# KEY TO PRONUNCIATION.

a as in fat, man, pang.  
 ā as in fate, mane, dale.  
 a as in far, father, guard.  
 ā as in fall, talk, naught.  
 ă as in ask, fast, ant.  
 a as in far, hair, bear.  
 e as in met, pen, bless.  
 ē as in mete, meet, meat.  
 é as in her, fern, heard.  
 i as in pin, it, biseuit.  
 î as in pine, light, file.  
 o as in not, on, frog.  
 ô as in note, poke, floor.  
 ò as in move, spoon, room.  
 ô as in nor, song, off.  
 u as in tub, son, blood.  
 û as in mute, acute, few (also new, tube, duty: see Preface, pp. ix, x).

û as in pull, book, could.  
 ü German ü, French u.  
 oi as in oil, joint, boy.  
 ou as in pound, proud, now.

A single dot under a vowel in an unaccented syllable indicates its abbreviation and lightening, without absolute loss of its distinctive quality. See Preface, p. xi. Thus:

ñ as in prelate, courage, captain.  
 ċ as in ablegate, episcopal.  
 ō as in abrogate, eulogy, democrat.  
 ū as in singular, education.

A double dot under a vowel in an unaccented syllable indicates that,

even in the mouths of the best speakers, its sound is variable to, and in ordinary utterance actually becomes, the short u-sound (of but, pun, etc.). See Preface, p. xl. Thus:

ę as in errant, republican.  
 ę as in prudent, difference.  
 ĵ as in charity, density.  
 ę as in valor, actor, idiot.  
 ę as in Persia, peninsula.  
 ċ as in the book.  
 ū as in nature, feature.

A mark (˘) under the consonants t, d, s, z indicates that they in like manner are variable to ch, j, sh, zh. Thus:

ț as in nature, adventure.  
 đ as in arduous, education.  
 ș as in pressure.  
 ș as in seizure.

th as in thin.  
 th as in then.  
 ch as in German ach, Scotch loch.  
 n French nasalizing n, as in ton, en.  
 ly (in French words) French liquid (mouillé) l.  
 ' denotes a primary, " a secondary accent. (A secondary accent is not marked if at its regular interval of two syllables from the primary, or from another secondary.)

## SIGNS.

< read *from*; i. e., derived from.  
 > read *whence*; i. e., from which is derived.  
 † read *and*; i. e., compounded with, or with suffix.  
 = read *cognate with*; i. e., etymologically parallel with.  
 ✓ read *root*.  
 \* read *theoretical or alleged*; i. e., theoretically assumed, or asserted but unverified, form.  
 † read *obsolete*.

## SPECIAL EXPLANATIONS.

A superior figure placed after a title-word indicates that the word so marked is distinct etymologically from other words, following or preceding it, spelled in the same manner and marked with different numbers. Thus:

back<sup>1</sup> (bak), n. The posterior part, etc.  
 back<sup>1</sup> (bak), a. Lying or being behind, etc.  
 back<sup>1</sup> (bak), v. To furnish with a back, etc.  
 back<sup>1</sup> (bak), adv. Behind, etc.  
 back<sup>2†</sup> (bak), n. The earlier form of bat<sup>2</sup>.  
 back<sup>3</sup> (bak), n. A large flat-bottomed boat, etc.

Various abbreviations have been used in the credits to the quotations, as "No." for *number*, "st." for *stanza*, "p." for *page*, "l." for *line*, ¶ for *paragraph*, "fol." for *folio*. The method used in indicating the subdivisions of books will be understood by reference to the following plan:

Section only..... § 5.  
 Chapter only..... xiv.

Canto only.....	xiv.
Book only.....	iii.
Book and chapter.....	} iii. 10.
Part and chapter.....	
Book and line.....	
Book and page.....	
Act and scene.....	} II. 34.
Chapter and verse.....	
No. and page.....	IV. iv.
Volume and page.....	II. iv. 12.
Volume and chapter.....	II. iv. 12.
Part, book, and chapter.....	vii. § or ¶ 3.
Part, canto, and stanza.....	I. i. § or ¶ 6.
Chapter and section or ¶.....	I. i. § or ¶ 6.
Volume, part, and section or ¶.....	
Book, chapter, and section or ¶.....	

Different grammatical phases of the same word are grouped under one head, and distinguished by the Roman numerals I, II, III, etc. This applies to transitive and intransitive uses of the same verb, to adjectives used also as nouns, to nouns used also as adjectives, to adverbs used also as prepositions or conjunctions, etc.

The capitalizing and italicizing of certain or all of the words in a synonym-list indicates that the words so distinguished are discriminated in the text immediately following, or under the title referred to.

The figures by which the synonym-lists are sometimes divided indicate the senses or definitions with which they are connected.

The title-words begin with a small (lower-case) letter, or with a capital, according to usage. When usage differs, in this matter, with the different senses of a word, the abbreviations [cap.] for "capital" and [l. c.] for "lower-case" are used to indicate this variation.

The difference observed in regard to the capitalizing of the second element in zoological and botanical terms is in accordance with the existing usage in the two sciences. Thus, in zoology, in a scientific name consisting of two words the second of which is derived from a proper name, only the first would be capitalized. But a name of similar derivation in botany would have the second element also capitalized.

The names of zoological and botanical classes, orders, families, genera, etc., have been uniformly italicized, in accordance with the present usage of scientific writers.

**technicality** (tek-ni-kal'i-ti), *n.*: pl. *technicalities* (-i-tiz). [*< technical + -ity.*] 1. Technicalness; technical character or quality.—2. That which is technical, or peculiar to any science, art, calling, sect, etc.; a technical expression or method: as, legal *technicalities*.

A School [of Art] as melodramatic as the French, without its perfection in *technicalities*.

Lowell, Fireside Travels, p. 53.

**technically** (tek-ni-kal-i), *adv.* In a technical manner; according to the signification of terms of art or the professions. *Warton*.

**technicalness** (tek-ni-kal-nes), *n.* The character or state of being technical; technicality. *Imp. Dict.*

**technician** (tek-nish'an), *n.* [*< technic + -ian.*] A technicist. *Imp. Dict.*

**technicist** (tek-ni-sist), *n.* [*< technic + -ist.*] One who is skilled in technics, or in the practical arts. *Imp. Dict.*

**technicon** (tek-ni-kon), *n.* [NL., *< Gr. τεχνικόν*, neut. of *τεχνικός*, pertaining to art: see *technic*.] An apparatus invented by J. Brotherhood for the gymnastic training of the hands for organists and pianists.

**technics** (tek-niks), *n.* [Pl. of *technic* (see -ics).] 1. [As a singular.] The doctrine of arts in general; such branches of learning, collectively, as relate to the arts.—2. [As a plural.] Technical terms, methods, or objects; things pertaining or relating to the practice of an art, science, or the like.

**techniphone** (tek-ni-fōn), *n.* [*< Gr. τέχνη*, art, skill, craft, + *φωνή*, a sound.] A soundless apparatus for the gymnastic training of the hands of organists and pianists, and for the acquirement of a strictly legato touch.

**technique** (tek-nék'), *n.* [*< F. technique*: see *technic*, *n.*] Same as *technic*: used especially in criticism of music and art.

**technism** (tek'nizm), *n.* [*< techn(ic) + -ism.*] Technicality.

**technologic** (tek-nō-loj'ik), *a.* [= *F. technologique*: as *technolog-y + -ic.*] Same as *technological*.

**technological** (tek-nō-loj'i-kal), *a.* [*< technologic + -al.*] Of or pertaining to technology; relating to the arts: as, *technological* institutes.

**technologist** (tek-nol'ō-jist), *n.* [*< technolog-y + -ist.*] One versed in technology; one who discourses or treats of arts or of the terms of arts.

**technology** (tek-nol'ō-ji), *n.* [= *F. technologie* = *Sp. tecnologia* = *It. tecnologia*, *< Gr. τεχνολογία*, systematic treatment (of grammar), *< τέχνη*, art (see *technic*), + *-λογία*, *< λέγειν*, speak: see *-ology*.] That branch of knowledge which deals with the various industrial arts; the science or systematic knowledge of the industrial arts, as spinning, metal-working, or brewing.

**technonomic** (tek-nō-nom'ik), *a.* [*< technonomy + -ic.*] Of or pertaining to technonomy. [Rare.]

**technonomy** (tek-non'ō-mi), *n.* [*< Gr. τέχνη*, art, + *νόμος*, a law.] The laws or principles of technology; the final stage of technology, when these laws and principles may be deduced, and applied to the future as well as to the present. *O. T. Mason*, Smithsonian Rep., 1881, p. 501. [Rare.]

**techy, tetchy** (tech'i), *a.* [Formerly also *techey*; a var. of *tachy*, *< tache*<sup>3</sup>, a blemish, fault, vice, bad habit, + *-y*: see *tachy* and *tache*<sup>3</sup>. The word has been confused with *touch*, for which *tech* is a common dial. variant, and in present use is now pronounced accordingly, spelled *touchy*, and understood as 'sensitive to the touch, easily irritated': see *touchy*. Some consider *techy* itself a corruption of *touchy*; but this view is quite untenable.] Peevish; fretful; irritable.

I cannot come to Cressid but by Paudar;  
And he's as *techy* [var. *tetchy*] to be woo'd to woo  
As she is stubborn-chaste against all suit.  
*Shak.*, T. and C., i. 1. 99.

Now, God is never angry without a cause; he is no froward God, of no *techy* and pettish nature; a cause there must be, or he would never be angry.

Rev. T. Adams, Works, III. 266.

**tecnology** (tek-nol'ō-ji), *n.* [*< Gr. τέκνον*, a child, + *-λογία*, *< λέγειν*, speak: see *-ology*.] A treatise on children.

**Tecoma** (te-kō'mā), *n.* [NL. (Jussieu, 1789), *< Aztec tecomarochitl*, name of *Solandra guttata*, but at first thought to refer to *Tecoma*, *< teco-*

*mall*, a vessel of peculiar shape, + *zochitl*, flower.] A genus of gamopetalous plants, of the order *Bignoniaceæ*, type of the tribe *Tecomeæ*. It is characterized by usually pinnate leaves; by racemose or panicle flowers with an equally five-toothed calyx and four perfect stamens; and by a narrow, often laterally compressed capsule with a flat partition, and numerous seeds each with an undivided hyaline wing. There are about 25 species, natives of warm regions, mostly either north or south of the tropics, widely distributed in both hemispheres. They are shrubby climbers or twiners, sometimes erect shrubs, or rarely arborescent. Their leaves are opposite or rarely scattered, with usually toothed leaflets which are often covered with stellate hairs, especially underneath. The flowers are commonly orange, red, or reddish-brown, and often very showy. They are known, from their shape, as *trumpet-flower* (which see). Two species occur within the United States, of which *T. radicans*, native from Pennsylvania to Illinois and southward, is commonly cultivated, often, like *T. grandiflora* of Japan and China, under the name *Bignonia*. (See cut under *Bignoniaceæ*.) The South African *T. Capensis*, somewhat naturalized in the West Indies, is known in cultivation by the name *West Indian honeysuckle*, and also, from its large orange-red flowers, as *fire-flower*. Several Australian evergreen climbers of the subgenus *Pandorea* are cultivated for their handsome white and violet or pink-spotted flowers, as *T. australis*, known as *wonga-wonga* vine and as *Churchill Island jasmine* or *creeper*, and *T. jasminoides*, the bower-plant or trumpet-jasmine. *T. stans*, of Texas, Arizona, and southward, with nine other erect shrubby species, is sometimes separated as a genus, *Tecomaria*. Many species with digitate leaves, formerly referred to *Tecoma*, are now included in *Tabebuia* (which see).

**Tecomeæ** (te-kō'mē-ē), *n. pl.* [NL. (Endlicher, 1836), *< Tecoma + -eæ*.] A tribe of plants, of the order *Bignoniaceæ*, characterized by usually shrubby or climbing or arborescent habit, absence of tendrils, commonly simple leaves, and a completely two-celled ovary, which becomes in fruit a loculicidal capsule with its two valves flattened contrary to the partition and usually deciduous. It includes about 22 genera, of which *Tecoma* is the type. They are chiefly tropical, and mostly natives of America or Africa. See *Tecoma*, *Catalpa*, and *Tabebuia*, for principal genera.

**tecpatl**, *n.* [Mex.] A sacrificial knife, a broad double-edged blade, usually of flint, sometimes of obsidian, used by the Aztecs of Mexico.

**tect** (tekt), *a.* [ME. *tecte*; *< L. tectus*, covered, hidden, pp. of *tegere* = *Gr. στέγειν*, cover, conceal. Cf. *tegmen*, *tegument*, *integument*, *tegula*, *tiled*, etc., and *protect*, *detect*, from the same ult. L. verb.] Covered; hidden.

With chaf or ferne this borders do be *tecte*.  
*Palladius*, *Husbonndie* (E. E. T. S.), p. 155.

**Tectaria** (tek-tā'ri-ā), *n.* [NL., *< L. tectum*, roof, house (*< tegere*, pp. *tectus*, cover: see *tect*), + *-aria*.] A genus of univalves, of the family *Littorinidæ*, with a turbinate or conic shell, more or less tuberculated or spinous, represented by various species in the tropical seas. A typical example is *T. pagoda*, of the Pacific.

*Tectaria pagoda*.

**tec-tec** (tek'tek), *n.* [African.] A kind of whinebat, *Pratincola sybilla*, of some of the islands off the eastern coast of Africa, as Réunion. *Encyc. Brit.*, XX. 492.

**tectibranch** (tek-ti-brangk), *a. and n.* [*< L. tectus*, covered (see *tect*), + *branchiæ*, gills.] Same as *tectibranchiate*.

**tectibranchian** (tek-ti-brangk'i-an), *a. and n.* [*< tectibranch + -ian.*] Same as *tectibranchiate*.

**Tectibranchiata** (tek-ti-brangk-i-ā'tā), *n. pl.* [NL.: see *tectibranchiate*.] A division of gastropods, usually held as an order or a suborder of *Gastropoda*, which have a single lateral gill,

*Tectibranchiata*.

covered by the mantle (whence the name), and whose shell, varying in size according to the genus, is very small and sometimes concealed. The group is marine, and includes such families as *Tornatellidæ*, *Bullitæ*, *Aplysidae*, *Pleurobranchidæ*, and *Phyllidiidæ*. Among them are the sea-hares and bubble-shells. Also called *Pleurobranchiata* and *Monopleurobranchiata*. See also cuts under *Aplysia*, *Bulla*, and *Scaphander*.

**tectibranchiate** (tek-ti-brangk'i-āt), *a. and n.* [*< NL. tectibranchiatus*, *< L. tectus*, covered, + *branchiæ*, gills. Cf. *tectibranch*.] 1. *a.* Having the gills covered; pertaining to the *Tectibranchiata*, or having their characters.

II. *n.* A gastropod belonging to the *Tectibranchiata*. They have been styled by Carpenter *crawlers with sheltered gills*.

**tectiform** (tek'ti-fōrm), *a.* [*< L. tectum*, a roof, + *forma*, form.] Like a roof in form or use; covering, or forming a cover; lid-like; specifically, in *entom.*, ridged in the middle and sloping down on each side: as, the *tectiform* elytra of some homopterous insects.

**tectily** (tekt'li), *adv.* [*< tect + -ly*<sup>2</sup>.] Secretly; covertly; privately.

He laid verie close & *tectlie* a company of his men in an old house fast by the castle.

*Stanhurst*, Ireland, an. 1581 (Hollinshed's Chron., I.).

**tectocephalic** (tek-tō-se-fal'ik or -sef'al-ik), *a.* Same as *scaphocephalic*. *Amer. Nat.*, XXII. 614.

**tectological** (tek-tō-loj'i-kal), *a.* [*< tectology + -ic-al.*] Of or pertaining to tectology.

**tectology** (tek-tol'ō-ji), *n.* [*< Gr. τέκτων*, a builder (see *tectonic*), + *-λογία*, *< λέγειν*, speak: see *-ology*.] Structural morphology which regards an organism as composed of organic individuals of different orders; ordinary morphology, as distinguished from stereomorphology, or promorphology. *Encyc. Brit.*, XVI. 842.

**Tectona** (tek-tō'nā), *n.* [NL. (Linnæus filius, 1781), alluding to the use of its wood; *< Gr. τεκτωνία*, *τεκτωνεία*, carpentry, *< τέκτων*, a carpenter: see *tectonic*.] A genus of gamopetalous trees, of the order *Verbenaceæ* and tribe *Viticeæ*. It is characterized by flowers in ample paniculate cymes, the calyx and the regular corolla each with five or six lobes, as many equal and projecting stamens, and a fleshy ovary, becoming in fruit a drupe included within the enlarged and closed calyx, and containing a single four-celled stone. Of the three species, known as *teak* or *Indian oak*, *T. grandis* is native of India and Malaysia, *T. Hamiltoniana* of Burma, and *T. Philippinensis* of the Philippine Islands. They are lofty trees, woolly, with both stellate and unbranched hairs, and bearing large entire leaves, which are opposite or whorled in threes. The small white or bluish flowers have each a bell-shaped calyx, small corolla-tube, and spreading lobes, and are sessile in the forks of copiously flowered cymes which form a large terminal panicle. See *teak*.

**Tectonarchinæ** (tek'tō-nār-kī'nē), *n. pl.* [NL., *< Gr. τεκτονάρχος*, same as *ἀρχιτέκτων*, an architect (*< τέκτων*, a builder, + *ἀρχή*, rule: cf. *architect*), + *-inæ*.] The bower-birds regarded as a subfamily of *Paradisidæ*. *D. G. Elliot*.

**tectonic** (tek-ton'ik), *a.* [= *Gr. τεκτονικ*, *< L. tectonicus*, *< Gr. τεκτονικός*, of or pertaining to building, *< τέκτων*, a worker in wood, a carpenter; akin to *τέχνη*, art, handicraft: see *technic*. Cf. *architect*, *architectonic*.] Of or pertaining to building or construction.—**Tectonic axes**, in *crystal.* See *axis*.

**Te Deum** (tē dē'um). [So called from the first words, "*Te Deum laudamus*," "Thee, God, we praise": *te* (= E. *thee*), acc. sing. of the pers. pron. *tu*, thou (= E. *thou*); *deum*, acc. sing. of *deus*, god: see *deity*.] 1. An ancient hymn, in the form of a psalm, sung at matins, or morning prayer, in the Roman Catholic and in the Anglican Church, and also separately as a service of thanksgiving on special occasions. The *Te Deum* is first mentioned early in the sixth century. Its authorship is popularly attributed to St. Ambrose and St. Augustine, but it probably assumed nearly its present form in the fourth century, during the Arian and Macedonian controversies, though in substance it seems to be still older. St. Cyprian in A. D. 252 using words closely similar to the seventh, eighth, and ninth verses, and several of the latter verses ("Day by day," etc.) agreeing with part of an ancient Greek hymn, preserved in the Alexandrian Codex, the beginning of which is a form of the *Gloria in Excelsis*. Originally it was obviously modeled on the preface and great intercession of a primitive liturgy, probably African, of the type of the liturgy of St. James (see *liturgy*). In the Roman Catholic hour-offices the *Te Deum* is sung at the close of matins on Sundays and feast-days, but not in Advent nor from Septuagesima to Easter, except on feasts, and also in the ferial office from Easter to Pentecost. In the Anglican morning prayer, condensed from the Sarum matins, lauds, and prime, the *Te Deum* marks the close of matins. The *Benedicite*, taken from lauds, is used as its alternate, and in many churches the *Te Deum* is not sung in Advent or Lent. Also, more fully, *Te Deum Laudamus*.

God fought for us. . . . Do we all holy rites;  
Let there be sung "Non nobis" and "Te Deum."

*Shak.*, *Hen. V.*, iv. 8. 128.

2. A musical setting of this hymn. Hence —  
3. A thanksgiving service in which this hymn forms a principal part.

**teeter** (tē'tēr), *v. i.* [A dial. var. of *titter²*.] To see-saw; move up and down in see-saw fashion. [U. S.]

**teeter** (tē'tēr), *n.* [*< teeter, v.*] A see-saw. [U. S.]

An 'I tell you you've gut to larn that War ain't one long teeter.  
Betwixt I wan' to an' 'T wun't du, debatin' like a skeeter  
Afore he lights—all is, to give the other side a millin'.  
*Lovell, Biglow Papers, 2d ser., iii.*

**teetertail** (tē'tēr-tāl), *n.* A sandpiper; a tilt-up or tip-up; the spotted sandpiper, *Tringoides macularius*; so called from the characteristic see-saw motion of the hind parts. See cut under *Tringoides*. [U. S.]

**teeth**, *n.* Plural of *tooth*.

**teethe** (tēth), *v. i.*; *pret.* and *pp.* *teethed*, *ppr.* *teething*. [*< teeth, pl. of tooth.*] To grow or cut the teeth: as, a *teething* child.

**teething** (tē'thing), *n.* [Verbal *n.* of *teethe, v.*] Dentition; the growth or formation of teeth; the act or process of acquiring teeth, as when they cut the gums.—*Climacteric teething*. See *climacteric*.

**teetotal** (tē'tō'tal), *a.* [An emphatic reduplication of *total*. There are two accounts of the origin of this word. (a) The Rev. Joel Jewell (according to various accounts, confirmed by a letter from him to the editor of this dictionary), secretary of a temperance society formed at Hector, New York, in 1818, on the basis of a pledge to abstain from distilled spirits but not from fermented liquors, introduced in January, 1827, a pledge binding the signers to abstinence from all intoxicants. The two classes of signers were distinguished as those who took the "old pledge," and had "O. P." placed before their names, and those who took the "new" or "total pledge" ("T."); the frequent explanation given of these letters made "T.—total" familiar. (b) Richard Turner, an artisan of Preston, in Lancashire, England, is said, in

advocating the principle of temperance, about 1833, to have maintained that "nothing but *te-te-total* will do"; while a variation of this account makes the artisan a stutterer. Both accounts appear to be correct, and the word may have originated independently in the two countries.] 1. Total; complete; entire; used emphatically.—2. Of, pertaining to, or for the promotion of total abstinence from intoxicating liquors: as, a *teetotal* society, meeting, or pledge; the *teetotal* cause.

The *teetotal* movement had been founded some years earlier by the Quakers of Cork, but it took no hold on the people till Theobald Mathew, a young Capuchin friar, joined it in 1838.

W. S. Gregg, Irish Hist. for Eng. Readers, p. 143.

3. Pledged to total abstinence from intoxicating liquors. [Colloq.]

I walk, I believe, 100 miles every week, and that I couldn't do, I know, if I wasn't *teetotal*.  
*Mayhew, London Labour and London Poor, I. 403.*

**teetotaler, teetotaler** (tē'tō'tal-ēr), *n.* [*< teetotal + -er¹.*] One who more or less formally pledges or binds himself to entire abstinence from intoxicating liquors, unless medically prescribed; a total abstainer.

But I am a *teetotaler*—said the divinity-student in a subdued tone.  
*O. W. Holmes, Professor, vi.*

**teetotalism** (tē'tō'tal-izm), *n.* [*< teetotal + -ism.*] The principles or practice of teetotalers; total abstinence from intoxicating drink, or the total-abstinence movement.

After a period distinguished by hard drinking and hard eating has come a period of comparative sobriety, which, in *teetotalism* and vegetarianism, exhibits extreme forms of its protest against the riotous living of the past.  
*H. Spencer, Education, p. 225.*

**teetotally** (tē'tō'tal-i), *adv.* Totally; entirely: used emphatically. [Colloq.]

Dinner was an ugly little parenthesis between two still uglier clauses of a *teetotally* ugly sentence.  
*De Quincey, Dinner, Real and Reputed.*

In Sir James Spence's "Tour of Ireland," published in 1829, he speaks of the word *teetotally* as an adverb in every-day use by the working classes.  
*Edwards, Words, Facts, and Phrases, p. 561.*

**tee-totum** (tē'tō'tum), *n.* [Also *te-totum*; i. e., *T-totum, totum* represented by *T*, from the *T* marked upon it.] 1. A small four-sided toy of the top kind, used by children in a very old game of chance. Formerly the four sides exhibited respectively the letters A, T, N, D. The toy is set spinning, and wins and losses are determined according to the letter that turns up when the tee-totum has ceased whirling: thus, A (*Latin aufer, take away*) indicates that the player who has last spun is entitled to take one from the stakes; D (*depono, put down*), a forfeiture or laying down of a stake; N (*nihil, nothing*), neither loss nor gain; T (*totum, the whole*) wins the whole of the stakes. In the modern tee-totum the D is commonly changed to P, and the reading also changed into English: thus, T (take up), P (put down), A (all), N (none).

The usage of the *te-totum* may be considered as a kind of petty gambling, it being marked with a certain number of letters; and part of the stake is taken up, or an additional part put down, according as those letters lie uppermost.  
*Strutt, Sports and Pastimes, p. 492.*

2. A similar toy used for spinning in the same manner, but circular or having an indefinite number of sides, and without the marks above described: used as a plaything or in different games by children.

**tee-whoop** (tē-hwēp'), *n.* [Imitative.] Same as *pewit* (b). See cut under *lapwing*. [Local, British.]

**te-fall** (tē'fāl), *n.* Same as *to-fall*. [Prov. Eng. or Scotch.]

**teff** (tef), *n.* [Native name; also written *taff, thaff, theff.*] An annual cereal grass, *Poa Abyssinica*, the most important food-plant of Abyssinia. Its grains, which are of the size of a pin-head, afford a very white flour which makes an excellent bread of an agreeable acidulous taste.

**teft** (teft), *a.* [A var. of *tight* (ME. *\*teght, tight*); cf. *draft*, var. of *draught, dafter*, a dial. var. of *daughter*, etc.: see *tight, taut*.] Tight; taut.

Away they fly, their tackling *teft* and tight,  
Top and top-gallant in the bravest sort.  
*Peele, Tale of Troy.*

**teg** (teg), *n.* [Also *tegg*; origin obscure. Possibly an arbitrary variation, with complementary sense, of *steg, stag*.] 1. A female fallow-deer; a doe in the second year.—2. Same as *tag*³.

**Tegenaria** (tej-e-nā'ri-ā), *n.* [NL. (Latreille, 1804).] A notable genus of spiders, of the family *Agalenidae*. They are medium-sized hairy spiders, having the superior spinnerets longest, with complementary sense, of *steg, stag*.] 1. A female fallow-deer; a doe in the second year.—2. Same as *tag*³.

**Tegenaria** (tej-e-nā'ri-ā), *n.* [NL. (Latreille, 1804).] A notable genus of spiders, of the family *Agalenidae*. They are medium-sized hairy spiders, having the superior spinnerets longest, with complementary sense, of *steg, stag*.] 1. A female fallow-deer; a doe in the second year.—2. Same as *tag*³.

**Tegenaria** (tej-e-nā'ri-ā), *n.* [NL. (Latreille, 1804).] A notable genus of spiders, of the family *Agalenidae*. **tegh**. A Middle English preterit of *tecl*, also of *tecl*.

**tegmen** (teg'men), *n.*: pl. *tegmina* (-mi-nā). [*Also tegumen*; NL., < L. *tegmen*, *tegumen*, a cover, < *tegere*, cover; see *tegument*.] 1. A covering; a covering or protecting part or organ; a tectum; an integument; a tegumentum.—2. In *bot.*, the endopleura, or inner coat, of the seed. It is soft and delicate, and conforms to the shape of the nucleus. See *seed*, 1.—3. *pl.* In *ornith.*, the tectrices or coverts of the wing or tail. See *teetrees*. [Rare.]—4. In *anat.*, the roof of the tympanic cavity of the ear, especially in early stages of its formation; also distinguished as *tegmen tympani*.—5. The covering of the posterior wing of some insects; especially, the fore wing of any orthopterous insect, corresponding to the elytrum of a beetle or the hemelytrum of a bug.

**tegmental** (teg'men-tal), *a.* [*< tegmentum* + *-al*.] Pertaining to the tegmentum.—**Tegmental nucleus**. Same as *red nucleus* (which see, under *nucleus*). **Tegmental region**, the tegmentum of the crus and the corresponding parts of the pons and oblongata down to the decussation of the pyramids. It contains the formatio reticularis, lemniscus, posterior longitudinal fasciculus, other fibers, and various collections of ganglion-cells.

**tegumentum** (teg'men'tum), *n.*: pl. *tegumenta* (-tā). [*Also tegumentum*; NL., < L. *tegumentum*, *tegumentum*, a cover, a covering; see *tegument*.] 1. In *bot.*, the scaly coat which covers the leaf-buds of deciduous trees; also, one of the scales of such covering.—2. In *anat.*, the larger and deeper or upper of two parts into which each crus cerebri is divisible, separated from the crura by the substantia nigra. **Nucleus of the tegmentum** (*nucleus tegmenti*). Same as *red nucleus* (which see, under *nucleus*).

**tegmina**, *n.* Plural of *tegmen*.

**tegmina** (teg'mi-nā), *a.* [*< NL. tegminalis*, < *tegmen* (teg'men), a covering; see *tegmen*.] Covering or protecting, as a tegmen; tectorial; tegumentary.

**tegminalia** (teg'mi-nā'li-ā), *n. pl.* [NL., neut. pl. of *tegminalis*; see *tegmina*.] The regularly arranged plates of the body or calyx of the tessellated crinoids.

**teguexin** (te-gek'sin), *n.* [Braz.] A large South American lizard of the genus *Teius*, *T. teguexin*. It attains a length of three or four feet, and is marked with yellow and black. *T. rufescens* is the red teguexin. See *Teiidae*.

**tegula** (teg'ū-lā), *n.*: pl. *tegulae* (-lā). [NL., < L. *tegula*, a tile, a roofing-tile, < *tegere*, cover, conceal; see *tecl*, *tell*.] In *entom.*: (a) A sclerite attached to the lateral border of the mesoscutum and covering the base of the fore wing, as in hymenopterous insects. (See *pterygota* and *operculum* (b) (8).) A similar formation of lepidopterous insects is known as the *patagium*, *scapula*, or *shoulder-tippet*. (b) A little membrane covering the metathoracic spiracle of dipterous insects; also called *squama*, *prehalter*, and *covering-scale*.

**tegular** (teg'ū-lār), *a.* [= F. *tégulaire*, < L. *tegula*, a tile; see *tegula*, *tile*.] 1. Of or pertaining to a tile; resembling a tile; consisting of tiles.—2. In *entom.*, covering, as a sclerite, the base of an insect's wing; of or pertaining to a tegula.

**regularly** (teg'ū-lār-lī), *adv.* In the manner of tiles on a roof.

**tegulated** (teg'ū-lā-ted), *a.* [*< L. tegula*, a tile, + *-ate* + *-ed*.] Composed of plates or scales overlapping like tiles; used specifically of a type of armor.—**Tegulated armor**, armor made of overlapping plates sewed to a foundation of textile fabric or leather. During the years immediately preceding the perfected armor of plate this was the armor adopted as the best by those who could afford the expense.

**tegumen** (teg'ū-men), *n.*: pl. *tegumina* (te-gū-mi-nā). [NL.; see *tegmen*.] Same as *tegmen*.

**tegument** (teg'ū-ment), *n.* [ME. *tegument*, < OF. *tegument*, F. *tegument* = Sp. Pg. *tegumento*, < L. *tegumentum*, *tegumentum*, *tegumentum*, < *tegere* = Gr. *τεγνν*, cover, conceal; see *tecl*. Cf. *integument*.] A cover; an envelop; a natural covering or protection of the body or a part of it; a tegmen or tegmentum.

Over ther that stonde  
A tegument of brom or such extende  
Hem fro tempest and coldes to defende.  
Palladius, Husbandrie (E. E. T. S.), p. 218.

Specifically—(a) In *zool.* and *anat.*, skin; the general covering of the body; the integument. (b) In *entom.*: (1) A tegmen; the wing-cover or elytrum of orthopterous insects; an erroneous use, apparently by confusion with *tegmen*, 5. (2) Properly, the crust, or chitinous integument, of the body, as distinguished from the hairs, scales, etc., which may grow upon it.

**tegumental** (teg'men-tal), *a.* [*< tegument* + *-al*.] Covering; investing or integumental; tectorial; tegumentary; tegmental.

Visual and tectonic sense organs borne by the tentacles. *Harvey and Martin, Elementary Biology*, p. 276.

**tegumentary** (teg'men-tār-i), *a.* [= F. *tegumentaire*; as *tegument* + *-ary*.] Of or pertaining to integument; composing or consisting of skin or other covering or investing part or structure; tegmental; tectorial. **Tegumentary amputation**, amputation in which the flaps are made of tegumentary tissue only. Also called *skin-flap amputation*. **Tegumentary epithelium**. Same as *epidermis*.

**tegumentum** (teg'men'tum), *n.*: pl. *tegumenta* (-tā). Same as *tegumentum*.

**tehee** (tē'hē'), *interj.* [*< ME. te hee*; imitative.] A word expressing a laugh.

"Te hee," quod she, and clapte the wyndow to.  
Chaucer, Miller's Tale, l. 554.

**tehee** (tē'hē'), *n.* [*< tehee*, *interj.*] A laugh; from the sound.

Did you chide me for not putting a stronger lace in your stays, when you had broke one as strong as a hempen cord with containing a violent *tehee* at a smutty jest in the last play?  
Farquhar, Love and a Bottle, l. 1.

**tehee** (tē'hē'), *r. i.* [*< tehee*, *interj.*] To laugh contemptuously or insolently; titter.

That laughed and *te-he'd* with derision  
To see them take your deposition.  
S. Butler, Hudibras, III. iii. 133.

**Teian, Tean** (tē'an), *a.* [*< L. Teius*, < *Teos*, < Gr. *Teos*, *Teos* (see *def.*), + *-an*.] Of or pertaining to Teos, an ancient Greek city of Ionia, Asia Minor; especially referring to the poet Anacreon, who was born there.

The Scian and the Teian muse,  
The hero's harp, the lover's lute,  
Have found the fame your shores refuse.  
Byron, Don Juan, iii. 86 (song).

**Te Igitur** (tē i'j-i-tēr). [So called from the first words of the canon: L. *te* (= E. *thee*), acc. sing. of pers. pron. *tu*, thou (= E. *thou*); *igitur*, therefore.] The first paragraph of the eucharistic canon in the Roman and some other Latin liturgies. It immediately succeeds the preface, and contains a prayer for the church.

**Teiidae** (tē'i-dē), *n. pl.* [NL., < *Teius* + *-idae*.] A family of eriglossate lacertilians, typified by the genus *Teius*, having confluent parietal bones, supratemporal fossæ not segmented or roofed over, and no osteodermal plates. These lizards are confined to America, and some of them are called *teguexins*. The family is also named *Ameividae*. Also *Teiide*, *Teiidae*.

**teii** (tēi), *n.* [Formerly also *teile*; < OF. *teii*, *teill*, *til*, F. *telle*, < L. *tilia*, a linden. Cf. dim. *teylet*, *tillet*.] 1. The linden or lime-tree.

From purple violets and the *teile* they bring  
Their gather'd sweets, and rife all the spring.  
Addison, tr. of Virgil's Georgics, iv. 233.

2. The terebinth.

As a *teii* tree (terebinth, R. V.), and as an oak. Isa. vi. 13.

**teind** (tēnd), *n.* [*< Icel. tinn*, a tenth, a tithe; see *tenth*, *tithe*.] In Scotland, a tithe. It is paid from the produce of land or cattle only. After the Reformation the whole teinds of Scotland were transferred to the crown, or to private individuals called *titulars*, to whom they had been granted by the crown, or to feuars or renters from the church, or to the original founding patrons, or to colleges or pious institutions. By a succession of decrees and enactments these teinds were generally rendered redeemable at a fixed valuation, but the clergy have now no right to the teinds beyond a suitable provision, called a *stipend*; so that teinds may now be described as that part of the estates of the laity which is liable to be assessed for the stipend of the clergy of the established church.

At every seven years  
They pay the *teind* to hell;  
And I am sœ fat and fair of flesh,  
I fear 'twill be mysell.  
The Young Tamlane (Child's Ballads, I. 120).

**Court of Teinds** (in full, *Court of Lords Commissioners for Teinds*), a court in Scotland consisting of five judges of the Court of Session (four lords of the inner house and the lord ordinary on teinds), who sit as a parliamentary commission, with jurisdiction extending to all matters respecting valuations and sales of teinds, augmentations of stipends, the disjunction or annexation of parishes, etc.—**Decree of valuation of teinds**. See *decree*.

**teind-master** (tēnd'mās-tēr), *n.* In Scotland, one who is entitled to teinds.

**teinet**, *n.* See *tain*.

**teinoscope** (tēnō-skōp), *n.* [*< Gr. teinein* (see *tend*), stretch, extend, + *σκοπεῖν*, view.] An optical instrument invented by Sir David Brewster, consisting of two prisms so combined as to correct the chromatic aberration, while the dimensions of objects seen through them are increased or decreased in the plane of refraction. Amici's prism-telescope consists of two such teinoscopes arranged consecutively, with their planes of refraction perpendicular to each other.

**teint**, *teinture*. Old spellings of *taint*, *tainture*.

**teiset**, *n.* [ME., < OF. *teise*, later *toise*, a fathom; see *toise*. Cf. *poise*, *poise*.] A fathom.

In me prison thou schelt abide,  
Under the twenty *teise*.  
Berce of Hamtoun, l. 1417.

**teiset**, *r. i.* [ME., < *teise*, *n.*] To weigh anchor; set sail.

Into see they went, the sayl vp gan reise,  
To expresse contrarie shippes gan *teise*.  
Rime of Parleyng (L. E. T. S.), l. 1295.

**Teius** (tē'us), *n.* [NL.] The typical genus of *Tendae*. See *teguexin*. Also *Tepus*.

**teknonymous** (tek-non'i-mus), *a.* [*< Gr. τέκνον*, child, + *ὄνομα*, *ὄνομα*, name.] Pertaining to or characterized by teknonymy.

Let us now turn to another custom, not less quaint-seeming than the last to the European mind. This is the practice of naming the parent from the child. . . . There are above thirty peoples spread over the earth who thus name the father, and, though less often, the mother. They may be called, coming a name for them, *teknonymous* peoples.  
Jour. Anthropol. Inst., XVIII. 248.

**teknonymy** (tek-non'i-mi), *n.* [*< teknonymous* + *-y*.] The naming of a parent from his or her child.

Another custom, here called *teknonymy*, or naming the parent from the child, prevails among more than thirty peoples.  
Athenæum, No. 3188, p. 740.

**tel** (tel), *n.* Sesame. See *til*.

**tela** (tē'lā), *n.*: pl. *telæ* (-lē). [NL., < L. *tela*, web, warp; see *toil*.] 1. A web; a rete.—2. In *anat.*: (a) A tissue, in general; any tissue of the body, or histological structure, as distinguished from the structures or organs of gross anatomy; extended to include liquids containing corpuscles: as, *tela adiposa*, fatty tissue; *tela connectiva*, connective tissue; *tela lymphatica*, liquid contents of the body-cavity and lymphatic vessels. *Haeckel*. (b) A delicate membranous web or thin sheet of scarcely nervous tissue found in the brain in connection with its cavities, consisting both of pia mater and of endyma, with little or no nerve-tissue intervening.—**Tela aranea**. Same as *spider-web*.—**Tela cellulosa**, areolar tissue.—**Tela choroidea cerebelli**, the membranous roof of the lower section of the fourth ventricle, continuous above with the velum medullare posterius. Also called *tela choroidea inferior ventriculi quarti*.—**Tela choroidea superior**, the velum interpositum, or membranous roof of the third ventricle. Also called *velum triangulare*.

**telæsthesia** (tel-es-thē'si-ā), *n.* [NL., < Gr. *τῆλε*, afar, + *αἰσθησις*, perception.] Perception at a distance. See the quotation under *telepathy*.

**telamon** (tel'a-mon), *n.*: pl. *telamones* (tel-a-mō'nēz). [*< L. telamon*, *telamo*, < Gr. *τελαμων*, bearer, < *τελέω*, bear.] In arch., the figure of a man performing the function of a column or pilaster to support an entablature, in the same manner as a caryatid. They were called *atlantes* by the Greeks. See *atlantes*.

**telangiectasia** (te-lan'ji-ek-tā'si-ā), *n.* [NL., also *telangiectasis*, < Gr. *τέλος*, the end, + *αγγεῖον*, vessel, + *εκτασις*, extension.] In med., a dilatation of the small vessels.

**telangiectasis** (te-lan'ji-ek-tā'sis), *n.* [NL.; see *telangiectasia*.] Same as *telangiectasia*.

**telangiectasy** (te-lan'ji-ek-tā'si), *n.* [NL.; see *telangiectasia*.] Same as *telangiectasia*.

**telangiectatic** (te-lan'ji-ek-tat'ik), *a.* Pertaining to or exhibiting telangiectasia.

**telapoint**, *n.* An obsolete form of *talapoin*. *Imp. Dict.*

**telar** (tē'lār), *a.* [*< tela* + *-ar*.] Having the character of a tela, web, or tissue; telary: as, the *telar* membranes of the brain. See *tela*.

**telar**<sup>2</sup>, *n.* An obsolete form of *tiller*<sup>2</sup>. *Arch. Jour.*, XIX. 71.

**telarian** (tē-lā'ri-an), *a.* and *n.* [*< telary* + *-an*.] I. A spinning web, as a spider. See *reticularian*, *tubularian*, *orbicularian*.

II. A spinning spider.

**telary** (tē'lār-lī), *adv.* [*< telar* (cf. *telary*) + *-ly*.] In the manner of or so as to make a web or tela: as, "telary interwoven," Sir T. Browne.

**telary** (tē'lār-lī), *a.* [*< ML. \*telarius*, < L. *tela*, a web; see *tela*.] 1. Of or pertaining to a web, tissue, or tela; woven; spun.—2. Spinning a web, as a spider; telarian.

The picture of *telary* spiders, and their position in the web, is commonly made lateral, and regarding the horizon.  
Sir T. Browne, Vulg. Err., v. 19. (Richardson.)

**telautograph** (te-lā'tō-grāf), *n.* [*< Gr. τῆλε*, afar, + *αὐτός*, self, + *γραφειν*, write.] The name given by Elisha Gray to his form of writing- or copying-telegraph. This telegraph can be used to reproduce in facsimile either the handwriting of the person sending the message, or any picture or drawing which can be made with a pen. The transmitting-pen is

connected by cords to mechanism by means of which the motions of the pen cause a pulsatory current to pass into two telegraph-line wires. These pulsatory currents produce rapid pulsatory motion of the armatures of a system of electromagnets, by means of which the receiving-pen is caused to follow the motions of the transmitter. Another electromagnetic arrangement lifts the receiving-pen off the paper at the end of each word or line, and still another serves to move the paper forward for the next line.

**teld**<sup>1</sup> (teld), *n.* [*ME. teld, < AS. teld, < G. teld = MD. teld = G. zelt = Ice. fjeld = Sw. tält = Dan. telt, a tent. Hence telt<sup>2</sup>.*] A tent.

**teld**<sup>2</sup> (teld), *v. t.* [*< ME. telden: < teld<sup>1</sup>, n.*] 1. To set up (a tent); pitch; in general, to set up.

Thence they tellet tablez [on] trestles alofte.

*Sir Gawayne and the Green Knight* (E. E. T. S.), l. 1648.

2. To lodge in a tent.

Vn-to me tolde god on a tyde,  
Wher I was teld vnder a tree,  
He saide my seede shulde multiplye.

*York Plays*, p. 56.

**teld**<sup>3</sup>. An obsolete preterit and past participle of *teld*<sup>1</sup>.

**Telea** (tē-lē-ā), *n.* [NL. (Hübner, 1816).] A genus of bombycid moths, erected for the polyphemus silkworm-moth, *T. polyphemus*, a large and handsome American species, which produces a coarse and durable silk. See *polyphemus*, 5.

**teleanemograph** (tel'-ē-a-nem'-ō-grāf), *n.* [*< Gr. τῆλε, afar, far off, far away, + E. anemograph.*] An anemograph that records at a distance by means of electricity.

**telebarograph** (tel'-ē-bar'-ō-grāf), *n.* [*< Gr. τῆλε, afar, + E. barograph.*] A barograph that records at a distance by means of electricity.

**telebarometer** (tel'-ē-ba-rom'-e-tēr), *n.* [*< Gr. τῆλε, afar, + E. barometer.*] A barometer that registers its indications at a distance by means of electric registering apparatus.

**teledu** (tel'-ē-dō), *n.* The stinking badger of Java and Sumatra, *Mydaus meliceps*.

Teledu (*Mydaus meliceps*).

**telega** (tē-lā'-gā), *n.* [Russ. *teliega*, a cart or wagon.] A cart or sort of box, about six feet

East Siberian Telega.

long, unprovided with springs, and set upon the wheels: a Russian vehicle.

Small unpainted one-horse *telegas*, which look like longitudinal halves of barrels mounted on four wheels.

*The Century*, XXXVI. 11.

**telegram** (tel'-ē-gram), *n.* [= F. *télégramme* = Sp. *telegrama* = Pg. It. *telegramma* = D. *telegram* = G. *telegramm* = Sw. Dan. *telegram* = Russ. *telegramma* = NGr. *τηλέγραμμα* (all after E.); < Gr. *τῆλε, afar, + γράμμα, a writing*. The correct form would be *\*telepheme*, from a Gr. type reflected in the NGr. *τηλεγραφήμα*, a telegram, < *τηλεγραφειν, telegraph, < Gr. τῆλε, afar, + γράφειν, write*.] A communication sent by telegraph; a telegraphic message or despatch.

A New Word.—A friend desires us to give notice that he will ask leave, at some convenient time, to introduce a new word into the vocabulary. The object of this proposed innovation is to avoid the necessity, now existing, of using two words for which there is very frequent occasion, where one will answer. It is *Telegram*, instead of *Telegraphic Despatch*, or *Telegraphic Communication*. . . . *Telegram* means to write from a distance.—*Telegram*, the writing itself, executed from a distance. *Monogram*, *Logogram*, etc., are words formed upon the same analogy and in good acceptance. *Albany Evening Journal*, April 6, 1852.

I sent a telegram (oh that I should live to see such a word introduced into the English language!).

*Bulwer*, What will he do with it? (1858), xii. 11.

To milk a telegram, to make use surreptitiously of a telegram designed for another. See *milk*, v. t., 5. [Slang.]

**telegraphic** (tel'-ē-gram'-ik), *a.* [*< telegram + -ic.*] Of or pertaining to a telegram; having

the characteristics of a telegram; hence, brief; concise; succinct. [Recent.] *Imp. Dict.*

**telegraph** (tel'-ē-grāf), *n.* [= F. *télégraphe* = Sp. *telegrafo* = Pg. *telegrafo* = It. *telegrafo* = J. *telegrafo* = G. *telegraph* = Sw. Dan. *telegraf* = Russ. *telegraf* = NGr. *τηλέγραφος* (all after E.); < Gr. *τῆλε, afar, + γράφειν, write*.] 1. An apparatus for transmitting intelligible messages to a distance. In this general sense it includes the original *semaphore-telegraphs*; *mechanical telegraphs* for sending messages short distances, as from the pilot-house to the engine-room of a steamer; *pneumatic telegraphs*, in which compressed air in a tube serves to transmit a message; *hydraulic telegraphs*, in which a column of water takes the place of the air in the tube; flashing lights, as from a *heliotrope*, and any appliance for signaling, as flags or lanterns. Nearly all of these appliances are recognized as *signaling apparatus*, and are now so called. (See *signal* and *annunciator*.) In its later and more restricted sense, the name is applied to some form of apparatus employing electricity and transmitting more than mere calls or signals. Telegraphs may be divided into two classes: the *electromechanical telegraphs*, or those in which the messages are received by means of some mechanical device operated by electricity; and the *electrochemical telegraphs*, in which the message is received and recorded by means of some chemical effect produced by electricity, the messages in both systems being sent or transmitted by some mechanical means. The *electromechanical telegraphs* may be again divided into two classes: those in which the message is received or read by sight (including those in which it is printed or recorded), and those in which it is read by sound. The *electromechanical telegraphs* are in some instances actuated by means of an electromagnet, and for this reason they are called *electromagnetic telegraphs*. This name has sometimes been given to all electrodynamic telegraphs, but it appears properly to belong to the *electromechanical telegraphs* which employ electromagnetism, and particularly to the Morse system. There is also an *electromechanical telegraph* actuated by magneto-electricity, and called the *magneto-electric telegraph*. The telegraph consists essentially of (1) a *line-wire*, or main conductor; (2) a *battery*, or other source of electricity; (3) a *transmitting instrument*, or device for connecting or disconnecting the line-wire with the battery, or for changing the polarity of the current sent over the line-wire; and (4) a *receiver*, or indicating or recording apparatus. The *line-wire* is, for land lines, most commonly of iron, but sometimes of steel covered with a copper tube, and frequently also (especially on the rapid circuits in England) of hard drawn copper and, for the local connections with the battery or instruments, of copper. The source of electricity may be a battery or a dynamo. The transmitter or receiver may vary greatly according to the system in which it is used. In the *electromechanical systems* in which the message is read by sight, two different receivers are employed. The first of these, the *needle-telegraph* of Cooke and Wheatstone of England, has a line-wire, a battery, and a simple device for reversing the current by the movement of a handle. The receiver is a needle supported on a horizontal bar, free to turn to the right or left, and provided with an index needle, placed in front of a dial, to show the deflections. The needle is within a coil of wire through which the current from the line passes, the whole forming an electric multiplier or galvanoscope. The message is indicated by an alphabet of motions, deflections to one side being read as the dots and to the other as the dashes of the Morse alphabet. This system is still used on some unimportant circuits and on some of the railway lines in England. It is largely in use for long submarine cables. Thomson's *mirror-galvanoscope* being used. This receiver consists essentially of a galvanometer, the needle of which carries a small mirror that reflects a beam of light from a lamp upon a screen. The minute movements of the needle are thus rendered visible on a large scale, and the vibrations of the spot of light serve to spell the message. The second sight-reading system is the *dial-telegraph*; it employs a dial and index or pointer for a receiver. The letters are placed round the edge of the dial, and the index travels round the dial from letter to letter till the right one is reached, when a slight pause indicates that the letter was signaled from the transmitting end of the line. This system is used for private lines and for local circuits where speed of transmission is not important. The *Morse system* employs a line-wire, battery, and circuit-breaker or Morse key as a transmitter, and now very commonly uses a *sounder* as a receiving instrument, the slight clicking sound of the instrument clearly indicating the letters of the alphabet. This system has developed from the recording telegraph which was invented by Morse of New York, and was first tried on a commercial scale between Baltimore and Washington in 1844. (See *Morse telegraph*, below.) The *electromechanical systems* in which the message is automatically recorded as it is received include the Morse system using the Morse receiver, the chemical telegraphs, the printing telegraphic systems, the stock-reporting telegraphs, the syphon recorder, and the writing-telegraphs. A number of *telegraphic-printing systems* have been invented, the object being to print the message directly on paper as fast as received. Of these, the systems of *House* and *Hughes* were successfully worked in the United States, and a modification of *Hughes's* apparatus, the *electromotor printing-telegraph* of Phelps, is still used by the Western Union Company. *Hughes's* apparatus is still used in Europe, especially in France. Several simpler forms of type printing-telegraphs are used as stock-printers and private-line telegraphs. The telegraph of Cowper, and the *telautograph* (which see) of Elisha Gray are examples of facsimile- or writing-telegraphs. In the former system two wires are used, and the message is transmitted by varying the intensity of the currents in the double line. The transmitter consists of a pencil connected by means of light rods with metal plates joined together through resistance-coils. The message is written on a band of paper passing under the pencil, and every movement of the pencil causes one or both of the rods to move over the plates, and change the resistance in the circuits. The receiver consists of a pen held upright, and joined by means of threads to the armatures of two magnets placed so that variations of the

currents through the two circuits give motions in two rectangular directions to the pen. The pen thus gives a trace in one direction or the other, or in a curve that is the resultant of both movements, and this trace is a literal copy of the message written by the transmitting pencil. The electrochemical systems of telegraphy all give a record of the message, and the transmitting device, whether a Morse key or some automatic mechanism, breaks or closes the circuit and thus either spells the message in the Morse alphabet, or copies it from writing or a drawing properly arranged at the transmitting end. The receiving apparatus in all these systems depends on the fact that if a current of electricity is made to pass through a piece of paper moistened in certain chemicals, a discoloration of the paper appears wherever the current passes. The first practical system is that of Bain of Edinburgh, which was used for some time both in England and in America. Several forms of copying telegraphs exist, but are little used. It was early recognized in the history of telegraphy that the cost of sending messages could be reduced if more than one message could be sent over a line-wire at one time, or if the speed of transmission could be made very great. Of the many systems designed to accomplish this, five are in actual use, and two have been adopted throughout the United States and more or less in other countries. These systems are the *duplex* of Stearns, 1872; the *quadruplex* of Edison, 1874 (see *duplex telegraph*, below); the *harmonic* of Gray, 1874; the *rapid system*, 1880; and the *synchronous system*, 1884. The *harmonic system* depends on the property possessed by sonorous bodies of responding to vibrations corresponding to their own pitch or rate of vibrations. A vibrating reed is used to transmit over the line a series of electrical impulses exactly corresponding to its rate of vibrations. At the receiving end of the line is another reed that vibrates at the same rate as long as connected with the line, giving to the ear of the operator an apparently continuous note. By means of a Morse key this continuous tone in both reeds may be broken up into the letters of a message. Besides this, if two or more reeds are placed at the sending end of the line, and an equal number having the same pitches at the receiving end of the line, all may transmit their rate of vibration to the current, and each receiving reed will select its own note and no other. By the use of a Morse key to each pair, it thus becomes possible to transmit as many messages as there are pairs of reeds over the same wire at the same time. The so-called *rapid system* of telegraphy is an electrochemical system, with automatic transmitting and receiving instruments. The message is first prepared by punching a series of holes in a strip of paper, each perforation or group of perforations representing a letter. This strip of paper is then made to pass rapidly under metal points connected with the line. At each perforation, one of the points passes through the paper and closes the circuit through the line-wire. At the receiving end, each closing of the circuit makes a stain on a band of prepared paper drawn rapidly under a stylus in connection with the line. Both the transmission and the recording of the message are automatic, and a large number of messages can be sent over one wire in a short time. The *synchronous system* is wholly electromechanical, and is based on the phonic wheel of La Cour. This invention employs a wheel divided radially into a number of sections, every alternate section being connected with the battery, and the alternating sections being connected by wire to the earth. A trailing needle connected with the line-wire rests on the upper side of the wheel, and as the wheel revolves it touches every section in turn, connecting the line with the battery at one section and being cut out at the next. Two wheels are used, one at each end of the line, and as each needle on the two wheels touches the same section the circuit is closed through the line, and then broken as the needles touch the next sections. In the synchronous system branch wires extend from each wheel, every branch being connected with a number of sections, and as the wheels turn, these branches are connected with the line a number of times in a second, or often enough to be practically always joined to the line, and thus messages may be sent by the Morse or other system. Upward of seventy branch wires may be connected with each end of a line-wire, every pair having the line to itself in succession, and yet with sufficient rapidity to be, as far as sight or sound is concerned, wholly independent of all others. The phonic wheel is in this system made useful on a commercial scale in telegraphy.

2. A telegraphic message or despatch; a telegram. *Trollope*. [Rare.]—Acoustic telegraph. See *acoustic*.—Autographic telegraph. See *autographic*.—Automatic signal telegraph, a system used for transmitting fire-alarms, in which the number of the box from which the alarm is sent is automatically struck or registered.—Automatic telegraph, a system in which the signals are transmitted automatically, generally by the use of bands of paper perforated with holes which in form and arrangement represent the message to be sent. The paper moves rapidly between two parts or poles of the circuit, which is complete during the passage of a perforation, but broken at other times. The perforated slips may be quickly prepared and by persons not skilled in telegraphy, so that economy as well as great rapidity is secured by their use.—Automatic type-writer telegraph, a telegraphic system in which the transmitter consists of a keyboard similar to that of a type-writer, and which prints the message at the receiving end.—Chemical telegraph. See def. 1.—Copying telegraph. Same as *autographic telegraph*.—Dial-telegraph. See def. 1.—Duplex telegraph, a telegraphic system arranged for double transmission, or the sending of two messages at the same time over one line, in opposite directions. Several methods for accomplishing this have been devised, one of the most successful being the differential system, in which the electromagnet at each end is so wound that if the key at the distant station is not closed, the current divides equally, one half going to earth and the other half to the distant point, while the instrument at hand is not affected. In this way each receiving instrument is active only when the distant operator closes his key. Each operator has thus control of the receiving instrument of the other, and double transmission without interference becomes possible. In the *quadruplex telegraph* four messages are transmitted on one line at the same time. Various systems of *multiplex telegraphy* have

been devised, by means of which many messages may be transmitted over one line at the same time. Among these is the *harmonic telegraph*. See def. 1. Other systems of multiplex telegraph depend on the synchronous movement of parts, such as revolving disks, by means of which local circuits at the extremities of the main line are regularly and rapidly placed in connection with each other through the main conducting wire. — **Electric telegraph**, the instrument or apparatus, device, or process by means of which electricity is utilized for the rapid transmission of intelligence between distant points. All varieties of electric telegraph have in common one or more conducting wires joining the points between which transmission takes place. At one end is a sending instrument, or transmitter, and at the other a receiving instrument. By the sending instrument electric impulses are transmitted through the line to the receiver, where they produce visible or audible signals capable of translation into words and sentences. Batteries, dynamo, or any other convenient source may supply the electricity. The conducting wire may be supported in the air upon insulators attached to poles, or it may be buried underground or sunk under water (being first covered with some good insulating material). Many different systems of telegraph have been devised, depending on different methods of transmitting and receiving the electric impulses. The latter may be of the simplest kind, and so related to each other in time and character as to produce signals which conform to the requirements of a conventional alphabet, as in the Morse system of telegraphy; or they may be made to operate a mechanism at the receiving end so as to write or print the message. See def. 1. — **Facsimile telegraph**. Same as *autographic telegraph*. — **Fire-alarm telegraph**. See *fire alarm*. — **Harmonic telegraph**. See def. 1. — **Magnetic telegraph**, the electric telegraph. — **Mechanical telegraph**. See *mechanical*, and def. 1. — **Morse telegraph**, a telegraphic system consisting essentially of a transmitting key operated by the hand, together with an electromagnetic receiver or register which records the signals in the form of dots and dashes. The registering apparatus is usually dispensed with and the signals read "by sound," the receiving magnet with its armature being known as a *sounder*. The currents from the line are passed through the magnet *a* (see cut) and cause it to attract its armature *b*, which

brings the stop *c* against the anvil *d*, giving out a clear click for each current sent. The audible signals consist of short and long intervals of contact, corresponding to dots and dashes, and are interpreted by means of the Morse alphabet (which see, under *alphabet*). When the line is more than a mile or two in length, the signals are usually received first on a relay, which is similar in form to a sounder, but so constructed that its armature acts as a key in a local circuit which operates the sounder or register. — **Needle telegraph**. See def. 1. — **Octoplex telegraph**, a telegraph by which eight messages can be sent at the same time over a single wire. — **Optical telegraph**. (a) A semaphore. (b) An electric telegraph of the needle or pointer class. — **Phonoplex telegraph**, a telegraph in which multiplex telegraphy is secured by combining telephonic communication with an ordinary telegraph system. — **Pneumatic telegraph**. (a) A form of telegraph, formerly in use, in which messages were transmitted by the agency of a column of water under pneumatic pressure. (b) A system of transmission for signals in which a bell is sounded and a pointer caused to indicate a message by the compression of air in a reservoir at one end of a long tube, the compression being transmitted to the opposite end of the tube. This system is used in hotels, manufacturing, etc., and to transmit steering and steaming directions on shipboard. — **Polygrammatic telegraph**. See *polygrammatic*. — **Printing telegraph**, a telegraph in which the message is printed

Phelps's Electromotor Printing telegraph.

The transmitting apparatus is shown on the left-hand side and the receiving apparatus on the right—the two being separated by a glass partition *tu*. In the apparatus here shown the receiving and transmitting parts are separate and are driven by independent motors. A combined apparatus is also made, in which both sets of mechanism are driven by one motor; in other respects the mechanism is practically the same. The message is transmitted by manipulating a set of keys shown at *k*. These keys move a set of vertical rods arranged in a circle within the cylinder *a*. The tops of these rods carry a set of sectors arranged to form a clock face, the revolving shaft of the sending mechanism. The part of any revolution at which a current is sent to line, depending on the key pressed, is, in the receiving mechanism, kept moving in synchronism, the type clock making the same number of revolutions as the revolving shaft here referred to, the current sent by any particular key can be made to print the corresponding letter on the paper ribbon. The circuit-closing arrangement, which is worked by a vertical rod passing through the top of the cylinder *e*,

The duration of the rays makes the alphabet, after the manner of the dot and dash telegraphic alphabet. — **Submarine telegraph**. See *submarine cable*, under *cable*. — **Submarine Telegraph Act**, a British statute of 1880 (43 and 44 Vict. c. 59) confirming the Convention of the Powers for the protection of telegraph-cables. — **Telegraph Act**, a British statute of 1868 (31 and 32 Vict. c. 110) which authorized the purchase and operation of telegraph lines by the Post-office. Other British statutes regulating the construction and maintenance of telegraphs are also known by this title.

**telegraph** (tel'ē-gráf), *v*. [= F. *télégraphier* = Sp. *telegrafar* = Pg. *telegrafiar* = It. *telegrafare* (NLgr. *τῆλεγραφῶ* or *τῆλεγραφῶν*), telegraph: see the noun.] **I. trans.** To transmit or convey, as a communication, speech, intelligence, or order, by a semaphore or telegraph, especially by the electric telegraph.

A little before sunset, however, Blackwood, in the Euryalus, telegraphed that they appeared determined to go to the westward. Southey, Nelson, II. 240.

"Make Buell, Grant, and Pope Major-generals of volunteers" he [Halleck] telegraphed the day after the surrender. Newday and Hay, Lincoln, V. 199.

**II. intrans.** 1. To send a message by telegraph. — 2. To signal; communicate by signs.

I now observed that Bellal was standing very near me. . . . The fellow had his gun in his hand, and he was telegraphing by looks with those who were standing near him. Sir S. W. Baker, Heart of Africa, xvi.

I didn't see—I didn't understand. Besides, I hate smirking and telegraphing. Also I'm very shy—you won't have forgotten that. Now we can communicate comfortably. The Century, XXXVI. 128.

**telegraph-board** (tel'ē-gráf-bórd), *n*. A board on which are hoisted or otherwise marked the numbers of horses about to run in a race, together with the names of their jockeys.

When the race is all over we may look at the telegraph-board in vain to find her officially-printed number. Daily Chronicle, Sept. 14, 1885. (Encyc. Dict.)

**telegraph-cable** (tel'ē-gráf-ká'bl), *n*. A cable containing wires used for transmitting telegraphic messages. In the accompanying cuts *a* represents a single-conductor cable, sheathed with iron or

steel wires, such as is used for submarine work (the conductor is shown at *d*, and is usually surrounded by a gutta-percha or india-rubber tube for insulation); *b* shows the end of a multiple-wire cable suitable for aerial suspension; while *c* is a similar multiple cable inclosed in a metal tube, usually of lead, suitable for underground work.

**telegraph-carriage** (tel'ē-gráf-kar'āj), *n*. A vehicle carrying the apparatus necessary for establishing temporary communication with a permanent telegraph-line. E. H. Knight.

**telegraph-clock** (tel'ē-gráf-klok), *n*. A clock whose rate controls that of others, or is itself controlled, by electric impulses transmitted through telegraph-wires.

**telegraph-dial** (tel'ē-gráf-dī'al), *n*. A dial bearing the letters of the alphabet, figures, etc., arranged in a circle, with a pointer actuated by electromagnetism.

**telegrapher** (tel'ē-gráf-ēr or tē-leg'ra-fēr), *n*. One who is skilled in telegraphy; one whose occupation is the sending of telegraphic messages, especially by the electric telegraph; a telegraph-operator. — **Telegraphers' cramp** or *palsy*, an occupation neurosis of telegraphers, similar to writers' cramp.

**telegraphic** (tel'ē-gráf'ik), *a*. [= F. *télégraphique* = Sp. *telegráfico* = Pg. *telegrafico* = It. *telegrafico*; as *telegraph* + *-ic*.] 1. Of or pertaining to the telegraph; made by a telegraph; used in telegraphing: as, *telegraphic signals*; *telegraphic art*. — 2. Communicated or transmitted by a telegraph: as, *telegraphic intelligence*.

**telegraphical** (tel'ē-gráf'i-kal), *a*. [*< telegraphic* + *-al*.] Same as *telegraphic*.

**telegraphically** (tel'ē-gráf'i-kal-i), *adv*. 1. In a telegraphic manner; by means of the telegraph. — 2. As regards telegraphic communication: as, a town *telegraphically* isolated.

**telegraphist** (tel'ē-gráf-ist or tē-leg'ra-fist), *n*. [*< telegraph* + *-ist*.] A telegrapher.

**telegraph-key** (tel'ē-gráf-kei), *n*. A device for making and breaking an electric circuit by the movement of the fingers and hand. It usually consists of a bar or lever pivoted in the middle, having a button of some insulating material attached at one end, below which are two platinum-points whose contact at *c* in the figure completes the circuit. The insulating but-

ton is held by the thumb and first two fingers, and stops are arranged to control the play or movement of the lever. The two ends of a break in the line-wire are connected to the terminals *t, t*, and the break is bridged over by the lever *b* each time it is depressed during the transmission of the message. When the key is not being used the lever is held against its back-stop *s* by the spring *p*, and the break is bridged over by putting the lever *b* in the position shown.

**telegraphophone** (tel'ē-gráf'ō-fōn), *n*. [*< Gr. τῆλε, afar, + E. graphophōne*.] An apparatus for reproducing at a distance the sounds which produced a graphophonic record; also, an apparatus for producing a graphophonic record at a distance by means of a telephonic circuit.

**telegraph-plant** (tel'ē-gráf-plant), *n*. The East Indian *Desmodium gyrans*, a plant with trifoliate leaves, of which the lateral leaflets are very small and remarkable for their spontaneous jerking motion, suggesting signaling. In a warm humid atmosphere they alternately rise and fall, quickly changing their position, sometimes almost 180 degrees, while they also rotate on their own axes. Also *moving-plant* and *semaphore-plant*.

**telegraph-pole** (tel'ē-gráf-pól), *n*. One of a series of poles or posts for supporting an elevated telegraph-line. Where there are more wires than one, they are usually fixed to cross-bars on the posts, an insulator being interposed in each case between the post or bar and the wire.

**telegraph-post** (tel'ē-gráf-pōst), *n*. A telegraph-pole.

**telegraph-reel** (tel'ē-gráf-rēl), *n*. In a recording telegraph, the reel on which is wound the endless strip of paper on which the messages are printed or otherwise indicated.

**telegraph-register** (tel'ē-gráf-rej'is-tēr), *n*. A form of receiving instrument which makes a permanent record of the signals received. See cut under *recorder*.

**telegraphy** (tel'ē-gráf-i or tē-leg'ra-fi), *n*. [= F. *télégraphie*; as *telegraph* + *-y*.] The art or practice of communicating intelligence by a telegraph; the science or art of constructing or managing telegraphs. — **Aerial telegraphy**. See *aerial*. — **Duplex telegraphy**. See *duplex* and *telegraph*. — **Telehydrobarometer** (tel'ē-hi-drō-ba-rom'e-tēr), *n*. [*< Gr. τῆλε, afar, + ὑδωρ, water, + E. barometer*.] An instrument for recording electrically at a distance the head of water, or of any liquid contained in a reservoir.

**teleianthous** (tel-i-an'thus), *a*. [NL., *< Gr. τέλειος, finished, perfect, + ἄνθος, a flower*.] In bot., perfect- or hermaphrodite-flowered.

**teleiconograph** (tel'ē-i-kon'ō-gráf), *n*. [*< Gr. τῆλε, afar, + εἰκων, an image, + γραφῶν, write*.] A combination of the telescope and camera lucida devised by M. Revoil. The camera lucida is attached to the eyepiece of the telescope in such a way that the observer sees an image of the objects visible in the field of view apparently projected upon a sheet of paper placed on a table below the eyepiece, where he can easily sketch their outlines. He has the scale of the drawing at command, since the size of the image depends on the distance between the eye and the paper.

**teleity** (te-lē'i-ti), *n*. [*< Gr. τέλειος, finished, perfect, + -ity*.] End; tendency to fulfil a function or purpose. [Rare.]

When such a number of hot, dry, and moist atoms cling together, up starts a horse; the same may be said of mixts; they differ merely accidentally, and have no other form, if I may say so, than the *teleity* of the mixture. Gentleman Instructed, p. 427. (Davies.)

**telekinesis** (tel'ē-ki-nē'sis), *n*. [NL., *< Gr. τῆλε, afar, + κίνησις, movement*; see *kinetic*.] Movement of or motion in an object, animate or inanimate, produced without contact with the body producing the motion. See the quotation under *telekinetic*. [Recent.]

Extra-mediumistic operations, as thought-transference, telepathy, *telekinesis* (Fernwirkung), or movements of objects without contact, and finally materialisation. Myers, Proc. Soc. Psych. Research, Dec. 1890, p. 668.

**telekinetic** (tel'ē-ki-net'ik), *a.* [*< telekinesis + -ic (cf. kinetic).*] Of the nature of or pertaining to telekinesis. [Recent.]

For the alleged movements without contact, which form an important branch of "so-called spiritualistic phenomena," M. Aksakof's new word *telekinetic* seems to me the best attainable. It need not, of course, imply an action in distance, without any intervening medium, but rather an action exercised upon a body so situated with regard to the assumed agent that no exercise of any known force would have originated the body's movement.

Myers, Proc. Soc. Psych. Research, Dec., 1890, p. 669.

**telegraph** (tē-lē'ō-grāf), *n.* [*< Gr. τῆλε, afar, + γράφω, word, + γραφή, write.*] A modified form of semaphore, invented by R. Lovell Edgeworth about the close of the eighteenth century. The signals were four long wooden isosceles triangles, each of which had eight definite positions, representing the numerical figures 1 to 7 and zero. One of the pieces represented units, and the others respectively tens, hundreds, and thousands; by the use of the different signals in different positions any number below eight thousand not containing the figures 8 or 9 could be signaled. Words could be assigned to these numbers according to any prearranged code.

**telemanometer** (tel'ē-mā-nom'e-tēr), *n.* [*< Gr. τῆλε, afar, + E. manometer.*] A manometer or pressure-gage that registers its indications at a distance by means of electric registering apparatus.

**telemeteorograph** (tel'ē-mē'tē-ō-rō-grāf), *n.* [*< Gr. τῆλε, afar, + μετεωρογρ., a meteor, + γράφω, write.*] A meteorograph in which the recording apparatus is at a distance from the actuating instruments, and is operated electrically. It is the combination in one registering instrument of a telethermograph, a telebarograph, and a teleanemograph.

**telemeteorographic** (tel'ē-mē'tē-ō-rō-grāf'ik), *a.* [*< telemeteorograph + -ic.*] Pertaining to the telemeteorograph; relating to registration by meteorological instruments at a distance.

**telemeter** (tē-lem'e-tēr), *n.* [*< F. télémètre, < Gr. τῆλε, afar, + μέτρον, measure.*] 1. An instrument for determining distances in surveying, in artillery practice, etc. Sometimes the whole apparatus, sometimes the angle-measuring part only, and sometimes only the graduated rod to be observed at a distance is called a *telemeter*. When such a rod is used the amount subtended by a fixed angle is observed.

2. An apparatus for recording electrically at a distance the indications of a physical or meteorological instrument. The essential features of several systems are as follows. On each side of the index

to the battery. The light armature will be attracted by a field of current, drawing the spring contact with it, so that the contact will be closed, and the current will flow from the battery through the instrument to the battery. The current, which passes through the line *L2*, magnet *M6* of the intermediate, magnet *M3* of the receiver to the base of both instruments, will draw the lever 12 and spring 13 to the battery. The armature of the magnet *M3* is attracted, carrying the fork or pallets which propel the wheel *W*, and also, by reason of the pin 13, pushes lever 15 so that it strikes the adjustable screw in lever 13, throwing it away from its contact with spring 14, breaking the circuit, and allowing the instruments to return to their normal position.

of the instrument is an electric contact-point carried on an insulated arm. When contact is made by a movement of the index, a current is established, which goes to the receiver and sets in motion there a train of mechanism which moves a dial-needle or registering-pen in the same sense as the motion of the original needle of the transmitter. When this has been effected, a return current is set up, which moves the electric contact-points of the transmitter a distance of one scale-division away from their position of contact with the needle, and all the other electrical parts are restored to their original condition. The instrument is then in readiness for another change in the actuating instrument. Three wires between the receiver and transmitter is the smallest number by which the requisite operations can be effected. This electrical registering apparatus is adapted to transmitting time, or the indications of any instrument whose changes are shown by an index.—**Acoustic telemeter**, an apparatus for determining a distance by the time occupied in traversing it by the sound of a detonation.

**telemetric** (tel'ē-met'rik), *a.* [*< telemetr-y + -ic.*] Pertaining to automatic registration at a distance of the indications of physical and meteorological instruments.

Telemetric aid to meteorological records.

Science, VI. 194.

**telemetry** (tē-lem'e-tri), *n.* [*< Gr. τῆλε, afar, + μετρία, < μέτρον, measure.*] 1. The art of measuring distances by the use of telemeters.

—2. The art of recording at a distance the indications of meteorological and physical instruments.

**telemotor** (tel'ē-mō-tor), *n.* [*< Gr. τῆλε, afar, + E. motor.*] A motor used to steer a ship, in which the power generated at a distance from the tiller is transmitted to another motor or apparatus directly connected with the tiller.

The transmission of power from the prime motor may be by chains or ropes, or by hydrostatic or pneumatic columns confined in pipes and connected with one or two piston-engines for actuating the tiller.

The steering motor is placed directly on the quadrant of the tiller, and is actuated from the bridge by means of what the author describes as a *telemotor*.

**telengscope** (tē-len'ji-skōp), *n.* [Irreg. *< Gr. τῆλε, afar, + ἔγγυς, near, + σκοπεῖν, view: see scope.*] An instrument which combines the powers of the telescope and of the microscope.

**Telenomus** (tē-len'ō-mus), *n.* [NL. (Haliday, 1833); formation uncertain.] A large genus of hymenopterous parasites, of the proctotrypid subfamily *Scelioninae*, comprising numerous minute chalcid-like forms which are all or nearly all parasitic in the eggs of hemipterous or lepidopterous insects.

**Telebranchia** (tel'ē-ō-brang'ki-ā), *n. pl.* [NL., *< Gr. τέλος, τέλος, complete, full-grown, perfect (< τέλος, end, completion), + βράγχια, gills.*] A group of rostriferous gastropods, with the gills of few (12 to 15) laminae in regular descending spiral rows on the left side of the mantle-cavity, the operculum distinct, and the aperture of the shell contracted moderately and roundish. It includes the families *Planorbidae*, *Rissoiidae*, *Melanidae*, *Cerithiidae*, *Viparidae*, and others.

**telebranchiate** (tel'ē-ō-brang'ki-āt), *a. and n.* 1. *a.* Pertaining to the *Telebranchia*, or having their characters.

II. *n.* A member of the *Telebranchia*.

**telecephal** (tel'ē-ō-sef'al), *n.* Any teleocephalous fish. *Amer. Nat.*, May, 1890.

**Teleocephali** (tel'ē-ō-sef'a-li), *n. pl.* [NL., *pl. of \*teleocephalus: see teleocephalous.*] An order of teleost fishes, including those whose cranium has the full complement of bones.

**teleocephalous** (tel'ē-ō-sef'a-lus), *a.* [*< NL. \*teleocephalus, < Gr. τέλος, τέλος, complete, + κεφαλή, head.*] Having the full number of bones in the skull; of or pertaining to the *Teleocephali*.

**Teleodesmacea** (tel'ē-ō-des-mā'sē-ā), *n. pl.* [NL., *< Gr. τέλος, τέλος, complete, + δέσμος, band, ligament.*] An order of bivalve mollusks, formed by W. H. Dall to include all those whose hinge is highly specialized or perfected. The division includes 12 suborders, and the name is contrasted with *Anomalodesmacea* and with *Prionodesmacea*. *Nature*, XLI. 188.

**teleodesmacean** (tel'ē-ō-des-mā'sē-an), *a. and n.* [*< Teleodesmacea + -an.*] 1. *a.* Of or pertaining to the *Teleodesmacea*.

II. *n.* Any member of the *Teleodesmacea*. *W. H. Dall*.

**teleologic** (tel'ē-ō-loj'ik), *a. and n.* [*< teleology + -ic.*] 1. *a.* Teleological.

Value in use, or, as Mr. De Quincy calls it, *teleologic value*, is the extreme limit of value in exchange.

J. S. Mill, Pol. Econ., III. i. § 2.

II. *n.* The science of final causes. [Rare.]

Technic and *Teleologie* are the two branches of practical knowledge, founded respectively on conation and feeling, and are both together, as *Ethic*, opposed to *Theoretic*, which is founded on cognition.

S. H. Hudson, Time and Space, § 68.

**teleological** (tel'ē-ō-loj'i-kal), *a.* [*< teleologic + -al.*] Of, pertaining to, or relating to teleology, or the doctrine of final causes; pertaining to or of the nature of a design or purpose.

A *teleological* ground in physics and physiology: that is, the presumption of something analogous to the causality of the human will, by which, without assigning to nature a conscious purpose, he may yet distinguish her agency from a blind and lifeless mechanism.

Coleridge, The Friend, ii. 10.

**teleologically** (tel'ē-ō-loj'i-kal-i), *adv.* With reference to or as regards teleology; on teleological grounds; by or with reference to purpose or design.

**teleologism** (tel'ē-ol'ō-jizm), *n.* [*< teleology + -ism.*] Teleology; also, the acceptance of teleology, or belief in that doctrine. *Pop. Sci. Mo.*, XXXV. 278.

**teleologist** (tel'ē-ol'ō-jist), *n.* [*< teleology + -ist.*] One who maintains the doctrine of or studies final causes. Compare *ætiologist*.

**teleology** (tel'ē-ol'ō-ji), *n.* [*< NL. teleologia (Chr. Wolf), < Gr. τέλος (gen. τέλεος), completion, final end, + λογία, < λέγειν, speak: see -ology.*] The doctrine of final causes; the theory of tendency to an end.

Under one aspect, the result of the search after the rationale of animal structure thus set afoot is *teleology*, or the doctrine of adaption to purpose.

Huxley, Crayfish, ii. 47.

**telemeter** (tel'ē-om'e-tēr), *n.* A telemeter.

**teleophobia** (tel'ē-ō-fō'bi-ā), *n.* [NL., *< Gr. τέλος (gen. τέλεος), end, + φόβος, fear.*] That disposition of mind which results in great unwillingness to admit that things tend toward definite ends, or that anything in nature is determined by anything not yet in existence. See *dysteleology*.

**teleophore** (tel'ē-ō-fōr), *n.* [*< Gr. τέλος, τέλος, complete, + φορέω, < φέρειν = E. bear.*] A gonotheca.

**teleophyte** (tel'ē-ō-fit), *n.* [*< Gr. τέλος, τέλος, complete, + φυτόν, plant.*] A plant composed of cells arranged in tissues; especially, a highly developed plant, as a tree. Compare *teleozoön*. *H. Spencer*, Prin. of Biol., § 43.

**teleorganic** (tel'ē-ōr-gan'ik), *a.* [*< Gr. τέλος, τέλος, complete, + ὄργανον, an organ.*] Accomplishing the purpose of organism; vital; necessary to organic life: as, *teleorganic forces*.

**teleosaur** (tel'ē-ō-sār), *n.* [*< NL. Teleosaurus.*] A fossil crocodile of the family *Teleosauridae*.

**teleosaurian** (tel'ē-ō-sā'ri-an), *a. and n.* 1. *a.* Pertaining to the *Teleosauridae*, or having their characters.

II. *n.* A member of the *Teleosauridae*.

**Teleosauridae** (tel'ē-ō-sā'ri-dē), *n. pl.* [NL., *< Teleosaurus + -idae.*] A family of fossil crocodiles, typified by the genus *Teleosaurus*, having a long narrow snout with terminal nostrils, the posterior nares bounded by the palatines (the pterygoids not being united below), and the vertebrae amphicoelous. They are characteristic of the Oolitic formation.

**Teleosaurus** (tel'ē-ō-sā'rus), *n.* [NL., *< Gr. τέλος, τέλος, complete, + σαῦρος, a lizard.*] The typical genus of *Teleosauridae*.

**teleost** (tel'ē-ost), *a. and n.* [*< NL. \*teleosteus, < Gr. τέλος, τέλος, complete, + ὀστίον, bone.*] 1. *a.* In *ichth.*, osseous, as a fish; having a well-ossified skeleton, as ordinary fishes; of or pertaining to the *Teleostei*.

II. *n.* An osseous fish; any member of the *Teleostei*. See cuts on following page, and cuts under *Esox*, *optic*, *palatoquadrate*, *parasphenoid*, and *pike*.

**teleostean** (tel'ē-os'tē-an), *a. and n.* [*< teleost + -an.*] Same as *teleost*.

**Teleostei** (tel'ē-os'tē-i), *n. pl.* [NL., *pl. of \*teleosteus: see teleost.*] The teleosts, or ordinary bony fishes; a subclass of true fishes. They have a well-developed brain, whose optic nerves cross each other, but without any chiasm; the heart is provided with a non-contractile arterial bulb; the fins have well-developed and distinct rays; the skeleton is generally completely ossified, and the backbone consists entirely or mostly of separate well-ossified vertebrae.

**teleostomate** (tel'ē-os'tō-māt), *a.* [*< teleostom-ous + -ate.*] Same as *teleostomous*.

*a*, hand carried by thermometer, and electrically connected to base of the transmitter, giving the initial contact; *a'*, *a'*, contact points and metallic strips separated by insulating material, and forming the commutator; *a1*, *a1*, wires connecting commutator strip *a'* to screw 2 and magnet *M2*; an 1 strip *a'* to screw 11; magnet *M1*; 1, 2, 3, 4, contact-springs fastened to base of the transmitter; 5, 6, light armatures connected together and pivoted between the plates of the transmitter, normally held in central position by springs (not shown on the face of the armatures, bearing on the face of the cores of their respective magnets, electrically connected with the base of the transmitter; 7, 8, contact-posts and screws insulated from the base of the transmitter; 9, 10, contact-springs fastened to the driving armatures, electrically connected to the base of the transmitter; 11, 12, armatures screwed to a lever, centrally pivoted between the plates of the instruments, and carrying a fork or two pallets, for driving the machinery of the receiver; 13, circuit-breaking lever pivoted between the plates of the receiver, and electrically connected thereto; 14, spring of the circuit breaker, insulated from the base of the receiver, and connected by wire to one pole of the battery *B*; 15, lever centrally pivoted between the plates of the receiver to hold the fork or pallets in a central position, and when acted upon by movement of the fork to strike the lever 13, throwing the lever from the spring 14, thereby breaking the circuit; 16, pawl for holding the driving-wheel *W* in its normal position; 17, 18, pins in the fork to act upon the inclines of the lever 15; *M'*, driving wheel pivoted between the plates; *L*, line connecting magnet *M'* and *M2* of the transmitter to the base of the receiver; *L'*, line connecting insulated post 7 of transmitter with magnet *M'* of the receiver; *L''*, line connecting insulated post 8 of transmitter with magnet *M2* of the receiver; *A*, line connecting the base of the transmitter with one pole of the battery *B*; *M'*, *M'*, magnets of intermediate receiver, connected to lines connected with corresponding magnets of the receiver. The hand *a*, which is always in connection with the battery-wires and makes contact with the commutator point *a'*, closes the circuit; the current passes through the line *a*, *B*, thermometer, and *a*, commutator *a'*, wire *a1*, and magnet *M2*; then from the transmitter through the line *L2* to the base of the receiver; thence through lever 13 and spring

ducing sounds, especially articulate speech, at a distance from their source.

**Telephoridae** (tel-e-for'ide), *n. pl.* [NL. (Leach, 1817), < *Telephorus* + *-ida*.] A family of serricorn beetles, including those forms commonly called *soldier-beetles*, now usually merged with the *Lampyridae*. See *Telephorinae*. *Malacodermidæ* is a synonym.

**Telephorinae** (tel-e-for'i-nē), *n. pl.* [*Telephorus* + *-inae*.] The *Telephoridae* as a subfamily of the *Lampyridae*. They have the middle coxae contiguous and the epipleura distinct and narrow at bases and mesothoracic episterna not smudged on the inner side. They are slender and rather soft bodied beetles of medium size, usually vegetable-feeders, although some are in the larval state. *Chaudotholus*, *Podabrus*, and *Telephorus* are the principal genera represented in the United States. See cut under *soldier-beetle*.

**Telephorus** (tē-lef'ō-rus), *n.* [NL. (Schaeffer, 1766), < Gr. *τῆλε*, afar, + *-phorus*, < *αφ'ερ* = E. *bear*.] A genus of serricorn beetles, typical of the family *Telephoridae*. It is of cosmopolitan distribution, and comprises more than 300 species, the majority of them inhabiting cold or temperate regions. Thirty-six species occur in the United States. *T. bilineatus*, the two-lined soldier-beetle, is in its larval state, according to Riley, a common enemy of the larva of the codling-moth (*Carpocapsa pomonella*). See cut under *soldier-beetle*.

**telescope** (tel'ē-fōt), *n.* [*Gr. τῆλε*, afar, + *φῶς* (phōs-), light.] An instrument designed to reproduce at a distance, by the aid of electricity, pictures or images of visible objects.

**telephotograph** (tel-e-fō'to-grāf), *n.* [*telephoto* + Gr. *γραφειν*, write. Cf. *photograph*.] A picture or image produced by a telescope.

**telephotography** (tel-e-fō'to-grā-fī), *n.* [*telephotograph* + *-y*.] The art (not yet attained) of producing a photograph of an object distant and invisible from the camera, by means of electrical connections with a suitable apparatus situated near the object. *Nature*, XLIII, 335.

**teleplastic** (tel'ē-plas'tik), *a.* [*Gr. τῆλε*, afar, + *πλάσσειν*, form, mold, shape.] Noting the alleged spiritualistic phenomena of materialization, or the formation of phantasmal figures of persons and things. Also *telesomatic*. See the quotation. [Rare.]

M. [A. N.] Aksakof uses the term "telesomatic" for the phenomena of so called "materialisation," the formation of "spirit-hands" and the like. Elsewhere he calls these phenomena "plastic." Inasmuch as other material objects are asserted to be thus supernaturally formed, besides quasi-human bodies, it would be better, I think, to give the name *teleplastic* to all this class of alleged phenomena. F. W. H. Myers, *Proc. Soc. Psych. Research*, [Dec., 1890, p. 669.]

**telepolariscope** (tel'ē-pō-lar'i-skōp), *n.* [*Gr. τῆλε*, afar, + E. *polariscope*.] An optical instrument consisting of a combination of the polariscope with the telescope.

**telerradiophone** (tel'ē-rā'di-ō-fōn), *n.* [*Gr. τῆλε*, afar, + E. *radiophone*.] An adaptation of telegraphy to the radiophone.

**Telrpeton** (tē-lér'pe-ton), *n.* [NL., < Gr. *τῆλε*, afar, + *ῥεπτόν*, a reptile, < *ῥεπειν*, creep, crawl.] 1. A genus of fossil lizards of the Mesozoic period, belonging to the order *Rhynchocephalia*.— 2. [I. c.] A member of this genus.

**telescope** (tel'e-skōp), *n.* [= F. *télescope* = Sp. *telescopio* = D. *teleskoop* = G. *Sw. Dan. teleskop*, etc., < NL. *telescopium* (NGr. *τῆλεσκοπιον*, < Gr. *τῆλε*, afar, + *σκοπεῖν*, view.) 1. An optical instrument by means of which distant objects are made to appear nearer and larger. It originated in the first decade of the seventeenth century, apparently earliest in Holland; but Galileo in 1609 independently invented the form which bears his name, published it to the world, and was the first to apply the instrument to astronomical observation. The telescope consists essentially of two members: one, the *objective*, a large converging lens, or a concave mirror (technically *speculum*), which forms an optical image of the object; the other, the *eyepiece*, a small lens or combination of lenses, which magnifies this image. The optical parts are usually set in a tube, and this is so arranged that the distance between the objective and the eyepiece can be adjusted to give the most distinct vision. Telescopes are classed as *refracting* or *reflecting*, according as the objective is a lens or a speculum. The simple refracting telescope has for an objective a large convex lens, A (fig. 1), of long

focus is seen erect. But the field of view is very restricted, and this form of instrument now survives only in the opera-glass. The simple refracting telescope in any of its forms is a very imperfect instrument, owing to the fact that rays of different color are not alike refrangible, the focus being nearer the lens for the blue rays than for the red. By making the telescope very long in proportion to its diameter, the injurious effect of this chromatic aberration can be greatly reduced, and about 1660 Huygens and Cassini used instruments more than 100 feet long in their observations upon Saturn. About the middle of the eighteenth century it was discovered in England that, by combining lenses of different kinds of glass, objectives could be made nearly free from chromatic aberration, and all the refracting telescopes now constructed have achromatic object-glasses of some form. The usual construction is a double-convex lens of crown-glass combined with a (nearly) plano-concave lens of flint-glass, the focal lengths of the two lenses being proportional to their dispersive powers, and the curves so chosen that the spherical aberration is corrected at the same time. But other forms are possible and even preferable. Fig. 2 shows some of those most used. For

many years after the invention of the achromatic telescope it was impossible to obtain suitable glass for lenses of more than 5 inches in diameter. The discoveries of Guinand about 1800 partially relieved the difficulty, and from about 1870 to 1890 a considerable number of instruments have been made with apertures exceeding 2 feet—the largest so far being one of 40 inches diameter given by Charles

T. Yerkes to the University of Chicago. The Lick telescope (fig. 3) is of 36 inches diameter and 57 feet in length, the object-glass by Clark of Cambridge, Massachusetts. That of Pulkowais 30 inches. The achromatic objective constructed of flint- and crown-glass is, however, by no means perfect, and cannot be made so while these kinds of glass are used. When the correction for the rays of mean wave-length in the spectrum is the best possible, the extreme rays—the red and violet—refuse to coincide with the others, so that the image of a bright object is surrounded by a purple halo, which renders it somewhat indistinct. This "secondary spectrum," as it is called, is not very obtrusive in small instruments, but is a serious defect in large ones, and unfit the ordinary achromatic refractor for photography. For this purpose it is necessary to use an object-glass specially corrected for the violet rays, and therefore practically worthless for visual observations. But while it is impossible to secure a perfect color-correction with any lens composed of ordinary crown- and flint-glass, there is no reason why kinds of glass may not be invented which will render it possible; and since 1880 experiments, under the auspices of the German government, by Professor Abbe at Jena, appear to have resulted in at least partial success. Lenses as large as 12 inches in diameter have been made of the new glass. If large disks of this glass can be obtained sufficiently homogeneous, and not corrodible under exposure to the air, the art of telescope-making will immediately make enormous progress. The reflecting telescope was invented between 1660 and 1670, independently by Gregory and Newton, by the latter as the result of his discovery of the decomposition of light by refraction, which led him to conclude (erroneously) that the faults of the refracting telescope were necessarily incurable. There are four different forms of the instrument, differing only in the method by which the rays reflected by the concave speculum which forms the objective are brought to the

eyepiece. In the Gregorian telescope (fig. 4) the rays reflected from the speculum are a second time reflected by a small concave mirror in the center of the tube, and just beyond the focus. The large mirror is perforated, and the eyepiece, placed behind the perforation, receives the rays thus twice reflected. In the Cassegrainian construction is precisely similar, except that the small mirror is convex, and is placed within the focus; this shortens the instrument a little, but restricts the field of view. In both these forms the observer looks toward the object just as with a refractor. In the Newtonian form, which is the most used, the small mirror is plane, and set at an angle of 45°, so that the rays are reflected out at the side of the tube. Finally, in the front-view or Herschelian form the small mirror is dispensed with, the speculum being slightly tilted so as to throw the image to one side of the mouth of the tube. This saves the loss of light due to the second reflection, but involves some injury to the definition. Although the reflecting telescope is free from chromatic aberration, it seldom gives as perfect definition as an achromatic instrument, and is much more subject to atmospheric disturbance; the image also is less brilliant than that given by a refractor of the same aperture; but the speculum is much easier and less costly to construct than an achromatic object-glass of the same size, so that the largest telescopes ever made have been reflectors. At the head of the list stands the six-foot "Leviathan" of Lord Rosse, erected in 1845, and still in use; it is of the Newtonian form. The five-foot silver-on-glass Cassegrainian reflector of Mr. Common, erected in 1889, stands next, and there are in existence a number of instruments with apertures of 3 and 4 feet. Herschel's great telescope, erected in 1789, but long since dismantled, was 48 inches in diameter and 40 feet long. The magnifying power of a telescope depends upon the ratio between the focal length of the object-glass and that of the eyepiece. (See *eyepiece*.) It can therefore be altered at pleasure by merely exchanging one eyepiece for another. As a rule, the highest power practically available, with the best object-glasses and under the best circumstances, is from 75 to 100 to every inch of aperture. The illuminating power is proportional, other things equal, to the area of the object-glass or the speculum; so that a telescope of 12 inches aperture ought to give four times as much light as one with a 6-inch lens. Practically, however, the larger lenses, on account of the increase in the thickness of the glass, do not reach their theoretical performance. Reflecting telescopes vary greatly in their light-gathering power. A Newtonian reflector with a silver-on-glass speculum freshly polished is not very greatly inferior in light to an achromatic of the same aperture; but as a rule a reflector in its ordinary working condition has only about half the light of the corresponding refractor. Small telescopes for terrestrial purposes are usually unmounted, but the tube is ordinarily made in several sections which slide into one another, reducing the length of the instrument, and making it more portable, as in the common spy-glass. Larger telescopes are mounted upon stands of some kind, and the practical efficiency of the instrument depends greatly on the firmness and convenient arrangement of the stand. At present telescopes for astronomical use are almost always mounted equatorially—that is, the telescope-tube is attached to an axis, which itself is carried by another axis with its bearings so arranged that it points toward the pole. This principal axis is called the *polar axis*, and a clockwork is usually arranged to make it turn at the rate of one revolution in a sidereal day. When the telescope is once pointed at a celestial object, the clockwork will keep it apparently stationary in the field of view for any length of time. By the help also of graduated circles attached to the two axes it is easy to "set" the telescope so as to find any object whose right ascension and declination are known. Fig. 5 represents diagrammatically the equatorial of the usual German form.

It is quite certain that previous to 1600 the telescope was unknown, except possibly to individuals who failed to see its practical importance, and who confined its use to "curious practices" or to demonstrations of "natural magic."

—*Axis of a telescope.* See *axis*.—*Binocular telescope*, an instrument composed of two similar small telescopes fastened together side by side and parallel, so that both eyes can be used at once in looking through it.

The opera-glass is its most common form.—*Brachy-telescope*, or *brachyte*, a form of silver-on-glass reflector in which the small mirror, convex in form, is placed out of the axis of the large speculum, which is slightly inclined, the distortion thus produced in the image being partly compensated by the corresponding inclination of the small mirror. This construction avoids the perforation of the speculum, and leaves its whole area unobstructed; it also considerably diminishes the length of the instrument.—*Broken telescope*, a telescope which has a reflecting prism or mirror inserted about half-way between the object-glass and its focus, the tube being thus bent at right angles; much used in transit-instruments and theodolites.—*Cane telescope*, a telescope or spy-glass fitted in a walking-stick.—*Cassegrainian telescope*, a form of reflector in which the small mirror is convex. focus, while the eyepiece, B, is also a convex lens, but of short focus, the two being placed at a distance slightly less than the sum of their focal lengths. The "real" inverted image of the object formed at *m* by the object-glass is viewed by the magnifying lens B, the magnifying power being equal to the ratio between the focal lengths of the lenses A and B. With this form of instrument the object is seen inverted. In the Galilean telescope the eye-lens is concave instead of convex, and intercepts the rays from the objective before they reach the focus, so that the ob-

Newtonian Telescope.

— **Photographic telescope,** a telescope fitted for photography. It may be a refractor with an object-glass specially constructed to bring the actinic rays to an accurate focus, or a reflector, which requires only mechanical adaptations. — **Prism-telescope.** See *telescope*. — **Sciatheric telescope.** See *sciatheric*. — **Silver-on-glass telescope,** a reflector which has a concave spectrum of glass-silvered on the front surface. Most of the reflectors now made are of this kind. — **Terrestrial telescope,** a telescope having two additional lenses in the eyepiece, by means of which the inverted image is brought to an erect position, in contradistinction to an astronomical refracting telescope. — **View-telescope,** the small telescope which usually forms part of a spectroscopy. — **Watch-telescope,** a small telescope attached to a theodolite or other geodetic instrument, and intended to enable the observer to assure himself of the stability of the parts of the instrument which ought to remain immovable while the observations are being made. — **Water-telescope.** (a) A simple tube, five or six inches in diameter, with a plane glass inserted watertight at the end. It is used by Norwegian fishermen and others to enable them to see objects under water. (b) A telescope with its tube completely filled with water. Such an instrument was used by Ayr at Greenwich, about 1870, as part of a zenith-sector, in order to settle by observation certain questions relating to the aberration of light. — **Zenith-telescope,** an instrument designed for the purpose of determining the latitude of a place by measuring the difference between the zenith-distances of two stars culminating north and south of the zenith at nearly equal altitudes: introduced by Capt. Talcott of the United States Engineers about 1840. The principle involved had been discovered as early as 1740 by Horrebow, but the method was never much used, for want of suitable star-catalogues, and had been quite lost sight of.

**telescope** (tel'e-skōp), *v.*; pret. and pp. *telescoped*, *pp.* *telescoping*. [*telescope*, *n.*] **I. trans.** To drive into one another like the movable joints or slides of a spy-glass: as, in the collision the forward ears were *telescoped*; to shut up or protrude like a jointed telescope.

**II. intrans.** To move in the same manner as the slides of a pocket-telescope; especially, to run or be driven together so that the one partially enters the other: as, two of the carriages *telescoped*.

**telescope-bag** (tel'e-skōp-bag), *n.* A hand-bag made in two separate parts, one of which shuts down over the other and is held in place by straps.

**telescope-driver** (tel'e-skōp-dri'vēr), *n.* The clockwork mechanism by which the motion of a telescope is made to accord with apparent sidereal motion. *Sir E. Beckett, Clocks and Watches*, p. 232.

**telescope-eye** (tel'e-skōp-ī), *n.* An eye, as of a gastropod, which may be telescoped, or withdrawn and protruded.

**telescope-fish** (tel'e-skōp-fish), *n.* Same as *telescope-carp*.

**telescope-fly** (tel'e-skōp-flī), *n.* A two-winged stalk-eyed insect. See cut under *Diopsis*.

**telescope-shell** (tel'e-skōp-shel), *n.* A cerithioid univalve of India, *Telescopium fuscum*, having a long conical shell of many whorls with subquadrangular aperture.

**telescope-sight** (tel'e-skōp-sīt), *n.* A telescopic glass mounted upon a firearm or a piece of ordnance, and usually adjustable for distance and windage.

**telescope-table** (tel'e-skōp-tā'bl), *n.* A table which allows of being lengthened or shortened at pleasure. Compare *extension-table*.

**telescopic** (tel'e-skōp'ik), *a.* [= F. *télescopique* = Sp. *telescopico* = Pg. It. *telescopico*; as *telescope* + *-ic*.] 1. Of or pertaining to the telescope or its use; obtained by means of a telescope: as, a *telescopic* view of the moon. — 2. That can be seen or discovered by the telescope only: as, *telescopic* stars. — 3. Seeing at a great distance; far-seeing.

Aristotle had the eye of a bird, both *telescopic* and *microscopic*. *W. H. W.*

4. Capable of being extended or shut up like a spy-glass; having joints or sections which slide one within another; especially, in *mach.*, constructed of concentric tubes, either stationary, as in the telescopic boiler, or movable, as in the telescopic chimney of a war-vessel, which may be lowered out of sight in action, or in the telescopic jack, a screw-jack in which the lifting head is raised by the action of two screws having reversed threads, one working within the other, and both sinking or telescoping within the base—an arrangement by which greater power is obtained. — 5. In *zool.*: (a) Stalked; mounted on an ophthalmite, stem, or peduncle, as an eye. (b) Capable of protrusion and retraction, as if jointed like a telescope, or like the joints of a telescope: as, *telescopic* eyes, feelers, horns, or feet. — **Telescopic axle.** See *axle*. — **Telescopic catheterism**, the passage of successively smaller-sized catheters one within the other, until one small enough to pass a urethral stricture has been found. — **Telescopic chimney**, a chimney, used on some steamers, made in sections arranged to slide into each other so that it can be lowered. — **Telescopic elevator**, a hydraulic elevator in which the hydraulic pressure is exerted through sections of tubes which gradually diminish in diameter to permit sliding within one another. — **Telescopic gas-holder**, a gas-holder whose sides move one within another like the slides of a portable telescope. — **Telescopic sight.** See *sight*.

**telescopical** (tel'e-skōp'i-kāl), *a.* [*telescopic* + *-al*.] Same as *telescopic*.

**telescopically** (tel'e-skōp'i-kāl-i), *adv.* 1. In the manner of a telescope: as, an instrument that opens and closes *telescopically*. — 2. By means of the telescope; as regards the view presented by the telescope.

**telescopiciform** (tel'e-skōp-i-fōrm), *a.* [*telescope* + L. *forma*, form.] Telescopic in form—that is, retractile by means of telescoping joints one within another, as the ovipositor of many insects. — **Telescopiciform ovipositor**, in *entom.*, an ovipositor consisting of several tubes, which are modified abdominal rings, and slide into one another, like the tubes of a spy-glass, when the organ is retracted: a form found in many *Diptera* and in the hymenopterous family *Chrysididae*.

**telescopist** (tel'e-skōp-ist or tē-les'kō-pist), *n.* [*telescope* + *-ist*.] One skilled in using the telescope.

**Telescopium** (tel'e-skō'pi-um), *n.* [NL.: see *telescope*.] A southern constellation, introduced by La Caille in 1752. It contains one star of the fourth magnitude. Also *Telescopium*. — **Telescopium Herschellii**, a constellation inserted by the Abbé Hell in 1789 between Lynx, Auriga, and Gemini. It is obsolete.

**telescoping** (tel'e-skō-pi or tē-les'kō-pi), *n.* [As *telescope* + *-y*.] The art of constructing or of using the telescope.

**teleseme** (tel'e-sēm), *n.* [*Gr. τήλε, afar, + σημα, sign, mark.*] A system of electric signaling in which provision is made for the automatic transmission of a number of different signals or calls, in use in connection with police telegraphs and hotel annunciators.

**tesesia** (tē-lē'siā), *n.* [= F. *télésie*, < Gr. *τελέσιος*, finishing, < *τελείν*, finish, complete, < *τέλος*, end.] A name sometimes given to sapphire.

**tesesmt** (tel'e-zm), *n.* [*MGr. τέλεσμα, a talisman: see talisman*.] A talisman or amulet. [Rare.]

The consecrated *tesesms* of the pagans. *Dr. H. More, Antidote against Idolatry*, ix. (Latham.)

**tesismatic** (tel'es-mat'ik), *a.* [*Gr. τέλεσμα, outlay, payment, < τέλλω, pay, < τίλος, payment.*] Same as *tesismatic*.

**tesismaticly** (tel'es-mat'ik-ly), *a.* [*tesismatic* + *-al*.] Pertaining to tesisms; talismanic.

They had a *tesismatic* way of preparation, answerable to the beginnings and mediocrity of the art. *J. Gregory, Notes on Scripture*, p. 38. (Latham.)

**tesismaticly** (tel'es-mat'ik-ly), *adv.* By means of tesisms or talismans.

The part of Fortune found out was mysteriously included in statue of brass, *tesismatically* prepared.

*J. Gregory, Notes on Scripture*, p. 32. (Latham.)

**telesomatic** (tel'e-skō-mat'ik), *a.* [*Gr. τήλε, afar, + σωμα(-), body, + -ic.*] Same as *telesomatic*. *A. N. Aksakof.*

**telespectroscope** (tel'e-spek'trō-skōp), *n.* [*Gr. τήλε, afar, + E. spectroscopy.*] An instrument consisting of an astronomical telescope with a spectroscopy attached: so designated by Lockyer.

**telescope** (tel'e-ster'ē-ē-skōp), *n.* [*Gr. τήλε, afar, + E. stereoscopy.*] An optical instrument devised by Helmholtz for producing an appearance of relief in the objects of a landscape at a great distance. Helmholtz's instrument consists of two plane mirrors set at an angle of 45°, and some distance apart. The rays from the objects of the landscape falling upon these mirrors are reflected to two plane mirrors placed parallel to the first and in front of the eyes. The observer views the image reflected from the first set of mirrors.

**telestic** (tē-les'tik), *a.* [*Gr. τελεστικός, fit for finishing or consecrating, < τελείν, finish, complete, < τέλος, end.*] Pertaining to the final end or purpose; tending or serving to end or finish.

I . . . call this the *telestic* or mystic operation; which is conversant about the purgation of the lucid or ethereal vehicle. *Cudworth, Intellectual System*, p. 792.

**teletich** (tel'e-stik), *n.* [*Gr. τέλος, end, + στίχος, a row, a line, a verse: see stich.*] A poem in which the final letters of the lines make a name.

**telethermograph** (tel'e-thēr'mō-grāf), *n.* [*Gr. τήλε, afar, + E. thermograph.*] A thermograph which records at a distance the indications of its actuating thermometer; a self-registering telethermometer.

**telethermometer** (tel'e-thēr-mom'e-tēr), *n.* [*Gr. τήλε, afar, + E. thermometer.*] A thermometer that records its temperature at a distance. In general, the actuating instrument is a metallic thermometer whose indicator is connected electrically with a dial and pointer, or with a continuous chronographic register, at the place where the record is desired. The apparatus connected with the thermometer is called the *transmitter*, and that connected with the register is called the *receiver*. Of various systems, the following one of Richard Bros. of Paris may be described. Over the pointer of the thermometer-dial is placed an auxiliary needle which carries a fork at its extremity. The arms of the fork are so placed that the primary pointer of the instrument rests between them. Thus, the motion of the pointer of the instrument is limited by the fork, and an electric contact is made when the pointer, responding to a change of temperature, touches either arm of the fork. The arms are isolated from each other, and separate wires carry the electric current from the two arms to the receiver. The two currents, therefore, distinguish rising and falling temperatures. At the receiver the current sets in motion a train of wheelwork, which moves the registering pen of a chronograph-barrel exactly one scale-division. The displacement is upward or downward according as the electric current is due to a rising or a falling temperature. Simultaneously the wheelwork plunges a metal weight into a cup of mercury, and closes an electric current independent of the first. The current thus established returns to the transmitter, and acts on a magnet whose function it is to move the auxiliary needle bearing the fork so as to bring the two arms of the fork again to equal distances from the primary needle. The apparatus is completed by an automatic interrupter, which operates after each return of the current from the receiver. The instrument is then in readiness to record another differential change of temperature. This system of electrical registration at a distance is applicable to any instrument whose indications are shown by a dial and pointer.

**telethermometry** (tel'e-thēr-mom'e-tri), *n.* [As *telethermometer* + *-y*.] The art of indicating or recording temperature automatically at a distance from the actuating thermometer.

**teletopometer** (tel'e-tō-pom'e-tēr), *n.* [*Gr. τήλε, afar, + τόπος, a place, + μέτρον, measure.*] A telemeter in which two telescopes are used.

**teleutoform** (tē-lū'tō-fōrm), *n.* [*Gr. τελευτή, completion, + L. forma, form.*] In *bot.*, the last or final fruit-form in the alternating generations of the *Uredineæ*; the stage in which the teliospores are formed.

**teleutogonidium** (tē-lū'tō-gō-nid'i-um), *n.*; pl. *teleutogonidia* (-ā). [NL., < Gr. τελευτή, completion, + NL. *gonidium*.] In *bot.*, same as *teleutospore*.

**teleutospore** (tē-lū'tō-spōr), *n.* [NL., < Gr. τελευτή, completion, + σπόρα, seed: see *spore*.] In *bot.*, in the *Uredineæ*, a thick-walled spore or pseudospore formed by abscission on a branch of the mycelium (sterigma), and on germination producing a promycelium. In some cases the teliospores are produced early in the season, but usually they appear in autumn, remain in the tissues of the host over winter, and germinate in the spring. See *spore*, *Uredineæ*, and cut under *Puccinia*. Also called *brand-spore*, *pseudospore*.

The cycle begins in spring with the germination of thick-walled spores, called *teliospores*, borne usually in pairs at the end of sterigmata. *Encyc. Brit.*, IX. 831.

**telfordize** (tel'ford-iz), *v.*; pret. and pp. *telfordized*, ppr. *telfordizing*. In road-making, to construct according to the method of road-making invented by Thomas Telford. See *Telford pavement*.

**Telford pavement.** A roadway devised by the Scotch engineer Thomas Telford (1757-1834). The bottoming of the road consists of any durable stone, from 4 to 7 inches in dimensions, laid upon the road-foundation. Between such stones smaller pieces are packed to complete a compact layer 7 inches deep in the middle of the road, and graduated to 4 inches in depth at the sides, to produce a uniform convexity. Upon this is spread, and rolled down, gravel composed of flints, the pieces being as nearly cubical in form as can be obtained, and none weighing more than six ounces. The rolling is continued till the surface is crushed and compacted to smoothness. The name is often contracted to *telford*.

**telic** (tel'ik), *a.* [*Gr.* *τελικος*, final, < *τελος*, end, completion.] Noting a final end or purpose. See *telutic*.

**teliconograph** (tel-i-kon'ô-gráf), *n.* [*Gr.* *τῆλε*, afar, + *εικων*, an image, + *γραφειν*, write. Cf. *iconograph*.] Same as *teliconograph*.

**Telifera** (tê-lif'e-râ), *n. pl.* [*NL.*, < *L.* *tela*, web, + *ferre* = *E.* *bear*.] Same as *Ephthalaria*.

**Telinga** (te-ling'gâ), *n.* 1. One of the people living in the eastern part of the Deccan. *Yule and Burnell*.—2*f.* [*i. c.*] A sepoy.—**Telinga potato.** See *potato*.

**tell**<sup>1</sup> (tel), *v.*; pret. and pp. *told* (formerly or dial. sometimes *telled*, *telt*), ppr. *telling*. [*ME.* *tellen* (pret. *tolde*, *talde*, pp. *told*, *toid*, *talden*, *ytold*), < *AS.* *tellan* (pret. *tealde*, pp. *geteald*) = *OS.* *tellian* = *OFries.* *tella* = *MD.* *D.* *tellen*, count, reckon, consider, = *MLG.* *tellen* = *OHG.* *zellan*, *MHG.* *zeln*, *G.* *zählen*, number (*erzählen*, narrate), = *Lecl.* *télja* = *Sw.* *tälja* = *Dan.* *tælle*, number, tell, cf. *Goth.* *taljan*, instruct, direct; from the noun represented by *tale*<sup>1</sup>; see *tale*<sup>1</sup>, *n.* Cf. *tale*<sup>1</sup>, *v.* For the forms *tell*, *told*, cf. *sell*, *sold*.] **I. trans.** 1. To number; count; enumerate; reckon one by one, or one after another: as, to tell a hundred; to tell one's beads.

Certein I hem never tolde;  
For as fele eyen hadde she  
As fetheres upon foules be.

His custom was to tell over his herd of sea-calves at noon, and then to sleep. *Bacon*, *Physical Fables*, vii.

He cannot be so innocent a coxcomb;  
He can tell ten, sure.

*Beau. and FL.*, Coxcomb, ii. 1.

Nobody comes to visit him, he receives no letters, and tells his money morning and evening.

*Steele*, *Spectator*, No. 264.

**2.** To recount; rehearse; narrate; relate: as, to tell a story.

Witnesse, ye Heavens, the truth of all that I have told!  
*Spenser*, *F. Q.*, VII. vi. 27.

Life . . . is a tale  
Told by an idiot, full of sound and fury,  
Signifying nothing. *Shak.*, *Macbeth*, v. 6. 27.

Masters, I have to tell a tale of woe,  
A tale of folly and of wasted life.

*William Morris*, *Earthly Paradise*, I. 5.

**3.** To make known; divulge; disclose; reveal; communicate: as, to tell a secret; to tell one's errand.

Now wul y telle the rygnt Way to Jerusalem.

*Manderlille*, *Travels*, p. 125.

Tell it not in Gath, publish it not in the streets of Askelon.

*2 Sam.*, i. 20.

But let concealment, like a worm i' the bud,  
Feed on her damask cheek. *Shak.*, *T. N.*, ii. 4. 113.

I wonder wha's tauld that gay ladie  
The fashion into our countrie.

*Lord Dinglewall* (*Child's Ballads*, I. 290).

**4.** To declare; say.

Who-so contrarieth treuthe he telleth in the gospel  
That God knoweth hym noughe, ne no seynthe of heuene.

*Piers Plowman* (B), v. 55.

**5.** To put or express in words; recite; explain; make clear or plain.

And dede men for that deon [din] comen oute of deope graues,  
And tolden why that tempest so longe tyme durede.

*Piers Plowman* (C), xxi. 68.

I know, quoth he, what it meaneeth, but I cannot tell it; I cannot express it.

*Latimer*, 2d Sermon bef. Edw. VI., 1550.

Whoso ask'd her for his wife,  
His riddle told not, lost his life.

*Shak.*, *Pericles*, I, Prol., I. 33.

Few can tell his pedigree,  
Nor his subtilt nature conster.

*Marston and Barksed*, *Insatiate Countess*, v.

**6.** To discern so as to be able to say; distinguish; recognize; decide; determine: as, to tell one from another; she cannot tell which she likes best.

I could always tell if visitors had called in my absence.  
*Thoreau*, *Walden*, p. 141.

**7.** To inform.

He seith that ye be sone aperceyvaunte of hym, and that ye sholde telle me what he is.

*Merlin* (E. E. T. S.), i. 74.

Tell me, good Hobbinoll, what garres thee greet?

*Spenser*, *Shep. Cal.*, April.

I'll tell you as we pass along,

That you will wonder what hath fortuned.

*Shak.*, *T. G. of V.*, v. 4. 168.

**8.** To give an order, command, or direction to; order; bid: as, I told him to stay at home.

Call for your casting-bottle, and place your mirror in your hat, as I told you. *B. Jonson*, *Cynthia's Revels*, ii. 1.

It may be accepted as necessary for the comfort of all coachmen that a team should never start until told.

*New York Tribune*, May 11, 1890.

**9.** To assure; assert positively to.

They are burs, I can tell you. *Shak.*, *T. and C.*, iii. 2. 120.

Pshaw! I tell you 'tis no such thing—you are the man she wants, and nobody but you.

*Sheridan*, *The Duenna*, ii. 4.

Let me tell you, you may drink worse French wine in many taverns in London than they have sometimes at this house.

*Cotton*, in *Walton's Angler*, ii. 227.

**10*f.*** To make account of: in phrases such as to tell no tale, to tell no dainty, to tell no store.

Vesselle of Sylver is there non: for their telle no prys there of, to make no Vesselle offre.

*Manderlille*, *Travels*, p. 220.

I ne tolde no deyntee of hir love.

*William Morris*, *Earthly Paradise*, I. 392.

**2.** To say; declare.

For hit aen myrre-mouthe men mynstrales of heuene,  
And godes boyes, bordiours as the bok telleth.

*Piers Plowman* (C), x. 127.

**3.** To talk; chat; gossip. [*Prov. Eng.*]

While I've been telling with you, here've this little maid been and ate up all my sugar!

*Kingsley*, *Westward Ho*, xxx.

**4.** To tell tales; play the informer; inform; blab: with *of* or *on* before the person: as, if you do, I'll tell. [*Now colloq.*]

And David saved neither man nor woman alive, to bring tidings to Gath, saying, Lest they should tell on us, saying, So did David.

*1 Sam.* xxvii. 11.

He didn't want to tell on Maggie, though he was angry with her; for Tom Tulliver was a lad of honor.

*George Eliot*, *Mill on the Floss*, i. 5.

**5.** To act effectively; produce a marked effect or impression; count for something.

It's true, every year will tell upon him. He is over five-and-forty, you know.

*George Eliot*, *Middlemarch*, iv.

It would seem that even pedantry and antiquarianism are welcomed when they tell on behalf of the other side.

*E. A. Freeman*, *Venice*, p. 42.

Everybody knows that speeches are little, that debates are often nothing, in Congress and elsewhere; but votes tell. It is the vote that men want.

*Bibliotheca Sacra*, XLVII. 544.

**To hear tell of.** See *hear*.

**tell**<sup>1</sup> (tel), *n.* [*< tell*<sup>1</sup>, *v.*] That which is told; account; narration; story; tale. [*Rare.*]

There, I am at the end of my tell! If I write on, it must be to ask questions.

*Walpole*, *To Mann*, April 4, 1743.

Little Barb'ry's the very flower of the flock, accordin' to my tell.

*E. Eggleston*, *The Century*, XXXV. 44.

**tell**<sup>2</sup> (tel), *n.* [*< Ar.* *tell*, a hill.] A hill or mound: common in Oriental place-names.

The east bank of the Tigris, where gigantic tells or artificial mounds, and the traces of an ancient city wall, bore evident witness of fallen greatness.

*Encyc. Brit.*, XVII. 511.

**tellable** (tel'a-bl), *a.* [*< tell*<sup>1</sup> + *-able*.] Capable of being told; worth telling.

**tell-bill-willy** (tel'bil-wil'i), *n.* [*Imitative.*] The willet, *Symphemia semipalmata*. See cuts under *willet* and *semipalmate*. [*Bahamas.*]

**tell-clock** (tel'klok), *n.* [*< tell*<sup>1</sup>, *v.* + *obj. clock*.] One who sits and counts the hours; an idler.

Is there no mean between busybodies and tell-clocks, between factotums and faintcasts?

*Rev. S. Ward*, *Sermons*, p. 131.

**telled** (teld). An obsolete or provincial preterit of *tell*<sup>1</sup>.

**tellen** (tel'en), *n.* [*< Sp.* *telina* = *F.* *telline*, < *NL.* *Tellina*, < *Gr.* *τῆλε*, a kind of shell-fish: see *Tellina*.] A bivalve of the genus *Tellina* or of some of the related *Tellinidæ*. *P. P. Carpenter*.

**teller** (tel'er), *n.* [*< ME.* *tellere*; < *tell*<sup>1</sup> + *-er*.] 1. One who counts or enumerates. Specifically—

(a) One of two or more persons, members of a deliberative or legislative body, appointed, when a division takes place, to count the votes cast for and against a particular proposal or measure. In the British House of Commons there are two tellers appointed for each party, of whom one for the ayes and another for the noes are associated to check each other in the telling. In the United States House of Representatives but one is appointed for each party. (b)

One of four officers (styled *talliers* in old records) formerly employed in the British Exchequer to receive money payable to the king and to pay money payable by the king. The office was abolished in 1834 by 4 & 5 Will. IV., c. 15, and the duties of the four tellers are now performed by a controller-general of the receipt and issue of the Exchequer. See *tallier*.

Sir Edward [Carey] was a gentleman of the Chamber, and one of the four Tellers of the Exchequer.

*H. Hall*, *Society in Elizabethan Age*, ix.

(c) A functionary in a banking establishment whose business it is to receive or to pay money over the counter: as, a receiving teller; a paying teller.

**2.** One who tells, recounts, narrates, relates, or communicates something to others: as, a story-teller.

Sr Kenelm was a teller of strange things.

*Evelyn*, *Diary*, June 18, 1670.

It is as Zara that the city is famous, because it is as Zara that its name appears in the pages of the great English teller of the tale.

*E. A. Freeman*, *Venice*, p. 121.

**tellership** (tel'er-ship), *n.* [*< teller* + *-ship*.] The office or post of teller; a position as teller.

**tellevast**, *n.* See *telavas*.

**Tellicherry bark.** See *conessi bark*, under *bark*<sup>2</sup>.

**Tellina** (te-lin'ä), *n.* [*NL.* (Linnaeus, 1758), < *Gr.* *τῆλε*, a kind of shell-fish.] In

*conch.*, a genus of bivalve mollusks, typical of the family *Tellinidæ*. The shell has a strong external ligament; it is generally thin and handsomely colored. The animal has very long siphons. There are many species, both living and extinct, of all coasts. See also cut under *Tellinidæ*.

**telling** (tel'ing), *a.* Effective; impressive; striking: as, a telling speech on tariff reform.

Not Latimer, not Luther, struck more telling blows against false theology than did this brave singer.

*Emerson*, *Robert Burns*.

**telling-house** (tel'ing-hous), *n.* One of the rude cots in which shepherds on the moor meet at the end of the pasturing season, to tell or count their sheep. *R. D. Blackmore*, *Lorna Doone*, ii., note. [*Prov. Eng.*]

**tellingly** (tel'ing-li), *adv.* In a telling manner; so as to be effective; effectively.

The doctrine that poetry, not philosophy, is the true interpretation of life, is put tellingly and persuasively.

*The Academy*, Dec. 1, 1888, p. 345.

**Tellinidæ** (te-lin'i-dē), *n. pl.* [*NL.*, < *Tellina* + *-idæ*.] A family of bivalve mollusks, of which the genus *Tellina*

is the type. The animal has the mantle-lobes wide open in front, but continued into very long, separate siphons behind; the labial palpi are large and triangular; the gills are united behind and appendiculate; the foot is tongue-shaped and compressed. The shell is nearly equilateral, and generally has cardinal and anterior and posterior lateral teeth.

**tellinite** (tel'i-nit), *n.* [*< Tellina* + *-ite*.] A fossil shell of the genus *Tellina*, or some similar one; a petrified tellen.

**telltale** (tel'täl), *n.* and *a.* [*< tell*<sup>1</sup>, *v.*, + *obj. tale*.] **I. n.** 1. One who officiously or heedlessly communicates information concerning the private affairs of others; one who tells that which is supposed to be secret or private; a blabber; an informer; a tale-bearer.

One that quarrells with no man, but for not pledging him, but takes all absurdities, and commits as many, and is no tell-tale next morning though hee remember it.

*Bp. Earle*, *Micro-cosmographie*, An Ordinaire Honest

[Follow.]

If you see your master wronged by any of your fellow-servants, be sure to conceal it, for fear of being called a tell-tale.

*Swift*, *Advice to Servants* (General Directions).

*Tellina lingua felis*, right valve.

*Tellina radiata*

The children, who are always house *tell-tales*, soon made him acquainted with the little history of the house and family.

Thackeray, Henry Esmond, XI.

2. An indication or an indicator; that which serves to convey information.

Paint those eyes, so blue, so kind,  
Finger *tell-tales* of her mind.

M. Arnold, A Memory-Picture.

3. A name given to a variety of instruments or devices, usually automatic, used for counting, indicating, registering, or otherwise giving desired information. Specifically: (a) In organ-building, a piece of bone, metal, or wood, moving in a slot, which is so connected with the bellows as to indicate to the blower or player by its position the state of the wind-supply. (b) A hanging compass, generally in the cabin of a ship to show the position of the tiller. (c) A turnstile placed at the entrance of a public hall or other place of resort, and having a mechanism which records the number of persons passing in or out. (d) A gage or index which shows the pressure of steam on an engine-boiler, of gas on a gas-holder, and the like. (e) A clock-attachment for the purpose of recording the presence of a watchman at certain intervals. Some forms of this device are provided with a rotating paper dial, showing the hour and minute at which a watchman touched a projecting button communicating by a point with the paper dial. (f) A small overflow-pipe attached to a tank or cistern to indicate when it is full. (g) A bar to which are attached strips of leather, set at a proper height over a railway track to warn brakemen on freight-trains when they are approaching a bridge.

4. In ornith., a tattler; a bird of the genus *Totanus* in a broad sense; as, the greater and lesser *telltale*, *Totanus melanoleucus* and *T. flavipes*. See *tattler*, and cut under *yellowlegs*.

II. a. 1. Disposed to tell or reveal secrets, whether officiously or heedlessly; given to betraying the confidences or revealing the private affairs of others; blabbing; as, *telltale* people.

Let not the heavens hear these *tell-tale* women  
Rail on the Lord's anointed.

Shak., Rich. III., iv. 4. 149.

2. Showing, revealing, or denoting that which is not intended to be known, apparent, or proclaimed; as, *telltale* tears; *telltale* blushes.

The *telltale* snow, a sparkling mould,  
Says where they go and whence they came;  
Lightly they touch its carpet cold,  
And where they touch they sign your name.

F. Locker, Winter Fantasy.

3. That gives warning or intimation of something; as, a *telltale* pipe attached to a cistern or tank.—**Telltale clock.** See *clock* 2.

**tell-troth**, *n.* Same as *tell-truth*.

**tell-truth** (tel'trōth), *n.* [Also *tell-troth*; < *tell*, *v.*, + *obj. truth*.] One who speaks or tells the truth; one who gives a true account or report; a veracious or candid person.

Caleb and Joshua, the only two *tell-troths*, endeavoured to deceive and encourage the people.

Fuller, Pisgah Sight, II. iv. 3. (Trench.)

The rudeness of a Macedonian *tell-truth* is no apparent calumny.

Jer. Taylor, Works (ed. 1835), II. 99.

**tellural** (tel'ū-rāl), *a.* [< *L. tellus* (*tellur-*), the earth, + *-al*.] Of or pertaining to the earth.

**tellurate** (tel'ū-rāt), *n.* [< *tellur* (*ic*) + *-ate* 1.] A salt of telluric acid.

**tellur-bismuth** (tel'er-biz'muth), *n.* [< *tellur* (*ium*) + *bismuth*.] Same as *tetradymite*.

**tellurete** (tel'ū-ret), *n.* [< *tellur* (*ium*) + *-et*.] Same as *telluride*.

**tellureted, telluretted** (tel'ū-ret-ed), *a.* [< *tellur* (*ium*) + *-et* + *-ed* 2.] Combined with tellurium.—**Tellureted hydrogen.** H<sub>2</sub>Te, a gaseous compound obtained by the action of hydrochloric acid on an alloy of tellurium. It is a feeble acid, analogous in composition, smell, and other characters to sulphureted hydrogen.

**tellurian** (te-lū'ri-an), *a.* and *n.* [< *L. tellus* (*tellur-*), the earth, + *-ian*.] I. *a.* Pertaining, relating to, or characteristic of the earth or an inhabitant of the earth.

They absolutely hear the *tellurian* lungs wheezing, panting, crying "Bellows to mend" periodically, as the Earth approaches her apheion.

De Quincey, System of the Heavens. (Davies.)

II. *n.* 1. An inhabitant of the earth: so called with reference to supposed inhabitants of other planets.

If any distant worlds (which may be the case) are so far ahead of us *Tellurians* in optical resources as to see distinctly through their telescopes all that we do on earth, what is the grandest sight to which we ever treat them?

De Quincey, Joan of Arc. (Davies.)

2. Same as *tellurian*.

**telluric** (te-lū'rik), *a.* [= *F. tellurique* = *Sp. telúrico*, < *L. tellus* (*tellur-*), the earth.] 1. Pertaining to or proceeding from the earth: as, a disease of *telluric* origin; *telluric* deities.

How the Coleridge moonshine comported itself amid these hot *telluric* flames . . . must be left to conjecture.

Carlyle, Sterling, i. 10. (Davies.)

His [man's] knowledge, his ideas, his treasures of art and literature, have a sensuous origin, just as this fruit has a mineral or *telluric* origin. The Century, XIX. 690.

2. Of, containing, or derived from tellurium: as, *telluric* acid.—**Telluric acid**, H<sub>2</sub>TeO<sub>4</sub>, an oxygen acid of tellurium which is formed when tellurium is deflagrated with niter. The pure acid forms a white powder soluble in hot water.—**Telluric bismuth**, the mineral tetradymite.—**Telluric silver**, hessite.

**telluride** (tel'ū-rid or -rid), *n.* [< *tellur* (*ium*) + *-ide* 2.] A compound of tellurium with an electropositive element. Also called *telluret*.

**telluriferous** (tel'ū-rif'ē-rus), *a.* [< *telluri* (*um*) + *L. ferri* = *E. bear* 1.] Containing or yielding tellurium.

**tellurian** (te-lū'ri-on), *n.* [Also *tellurian*; < *L. tellus* (*tellur-*) + *-i-on*.] An instrument for showing in what manner the causes operate which produce the succession of day and night and the changes of the seasons: a kind of orrery.

**tellurism** (tel'ū-rizm), *n.* [< *L. tellus* (*tellur-*), the earth, + *-ism*.] See the quotation.

There is in magnetism two different actions—one which depends upon a vital principle spread throughout nature, and circulating in all bodies; the other the same principle, modified by man, animated by his spirit, directed by his will. He thinks that the first sort of magnetism, which he calls *tellurism*, or siderism, can be, etc.

Deleuze, Anim. Magn. (trans. 1843), p. 209.

**tellurite** (tel'ū-rit), *n.* [< *tellur* (*ous*) + *-ite* 2.] 1. In chem., a compound of tellurous acid and a base.—2. In mineral., tellurium dioxide, a mineral found in small yellowish or whitish spherical masses, having a radiated structure, occurring with native tellurium.

**tellurium** (te-lū'ri-um), *n.* [NL., < *L. tellus* (*tellur-*), the earth.] Chemical symbol, Te; atomic weight, 125. One of the rarer elements, occurring in nature in small quantity in the native state and also in combination with various metals, as with gold and silver in the form of graphic tellurium, or sylvanite, with gold, lead, and antimony as nagayagite, and in several other mostly very rare mineral combinations. Tellurium is a brittle substance. Its specific gravity is about 6.2. Its chemical properties have made it a problem from an early time, and it was first called *aurum paradoxum* and *metallum problematicum*. That it was not identical with any metal previously known was demonstrated by Klaproth in 1798. Tellurium, although having a decided metallic luster, and occurring in nature almost exclusively in combination with decided metallic elements, most closely resembles sulphur and selenium in its chemical reactions, and is generally classed at the present time among the non-metallic elements, although considered by Berzelius as being a metal.—**Foliated tellurium.** Same as *nagayagite*.—**Graphic tellurium.** Same as *sylvanite*.

**tellurium-glance** (te-lū'ri-um-glāns), *n.* Same as *nagayagite*.

**tellurize** (tel'ū-riz), *v. t.* To mix or cause to combine with tellurium.—**Tellurized ores**, ores which contain tellurium compounds.

**tellurous** (tel'ū-rus), *a.* [< *tellur* (*ium*) + *-ous*.] Of, pertaining to, or obtained from tellurium.—**Tellurous acid**, H<sub>2</sub>TeO<sub>3</sub>, an oxygen acid of tellurium, analogous to selenious acid, and, like it, formed by the action of nitric acid on the element. It is a white insoluble powder, forming with alkalis crystallizable salts.

**Telmatodytes** (tel-ma-to-dī'tēz), *n.* [NL. (Cabanis, 1850), < Gr. τέλμα (τ), a marsh, + δύτης, diver.] A genus of true wrens, or subgenus of *Cistothorus*, under which is often named the common long-billed marsh-wren of the United States, *C. or T. palustris*. See cut under *marsh-wren*.

**telodynamic** (tel'ō-di-nam'ik), *a.* [< Gr. τέλη, afar, + δύναμις, power: see *dynamic*.] In mech., elect., etc., relating to or used in the transmission of power from or to a distance.

The mechanical method of traction by means of the telodynamic cable is preferable to any electric system.

The Engineer, LXVII. 9.

**telolecithal** (tel-ō-les'i-thal), *a.* [< Gr. τέλος, end, + λέκθος, the yolk of an egg.] In embryol., having much food-yolk which is eccentric from the formative yolk, as the large meroblastic eggs of birds: correlated with *alecithal* (having no food-yolk) and *centrolecithal* (which see).

The classification of animal eggs proposed by Balfour is adopted: viz., *alecithal*, *telolecithal*, and *centrolecithal*.

Nature, XXXVII. 507.

**telopore** (tel'ō-pōr), *n.* [< Gr. τέλος, end, + πόρος, pore.] In embryol., a terminal pore left by the closing from before backward of the median furrow produced by the invagination of mesoderm in the embryo of some insects.

Patten, Quart. Jour. Micros. Sci., XXXI. 639.

**telotrocha** (tel'ō-trok), *n.* Same as *telotrocha*.

**telotrocha** (te-lōt'rō-kā), *n.*; pl. *telotrochæ* (-kē). [NL.: see *telotrochous*.] The ciliated embryo of polychæte annelids, having a circle of cilia around the body just in front of the mouth and behind the eyes, on the segment which becomes

the præstomium. There is also usually in such embryos another circle of cilia around the caudal end of the body, and a tuft upon the center of the præstomium. See *atrocha*, *mesotrocha*. Also, irregularly *telotrocha*.

**telotrochal** (te-lōt'rō-kal), *a.* [< *telotroch* (*ous*) + *-al*.] Same as *telotrochous*. Gegenbaur, Comp. Anat. (trans.), p. 137.

**telotrochous** (te-lōt'rō-kus), *a.* [< Gr. τέλος, end, + τροχός, a wheel: see *trochus*.] Surrounded by terminal cilia, as an annelidous larva; having the character of a telotrocha. Huxley, Anat. Invert., p. 171.

**telotype** (tel'ō-tip), *n.* [Irreg. < Gr. τύπος, afar, + τύπος, type.] 1. A printing electric telegraph.—2. An automatically printed telegram.

**telpher** (tel'fēr), *n.* [Irreg. < *telegraph* + Gr. φέρω, carry, = *E. bear* 1. (f. *telephage*.)] Of or relating to a system of telpherage.

**telpherage** (tel'fēr-āj), *n.* [< *telpher* + *-age*.] Transportation effected automatically by the aid of electricity; specifically, a system of electric locomotion especially adapted to the transfer of goods, in which the carriages are suspended from electric conductors supported on poles. Every carriage or train of carriages contains an electric motor, which takes the current from the conductors upon which it runs.

This word "*telpherage*" . . . is intended to designate all modes of transport effected automatically with the aid of electricity. According to strict rules of derivation, the word would be "*telephorage*"; but in order to avoid confusion with "*telephone*" and to get rid of the double accent in one word, which is disagreeable to my ear, I have ventured to give the new word such a form as it might have received after a few centuries of usage by English tongues, and to substitute the English sounding "*telpher*" for "*telephore*." In the most general sense, telpher lines include such electric railway lines as were first proposed by my colleagues, Messrs. Ayton and Perry. The word would also describe lines, such as I have seen proposed in the newspapers, for the conveyance of small parcels at extremely rapid rates. But to-night I shall confine myself entirely to the one specific form in which the telpher line first presented itself to my mind, and which it has fallen to my lot to develop. In this form telpher lines are adapted for the conveyance of minerals and other goods at a slow pace and at a cheap rate.

Fleming Jenkin, Jour. Soc. of Arts (1884), XXXII. 648.

**telpherway** (tel'fēr-wā), *n.* The road, line, or way on which transportation by the system of telpherage is carried on.

**telson** (tel'son), *n.* [NL., < Gr. τέλσον, a boundary, limit.] In zool., the last segment, or an azygous appendage of the last segment, or the median axis of the last segment, whether in one piece or more, of certain crustaceans and arachnidans, as the middle flipper of a lobster's tail-fin, the long sharp tail of a horseshoe-crab, and the sting of a scorpion. In long-tailed crustaceans a broad flat telson combines with similar swimmerets to form the rhipidura. In some thysanurous insects the telson is a small plate at the end of the abdomen, and is either a modified segment or, more properly, a median azygous appendage. See cuts under *Amphithoe*, *Euryptera*, *horseshoe-crab*, *scorpion*, and *Squilla*.

**telt**. An obsolete or provincial preterit of *tell* 1.

**Telugu** (tel'ō-gō), *n.* [Also *Teloogo*; < *Telugu* *Telugu*, also *Telungu*, *Telingu*, etc., < *Telingā*, one of the people of the country called *Telingā* or *Tilingana*.] The language of the district in the east of the Deccan inhabited by the Telingas: a Dravidian dialect. Also used adjectively.

**temenos** (tem'e-nos), *n.*; pl. *temene* (-nē). [< Gr. τέμενος, a piece of land marked off, a sacred inclosure, < τέμνειν, *temnēin*, cut: see *tome*. Cf. *temple* 1.] In Gr. antiq., a sacred inclosure or precinct; a piece of land marked off from common uses and dedicated to a god; a precinct, usually surrounded by a barrier, allotted to a temple or sanctuary, or consecrated for any other reason.

The building was surrounded with a wall of brick forming a court or *temenos*.

Encyc. Brit., II. 388.

**Temenuchus** (tem-e-nū'kus), *n.* [NL. (Cabanis, 1850), so called as occupying pagodas in India; < Gr. τεμενοῦχος, holding a piece of land (a sacred inclosure), < τέμενος, a piece of land, a sacred inclosure (see *temenos*), + ἔχειν, have, hold.] A genus of Old World starlings, with exposed nostrils, a bare postocular area, and an enormous crest of lanceolate feathers overhanging the back of the neck. The only species is *T. pagodarum*, the pagoda-thrush of Latham, originally described as "*Brahm's martin*" by Sonnini in 1782, which extends from Afghanistan to Ceylon, and is a well-known bird of the whole peninsula of India. The male is 8½ inches long, the wing 4, the tail 2½. The general color is lavender-gray, varied with black, white, and cinnamon: the long crest is greenish-black, the feet are yellow, and the eyes are white. The female is similar, but rather smaller and with a shorter crest. See cut on following page.

**temerarious** (tem-e-rā'ri-us), *a.* [= *F. téméraire* = *Sp. Pg. It. temerario*, < *L. temerarius*,

Pagala Starling, Temia n. n. pag. d. n. n.

that happens by chance, imprudent, < temere, by chance, at random, rashly: see temerity, temerous.] Heedless or careless of consequences; unreasonably venturesome; reckless; headstrong; inconsiderate; rash; careless.

I spoke against temerarious judgment.

Latimer, 4th Sermon bef. Edw. VI., 1549.

**temerariouly†** (tem-ē-rā'ri-us-li), *adv.* In a temerarious or presumptuous manner; rashly; inconsiderately.

It asserts and enacts that they have no right, as they "temerariouly" presume, and usurpously take on themselves, to be parcel of the body, in manner claiming that without their assents nothing can be enacted at any parliament within this land." Hallam. (Imp. Dict.)

**temeration†** (tem-ē-rā'shon), *n.* [*L. temeratio* (-n-), a dishonoring or profaning, < *L. temerare*, pp. *temeratus*, violate, pollute, lit. 'treat rashly,' < *temere*, rashly, at random.] Contamination; profanation; pollution.

Those cryptic ways of institution by which the ancients did hide a light, and keep it in a dark lantern from the temeration of ruder handlings and popular preachers.

Jer. Taylor, Works (ed. 1835), II. 121.

**temerity** (tē-mer'i-ti), *n.* [= *F. témérité* = *Pr. temeritat* = *Sp. temeridad* = *Pg. temeridade* = *It. temerità*, < *L. temerita* (-t-), chance, accident, rashness, < *temere*, by chance, casually, rashly. (Cf. *temerous*.) Extreme venturesomeness; rashness; recklessness.

The temerity that risked the fate of an empire on the chances of a single battle. Hallam, Middle Ages, i. 4.

It appears to me that I cannot, without exposing myself to the charge of temerity, seek to discover the (impenetrable) ends of Deity.

Descartes, Meditations (tr. by Veitch), iv.

=*Syn.* Rashness, Temerity (see *rashness*); venturesomeness, presumption, foolhardiness.

**temerous** (tem-ē-rus), *a.* [*ML. temerus*, developed after the analogy of other adjectives as related to adverbs in -e, < *L. temere*, by chance, rashly; see *temerity*, *temerarious*.] Heedless; rash; reckless. [Rare.]

Temerous tauntesse that delights in toys.

Uncertain Authors, Agt. an Unstaid Woman.

I have not the temerous intention of disputing for a moment.

Atlantic Monthly, I.XI. 251.

**temerously** (tem-ē-rus-li), *adv.* Heedlessly; rashly; recklessly. [Rare.]

Not that I temerously define anything to come.

Ep. Bale, Image, ii. fol. 69.

**temia** (tē'mi-ā), *n.* A bird of the genus *Cypripodina* of Vieillot, *C. varians*.

Temia cypripodina varians.

**temiak** (tem'i-ak), *n.* [Eskimo.] A jacket worn by Eskimo men and women. See *jumpet*.

Seal-skin temiaks, or jumpers, were found serviceable only in windy weather, and were but little used.

A. W. Grebb, Arctic Service, p. 208.

**Temminck's sandpiper or stint.** See *stint*, 3. **Temnorhis** (tem'nō-ris), *n.* [*N.L.*, < *Gr. τέμνω*, cut, + *πίς*, nose.] In *ornith.*, same as *Suthora*.

**temp.** An abbreviation of Latin *tempore*, in the time, or in the time of.

The history of the Cardinal of S. Praxedes, who made it [the family of Bainbrige] famous, temp. Henry VIII.

N. and Q., 7th ser., XI. 80.

**Tempean** (tem'pē-an), *a.* [*L. Tempe*, < *Gr. Τέμπε*, contraction of *Τέμερα*, pl., Tempe (see def.) in Thessaly.] Of, pertaining to, or resembling Tempe, a beautiful vale in Thessaly, celebrated by the classic poets.

**temper** (tem'pēr), *v.* [*ME. temperen*, *temperen*, *temperen*, < *AS. temprian* = *OF. temperer*, *F. temper* = *Pr. temprar*, *temprar* = *Sp. templar* = *Pg. temperar* = *It. temperare*, < *L. temperare*, divide or proportion duly, mingle in due proportion, qualify, temper, regulate, rule, intr. observe measure, be moderate or temperate, < *tempus*, time, fit season: see *temporal*. Cf. *temper*, *v.* Hence also ult. *attempter*, *attempter*, *contemper*, *distemper*, *temperate*, etc.] **1. trans.** 1. To modify by mixing; mix; blend; combine; compound.

And other Trees, that beren Venym; azenst the whiche there is no Medecyne but on; and that is to taken here propre Leves, and stampe hem and *tempere* hem with Watre, and than drynke it. Mandeville, Travels, p. 189.

In *temperynge* his colours, he lacked good size.

Sir T. Elyot, The Governour, iii. 19.

The queen, sir, very oft importuned me

To *temper* poisons for her.

Shak., Cymbeline, v. 5. 250.

**2. To combine in due proportions; constitute; adjust; fit.**

But God hath *tempered* the body together: . . . that there should be no schism in the body, but that the members should have the same care one for another.

1 Cor. xii. 24, 25.

Who of us can live content, as we are *tempered*, without some hero to admire and worship?

H. Bushnell, Sermons for New Life, p. 57.

Either this being should not have been made mortal, or mortal existence should have been *tempered* to his qualities.

Hawthorne, Seven Gables, ix.

**3. To moisten, mix, and work up into proper consistency; prepare by moistening, mixing, or kneading.**

After the clay has been allowed to "mellow, or ripen," in pits, under water, it is passed through the pug-mill and well kneaded or *tempered*.

Ure, Dict., III. 997.

To *temper* clay means to mix it thoroughly, and prepare it for the use of the moulder, who must have it in a condition not too soft nor yet too hard, but in a suitable state of plasticity to be easily and solidly moulded into bricks.

C. T. Davis, Bricks and Tiles, p. 106.

**4. To modify or qualify by blending: as, to temper indignation with pity.**

I shall *temper* so

Justice with mercy as may illustrate most

Them fully satisfied, and thee appease.

Milton, P. L., x. 77.

The young and happy are not ill pleased to *temper* their life with a transparent shadow.

Hawthorne, Seven Gables, ix.

Hence — **5. To restrain; moderate; mitigate; soften; tone down the violence, severity, or harshness of; mollify; soothe; calm.**

zif thou tynest that toun, *tempre* thyn yre

As thy mersy may malte thy meke to spare.

Alliterative Poems (ed. Morris), II. 775.

The waters whereof, temperatly drunken, did exceeding *temper* the braine, and take away madnesse.

Purchas, Pilgrimage, p. 332.

"God *temper* the wind," said Maria, "to the shorn lamb."

Sterne, Sentimental Journey (Maria).

Gloomy canopies of stone, that *temper* the sunlight as it streams from the chapel windows.

J. A. Symonds, Italy and Greece, p. 173.

**6. In music, to tune or adjust the pitch of (the tones of an instrument of fixed intonation, like an organ or pianoforte), with reference to a selected principle of tuning. The term is also extended to the tones and intervals of the voice and of instruments of free intonation. See *temperament*.**

**7. To attune.**

He [Orpheus] wente hym to the howses of helle, and there he *temprede* hise blaudyssynge soonges by resownynge strenges.

Chaucer, Boethius, iii. meter 12.

Meanwhile the rural ditties were not mute,

*Temper'd* to the oaten flute. Milton, Lycidas, l. 33.

**8†. To govern; control; regulate; train.**

He *tempreth* the tonge to-treuthe-ward and no tresore coueiteth.

Piers Plowman (B), xiv. 308.

Cato . . . was so moche inflated in the desire of learning that . . . he coude nat *tempre* him selfe in redyng Greke bokes whyles the Senate was sitting.

Sir T. Elyot, The Governour, iii. 24.

**9. To bring to a proper degree of hardness and elasticity for use, as steel or other metal. Steel is tempered by being first heated to a high temperature, and then rapidly cooled; it is then reheated to the desired temperature, and cooled again. The surface of steel when thus reheated undergoes a regular succession of changes of color, and these indicate exactly when the process is to be stopped in order that the right hardness may be secured. The following table exhibits the order of succession of the colors shown by the steel in tempering, also the degree of the thermometer at which that color appears, and some of the articles for which that especial hardness is best suited:**

Temperature	Color	Article
430	Very pale yellow	Lancets.
450	Straw-yellow	Razors and surgical instruments.
490	Brownish yellow	Scissors, chisels.
510	Purplish brown	Axes, planes.
530	Purple	Table cutlery.
550	Light blue	Spring, saws.
560	Dark blue	Fine saws, augers.
600	Blackish blue	Hand-saws.

Our men that went to discover those parts had but two iron pickaxes with them, and those so ill *tempered* that the points turned againe at every stroke; but triall was made of the Oare, with argument of much hope.

Purchas, Pilgrimage, p. 761.

The *temper'd* metals clash, and yield a silver sound.

Dryden, Æneid, viii. 699.

**10†. To dispose.**

'Tis she

That *temper* him to this extremity.

Shak., Rich. III., i. 1. 65.

**II. intrans.** **1†. To accord; keep agreement.**

Few men rightly *temper* with the stars.

Shak., 3 Hen. VI., iv. 6. 29.

**2. To become soft and plastic; be molded; acquire a desired quality or state.**

I have him already *tempering* between my finger and my thumb.

Shak., 2 Hen. IV., iv. 3. 140.

**temper** (tem'pēr), *n.* [= *It. tempera*, *tempra*, temper, kind, sort, tempera; from the verb.]

**1. Mixture or combination of different ingredients or qualities, especially in the way and the proportions best suited for some specific purpose: as, the temper of mortar.—2. Constitution; consistency; form; definite state or condition.**

Yorick was just bringing my father's hypothesis to some *temper*.

Sterne, Tristram Shandy, ix. 32.

**3†. Temperament.**

The exquisiteness of his [Christ's] bodily *temper* increased the exquisiteness of his torment.

Fuller, Pisgah Sight, I. 345. (Trench.)

**4. Disposition of mind; frame of mind; inclination; humor; mood: as, a calm temper; a hasty temper; a sullen or a fretful temper.**

A creature of a most perfect and divine *temper*; one in whom the humours and elements are peaceably met, without emulation of precedence.

B. Jonson, Cynthia's Revels, ii. 1.

Grave Henry hath succeeded him in all things, and is a gallant Gentleman, of a French Education and *Temper*.

Howell, Letters, I. iv. 15.

Such as have a knowledge of the town may easily class themselves with *temper* congenial to their own.

Goldsmith, Various Clubs.

It may readily be imagined how little such thwarting agrees with the old cavalier's fiery *temper*.

Irving, Sketch-Book, p. 388.

**5†. Calmness of mind; temperateness; moderation; self-restraint; tranquillity; good temper.**

You are too suspicious,

And I have borne too much beyond my *temper*.

Fletcher, Double Marriage, i. 1.

The Emperor heard the Heralds with great *Temper*, and answered Clarendieux very mildly.

Baker, Chronicles, p. 275.

How could I think with *temper* of passing my days among Yahoos?

Swift, Gulliver's Travels, iv. 10.

**6. Heat of mind or passion; irritation; disposition to give way to anger, resentment, or the like: as, he showed a great deal of temper.—7. Middle character or course; mean or medium; compromise. [Obsolete or archaic.]**

A *temper* between [the opinions of] France and Oxford. John Hampden, quoted by Macaulay, Nugent's Hampden.

They made decrees of toleration, and appointed *temper* and expedients to be drawn up by discreet persons.

Jer. Taylor, Works (ed. 1835), II. 297.

The perfect lawgiver is a just *temper* between the man of theory, who can see nothing but general principles, and the mere man of business, who can see nothing but particular circumstances.

Macaulay.

**8. The state of a metal, particularly as to its hardness and elasticity: as, the temper of iron or steel.**

His fears were vain; impenetrable charms

Secur'd the *temper* of th' ethereal arms.

Pope, Iliad, xx. 315.

**9. In sugar-works, white lime or other alkaline substance stirred into a clarifier filled with**

came-juice, to neutralize the excess of acid.—  
**Good temper**, freedom from passionate irritability; good nature.—**Out of temper**, in bad temper; irritated.—  
**To keep one's temper**, to avoid becoming angry or irritated; control one's temper.

But consider this to have been how Bets to lay  
 them how to have your temper while you play.  
*Conjreave*, tr. of Ovid's *Art of Love*, III.

**To lose one's temper**, to become angry.

**tempera** (tem'pə-rā, n. [It.; see *temper*.] In painting, same as *dis temper*².

**Tempera**, or *Dis temper*, is a method of painting in which soft pigments are employed, mixed with a water medium in which some kind of gum or gelatinous substance is dissolved to prevent the colours from scaling off. *Tempera* is called in Italy "fresco a secco," as distinguished from "fresco buono," or true fresco, painted on freshly laid patches of stucco. *Engc. Brit.* XXIII, 157.

**temperable** (tem'pə-rə-bl, a. [*temper* + *-able*].) Capable of being tempered.

Do not the constructive fingers of Watt, Fulton, Whittemore, Arkwright predict the fusible, hard, and temperable texture of metals? *Emerson*, *History*.

**temperament** (tem'pər-a-ment), n. [*F. temperament* = Sp. *Pg.* *temperamento*, *L.* *temperamentum*, due proportion, proper measure, < *temperare*, modify, proportion: see *temper*.]

1. State with respect to the relative proportion of qualities or constituent parts; constitution; mixture of opposite or different qualities; a condition resulting from the blending of various qualities.

The common law has wasted and wrought out those distempers, and reduced the kingdom to its just state and temperance. *Sir M. Hale*.

2. That individual peculiarity of physical organization by which the manner of acting, feeling, and thinking of every person is permanently affected: as, a phlegmatic *temperament*; a sanguine *temperament*; the artistic *temperament*. Certain temperamental types have long been recognized (see the phrases below); they may serve the purposes of description, but do not represent any very well marked natural groups.

3. A middle course or an arrangement reached by mutual concession, as by a tempering of extreme claims on either side; adjustment of conflicting influences, as passions, interests, or doctrines, or the means by which such adjustment is effected; compromise.

I forejudge not any probable expedient, any *temperament* that can be found in things of this nature, so disputable on either side. *Milton*, *Free Commonwealth*.

Auricular confession . . . was left to each man's discretion in the new order: a judicious *temperament*, which the reformers would have done well to adopt in some other points. *Hallam*, *Const. Hist.*, I, 88.

4†. Condition as to heat or cold; temperature.

Bodies are denominated hot and cold in proportion to the present *temperament* of that part of our body to which they are applied. *Locke*, *Elem. of Nat. Phil.*, xi.

Madeira is a fertile island, and the different heights and situations among its mountains afford such *temperaments* of air that all the fruits of northern and southern countries are produced there.

*B. Franklin*, *Autobiography*, p. 313.

5. In *music*, the principle or system of tuning in accordance with which the tones of an instrument of fixed intonation are tuned, or those of the voice or of an instrument of free intonation are modulated in a given case. The relative pitch of the tones of an ideal scale may be fixed with mathematical precision. An instrument tuned so as to produce such a scale, or a voice or instrument using the intervals of such a scale, is said to be tuned or modulated in *pure* or *just temperament*. So long as these tones only are used, no further adjustment is necessary. But if modulation be attempted, so that some other tone than the original one becomes the key-note, one or more intercalary tones are required, and the relative pitch of some of the original tones has to be altered. To fit an instrument for varied modulations, therefore, either a large number of separate tones must be provided for, or the pitch of some of them must be slightly modified, so that a single tone may serve equally well for either of two or more tones whose pitches are theoretically different. This subject is necessarily of great practical importance in the construction of keyboard-instruments, like the pianoforte and the organ. Until comparatively recently such instruments were tuned in *mean-tone* or *mesotonic temperament*, so called because based on the use of a standard whole step or mean tone, which is an interval half-way between a greater and a less major second (see *second*¹, *step*, and *tone*¹). This standard was applied to the tuning of twelve digitals to the octave—namely, C, C², D, E, E², F, F², G, G², A, B, and B²; and provided for harmonious effects only in the keys (tonalities) of C, D, F, G, A, and B, major, and of D, G, and A, minor. Other tonalities presented an intolerable deviation from pure temperament, which was called the "wolf." As the demand for greater freedom of modulation increased, various plans were tried for using more than twelve digitals to the octave, or for distributing the "wolf" more equally. The result of the latter effort is the system of *equal* or *even temperament*, first advocated by J. S. Bach early in the eighteenth century, though not universally adopted until the middle of the nineteenth century, in which the standard interval is the mean semitone—that is, the twelfth part of an octave. This distributes

the "wolf" among all the tones of the instrument, so that the only intervals exactly true are octaves. Modulation, therefore, is made equally free in all directions; but, on the other hand, all chords are more or less out of tune. The benefits of the system in the way of providing a simple keyboard for music in many tonalities are largely counterbalanced by the constant deterioration of the sense of pure intonation on the part of those who use instruments tuned in this compromise temperament. This unmistakable disadvantage, reinforced by the fact that keyboard-instruments are much used in conjunction with the voice and with instruments of free intonation, like the violin, in which a just temperament is to be expected, has led to many new experiments with keyboards of more than twelve digitals to the octave, but without any result suitable for general adoption. Temperaments are sometimes known by various technical names, usually designating the interval chosen as a unit of measurement, such as *commatic*, *schismic*, etc.—**Choleric or bilious temperament**, a temperament which in its typical forms presents a swarthy complexion, dark hair and eyes, well developed musculature, strength of vital organs, and strong passions with tenacity of purpose.—**Lymphatic temperament**, a temperament which in its typical forms presents a pallid skin, flabby muscles, and sluggishness of vital, voluntary, and mental action.—**Nervous temperament**, a temperament which in its typical forms presents delicate features, frequent quick pulse, irritability of vital functions, and alertness of mind and body.—**Sanguine temperament**, a temperament which in its typical forms presents a brilliant complexion, activity of the circulation and respiration, ardent, not always persistent emotions, activity of mind and enterprise, somewhat lacking in tenacity.—  
**To set the temperament**. See *set*, v. t.

**temperament** (tem'pər-a-ment), v. t. [*temperament*, n.] To constitute as regards temperament.

Men are not to the same degree *temperamented*, for there are multitudes of men who live to objects quite out of them, as to politics, to trade, to letters or art, unhindered by any influence of constitution. *Emerson*, *Woman*.

**temperamental** (tem'pər-a-men'tal), a. [*temperament* + *-al*]. Of or pertaining to temperament.

Few overcome their *temperamental* inclinations.

*Sir T. Browne*, *Christ. Mor.*, iii, 22.

Undoubtedly there is a *temperamental* courage, a warlike blood, which loves a fight, does not feel itself except in a quarrel, as one sees in wasps, or ants, or cocks, or cats. *Emerson*, *Courage*.

**temperamentally** (tem'pər-a-men'tal-i), adv. In temperament; as regards temperament. *The Century*, XX, 89.

**temperance** (tem'pər-ans), n. [Early mod. E. also *temperance*; < ME. *temperance*, < OF. *temperance*, *temprance*, F. *temperance* = Pr. *tempransa* = Sp. *templanza*, *temperancia* = Pg. *temperança* = It. *temperanza*, < L. *temperantia*, moderation, sobriety, < *temperan*(-t)s, ppr. of *temperare*, moderate, temper: see *temperant*.] 1. Moderation; the observance of moderation; temperateness.

True sentiment is emotion ripened by a slow ferment of the mind and qualified to an agreeable *temperance* by that taste which is the conscience of polite society.

*Lowell*, *Among my Books*, 1st ser., p. 366.

Particularly—(a) Habitual moderation in regard to the indulgence of the natural appetites and passions; restrained or moderate indulgence; abstinence from all violence or excess, from inordinate or unseasonable indulgence, or from the use or pursuit of anything injurious to moral or physical well-being; sobriety; frugality: as, *temperance* in eating and drinking; *temperance* in the indulgence of joy or grief; in a narrower sense, moderation in the use of alcoholic liquors, as beverages; or, in a still narrower sense as used by its advocates, entire abstinence from such liquors: in this sense also used attributively: as, a *temperance* society; a *temperance* hotel; a *temperance* lecture.

If thou well observe  
 The rule of—Not too much; by *temperance* taught,  
 In what thou eat'st and drink'st; seeking from thence  
 Due nourishment, not glutinous delight; . . .  
 So mayest thou live; till, like ripe fruit, thou drop  
 Into thy mother's lap. *Milton*, P. L., xi, 531.

When the Chaldean Monarchy fell, the Persians, who were the sword in God's right hand, were eminent for nothing more than their great *temperance* and frugality.

*Strillingfleet*, *Sermons*, I, x.  
 Many a day did he fast, many a year did he refrain from wine; but when he did eat, it was voraciously; when he did drink wine, it was copiously. He could practise abstinence, but not *temperance*.

*Boswell*, *Johnson*, March, 1781.

(b) Moderation of passion; self-restraint; self-control; calmness.

And calmed his wrath with goodly *temperance*.

In the very torrent, tempest, and, as I may, the whirlwind of passion, you must acquire and beget a *temperance*, that may give it smoothness.

*Shak.*, *Hamlet*, iii, 2, 8.

2†. The act of tempering or mixing; temperament.

The . . . mutual conjunction and just *temperance* of . . . two studies. *Sir T. Elyot*, *The Governour*, iii, 24.

3†. Moderate degree of temperature; equal state.

And in your bed lye not to hote nor to colde, but in a *temperance*. *Babees Book* (E. E. T. S.), p. 246.

4†. Temperature.

It [the island] must needs be of subtle, tender, and delicate *temperance*. *Shak.*, *Tempest*, ii, 1, 42.

**Temperance hotel**, a hotel in which no intoxicating liquors are supplied to the guests or kept for sale.—**Temperance movement**, a social or political movement having for its object the restriction or abolition of the use of alcoholic liquors as beverages.—**Temperance society**, an association formed for the purpose of suppressing drunkenness. The basis on which these associations have been formed has been that of an engagement on the part of each member to abstain from the excessive or habitual use of intoxicating liquors. But, since the most strictly limited use of intoxicants as beverages is condemned by many social reformers, this name has been very generally applied to, or assumed by, associations which are more correctly designated *total-abstinence societies* = *Syn.* 1. (a) *Abstinence*, *Sobriety*, etc. See *abstemiousness*.

**temperancy** (tem'pər-an-si), n. [As *temperance* (see -cy).] Temperance.

**temperant**, a. [ME. *\*temperant*, *temperant*, < OF. *temperant*, F. *temperant* = Sp. It. *temperante* = Pg. *temperante*, < L. *temperant*(-s), ppr. of *temperare*, moderate, temper: see *temper*, *temperate*.] Moderate; temperate.

Northward in places hote, in places colde

Southward, and *temperant* in Est and West.

*Palladius*, *Husbandrie* (E. E. T. S.), p. 5.

**temperate** (tem'pər-āt), a. [*ME. temperate* = F. *tempéré* = Sp. *templado* = Pg. *templado*, *temperado*, < L. *temperatus*, pp. of *temperare*: see *temper*. Cf. *tempre*.] 1. Moderate; showing moderation; not excessive, lavish, or inordinate.

And what you fancy to bestow on him,  
 Be not too lavish, use a *temperate* bounty.  
*B. Jonson*, *Staple of News*, ii.

Let not the government of the plantation depend upon too many counsellors and undertakers in the country that planteth, but upon a *temperate* number.

*Bacon*, *Plantations* (ed. 1887).

Rain-scented eglantine

Gave *temperate* sweets to that well-wooing Sun.

*Keats*, *Endymion*, i.

In these [early French Pointed capitals] alone is perfect structural adaptation joined with the highest and most *temperate* grace. *C. H. Moore*, *Gothic Architecture*, p. 208.

More especially—(a) Moderate as regards the indulgence of the appetites or desires; abstemious; sober; continent: as, *temperate* in eating; *temperate* habits.

He that is *temperate* fleeth pleasures voluptuous.  
*Sir T. Elyot*, *The Governour*, iii, 19.

If he be insatiable in plunder and revenge, shall we pass it by because in meat and drink he is *temperate*?

*Macaulay*, *Conversations between Cowley and Milton*.

(b) Not violent or extravagant in the use of language; calm; measured; dispassionate: as, a *temperate* discourse.

The sentence of the board of generals which condemned André remains, and no document could be more *temperate* or better reasoned. *Lecky*, *Eng.* in 18th Cent., xiv.

2. Not swayed by passion; calm; self-contained; self-restrained; not extreme in opinions.

Whanne the Sowdon had hard hym every dele,  
 Withynne a while he was right *temperate*.  
*Geoffrey Chaucer* (E. E. T. S.), I, 1661.

The *temperate* man deliteth in nothyng contrary to reason.

*Sir T. Elyot*, *The Governour*, iii, 20.

Who can be wise, amazed, *temperate* and furious,

Loyal and neutral in a moment?

*Shak.*, *Macbeth*, ii, 3, 114.

Peace, lady! pause, or be more *temperate*.

*Shak.*, *K. John*, ii, 1, 195.

3. Proceeding from temperance; moderate.

He [Richard Baxter] belonged to the mildest and most *temperate* section of the Puritan body.

*Macaulay*, *Hist. Eng.*, iv.

4. Moderate in respect of *temperature*; not liable to excessive heat or cold; mild; specifically, noting certain zones of the earth's surface.

When *temperate* heat offends not with extremes.  
*Dekker and Ford*, *Sun's Darling*, iv, 1.

They said they came to an Island of a very *temperate* Air, where they look'd upon it as the greatest Indecency in the World to cover their Bodies.

*N. Bailey*, tr. of *Colloquies of Erasmus*, I, 370.

5. In *music*, same as *tempered*.—**Temperate zones**, the parts of the earth lying between the tropics and the polar circles, where the climate is cooler than between the tropics and warmer than within the polar circles. The north *temperate* zone is the space included between the tropic of Cancer and the arctic circle; and the south *temperate* zone, that between the tropic of Capricorn and the antarctic circle. See *zone*. = *Syn.* 1-4. *Moderate*, *Temperate*. See *moderate*.

**temperatet** (tem'pər-āt), v. t. [*L. temperatus*, pp. of *temperare*, modify, temper: see *temper*, v.] To temper; moderate.

In heaven and earth this power beauty hath—  
 It inflames *temperance*, and *temperates* wrath.

*Marston and Barkedel*, *Insatiate Countess*, i.

Sometimes *temperated* by the comfortable winds, to which it lies open.

*Sandys*, *Travailes*, p. 178.

**temperately** (tem'pər-āt-li), adv. In a temperate manner or degree. (a) Moderately; not excessively.

- I love good wine,  
As I love health and joy of heart, but *temperately*.  
Fletcher, Wit without Money, iii. 1.
- (b) Without over indulgence in eating, drinking, or the like, abstemiously; soberly.
- God esteems it part of his service if we eat or drink; so it be *temperately*, and as may best preserve health.  
Jer. Taylor.
- (c) Without violence or extravagance; dispassionately; calmly; sedately.

*Temperately* proceed to what you would  
Thus violently redress. Shaks., Cor., iii. 1. 219.

**temperateness** (tem'pér-ăt-nes), *n.* The state or character of being temperate. Specifically (a) Moderation; freedom from excess: as, *temperateness of language*. (b) Due control of the natural appetites or desires; temperance; sobriety. (c) Calmness; sedateness; equanimity of mind. (d) Freedom from excessive heat or cold: as, the *temperateness of a climate*.

**temperative** (tem'pér-ă-tiv), *a.* [*LL. temperatus*, serving to moderate, < *L. temperare*, temper: see *temper*.] Having the power or quality of tempering.

**temperature** (tem'pér-ă-tūr), *n.* [*OF. temperatura* (also *temperure*, > *ME. temperure*). *F. température* = *Pr. tempradura* = *Sp. templadura* = *Pg. temperatura*, *It. temperatura*, < *L. temperatura*, due measure, proportion, composition, or quality, temper, temperament, *temperature*, < *temperare*, moderate, temper: see *temper*. (cf. *temperure*.] 1. Mixture, or that which is produced by mixture; a compound.

Made a *temperature* of brass and iron together.

A proper *temperature* of fear and love. Abp. Secker.  
2. Constitution; state; temperament.

The best composition and *temperature* is to have openness in fame and opinion, secrecy in habit.

Bacon, Simulation and Dissimulation (ed. 1887).  
3. Moderation; freedom from passions or excesses.

In that proud port which her so goodly graceth . . .  
Most gently *temperature* ye may descry.

Spenser, Sonnets, xiii.  
A difficult thing it is for any man that is rich not to submit his minde and affection vnto his money; and, passing many a *Crossus* in wealth, to beare a modest *temperature* with Numa.  
Heywood, Hierarchy of Angels, p. 590.

4. Temper, as of metals.  
The due *temperature* of stiff steel.  
Holland, tr. of Plutarch, p. 95.

5. Temperateness; mildness.  
This territory being 15. myle from the shoare, for pleasantest of seate, for *temperature* of climate, fertility of soyle, and comoditie of the Sea, . . . is not to be excelled by any other whatsoever.

Quoted in Capt. John Smith's Works, I. 87.

6. The state of a substance with regard to sensible heat; the degree or intensity of the sensible heat of a body. Primarily the conception of temperature is based on the different sensations produced by bodies when termed *hot*, *warm*, or *cold*, the hotter body being said to have the higher temperature. Again two bodies are said to have the same temperature when, by being placed in contact, neither is heated or cooled by the other. But these conceptions are relative. The absolute physical condition implied by temperature depends upon the nature of heat. Heat being considered to be molecular motion, temperature (or the degree of heat) is the expression of the velocity of the motion. The *absolute scale of temperature* recognizes this property, and preserves it in numerical measures which are proportional to the square of the corresponding molecular velocities. Thus temperature has the same dimensions as heat. The *absolute zero of temperature* is the point at which molecular motion ceases and all heat vanishes. This point is computed to be at  $-273^{\circ}$  on the centigrade scale. Sir W. Thomson has shown that the changes in either volume or pressure of an ideal gas would give an absolute scale of temperature which would give true relative measures of absolute amounts of heat. In this system the temperature  $t$  is defined by the equation  $E = kt$ , in which  $E$  is the average kinetic energy per molecule of a perfect gas which has that temperature, and  $k$  a constant. This is called the thermodynamic definition of temperature. It should be noted that temperatures are true relative measures of the absolute amounts of heat which they contain so far as the specific heat of the bodies remains constant. In practice temperature is measured by the changes produced in bodies by heat, and thermometry is the instrumental art employed. Experiments show that the air- or gas-thermometer approximates most closely to the thermodynamic requirement that its indications shall bear a linear relation to successive increments of heat. In the next instance, the normal mercurial thermometer possesses this property to a high degree, and the small departures of its indications from the linear law have been made the subject of elaborate investigation. Other thermometers differ more or less widely in their indications from the foregoing, and it is important to note that without the thermodynamic conception the definition of temperature is dependent on the particular instrument or method employed for its measurement. After considering the thermodynamic scale and its absolute zero, it will be recognized that the system of numeration of the usual Fahrenheit and centigrade scales is entirely arbitrary. Numerical temperatures on these scales have only a relative significance, and cannot be made to serve in any absolute sense. See *thermometry*.

Water boils at a lower *temperature* at the top of a mountain than it does at the seashore, and . . . ice melts at the same *temperature* in all parts of the world.

Clerk Maxwell, Heat, p. 33.  
Our sensations of *temperature* vary considerably according to the "subjective" *temperature*.

J. Sully, Outlines of Psychol., p. 167.

7. Specifically, the thermal element of weather or climate. If the whole surface of the earth were either land or water, and perfectly homogeneous, there would be the same temperature at every point on the same latitude; but in the case of an entire land surface the difference of temperature between the equator and the pole, and consequently the temperature gradient, would be much greater than in the case of an earth entirely covered by water. In the case of the actual earth with continents and oceans, the temperature gradients between the equator and the pole on the continents are somewhat as they would be in the case of an entire land surface, while on the ocean they are somewhat as on an entire water surface, and consequently the temperature gradients on the former are greater than on the latter; hence there are differences of temperature on the same latitude in different longitudes, and temperature gradients arise between regions of land and regions of water. As a result of these diversifying conditions, the mean sea-level temperature can be expressed as a function of latitude and longitude only by empirical methods, and by utilizing a large mass of observed data. The diminution of temperature with altitude is a further variation that can often be independently treated.

8. In *physiol.* and *pathol.*, the degree of heat of a living body, especially of the human body. It is usually taken, clinically, in the axilla, under the tongue, or in the rectum.

The pulse, respiration, and *temperature* may improve.  
J. M. Carnochan, Operative Surgery, p. 393.

**Absolute temperature.** See *absolute*.—**Absolute zero of temperature.** See *def. 6* and *absolute*.—**Animal temperature.** the temperature of an animal, which in cold-blooded animals is but slightly above that of their surroundings, but in warm-blooded animals is maintained at a more or less constant point considerably above that of their surroundings. In the latter it is under the control of a nervous (thermotactic) mechanism, and is dependent on the coordinated regulation of the production of heat by vital metabolism (thermogenesis) and the loss of heat by conduction, by radiation, by evaporation, and otherwise (thermolysis). The temperature of a man in health, taken in the mouth or axilla, varies from about  $98^{\circ}$  to  $99^{\circ}$  F. Temperature above this is called *pyrexia*.—**Critical temperature.** Same as *critical point* (b). See under *critical*.—**Mean temperature.** a mean for any given period of air-temperatures systematically observed each day at a given place; or, without reference to time, the mean of a series of temperature observations extending over a long number of years. The latter is, more specifically, the *mean annual temperature*, and is the average of a series of annual means. The annual mean for any year is usually taken as the average of all the monthly means; the monthly mean is the average of the daily means; and the daily mean is obtained from some combination of individual observations.—**Perverse temperature-sensations.** See *sensation*.

**temperature-alarm** (tem'pér-ă-tūr-ă-lärm'), *n.* An adjustable apparatus for indicating automatically the variation from a certain point of the temperature of the place where it is fixed.

**temperature-curve** (tem'pér-ă-tūr-kêrv'), *n.* A curve exhibiting the variations of temperature during a given period.

**tempered** (tem'pêrd), *a.* 1. Having a certain temper or disposition; disposed: often used in composition: as, a good-tempered man.

When was my lord so much ungently *temper'd*,  
To stop his ears against admonishment?  
Shaks., T. and C., v. 3. 1.

Loath was he to move  
From the imprinted couch, and, when he did,  
'Twas with slow, languid paces, and face hid  
In muffing hands. So *temper'd*, out he stray'd.  
Keats, Endymion, ii.

2. In *music*, noting an instrument, scale, or interval that is tuned in accordance with some other temperament than just or pure temperament, specifically one tuned in equal temperament. See *temperament*, 5.—**Tempered clay**, clay prepared for molding by moistening and kneading.—**Tempered-clay machine**, in *brick-manuf.*, one of a class of machines by which tempered or moistened clay is molded into bricks or tiles.—**Tempered glass.** See *glass*.

**temperedly** (tem'pêrd-li), *adv.* In a tempered manner.

**temperer** (tem'pér-êr), *n.* [*< temper + -er*.] One who or that which tempers, in any sense.

They are weighed out in quantities of about 30 lbs., which contain from 250,000 to 500,000 needles, and are carried in boxes to the *temperer*.  
Ure, Dict., III. 410.

It is the duty of the *temperer* to see that sufficient water is let to the clay to soak it.

C. T. Davis, Bricks and Tiles, p. 113.

**tempering** (tem'pér-ing), *n.* [Verbal *n.* of *temper*, *v.*] 1. The process of giving to any metal the desired hardness and elasticity. See *temper*, 9. Also called *annealing*.—2. In *music*, the act, process, or result of tuning an instrument, scale, or interval in accordance with some other temperament than just or pure temperament, especially with equal temperament. See *temperament*, 5.

**tempering-furnace** (tem'pér-ing-fêr' nās), *n.* A furnace adapted for the uniform heating of articles which are to be tempered.

**tempering-oven** (tem'pér-ing-uv' n), *n.* In *glass-manuf.*, an annealing-oven used after the melting-oven.

**tempering-wheel** (tem'pér-ing-hwêl), *n.* An apparatus for mixing and tempering clay for use in brick-making, etc. It consists of a heavy cast-iron wheel moving in a circular pit, and so geared that it alternately approaches the central pivot and recedes from it.

**temperouret**, *n.* See *temperure*.

**temper-screw** (tem'pér-skro), *n.* 1. In *well-boring*, the connecting-link between the working-beam and the cable, which is let out as fast as the drill penetrates the rock, so as to regulate the play of the jars. When the whole length of the screw is run out, it is disengaged and carried up, so as in a few minutes to be ready for another run. See *cut under oil-derrick*.

2. A set-screw the point of which bears against an object or a bearing, and serves to adjust it.  
E. H. Knight.

**temperure**, *n.* [*ME.*, also *temperoure*, *temprure*, < *OF. \*temperure*, < *L. temperatura*, due measure, temper, temperature: see *temperatura*.] Tempering; temperament.

The *temprure* of the mortere  
Was maad of lycour wonder dere.  
Rom. of the Rose, l. 4177.

An other suche as Arione,  
Whiche had a harpe of suche *temprure*  
. . . that he the bestes wilde  
Made of his note tame and milde.  
Gower, Conf. Amant., Prolog. (Richardson.)

**tempest** (tem'pest), *n.* [*< ME. tempest, tempeste*, < *OF. tempeste*, *F. tempête* = *Pr. tempesta* (< *L.* as if *\*tempesta*; cf. *tempestus*, *adj.*) = *Sp. tempestad* = *Pg. tempestade* = *It. tempesta*, < *L. tempesta* (t)-s, time, esp. time with respect to physical conditions, weather, and specifically bad weather, a storm or tempest, hence also commotion, disturbance, < *tempos* (tempor-, *tempos*-), time: see *temporal*.] 1. A very violent storm; an extensive current of wind, rushing with great velocity and violence, and commonly attended with rain, hail, or snow; a furious gale; a hurricane.

When thei in ese wene best to lyve,  
They ben with *tempest* alle fordyve.  
Rom. of the Rose, l. 3782.

What at first was called a gust, the same  
Hath now a storm's, anon a *tempest*'s name.  
Donne, The Storm.

2. A violent tumult or commotion; perturbation; violent agitation: as, a *tempest* of the passions; a popular or political *tempest*.

The *tempest* in my mind  
Doth from my senses take all feeling else  
Save what beats there. Shaks., Lear, iii. 4. 12.

A *tempest* in a tea-pot, a great disturbance over a small matter.—*Syn.* 1. Hurricane, etc. See *wind*.  
**tempest** (tem'pest), *v.* [*< ME. tempesten*, < *OF. tempester*, *F. tempêter* = *Pr. Sp. tempear* = *Pg. tempear* = *It. tempestare*, storm; from the noun.] 1. *trans.* To disturb violently, as by a tempest; rouse; throw into a state of commotion; agitate.

*Tempest* thee noight al croked to redresse,  
In trust of hir that turneth as a ball.  
Chaucer, Truth, l. 8.

Part huge of bulk,  
Wallowing unwieldy, enormous in their gait,  
*Tempest* the ocean. Milton, P. L., vii. 412.

Your last letters betray a mind . . . *tempest*ed up by a thousand various passions.  
Goldsmith, Citizen of the World, xlvii.

II. *intrans.* To descend as a tempest; be tempestuous; storm. [Rare.]

And, by their excess  
Of cold in virtue, and cross heat in vice,  
Thunder and *tempest* on those learned heads,  
Whom Cæsar with such honour doth advance.  
B. Jonson, Poetaster, v. 1.

**tempestarian** (tem-pes-tā'ri-an), *n.* A sorcerer who professed to raise tempests by magical arts. Bingham, Antiquities, xvi. 5.

**tempest-beaten** (tem'pest-bē'tn), *a.* Beaten or disturbed by or as by a tempest.

In the calm harbour of whose gentle breast  
My *tempest* beaten soul may safely rest.  
Dryden, Amingzebe, i. 1.

**tempestive** (tem'pes-tiv), *a.* [*< OF. \*tempestif* = *Sp. Pg. It. tempestivo*, < *L. tempestivus*, timely, seasonable, opportune, < *tempesta*, time: see *tempest*.] Timely; seasonable.

This despised and dejected shrub . . . was left standing alone, neither obscured from the comfortable beams of the Sunne, nor covered from the chearefull and *tempestive* showres of the Heavens.  
Heywood, Hierarchy of Angels, p. 532.

**tempestively** (tem'pes-tiv-ly), *adv.* Seasonably.

Dancing is a pleasant recreation of body and mind, if tempestively used. *Barton, Anat. of Mel.*, p. 399.

**tempestivity** (tem-pes-tiv-i-ti), *n.* [= *Sp. tempestividad* = *OF. tempestivité*, < *L. tempestivitas*, timeliness, seasonableness, < *tempestivus*, timely, seasonable: see *tempestive*.] Seasonableness.

Since their dispersion, and habitation in countries whose constitutions admit not such tempestivity of harvests, . . . there will be found a great disparity in their observations. *Sir P. Browne, Vulg. Err.*, vi. 3.

**tempest-tossed, tempest-tost** (tem'pest-tost), *a.* Tossed by or as by a tempest.

Though his bark cannot be lost,  
Yet it shall be tempest-tost.

*Shak., Macbeth*, i. 3. 25.

**tempestuous** (tem-pes'tu-us), *a.* [*< OF. tempestueux*, *F. tempestueux* = *Pr. tempestuos*, *tempestos* = *Sp. Pg. tempestoso* = *It. tempestoso*, < *L. tempestuosus*, stormy, turbulent, < *L. tempestus*, tempest: see *tempest*.] 1. Very stormy; turbulent; rough with wind; stormy: as, a tempestuous night. Also used figuratively.

We had now very tempestuous Weather, and excessive Rains, which so well'd the River that it overflowed its Banks; so that we had much ado to keep our Ship safe.

*Dampier, Voyages*, i. 360.

Her looks grow black as a tempestuous wind.

*Dryden, Indian Emperor*, iv. 4.

High in his hall, rock'd in a chair of state,

The king with his tempestuous council sate.

*Dryden, tr. of Ovid's Epistles*, xi. 76.

2. Subject to fits of stormy passion; impetuous.

Bruno was passionate, tempestuous, and weak. *Ouida.*

**tempestuously** (tem-pes'tu-us-ly), *adv.* In a tempestuous manner; with great violence or commotion; turbulently.

**tempestuousness** (tem-pes'tu-us-ness), *n.* The state or character of being tempestuous; storminess; turbulence.

**templar** (tem'plär), *n.* [Formerly also *templer*; < *ME. temple* = *D. tempelier* = *G. templer*, < *OF. (and F.) templier* = *Pr. templier* = *Sp. Pg. templario* = *It. tempiere*, < *ML. templarius*, a templar, prop. adj., < *L. templum*, a temple: see *temple*.] 1. [cap.] A member of a military order, also called Knights Templars or Knights of the Temple, from the early headquarters of the order in the Crusaders' palace at Jerusalem (the so-called temple of Solomon). The order was founded at Jerusalem about 1118, and was confirmed by the Pope in 1128. Its special aim was protection to pilgrims on the way to the holy shrines, and the distinguishing garb of the knights was a white mantle with a red cross. The order took a leading part in the conduct of the Crusades, and spread rapidly, acquiring great wealth and influence in Spain, France, England, and other countries in Europe. Its chief seats in the East were Jerusalem, Acre, and Cyprus, and its European headquarters was a foundation called the Temple, then just outside of Paris. The members were composed of knights, men-at-arms, and chaplains; they were grouped in commanderies, with a preceptor at the head of each province, and a grand master at the head of the order. The Templars were accused of heresy, immorality, and other offenses by Philip IV. of France in 1307, and the order was suppressed by the Council of Vienne in 1312.

In that Temple duellen the Knyghtes of the Temple, that weren wont to be clept *Templeres*; and that was the foundacioun of here Ordre. *Mandeville, Travels*, p. 88.

2. A student of the law, or a lawyer, so called from having chambers in the Temple in London. See *temple*, 5.

The reader cannot but observe what pains I have been at in polishing the style of my book to the greatest exactness: nor have I been less diligent in refining the orthography by spelling the words in the very same manner as they are pronounced by the chief patterns of politeness at court, at levees, at assemblies, at play-houses, at the prime visiting places, by young *templers*, and by gentlemen-commoners of both universities, who have lived at least a twelvemonth in town, and kept the best company.

*Swift, Polite Conversation*, Int.

The Whigs answered that it was idle to apply ordinary rules to a country in a state of revolution; that the great question now depending was not to be decided by the saws of pedantic *Templars*.

*Macaulay, Hist. Eng.*, x.

**Good Templar**, a member of the Society of Good Templars, organized for the promotion of total abstinence from intoxicating drinks, and modeled in some respects upon the system of freemasonry. — **Knights Templars**. (a) See def. 1. (b) See *knights*.

**templar** (tem'plär), *a.* [*< LL. templaris*, of or pertaining to a temple, < *L. templum*, temple: see *temple*.] Of, pertaining to, or performed in a temple. [Rare.]

Solitary, family, and templar devotion. *Coleridge.*

**temple** (tem'plät), *n.* Same as *templet*.

**temple** (tem'pl), *n.* [*< ME. temple*, < *AS. templ*, *templ* = *D. G. Sw. Dan. templ* = *OF. (and F.)*

*temple* = *Sp. An edifice dedicated to the service of a deity or deities, and connected with a system of worship. The most celebrated and architecturally perfect of the ancient temples were those of the Greeks, as that of Zeus at Olympia, that of Athena Parthenos (the Parthenon) at Athens, and that of Apollo at Delphi. The form ordinarily given to classical temples was

that of a rectangle, but sometimes the construction was circular, or even of irregular plan. Vitruvius divides temples into eight kinds, according to the arrangement of their columns: namely, temples in *antis* (see *anti*), *prostyle*, *amphiprostyle*, *peripteral*, *dipteral*, *pseudodipteral*, *hypethral*, and *monopteral*. (See these words.) In regard to intercolumniation, they are further distinguished as *pneustyle*, *syetyle*, *eustyle*, *diastyle*, and *areostyle* structures, and in regard to the number of columns in front, as *tetrastyle*, *hexastyle*, *octastyle*, and *decastyle*. (See these words.) Circular temples are known as *monopteral*, with or without a cella. The temples of ancient Egypt are impressive from their great size and from the number and mass of the pillars ordinarily introduced in their construction; those of India are remarkable for the elaborateness of their plan and elevation, and the lavishness of their sculptured decoration. See also cuts under *dipteral*, *cella*, *monopteron*, *octastyle*, *pantheon*, *opisthodomus*, and *prostyle*.

In this connection the term "house of God" has quite a different sense from that which we connect with it when we apply it to a Christian place of worship. A temple is not a meeting-place for worshippers; for many ancient temples were open only to priests, and as a general rule the altar, which was the true place of worship, stood not within the house but before the door. The temple is the dwelling-house of the deity to which it is consecrated, whose presence is marked by a statue or other sacred symbol; and in it his sacred treasures, the gifts and tribute of his worshippers, are kept, under the charge of his attendants or priests.

*Encyc. Brit.*, XXIII. 165.

2. The religious edifice of the Jews in Jerusalem. There were three buildings successively erected in the same spot, and entitled, from the names of their builders, the temple of Solomon, the temple of Zerubbabel, and the temple of Herod. The first was built by Solomon, and was destroyed by Nebuchadnezzar about 586 B. C. The second was built by the Jews on their return from the captivity (about 537 B. C.), and was pillaged or partially destroyed several times, as by Antiochus Epiphanes, Pompey, and Herod. The third, the largest and most magnificent of the three, was begun by Herod the Great, and was completely destroyed at the capture of Jerusalem by the Romans (A. D. 70). Various attempts have been made toward the restoration of the first and the third of these temples, but scholars are not agreed in respect to architectural details. The ornament and design were in any case of severe and simple character, though rich materials were used. The successive temples all consisted of a combination of buildings, comprising courts separated from and arising one above another, and provided also with chambers for the use of the priests and for educational purposes. The inclosure of Herod's temple covered nineteen acres. It comprised an outer court of the Gentiles, a court of the women, a court of Israel, a court of the priests, and the temple building, with the holy place, and within all entered only once a year, and only by the high priest—the holy of holies. Within the court of the priests were the great altar and the laver, within the holy place the golden candlestick, the altar of incense, and the table for the showbread, and within the holy of holies the ark of the covenant and the mercy-seat.

Out of that sayd Temple oure Lord drof the Byggerses and the SELLERS.

And he sware, By this Habitate—that is, the Temple,  
*Purchas, Pilgrimage*, p. 138.

3. An edifice erected as a place of public worship; a church; in France, specifically, a Protestant church, as distinguished from a Roman Catholic place of worship, which alone is usually spoken of as a church (*église*).

That time [for the outward service] to me towards you is Tuesday, and my temple the Rose in Smithfield.

*Donne, Letters*, xxiv.

The true Christian . . . loves the good, under whatever temple, at whatever altar he may find them.

*Sydney Smith*, in Lady Holland, iii.

4. Metaphorically, any place in which the divine presence specially resides.

Know ye not that your body is the temple of the Holy Ghost which is in you, which ye have of God, and ye are not your own?

1 Cor. vi. 19.

My chamber were no temple, my body were no temple, except God came to it.

*Donne, Sermons*, iv.

5. [cap.] The name of two semi-monastic establishments of the middle ages, one in London, the other in Paris, occupied by the Knights Templars. The Temple Church, London, is the only part of either establishment now existing. On the site of the London Temple the two Inns of Court called the Middle Temple and Inner Temple now stand; they have long been occupied by barristers, and are the joint property of the two societies called the Societies of the Inner and of the Middle Temple, which have the right of calling candidates to the degree of barrister. The Temple in Paris was the prison of Louis XVI. and the royal family during their sufferings in 1792 and 1793.

6. An inn of court.

A gentle maunciple was ther of a temple.

*Chaucer, Gen. Pro.* to C. T., l. 567.

**Master of the temple.** See *master*. — **Temple jar, temple vase**, a jar or vase such as are used for the decoration and ceremonial of religious temples in China, Japan, etc. — **Temple jewelry.** See *jewelry*.

**temple** (tem'pl), *v. t.*; pret. and pp. *templed*, ppr. *templing*. [*< templi*, *n.*] To build a temple for; appropriate a temple to; inclose in a temple. [Rare.]

The heathen (in many places) *templed* and adored this drunken god.

*Feltham, Resolves*, l. 84.

**temple** (tem'pl), *n.* [*< ME. temple*, < *OF. temple*, *F. temple*, dial. *temple* = *Pr. temple* = *It. tempia*, < *L. tempora*, the temples, pl. of *tempus*, temple, head, face.] 1. The region of the head or skull behind the eye and forehead, above and mostly in front of the ear. This area corresponds to the temporal fossa above the zygomatic arch, where the skull is very thin and is covered by the temporal muscle.

King Helenus wav'd high the Thracian blade,

And smote his temples with an arm so strong

The helm fell off, and roll'd amid the throng.

*Pope, Iliad*, xiii. 729.

2. In *entom.*, the posterior part of the gena, or that immediately beneath the eye.—3. One of the bars sometimes added to the ends of spectacle-bows to give them a firmer hold on the head of the wearer. See *spectacle*, 5.—4. An ornament worn at the side of the head or covering the side of the head, mentioned in the fifteenth century as apparently sometimes of needlework, sometimes set with jewels. *Fairholt*.

**temple** (tem'pl), *n.* [*< F. temple*, *templet*.] An attachment to a loom for keeping the cloth stretched, while the reed beats the threads into place after each throw of the shuttle. One form is automatic, releasing the cloth and then stretching it after each stroke of the lay.

**templeless** (tem'pl-less), *a.* [*< temple* + *-less*.] Devoid of a temple. *Bulwer, Caxtons*, iv. 2.

**templet** (tem'plät), *n.* See *templer*.

**templet** (tem'plät), *n.* [*< F. templet*, a stretcher, < *L. templum*, a small timber, a purlin.] 1. A pattern, guide, or model used to indicate the shape any piece of work is to assume when finished. It may also be used as a tool in modeling plastic material, or as a guide placed in a milling-machine, shaper-lathe, or other automatic cutting-machine. In these applications it may be a thin piece of wood or metal, with one or all the edges cut in profile to the shape of the baluster, cornice, part of a machine, or other object to be wrought to shape. Templets are also used as guides in filing sheet-metal to shape, as in making small brass gears for clocks, sheets of brass being clamped between steel templets, and all the parts projecting beyond the edges being filed away. Templets are used in founding as patterns in forming molds in loam.

2. A strip of metal used in boiler-making, pierced with a series of holes, and serving as a guide in marking out a line of rivet-holes.—3. In *building*: (a) A short piece of timber or a large stone placed in a wall to receive the impost of a girder, beam, etc., and distribute its weight. (b) A beam or plate spanning a door- or window-space to sustain joists and throw their weight on the piers. (c) One of the wedges in a building-block. *E. H. Knight*.—4. Same as *temple*.—5. In a brilliant, same as *bezel*, 2. See cut under *brilliant*.

**templify** (tem'pli-fy), *v. t.*; pret. and pp. *templified*, ppr. *templifying*. To make into a temple. [Rare.]

**temporary** (tem'pō-rā-ri), *a.* [= *F. temporaire* = *Sp. Pg. temporario*, < *L. temporarius*, lasting but for a time, < *tempus* (*tempor-*), time, season; see *temporal*.] 1. Lasting for a time only; existing or continuing for a limited time; not permanent.

These temporary truces and peacees were soone made and soone broken. Bacon, Hist. Hen. VII., p. 191.

I am satisfied, that, as we grow older, we learn to look upon our bodies more and more as a temporary possession, and less and less as identified with ourselves.

O. W. Holmes, Professor, viii.

2†. Contemporary; of the period. [Rare.]

This excellent little piece ["Devil upon Two Sticks"], though it admits of some temporary strokes, such as the ridicule on the college of physicians, the political doctor, &c., yet exhibits them worked up in so brilliant and general a manner as to be always new.

W. Cooke, S. Foote, I. 83.

**Temporary administrator.** Same as *special administrator* (which see, under *special*). — **Temporary allegiance.** See *allegiance*, 1. — **Temporary cartilage.** See *cartilage*. — **Temporary excise.** See *Act of the Hereditary Excise*, under *excise*. — **Temporary hours.** See *hour*. — **Temporary injunction.** See *ad interim injunction*, under *injunction*. — **Temporary star,** a star which bursts in a few days into great brilliancy, and after some weeks or months sinks into lasting dimness. = *Syn.* 1. **Temporary, Temporal** (see *temporal*), transient, fleeting, transitory, ephemeral, evanescent, brief.

**temporalization, temporise, etc.** See *temporalization*, etc.

**temporist** (tem'pō-ris't), *n.* [*L. tempus* (*tempor-*), time, season, + *-ist*.] A temporizer.

Why turn a temporist, row with the tide? Marston.

**temporalization** (tem'pō-ri-zā'shən), *n.* [= *F. temporalisation* = *Pg. temporalização*; as *temporize* + *-ation*.] The act of temporizing; time-serving. Also spelled *temporalisation*.

He [Graunt] allows that suspicions and charges of temporalization and compliance had somewhat sullied his reputation. Johnson, Ascham.

**temporize** (tem'pō-riz), *v. i.*; pret. and pp. *temporized*, ppr. *temporizing*. [= *F. temporiser* = *Sp. Pg. temporizar* = *It. temporeggiare*; as *L. tempus* (*tempor-*), time, season, + *-ize*.] 1. To comply with the time or occasion, or with the desires of another; yield temporarily or ostensibly to the current of opinion or circumstances.

The Dauphin is too wilful-opposite,  
And will not temporize with my entreaties;  
He flatly says he'll not lay down his arms.

Shak., K. John, v. 2. 125.

'Twas then no time her grievance to reveal,  
'He's mad who takes a lion by the ears.'  
This knew the Queen, and this well knew the wise,  
This must they learn that rightly temporize.

Drayton, Barons' Wars, i. 36.

2†. To parley.

For that he could not brook to temporise

With humours masked in those times' disguise.

Ford, Fame's Memorial.

All these temporize with other for necessities, but all as uncertain as peace or warres.

Capt. John Smith, Works, I. 128.

3. To dilly-dally; delay; procrastinate.

The Earle of Lincolne, deceived of his hopes of the Countreies concourse unto him (in which case he would have temporized), . . . resolved . . . to give him [the king] bataille.

Bacon, Hist. Hen. VII., p. 43.

All parties joined in entreating for the people a share in legislation. The duke of York temporized.

Bancroft, Hist. U. S., II. 413.

Also spelled *temporise*.

We have atheists that serve no God, mammonists that serve their money, idolaters that serve creatures, apostates that forsake God, worldlings, temporisers, neutrals, that serve many, serve all, serve none.

Rev. T. Adams, Works, I. 444.

**temporizing** (tem'pō-ri-zing), *p. a.* [Ppr. of *temporize*, *v.*] Inclined to temporize; complying with the time or with the prevailing humors and opinions of men; time-serving.

The proceedings exhibit Henry [IV.] as a somewhat temporising politician, but not as a cruel man.

Stubbs, Const. Hist., § 303.

**temporizingly** (tem'pō-ri-zing-li), *adv.* In a temporizing manner.

**temporo-alar** (tem'pō-rō-ā-lār), *a.* In *ornith.*, pertaining to the temporal region and to the wing; as, the *temporo-alar* muscle.

**temporo-alaris** (tem'pō-rō-ā-lā-ris), *n.*; pl. *temporo-alares* (-rēs). The temporo-alar muscle of a bird. It is nearly the same as that usually called the *demotensor patagii*. Fiallac.

**temporo-auricular** (tem'pō-rō-ā-rik'ū-lār), *a.* Of or pertaining to the temporal and auricular regions of the head: applied to one of the

divisions of the trigeminal nerve. See *auriculotemporal*.

**temporoccipital** (tem'pō-rok-sip'i-tal), *a.* Pertaining to the temple and the back of the head; common to the temporal and occipital regions of the skull.

**temporofacial** (tem'pō-rō-fā-shal), *a.* Of or pertaining to the temporal and facial regions of the head.—**Temporofacial nerve,** the larger of the two terminal divisions of the facial nerve, distributed to the supra-auricular and pre-auricular muscles, the frontalis, corrugator supercilii, and orbicularis palpebrarum.

**temporohyoid** (tem'pō-rō-hi'oid), *a.* Of or pertaining to the temporal and hyoid bones; noting muscles or ligaments connecting these bones. See *epihyal*, *stylohyal*.

**temporomalar** (tem'pō-rō-mā-lār), *a.* Of or pertaining to the temporal fossa and the malar bone.—**Temporomalar canals,** canals leading from the orbital to the temporal and facial surfaces of the malar bone. There are usually two, known as the *temporal* and the *malar canal*.—**Temporomalar nerve,** a small branch of the superior maxillary nerve distributed to the skin of the cheek and temple: same as *orbital nerve* (which see, under *orbital*).

**temporomandibular** (tem'pō-rō-man-dib'ū-lār), *a.* Of or pertaining to the temporal bone and the mandible, or lower jaw-bone. See *temporomaxillary*.

The act of testing or trying; trial. [Archaic.]

Or hath God assayed to go and take him a nation from the midst of another nation, by temptations, by signs, and by wonders? Deut. iv. 34.

A temptation is only another word for an experiment, or trial; a trial whether we will do or forbear such a thing.

Ep. Atterbury, Sermons, II. iv.

2. Enticement to evil, as by specious argument, flattery, or the offer of some real or apparent good.

Most dangerous

Is that temptation that doth good us on  
To sin in loving virtue.

Shak., M. for M., ii. 2. 182.

He who resigns the world has no temptation to envy, hatred, malice, anger.

Steele, Spectator, No. 282.

He drilled himself till inflexible habit stood sentinel before all those postern-weaknesses which temperament leaves unbolted to temptation.

Lowell, Cambridge Thirty Years Ago.

3. The state of being tempted, or enticed to evil.

And lead [bring, R. V.] us not into temptation, but deliver us from evil [the evil one, R. V.]. Mat. vi. 13.

In the sixth petition [of the Lord's Prayer], which is, "And lead us not into temptation, but deliver us from evil," we pray that God would either keep us from being tempted to sin, or support and deliver us when we are tempted.

*Shorter Catechism*, ans. to qu. 106.

By one man's firm obedience fully tried  
Through all temptation. *Milton*, P. R., i. 5.

4. That which tempts, or entices to evil; an enticement; an allurements; any tempting or alluring object.

Set a deep glass of rhenish wine on the contrary casket, for if the devil be with and that temptation without, I know he will choose it. *Shak.*, M. of V., i. 2. 106.

There is no place, no state, or scene of life, that hath not its proper and peculiar temptations.

*Bp. Atterbury*, Sermons, I. x.

**temptational** (temp-tā'shon-al), *a.* [*< temptation + -al.*] Of the nature of temptation; tempting; seductive; as, "the temptational agency of lust," *J. Caldwell*, Homiletical Mag., VI. 106.

**temptationless** (temp-tā'shon-less), *a.* [*< temptation + -less.*] Having no temptation or motive. *Hammond*, Works, IV. vii. [Rare.]

**temptations** (temp-tā'shun), *a.* [*< temptati(on) + -ous.*] Tempting; seductive. [Obsolete or rare.]

I, my liege, I. O, that temptations tongue!  
*Death of Rob. E. of Hunt.*, F. I. (Nares.)

She put it [a hat] off and looked at it. There was something almost humanly winning and temptations in it.

*Harper's Mag.*, LXXVIII. 665.

**tempter** (temp'tēr), *n.* [*< ME. temptour, < OF. tempteur, \*tempteur, teneur, F. teneur = Pr. Sp. Pg. tentador = It. tentatore, < L. tentator, one who tempts or attempts, < tentare, tempt: see tempt.*] One who tempts; one who solicits or entices to evil.

Is this her fault or mine?  
The tempter or the tempted?  
*Shak.*, M. for M., ii. 2. 163.

**The tempter**, the great adversary of man; the devil.

And when the tempter came to him, he said, If thou be the Son of God, command that these stones be made bread.

*Mat. iv. 3.*

So glozed the tempter, and his poem tuned;  
Into the heart of Eve his words made way.

*Milton*, P. L., ix. 549.

**tempting** (temp'ting), *p. a.* [*Ppr. of tempt, v.*] That tempts, entices, or allures; attractive; seductive; as, tempting pleasures.

So peruse stomachs have they borne to women that the more part of their temptings spretes they have made she deulya.

*Bp. Bale*, English Votaries, Pref.

To whom [his precursors] he thus owed the service, often an important one in such cases, of exhausting the most tempting forms of error.

*Whevell*, Novum Organon Renovatum.

**temptingly** (temp'ting-li), *adv.* In a tempting manner; seductively; attractively; alluringly.

How temptingly the landscape shines!  
Breathes invitation. *Wordsworth*, Excursion, ix.

**temptingness** (temp'ting-ness), *n.* The state of being tempting.

**temption** (temp'shun), *n.* A reduced form of temptation.

Conceal her; let me not  
As much as know her name; there's temptation in't.

*Middleton and Rowley*, Spanish Gypsy, i. 5.

**temptress** (temp'tres), *n.* [Formerly also *temptress*; *< ME. temptresse, < OF. temptresse* (cf. *F. tentatrice = It. tentatrice*); as *tempter + -ess*.] A woman who tempts or entices.

She was my temptress, the foul provoker. *Scott*.

**tempus** (temp'pus), *n.* [*L.*, time; see *tense*, *temporal*.] In medieval music, a method of dividing a breve into semibreves—that is, rhythmic subdivision. In *tempus perfectum* a breve is equal to three semibreves, in *tempus imperfectum* to two. Compare *mode*, 7 (b), and *prolation*, 4.

**temse** (tems), *n.* [Formerly also *tems*, *temps*, *tempse*; *< ME. temse, tempse, < AS. \*temes = MD. tems, temst, D. tems = MLG. temes, temis, temese*, a colander, sieve; cf. *F. tamis = Fr. tamis = Sp. tamiz = It. tamigio* (Venetian *tamiso*) (ML. *tamisium*), a sieve; origin obscure.] A sieve; a searce; a bolter; a strainer. See the quotation from "Notes and Queries." According to a common statement, the proverbial saying "He'll never set the Thames on fire" (that is, he'll never make any figure in the world) contains this word in a corrupt form. "The *temse* was a corn-sieve which was worked in former times over the receiver of the sifted flour. A hard-working, active man would not infrequently ply the *temse* so quickly as to set fire to the wooden hoop at the bottom." (*Brewer*.) No evidence for this statement appears. The word *Thames* was in Middle English *Temse*, etc., Anglo-Saxon *Temes*. [Obsolete or prov. Eng.]

Marcolphus toke a lytyll cyve or temse in his oon hande, and a foot of a bere in the othre hande.

*Salomon and Marcolphus*. (*Halliwel*.)

I have seen it stated during this discussion and elsewhere that a *tems* in North and West Lancashire means a grain riddle; but this is not exact. A *tems* proper is a sieve with deep sides, very like a peck measure, is 10 or 12 inches in diameter, and has a bottom of woven horse-hair. It is used for taking small particles of butter out of the buttermilk just after churning; one person holds the *tems* over a vessel and another pours in the buttermilk, the hair-work passing the milk and catching the particles of butter. This would not cause a fire, neither is a grain-riddle firing by ordinary hand usage more probable. When worked at the quickest one man riddles while another fills, and the riddle is emptied several times in a minute. The grain also is cold in its normal state, and there is no chance of it or the riddle's getting heated by friction. To a practical man a riddle firing would sound most absurd. If you say to a Lancashire labourer, "Tha'll ne'er set th' *tems* afire," a hundred to one he would understand the river Thames. *N. and Q.*, 6th ser., IX. 14.

**temse** (tems), *v. t.*; pret. and pp. *temsed*, ppr. *temsing*. [Formerly also *tempe*; *< ME. temsen, tempsen, < AS. temsian (= D. temsen = MLG. temesen)*, sift; from the noun.] To sift. [Obsolete or prov. Eng.]

**temse-bread** (tems'bred), *n.* Bread made of flour better sifted than common flour. [*Prov. Eng.*]

**temse-loaf** (tems'lōf), *n.* Same as *temse-bread*. [*Prov. Eng.*]

Some mixeth to miller the rhye with the wheat,

*Temse-loaf* on his table to have for to eat.

*Tusser*, September's Husbandry.

**temulence** (tem'ū-lens), *n.* [*< F. tēulence = Pg. temulencia = It. temulenza, < L. temulentia*, drunkenness, intoxication, *< temulentus*, drunk; see *temulent*.] Intoxication; inebriation; drunkenness. [Rare.]

**temulency** (tem'ū-len-si), *n.* [*As temulencia* (see *cy*).] Same as *temulencia*. *Bailey*. [Rare.]

**temulent** (tem'ū-lent), *a.* [*= Sp. Pg. temulento, < L. temulentus*, drunk.] Intoxicated; given to drink. [Rare.]

He was recognized, in then *temulent* Germany, as the very prince of toppers.

*Sir W. Hamilton*.

**temulentive** (tem'ū-len-tiv), *a.* [*< temulent + -ive.*] Drunken; in a state of inebriation.

*F. Junius*, Sin Stigmatized (1639), p. 38. [Rare.]

**temulently** (tem'ū-lent-li), *adv.* In a drunken manner. *Bailey*, 1727.

**temulentness** (tem'ū-lent-ness), *n.* Same as *temulencia*. *Bailey*.

**ten** (ten), *a. and n.* [*< ME. ten, tene, < AS. tēn, tīen, tēne = OS. tēhan = OFries. tian, tien = D. tien = MLG. tein, LG. tien = OHG. zehan, MHG. zehen, zen, G. zehn = Icel. tíu = Dan. ti = Sw. tio = Ir. See *locomotive*.—**The ten bones**. See *bone*. To face it with a card of *ten*. See *face*.—**Upper ten thousand**. See *upper ten*, under *upper*.

**II. n.** 1. The sum of nine and one, or of five and five.—2. A figure or symbol denoting that number of units or objects, as 10, or X, or x.—3. A playing-card with ten spots.

But, whiles he thought to steal the single ten,  
The king was slyly finger'd from the deck!

*Shak.*, 3 Hen. VI., v. 1. 43.

4. Ten o'clock in the morning or evening: as, I was to be there at *ten*.—5. A certain weight of coal used in the coal-fields of Durham and Northumberland, England, for reckoning the royalty to be paid by the lessee to the lessor. It varies between 48 and 50 tons. *Gresley*.—**Catch the ten**. See *catch*. **Upper ten**. See *upper*.

**tent**, *adv.* Ten times.

Forbode a love, and it is *ten* so wood.

*Chaucer*, Good Women, l. 736.

**ten**. Abbreviation for *tenuto*.  
**tenability** (ten-a-bil'i-ti), *n.* [*< tenable + -ity* (see *-bility*).] The state or character of being tenable; tenableness.

**tenable** (ten'a-bl), *a.* [*< F. tenable, < tenir = Pr. tener, tenir = Sp. tener = Pg. ter = It. tenere*, hold, keep, *< L. tenere*, hold, keep; see *tenant*.] 1. Capable of being held, maintained, or defended successfully against an assailant; successfully defensible against attacks or arguments or objections: as, a *tenable* fortress; a *tenable* theory.

Infidelity has been attacked with so good success of late years that it is driven out of all its out-works. The atheist has not found his post *tenable*, and is therefore retired into deism.

*Addison*, Spectator, No. 186.

The place was scarcely *tenable*, and it was abandoned on the approach of the Spanish army.

*Prescott*, Ferd. and Isa., ii. 3.

2t. Held; retained; kept secret or inviolate.

If you have hitherto conceal'd this sight,  
Let it be *tenable* in your silence still.

*Shak.*, Hamlet, i. 2. 248.

**tenableness** (ten'a-bl-ness), *n.* The state of being tenable; tenability.

**tenace** (ten'as), *n.* [*< F. tenace, tenacious, in demeurer tenace*, hold the best and third best cards, lit. 'stay tenacious': see *demur* and *tenacious*.] In *whist*, the best and third best cards, or the second and fourth best cards, in play, of a suit: known in the former case as a *major tenace*, in the latter as a *minor tenace*.

**tenacious** (tē-nā'shus), *a.* [*= F. tenace = Sp. Pg. tenaz = It. tenace, < L. tenax (tenac)*, holding fast, *< tenere*, hold; see *tenant*.] 1. Holding fast, or inclined to hold fast; inclined to retain what is in possession: with *of* before the thing held; hence, stubborn; obstinate.

A resolute *tenacious* adherence to well chosen principles.

*South*.

A man is naturally most *tenacious* of that which is most liable to be taken from him.

*E. W. Lane*, Modern Egyptians, I. 397.

The religion of ancient Egypt was very *tenacious*, and not easily effaced.

*J. F. Clarke*, Ten Great Religions, vii. 6.

2. Retentive; apt to retain long what is committed to it: said of the memory.

The memory of some . . . is very *tenacious*.  
*Locke*, Human Understanding, II. x. § 5.

3t. Niggardly; close-fisted. *Bailey*, 1727.—4. Apt to adhere to another substance; adhesive, as rosy, glutinous, or viscous matter; sticky; viscid; as, few substances are so *tenacious* as tar.—5. Tough; having great cohesive force between its particles, so that they resist any effort to pull or force them asunder: as, steel is the most *tenacious* of all known substances.

**tenaciously** (tē-nā'shus-li), *adv.* In a tenacious manner. (a) With a disposition to hold fast what is possessed; firmly; determinedly; with unyielding obstinacy; obstinately. (b) Adhesively; with cohesive force.

**tenaciousness** (tē-nā'shus-ness), *n.* The state or character of being tenacious, in any sense; tenacity.

I can allow in clergymen, through all their divisions, some *tenaciousness* of their own opinion.

*Burke*, Rev. in France.

**tenacity** (tē-nas'i-ti), *n.* [*< F. ténacité = Sp. tenacidad = Pg. tenacidade = It. tenacità, < L. tenacita(t)-s*, a holding fast, *< tenax (tenac)*, holding fast; see *tenacious*.] 1. The property or character of being tenacious, in any sense. Specifically—(a) Firmness of hold or of purpose; obstinacy.

I find to my grief that the misunderstanding *tenacity* of some zealous spirits hath made it a quarrel.

*Bp. Hall*, The Reconciler.

Old associations cling to the mind with astonishing *tenacity*.

*Hawthorne*, Old Manse, p. 114.

Their moral notions, though held with strong *tenacity*, seem to have no standard beyond hereditary custom.

*George Eliot*, Mill on the Floss, iv. 1.

The *tenacity* of the English bull-dog . . . was a subject of national boasting.

*Lecky*, Eng. in 18th Cent., iv.

(b) Retentiveness, as of memory. (c) Adhesiveness; that property of matter by virtue of which things stick or adhere to others; glutinousness; stickiness. (d) That property of material bodies by which their parts resist an effort to force or pull them asunder; also, the measure of the resistance of bodies to tearing or crushing: opposed to *brittleness* or *fragility*. *Tenacity* results from the attraction of cohesion which exists between the particles of bodies, and the stronger this attraction is in any body the greater is the *tenacity* of the body. *Tenacity* is consequently different in different materials, and in the same material it varies with the state of the body in regard to temperature and other circumstances. The resistance offered to tearing is called *absolute tenacity*, that offered to crushing *retroactive tenacity*. The *tenacity* of wood is much greater in the direction of the length of its fibers than in the transverse direction. With regard to metals, the processes of forging and wire-drawing increase their *tenacity* in the longitudinal direction; and mixed metals have, in general, greater *tenacity* than those which are simple. See *cohesion*.

The *tenacity* of a substance may be defined as the greatest longitudinal stress that it can bear without tearing asunder.

*J. D. Everett*, Units and Physical Constants, p. 56.

**tenaculum** (tē-nak'ū-lum), *n.*; pl. *tenacula* (-lā). [*NL.*, *< LL. tenaculum*, an instrument for holding, *< L. tenere*, hold; see *tenant*.] 1. A sharp hook, set in a handle, used for picking up arteries in surgical operations, and in dissections.

These [arterial branches] are difficult to tie, even when picked up by the *tenaculum*.

*J. M. Carnochan*, Operative Surgery, p. 62.

2. In *entom.*, the part of microscopic chitinous processes on the under side of the abdomen of podurans or spring-tails, serving as a catch to hold the clasper of springing-organ in place. *A. S. Packard.*

**tenacity** (*ten'as-i*), *v.* [*L. tenax* (*tenax*)] (*see* *tenacious*) + *-y*.] **Tenacity**; obstinacy.

Highest excellence is void of all envy, selfishness, and *tenacity*. *Burton, Sermons, II. xii. (Latham.)*

**tenail, tenaille** (*te-nal'*), *n.* [*F. tenaille* = *It. tenaglia* = *Sp. tenaza* = *It. tenaglia*, < *ML. \*tenacula*, *f.*, orig. *LL. neut. pl. of tenaculum*, a holder; *see* *tenaculum*.] In *fort.*, an outwork or rampart raised in the main ditch immediately in front of the curtain, between two bastions. Its simplest form it consists of two faces forming with each other a reentering angle; but generally it consists of three faces forming two reentering angles, in which case it is called a *double tenail*. Any work belonging either to permanent or to field fortification which, on the plan, consists of a succession of lines forming a series of reentering angles alternately, is said to be a *tenaille*.

**tenaillon** (*te-nal'yon*), *n.* [*F.*: *see* *tenail*.] In *fort.*, a work constructed on each side of the ravelins, like the lunettes, but differing in that one of the faces of the tenaillon is in the direction of the ravelin, whereas that of the lunette is perpendicular to it. Works of this kind are seldom adopted.

**tenancy** (*ten'an-si*), *n.* [*OF. tenance*, possession, = *Sp. Pg. tenencia* = *ML. tenentia*, < *L. tenet* (*ten*), a tenant; *see* *tenant*.] 1. In law: (a) A holding by private ownership; estate; tenure; as, *tenancy* in fee simple; *tenancy* in tail. (b) A habitation or dwelling-place held of another.

The said John Scrips had in like sort divided a Tement in Shordich into or about seventeen *Tenancies* or dwellings, and the same inhabited by divers persons. *Proc. in Star Chamber*, an. 40 Queen Elizabeth, quoted in [Ribton-Turner's Vagrants and Vagrancy, p. 123.]

2. The period during which lands or tenements are held or occupied by a tenant.—**Entire tenancy.** *See* *entire*. Estate in joint tenancy. *See* *estate*.—**Several tenancy.** *See* *entire tenancy*. Severance of a joint tenancy. *See* *severance*.—**Tenancy at will.** *See* *estate at will* under *estate*.—**Tenancy by entireties.** *See* *entirety*.—**Tenancy by the courtesy of England.** *See* *courtesy of England*, under *courtesy*.—**Tenancy from year to year.** a tenancy which is implied by law sometimes, on the termination of a lease for a year or years and a continuance of the possession without a new agreement.—**Tenancy in common.** a holding in common with others; an estate consisting in a right to a share of an undivided thing; a tenancy in which all have or are entitled to a common or joint possession, but each has a separate or several title to his undivided share which he can dispose of without affecting the others; distinguished from *joint tenancy*. *See* *estate*. Sometimes called *coparcenary*.

**tenant** (*ten'ant*), *n.* [*ME. tenant, ternaunt*, < *OF. tennant*, a tenant, = *Pg. It. tennate*, a lieutenant, < *L. tenent* (*ten*), *ppr. of tenere*, hold, keep, possess. Cf. *lieutenant*. From the *L. tenere* are also ult. *E. tenable, tenacious, tenacy, tempt, temptation*, etc.] 1. In law: (a) A person who holds real property by private ownership, by any kind of title, either in fee, for life, for years, or at will. The term is sometimes used in reference to interests in pure personality, as when we speak of one as *tenant* for life of a fund. (b) More specifically, one who holds under a superior owner, as a lessee or occupant for rent: used thus as correlative to *landlord*.

I have been your *tenant*, and your father's *tenant*, these fourscore years. *Shak., Lear*, iv. 1. 14.

[The word always implies indirectly the existence of a paramount right, like that of a feudal lord or the modern right of eminent domain. States or nations are not spoken of as tenants of their own property; subjects and citizens are.]

(c) A defendant in a real action. *See* *action*, 8 (b).—2. One who has possession of any place; a dweller; an occupant.

Oh fields! Oh woods! when, when shall I be made  
The happy tenant of your shade?

*Cowley, The Wish.*

The sheepfold here  
Pours out its fleecy tenants o'er the glebe.

*Cropper, Task*, i. 291.

3. In *her.*, same as *supporter*. A distinction has been made between these terms by alleging that the tenant holds the shield as if keeping it upright, as is usual with modern supporters, but does not support its weight or lift it. (Compare *supporter*.) Some writers, following the French heralds, use *tenant* for a human figure holding or flanking the shield, reserving *supporter* for an animal. *See* *supporter*.—**Chief tenant.** Same as *tenant in capite*.—**Customary tenant.** *See* *customary freehold*, under *customary*.—**Kindly tenant.** *See* *landlord*.—**Landlord and Tenant Act.** *See* *landlord*.—**Particular tenant.** *See* *particular*.—**Sole tenant.** one who holds in his own sole right, and not with another. **Tenant at suffrage**, one who, having been in lawful possession of land, keeps it after the title has come to an end without express agreement with the rightful owner.—**Tenant at will.** one in possession of lands who holds at the will of the lessor or owner.—**Tenant by copy of court-roll.** one who is

admitted tenant of any lands, etc., within a manor.—**Tenant by courtesy.** *See* *under courtesy*.—**Tenant by the verge.** *See* *verge*.—**Tenant for life, life tenant.** *See* *estate for life*, under *estate*.—**Tenant in capite, tenant in chief.** *See* *in capite*.—**Tenant in common.** one who holds lands or chattels in common with another or other persons. *See* *tenancy in common* (under *tenancy*) and *estate in joint tenancy* under *estate*.—**Tenant in dower.** a widow who possesses land, etc., by virtue of her dower. **Tenant pour autre vie.** *See* *autre vie*.—**Tenants by entireties.** *See* *entirety*.—**Tenant to the praepice**, the person to whom a tenant in tail granted an estate for the express purpose of being made defendant in proceedings to alienate the land by a recovery.

**tenant** (*ten'ant*), *v.* [*tenant*, *n.*] **I. trans.** 1. To hold or possess as a tenant; occupy.

The greatest part of Sir Roger's estate is *tenanted* by persons who have served himself or his ancestors.

*Steele, Spectator*, No. 107.

Goblins, to my notions, though they might *tenant* the dumb carcasses of beasts, could scarce covet shelter in the commonplace human form.

*Charlotte Brontë, Jane Eyre*, xii.

We bought the farm we *tenanted* before.

*Tennyson, The Brook.*

2. To let out to tenants.

Three acres more he converted into a high way; . . . and the rest he *tenanted* out.

*Styrie, Hen. VIII.*, an. 1530.

**II.† intrans.** To live as a tenant; dwell.

In yonder tree he *tenanted* alone.

*Warren, The Lily and the Bee*, ii.

**tenant** (*ten'ant*), *n.* and *v.* A corruption of *tenon*.

They be fastened or *tenanted* the one to the other.

*Ep. Andrews, Sermons*, II. 51. (*Davies*.)

**tenantable** (*ten'an-ta-bl*), *a.* [*tenant* + *-able*.] Being in a state of repair suitable for a tenant; that may be tenanted or occupied.

To apply the distinction to Colchester: all men beheld it as *tenantable*, full of fair houses; none as *tenable* in a hostile way for any long time against a great army.

*Fuller, Worthies, Essex*, I. 544.

He even gave her permission to tenant the house in which she had lived with her husband, as long as it should be *tenantable*.

*Scott, Heart of Mid-Lothian*, ix.

**tenantableness** (*ten'an-ta-bl-nes*), *n.* The state of being tenantable.

**tenant-farmer** (*ten'ant-fär'mér*), *n.* A farmer who is only a tenant, and not the owner of the farm he cultivates.

We may relieve this country from all responsibility, real or imaginary, for the misfortunes of the Irish *tenant-farmers*.

*Nineteenth Century*, XXII. 729.

**tenant-farming** (*ten'ant-fär'ming*), *n.* The occupying of a farm on lease, and not as owner.

*Tenant-farming* is unprofitable.

*Edinburgh Rev.*, CLXVI. 301.

**tenantless** (*ten'ant-less*), *a.* [*tenant* + *-less*.] Having no tenant; unoccupied; vacant; untenanted.

Leave not the mansion so long *tenantless*.

*Shak., T. G. of V.*, v. 4. 8.

**tenant-right** (*ten'ant-rit*), *a.* 1. The right of tenancy of a tenant on a manor, who holds not at the will of the lord but according to the custom of the manor.

The customary tenants enjoy the ancient custom called *tenant-right*: namely, "To have their messuages and tenements to them during their lives, and after their deceases to the eldest issues of their bodies lawfully begotten."

*H. Hall, Society in Elizabethan Age*, App. I.

2. The right, or claim of right, in various forms or degrees, on the part of agricultural tenants, particularly in Great Britain and Ireland, to continue the tenancy so long as they pay the rent and act properly, to have the rent not raised so high as to destroy their interest, to be allowed to sell their interest on leaving to a purchaser acceptable to the landlord, and to receive a compensation from the landlord if turned off. The claim last mentioned, recognized as extending to crops left in the ground, labor in preparing the soil for the next crop, produce left on the farm, and of late years the value of permanent improvements, is that more especially known as *tenant-right*.

**tenantry** (*ten'an-tri*), *n.*; pl. *tenantries* (-triz). [*tenant* + *-ry*.] 1. The condition of being a tenant; tenancy.

Tenants have taken new leases of their *tenantries*.

*Ep. Ridley, in Dr. Ridley's Life*, p. 656. (*Latham*.)

2. The body of tenants; tenants collectively.

Yes, Mr. Huxter, yes; a happy *tenantry*, its country's pride, will assemble in the baronial hall, where the beards will wag all.

*Thackeray, Pendennis*, lxxv.

**tencer**, *n.* An obsolete spelling of *tensel*.

**tench** (*tench*), *n.* [*ME. tenech*, < *OF. tenche*, *F. tanche* = *Sp. Pg. tenca* = *It. tinca*, < *LL. tinca*, *ML. also tenea*, a *tench*.] A cyprinoid fish of Europe, *Tinca vulgaris*. It inhabits the streams and lakes of the European continent, and in England it is frequent in ornamental waters and ponds. The fish attains

a length of from 10 to 12 inches. It has very small smooth scales. The color is generally a greenish-olive above, a light tint predominating below. It is very sluggish, inhabits bottom-waters, and feeds on refuse vegetable matter. It

Tench. *Tinca vulgaris*.

is very tenacious of life, and may be conveyed alive in damp weeds for long distances. The flesh is somewhat coarse and insipid. The tench was formerly supposed to have some healing virtue in the touch. I. Walton ("Complete Angler," p. 175) says: "The Tench . . . is observed to be a Physician to other fishes, . . . and it is said that a Pike will neither devour nor hurt him, because the Pike, being sick or hurt by any accident, is cured by touching the Tench."

**tench-weed** (*tench'wēd*), *n.* The common pond-weed, *Potamogeton natans*; so named from some association with the tench (according to Forby, from its coating of mucilage, supposed to be very agreeable to that fish).

**tend** (*tend*), *v.* [*ME. \*tenden*, < *OF. (and F.) tendre*, stretch, stretch out, hold forth, offer, tender, = *Pr. tendre* = *Sp. Pg. tender* = *It. tendere*, < *L. tendere* (*ten*), stretch, stretch out, extend, spread out, intr. direct one's course, aim, strive, go, tend, = *Gr. teivew* (*ten*, *tau*) = *Skt. tan*, stretch: a root represented in Teut. by *thin*: *see* *thin*.] From the *L. tendere* are also ult. *E. tend*, *tender* (a doublet of *tend*), *tender*, *tendon*, *tense*, *tension*, *tent*, *tent*, *tent*, *attend*, *contend*, *extend*, *intend*, *portend*, *pretend*, *superintend*, *contention*, *extension*, *intention*, etc.; from the *Gr.*, *tone*, *tonic*, *tune*, etc.] **I.† trans.** To reach out; offer; tender.

Then Cassivelaunus . . . sent Embassadors to Cæsar by Conius and Arras, *tending* unto him a surrender.

*Shak., Hamlet, I. 3. 106.*

**Legal-tender currency**, currency which can lawfully be used in paying a debt. All the gold coins of the United States are a legal tender in all payments at their nominal value, when not below the standard weight and limit of tolerance provided by law for the single piece; and when reduced in weight below such standard tolerance, they are a legal tender at a valuation in proportion to their actual weight. The silver dollar of 412½ grains is a legal tender for all debts and dues, public and private, except when otherwise expressly mentioned in the contract. The silver coins of the United States of smaller denomination than one dollar are a legal tender, in sums not exceeding ten dollars, in payment of all dues, public and private. The so-called trade-dollar of 420 grains is not a legal tender. The five-cent, three-cent, and one-cent pieces are a legal tender to the amount of twenty-five cents in one payment. No foreign coins are now (1891) a legal tender. The United States notes (see *greenback*) are a legal tender for all debts, public and private, except duties on imports and interest on the public debt. Loans and debts contracted before the enactment of the legal-tender law of 1862 authorizing the issue of greenbacks, can be satisfied by payments made in them, unless an express agreement has been made for the payment of gold and silver. Gold certificates, under act of Congress of 1882, are receivable for customs, taxes, and all public dues, and when so received may be reissued; and silver certificates, under act of 1878, are receivable for customs, taxes, and all public dues, and when so received may be reissued. Treasury notes, under the act of March 3d, 1863, and of June 30th, 1864, were a legal tender (for their face-value, excluding interest) for all debts, public and private, within the United States, except for duties on imports and interest on the public debt, and except that those issued under the latter act are not legal tender in redemption of bank-notes, or bankers' notes, for circulation as money; those issued under the act of July 14th, 1890, are a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and are receivable for customs, taxes, and all public dues, and when so received may be reissued. The term "debts public and private" has been held to intend contract obligations, whether contracted before or after the statute, but not such dues as State taxes. National bank-notes are legal tender in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except duties on imports, also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt and in redemption of the national currency, and also for any debt or liability to any national banking association,

except gold-note banks.—**Plea of tender**, a plea by a defendant that he has made due tender, and has remained always ready to satisfy the plaintiff's claim, and now brings the sum demanded into court.—**Tender of amends**, an offer by a person who is charged with a wrong or breach of contract to pay a sum of money by way of amends.—**Tender of issue**, a pleading which in effect invites the adverse party to join issue upon it.

*tenderling* (ten'dér-ling), *n.* [*< tender*<sup>1</sup> + *-ling*<sup>1</sup>.] 1. A fondling; one made tender by too much coddling; an effeminate person.

Now haue we manie chimnies, and yet our *tenderlings* complain of rheumes, catarrhs, and poses.

*Harrison, Descrip. of Eng., ii. 22.*

2. One of the first horns of a deer.

*tenderloin* (ten'dér-loin), *n.* That part of the loin of beef which is tenderer than the rest, in consequence of the softness or fineness of the muscular fiber; the psoas muscle of the ox and some other animals used as meat; the fillet; the undercut. In the tenderloin steak, as usually cut, the bone left in is one lateral half of a lumbar vertebra, of which the long slender bone which separates the tenderloin from the rest of the meat is the transverse process. The tenderloin lies close to the backbone, on the ventral side.

*tenderly* (ten'dér-li), *adv.* [*< ME. tenderly, tenderly, tendreliche*; *< tender*<sup>1</sup> + *-ly*<sup>2</sup>.] In a tender manner. (a) With tenderness; mildly; gently; softly; in a manner not to injure or give pain.

The Moor . . .  
 . . . will as *tenderly* be led by the nose  
As asses are.

*Shak., Othello, I. 3. 407.*

(b) Kindly; with pity or affection; fondly.

So eche of theym comaunded other to god full *tenderly*.

*Martin (E. E. T. S.), iii. 634.*

He cannot be such a monster . . . to his father, that so *tenderly* and entirely loves him.

*Shak., Lear, I. 2. 104.*

(c) With a keen sense of pain; keenly; bitterly.

There is the Place where Seynt Petir wepte fulle *tenderly*, afre that he hadde forsaken oure Lord.

*Mandeville, Travels, p. 92.*

Pandare that ful *tendreliche* wepte.

*Chaucer, Troilus, iv. 353.*

(d) Delicately; effeminately; as, a child *tenderly* reared.

*tender-minded* (ten'dér-mīn'ed), *a.* Com-

passionate; tender-hearted.

To be *tender-minded*  
Does not become a sword.

*Shak., Lear, v. 3. 31.*

*tenderness* (ten'dér-nes), *n.* The state or character of being tender, in any sense.

Well we know your *tenderness* of heart.

*Shak., Rich. III., iii. 7. 210.*

We went to see the stables and fine horses of which many were here kept at a vast expense, with all the art and *tenderness* imaginable.

*Evelyn, Diary, July 22, 1670.*

Eleven half sheets marbled (like smoke) after a different manner, bit with great curiosity and *tenderness*.

*H. Wanley, in Ellis's Lit. Letters, p. 276.*

There was great *tenderness* over the bowels, especially in the right iliac region.

*J. M. Carnochan, Operative Surgery, p. 156.*

*tender-sided* (ten'dér-sī'ded), *a.* *Naut.*, crank, as a vessel; careening too easily under press of sail.

*tendinal* (ten'di-nal), *a.* Same as *tendinous*. [Rare.]

A *tendinal* slip is shown cut short, of which he says nothing, but which evidently belongs to this muscle.

*Science, IX. 624.*

*tendineal* (ten-din'ē-al), *a.* [*< NL. tendo (tendin-), a tendon, + -eal*.] Same as *tendinous*. [Rare.]

Special development of its *tendineal* portion aids in strengthening the tensor propatagii.

*Science, X. 71.*

*tendines*, *n.* Plural of *tendo*.

*tendinosus* (ten-di-nō'sus), *n.*; pl. *tendinosi* (-sī). [*NL. (sc. musculus)*; see *tendinous*.] A muscle of the back of the thigh whose tendon forms one of the inner hamstrings: usually called *semitendinosus*. *Cotes, 1887.*

*tendinous* (ten'di-nus), *a.* [*< F. tendineux = Sp. Pg. It. tendinoso, < ML. tendinosus, < tendo (tendin-), a tendon*; see *tendon*.] 1. Having a tendon; full of tendons; sinewy.—2. Of or pertaining to tendons; forming or formed by a tendon; fascial; aponeurotic; as, *tendinous* tissue; a *tendinous* structure; the *tendinous* origin or insertion of a muscle.

*tendment*<sup>1</sup> (tend'ment), *n.* [*< tend*<sup>2</sup> + *-ment*.] Attendance; care. *Bp. Hall, Satires, II. iv.*

*tendo* (ten'dō), *n.*; pl. *tendines* (-di-nēz). [*NL.*; see *tendon*.] 1. In *anat.*, a tendon.—2. In *entom.*, a bristle on the base of the lower wing, found in many *Lepidoptera*. In the males of some species it passes through a loop, the hamus or frenulum, on the upper wing. See also *hamus*.—**Tendo Achillis** (improp. *tendo Achilles*). See *tendon of Achilles*, under *tendon*.—**Tendo oculi**, a small white ligament, about one sixth of an inch in length, attached to the nasal process of the superior maxilla, and inserted by two slips into the inner extremities of the tarsal cartilages of the eyelids. Also called *tendo palpebrarum*, *internal tarsal ligament*.

*tendon* (ten'don), *n.* [= *F. tendon = Sp. tendon = Pg. tendão = It. tendine, < ML. tendo (tendin-), a tendon, < L. tendere, stretch, extend*; cf. Gr. *τενναι*, a sinew, tendon, *< τενναι*, stretch; see *tend*<sup>1</sup>.] A band or layer of dense fibrous tissue at the end of a muscle for attachment to a hard part, or interposed between two muscular bellies, usually where the direction of the muscle is changed; a sinew; said especially of such structures when rounded or cord-like, very broad flat tendons being commonly called *fasciæ* and *aponeuroses*. Tendons are directly continuous, at one end, with the periosteum, or fibrous investment of bones, and at the other with the fascial tissue which invests and interpenetrates the bundles of muscu-

lar tissue. The tissue or substance of tendons is quite like that of ligament, fascia, etc., being dense white fibrous or ordinary connective tissue, usually entirely inelastic and inextensible, though there are some exceptions to this rule. They are attached to bones by perfect continuity of their tissue with the periosteum, and are not notably different from the ligaments of joints. They are the strongest substances of the body, often sustaining strains under which muscle is ruptured and bone fractured. Some tendons are prone to ossify, as those of the leg of the turkey, and all sesamoid bones are ossifications in tendon, as the patella of the knee. See cut under *synchondrosis*. — **Achilles tendon.** Same as *tendon of Achilles*. — **Achilles tendon reaction.** See *reaction*. — **Conjoined tendon,** the united tendons of the internal oblique and transversalis muscles at their lower fourth, inserted into the linea alba and pectineal line of the pubis. — **Cordiform tendon.** See *cordiform*. — **Coronary tendons,** the fibrous rings surrounding the arterial orifices of the heart. — **Patellar tendon reflex.** Same as *knee-jerk*. — **Popliteal tendons.** See *popliteal*. — **Tendon-cell,** a connective-tissue cell found in tendons and ligaments, disposed in rows or chains parallel to the fiber-bundles. — **Tendon-jerk, tendon-reflex.** Same as *myotatic contraction* (which see, under *myotatic*). — **Tendon of Achilles** (*tendo Achillis*), the tendon of the heel: the tendon of the gastrocnemius and soleus muscles, which connects the heel with the calf of the leg, and is the principal extensor of the foot. It was so named because, as fable reports, Thetis, the mother of Achilles, held him by the foot when she dipped him in the river Styx to render him invulnerable, and so the only part about him which was vulnerable was his heel. The tendon of Achilles is that tendon which is cut when a quadruped, as a deer, is hamstrung; but the hamstrings of man are at the back of the knee-joint, and bend the leg upon the thigh, while the tendon of Achilles of any animal, man included, extends the foot upon the leg. — **Tendon of Zinn.** Same as *ligament of Zinn* (which see, under *ligament*).

Ankle and foot from behind, the tendon of the gastrocnemius, helping to form the tendo Achillis, cut away to show the soleus.

**tendotome** (ten'ō-tōm), *n.* [*< NL. tendo, a tendon, + Gr. -τομος, < τέμνω, τέμνω, cut.*] In *surg.*, a tenotome.

**tendresse**, *n.* [*ME. tendresse, < OF. (also F.) tendresse (= Pr. tendreza, tenreza = Sp. ternera = It. tenerza), < tendre, tender: see tender<sup>1</sup>.*] Tender feeling; tenderness. [In modern use only as French, pron. ton-dres'.]

**tendrill** (ten'dril), *n.* and *a.* [Early mod. E. also *tendrill*, *tendrill*; < *OF. \*tendrille, F. tendrille, a tendrill* (cf. *OF. tendron, a tendrill*, shoot: see *tendron*), < *tendre, tender, delicate: see tender<sup>1</sup>.*] **1. *n.*** In *bot.*, a filiform leafless plant-organ that attaches itself to another body for the purpose of support. Morphologically, a tendrill may be a modified stem, as in the vine and Virginia creeper; a modified branch, as in the passion-flower; a petiole, as in *Lathyrus Aphaca*; a stipule, or, as in *Smilax*, a pair of stipules; or a leaflet of a compound leaf, as in the pea and vetch. The morphology of the tendrills in the *Cucurbitaceae* is still open to question; by Braun and Wydler they are regarded as simple leaves of which the ribs are the branches of the tendrill (a view adopted also by Eichler), but Naudin regards the main tendrill as cauline and the branches as leaves. Tendrills are usually found on those plants which are too weak in the stem to enable them to grow erect; they twist themselves, usually in a spiral form, around other plants or neighboring bodies, and the plants on which they grow are thus enabled to elevate themselves. See cuts under *cirrus, creeper, Lathyrus, passion-flower, and Smilax*.

Her unadorned golden tresses . . . waved, As the vine curls her tendrills. *Milton, P. L.*, iv. 307.

**Leaf-tendrill**, a tendrill consisting of a modified leaf or part of a leaf—in the latter case appearing to be borne on the leaf, as in the pea.

**II. *a.*** Climbing as a tendrill, or as by a tendrill. The curling growth Of tendrill hops, that flaunt upon their poles. *Dyer, Fleecy, 1.*

**tendrill-climber** (ten'dril-klī'mér), *n.* In *bot.* See *climber<sup>1</sup>, 2.*

**tendrilled, tendrilled** (ten'drild), *a.* [*< tendrill + -ed<sup>2</sup>.*] Having tendrills: provided with tendrills. The delicate-tendrilled plant must have something to cling to. *George Eliot, Mr. Gilfil, xx.*

**tendron** (ten'dron), *n.* [*ME., < OF. tendron, a shoot, tendrill, also a tender person, F. tendron, a shoot, a girl, gristle, < tendre, tender, delicate: see tender<sup>1</sup>. Cf. tendrill.*] A stalk or shoot. The tendron and the leaves [of a pear-tree] of thou folde. *Palladius, Husbandrie (E. E. T. S.)*, p. 88.

**tendry** (ten'dri), *n.* [*< tender<sup>2</sup> + -y<sup>3</sup>.*] Offer; proposal; tender. [Rare.] This confession, though imperfect, was offered: . . . the like was done also in the tendry of their larger catechism. *Heylin, Hist. Presbyterians, p. 478. (Latham.)*

**tendsome** (ten'dsum), *a.* [Also *tensome*; < *tend<sup>2</sup> + -some.*] Requiring much attendance: as, a tendsome child. *Halliwel.* [Prov. Eng.]

**tenet**, *n.* and *v.* See *tenet<sup>1</sup>.*

**tenebræ** (ten'ē-bræ), *n. pl.* [*L., darkness, night, gloom; cf. den.*] In the *Rom. Cath. Ch.*, the matins and lauds of the following day, sung on the afternoon or evening of Wednesday, Thursday, and Friday in Holy Week. At the beginning of the office fifteen lighted candles are set on a stand at the epistle side of the altar, one of which is extinguished after each psalm—the highest, however, remaining alight. During the Benedictus the six altar-lights are extinguished, and the lights throughout the church. At the antiphon the light which had been left burning is hidden, and brought out again at the end of the office. These rites symbolize Christ's passion and death, one light remaining as a reminder of his coming resurrection. In the medieval church in England the number of lights on the stand was twenty-four. These ceremonies are as old as the eighth century.

For Maundy Thursday, as well as for Good Friday and Holy Saturday, the matins and lauds, which in these our times, and all through several by-gone ages, have been called *Tenebræ*, were sung by the Anglo-Saxons with the same accompaniment as ours, of lighted tapers, to be put out, one by one, as the psalms went on.

*Rock, Church of our Fathers, III. ii. 71.*

**tenebræ-hearse** (ten'ē-brē-hērs), *n.* The triangular stand holding the candles to be extinguished one after each psalm in the office of the tenebræ. Also called *Lenten hearse*.

**tenebrarium** (ten'ē-brā'ri-um), *n.*; *pl. tenebraria* (-i). [*NL., < L. tenebræ, q. v.*] Same as *tenebræ-hearse*.

**tenebricosæ** (tē-nēb'ri-kōs), *a.* [= *Pr. It. tenebricosæ*, < *L. tenebricosus*, shrouded in darkness, gloomy, < *tenebræ*, darkness: see *tenebræ*.] Tenebrous. *Bailey.*

**tenebrific** (ten'ē-brif'ik), *a.* [*< L. tenebræ, darkness, + facere, make.*] Producing darkness. According to an old fancy, night succeeds to day through the influence of tenebrific stars.

The chief mystics in Germany, it would appear, are the transcendental philosophers, Kant, Fichte, and Schelling! With these is the chosen seat of mysticism; these are its "tenebrific constellations," from which it doth "ray out darkness" over the earth.

*Carlyle, State of German Lit.*

Now begins

The tenebrific passage of the tale.

*Browning, Ring and Book, I. 123.*

**tenebrificous** (ten'ē-brif'ik-us), *a.* [*< tenebrific + -ous.*] Tenebrific.

I could mention several authors who are tenebrificous stars of the first magnitude. *Addison, Spectator, No. 682.*

**Tenebrio** (tē-nēb'ri-ō), *n.* [*NL. (Linnæus, 1758), < L. tenebrio, one who loves darkness (applied to a trickster), < tenebræ, darkness, gloom: see darkness.*] **1. *a*** genus of heteromorous beetles, typical of the family *Tenebrionidæ*, including about 20 species of black elongated beetles with slender legs. The common meal-worm (larva of *T. molitor*) belongs to this genus, but most of the species live under bark and in decayed trunks of old trees. *T. obscurus*, indigenous to America, also lives in farinaceous substances, and has been called the American meal-worm to distinguish it from the European meal-worm, *T. molitor*. Both species, however, are now cosmopolitan. See also cuts under *flour-beetle* and *meal-beetle*.

**2. [*l. c.*]** A species of this genus.

**Tenebrionidæ** (tē-nēb-ri-on'i-dē), *n. pl.* [*NL. (Leach, 1877), < Tenebrio(n) + -idæ.*] A large and wide-spread family of heteromorous beetles, comprising about 5,000 species, usually of obscure color, but containing some bright tropical forms. They have the anterior coxal cavities closed behind; the ventral segments five, in part connate; the penultimate tarsal joint not spongy, and the tarsal claws simple. The classification of the family is extremely difficult, and the species vary greatly in form and habit. The larvae, however, are very uniform in structure, and resemble those of the family *Elateridæ*. The great majority live in decaying vegetation, fungi, and excrement. Some of the largest genera are *Blaps*, *Zophosis*, *Helops*, *Strongylium*, *Pimelia*, and *Ascidia*. *Eleodes obscura* is a representative species. See *Tenebrio*, and also cut under *Blaps*.

*Eleodes obscura*, natural size.

**tenebrious** (tē-nēb'ri-us), *a.* [*Irreg. for tenebrous.*] Same as *tenebrous*.

Were moon and stars for villains only made,  
To guide yet screen them with tenebrious light?  
*Young, Night Thoughts, ix.*

**tenebrose** (ten'ē-brōs), *a.* [*< L. tenebrosus, dark: see tenebrous.*] Dark; gloomy; tenebrous. *Bailey, 1727.*

**tenebrosity** (ten'ē-brōs'i-ti), *n.* [*< OF. tenebrosité, F. tenebrosité = Sp. tenebrosidad = Pg. tenebrosidade = It. tenebrosità, < ML. tenebrositas (-t), darkness, < L. tenebrosus, dark: see tenebrous.*] The state of being tenebrous or dark; darkness; gloominess; gloom.

The ancient Poets, in regard of the tenebrosity thereof, compare Hell to a territory in Italy . . . so uninured with hills and mountains that the Sunne is never seene at any time of the yeare to shine amongst them.

*Heywood, Hierarchy of Angels, p. 389.*

**tenebrous** (ten'ē-brus), *a.* [*< OF. tenebreux, F. tenebreux = Pr. tenebros = Sp. Pg. It. tenebros, < L. tenebrosus, dark, gloomy, < tenebræ, darkness: see tenebræ.*] Dark; gloomy.

The day at the sixth hour was turned into tenebrous night, inasmuch as the Stars were visibly seene in the Firmament. *Heywood, Hierarchy of Angels, p. 317.*

Huge hail, and water sombre-hued, and snow  
Athwart the tenebrous air pour down amain.

*Longfellow, tr. of Dante's Inferno, vi. 11.*

**tenebrousness** (ten'ē-brus-nēs), *n.* The state of being tenebrous; darkness; gloom. *Bailey, 1727.*

**tenefult, tenefullyt.** Middle English forms of *teneful, tenefully*.

**tenel**, *n.* [*ME., < AS. tēnol (ML. tenella), a basket.*] A basket. *Prompt. Parv., p. 489.*

**tenement** (ten'e-ment), *n.* [*< ME. tenement, < OF. tenement, F. ténement = Pr. tenement, < LL. tenementum, a holding, fief, < L. tenere, hold: see tenant<sup>1</sup>.*] **1.** A holding; a parcel of land held by an owner.

After the deth of euerych halderne in fee sholle the baylynes of the Citee seyys sympleche the tenemens of weche he deyd y-seysed, for to y-wyte bet who-so is next eyr. *English Gids (E. E. T. S.)*, p. 362.

For Herry Halman hath played the false shrowe, and felld my wood upon a tenement off myn to the valew of xx markes. *Paston Letters, III. 86.*

The subscriber, having obtained patents for upwards of twenty thousand acres of land on the Ohio and Great Kan[sa]wha, . . . proposes to divide the same into any sized tenements that may be described.

*Washington, in Washington's Interest in Western Lands, [quoted in Johns Hopkins Univ. Studies, 3d ser.]*

**2. In law,** any species of permanent property that may be held of a superior, as lands, houses, rents, commons, an office, an advowson, a franchise, a right of common, a peerage, etc. These are called *free tenements* or *frank-tenements*.

gif eny tho that nymeth rente of eny tenement in fraunchyse of the Citee, and his rente holliche be by-hynde, . . . by leue of the baylynes of the town, nyme the dores and the fenestres. *English Gids (E. E. T. S.)*, p. 362.

The thing holden is . . . styled a *tenement*, the possessors thereof tenants, and the manner of their possession a tenure. *Blackstone, Com., II. v.*

**3. A dwelling inhabited by a tenant; a dwelling; an abode; a habitation; a home.**

Such is my home—a gloomy *tenement*,  
More solitary than the peasant's hut  
Upon the barren mountain.

*Hurd, quoted in Int. to Sir T. More's Utopia, p. liv.*

To sage Philosophy next lend thine ear,  
From Heaven descended to the low-roof'd house  
Of Socrates; see there his *tenement*.

*Milton, P. R., iv. 274.*

**4. One of a number of apartments or sets of apartments in one building, each occupied by a separate family, and containing the conveniences of a common dwelling-house.**

The two *tenements*, it was true, were under the same roof; but they were not on that account the same *tenements*. *D. Webster, Speech in Goodrich Case, April, 1817.*

**Dominant, servient, etc., tenement.** See the adjectives. = *Syn. 4.* See definitions of *flat<sup>2</sup>* and *apartment*.

**tenemental** (ten'ē-men'tal), *a.* [*< tenement + -al.*] Pertaining to a tenement or to tenements; pertaining to what may be held by tenants; capable of being held by tenants. — **Tenemental lands,** lands held of a feudal lord by free tenures.

The other, or *tenemental*, lands they distributed among their tenants. *Blackstone, Com., II. vi.*

**tenementary** (ten'ē-men'ta-ri), *a.* [*< ML. tenementarius, < LL. tenementum, a tenement: see tenement.*] Capable of being leased; designed for tenancy; held by tenants.

Such were the Ceorls among the Saxons; but of two sorts, one that hired the Lord's Outland or Tenementary Land . . . like our Farmers.

*Spelman, Feuds and Tenures, vii.*

**tenement-house** (ten'ə-mənt-həus), *n.* A house or block of buildings divided into dwellings occupied by separate families; technically, in the State of New York, any house occupied by more than three families. In ordinary use the word is restricted to such dwellings for the poorer classes in crowded parts of cities.

**tenencyt**, *n.* An obsolete spelling of *tenancy*.

A vast, miscellaneous, and swimming knowledge, a notion, a metaphoric and confused *tenency* of many things, which lie like corn, loose on the floor of their brains.

Rev. T. Adams, Works, I. 367.

**tenendas** (tē-nen'das), *n.* [So called from this word in the clause: *L. tenendas*, acc. pl. fem. of *tenendus*, gerundive of *tenere*, hold, possess: see *tenant*<sup>1</sup>.] In *Seals law*, that clause of a charter by which the particular tenure is expressed. *Bell*.

**tenendum** (tē-nen'dum), *n.* [So called from this word in the clause: *L. tenendum*, nom. sing. neut. of *tenendus*, gerundive of *tenere*, hold, possess: see *tenant*<sup>1</sup>.] In *law*, that clause in a deed wherein the tenure of the land is defined and limited.

**tenant**<sup>1</sup> (ten'ənt), *a.* [*L. tenen(t)-s*, ppr. of *tenere*, hold: see *tenant*<sup>1</sup>.] Holding; specifically, in *zool.*, used to hold, cling, or support: as, *tenant hairs* and bristles on the feet of insects. **tenant**<sup>2</sup> (ten'ənt), *n.* In *her.*, same as *tenant*<sup>1</sup>. **tenant**<sup>3</sup> (ten'ənt), *n.* [*L. tenent*, they hold, 3d pers. pl. pres. ind. of *tenere*, hold: see *tenant*<sup>1</sup>. Cf. *tenet*.] Same as *tenet*.

We shall in our sermons take occasion now and then, where it may be pertinent, to discover the weakness of the puritan principles and *tenents* to the people.

Bp. Sanderson, Cases of Conscience. (Latham.)

Atheisme and Sadducism disputed;

Their *Tenents* argued, and refuted;

Heywood, Hierarchy of Angels, p. 3.

**teneral** (ten'ə-rəl), *a.* [*L. tener*, soft, delicate, + *-al*.] In *entom.*, noting the incomplete imago of a neuropterous insect, soon after it has passed from the pupal state, and while it is yet soft. See *pseudimago* and *subimago*.

**Tenerife** (ten'ə-rif), *n.* [*L. Tenerife* or *Teneriffe*, the most important of the Canary Islands, situated west of Africa.] Wine produced in the island of Tenerife (properly *Tenerife*), formerly imported into Europe.

**Tenerife slug**. See *slug*<sup>2</sup>.

**teneritude** (tē-ner'ī-tūd), *n.* [ME., = *It. teneritudine*, < *L. teneritudo* (-*itudo*), softness, tenderness, < *tener*, tender: see *tender*<sup>1</sup>.] Tenderness.

So wol thaire fattenesse and *teneritude*

With hem [cheese] be stille.

Palladius, Husbandrie (E. E. T. S.), p. 154.

**tenerity** (tē-ner'ī-ti), *n.* [= *It. tenerità*, < *L. teneritudo* (-*itudo*), softness, tenderness, < *tener*, soft, tender: see *tender*<sup>1</sup>.] Tenderness. *Imp. Dict.* **tenesmic** (tē-nes'mik), *a.* [*L. tenesmus* + *-ic*.] In *med.*, pertaining to or characterized by *tenesmus*.

**tenesmus** (tē-nes'mus), *n.* [NL., < *L. tenesmos*, < *Gr. τενεσμος*, a straining at stool, < *τεννεν*, stretch, strain: see *tend*<sup>1</sup>.] In *med.*, a continual inclination to void the contents of the bowels or bladder, accompanied by straining, but with little or no discharge. It is caused by an irritation of the rectum or bladder or adjacent parts, and is a common symptom in dysentery, stricture of the urethra, cystitis, etc.

**tenet** (ten'et), *n.* [*L. tenet*, he holds, 3d pers. sing. pres. ind. of *tenere*, hold: see *tenant*<sup>1</sup>. Cf. *habitat*. Cf. also *tenet*<sup>3</sup>.] Any opinion, principle, dogma, or doctrine which a person, school, or sect holds or maintains as true.

That all animals of the land are in their kind in the sea, although received as a principle, is a *tenet* very questionable.

Sir T. Browne, Vulg. Err., iii. 24.

Though my scheme was not wholly without religion, there was in it no mark of any of the distinguishing *tenets* of any particular sect.

Franklin, Autobiog., p. 141.

In the *tenet* of justification, the believer is himself in contact with the miracle of Christ's atonement, and applies Christ's merits to himself.

M. Arnold, Literature and Dogma, ix.

-Syn. Precept, Dogma, etc. See *doctrine*.

**tenfingers** (ten'fing'gərz), *n.* A starfish with ten arms. Compare *fingering*, 3.

**tenfold** (ten'fōld), *a.* and *adv.* [*L. ten* + *-fold*.] Ten times as much or as many.

I will reward thee

Once for thy sprightly comfort, and *ten-fold*

For thy good valour. *Shak.*, A. C., iv. 7. 15.

**ten-forties** (ten'fōr'tiz), *n. pl.* [Short for *ten-forty bonds*: see *def.*] The popular name for certain five per cent. bonds issued by the government of the United States in 1864, redeemable at any time after ten years, and payable at the end of forty years.

**tengerite** (teng'ér-it), *n.* [Named after C. Tenger, a Swedish chemist.] An imperfectly known yttrium carbonate occurring as a white crystalline or earthy incrustation upon gadolinite.

Many more minerals, such as cyrtolite, molybdate, lanthanite, *tengerite*, . . . have been found. *Nature*, XLI. 163.

**tenia**, *n.* See *tenia*.

**teniente** (ten-yen'te), *n.* [Sp., a lieutenant, a deputy, = *E. tenant*: see *tenant*<sup>1</sup>.] A lieutenant; a deputy.

Am I your major-domo, your *teniente*,

Your captain, your commander?

Middleton, Spanish Gypsy, II. 1.

**tenioid**, *a.* See *tenioid*.

**tennantite** (ten'ant-it), *n.* [Named after Smithson Tennant, an English chemist (1761-1815).] A species closely related to tetrahedrite, or gray copper ore, a mineral of a lead-gray or iron-black color, massive or crystallized, found in Cornwall, England, and elsewhere. It is a sulphide of arsenic with copper and iron, and differs from tetrahedrite in containing arsenic in place of antimony; between the two species there are many intermediate compounds.

**Tennant's powder**. See *powder*.

**tenné** (te-nā'), *n.* [Heraldic F.: see *tawny*.] In *her.*, a tincture spoken of as orange-brown, or as produced by mixing red and yellow. It is represented in engraving and drawings in black and white by diagonal lines from the sinister chief to the dexter base, crossed by vertical lines according to most authorities, or by horizontal lines according to Berry. Also *tenney*, *tawny*.

**tenner** (ten'ər), *n.* A ten-pound note. [Slang, Great Britain.]

And you don't like me well enough to borrow a few *tenners* just to carry on the war with?

Miss Braddon, Rupert Godwin, I. 221.

**Tennesseean** (ten-e-sē'an), *a.* and *n.* [*L. Tennessee* (see *def.*) + *-an*.] I. *a.* Of or pertaining to Tennessee. See II.

II. *n.* A native or an inhabitant of Tennessee, one of the southern United States, lying south of Kentucky.

**Tennessee bond cases**. See *case*<sup>1</sup>.

**tenney** (ten'e), *n.* In *her.*, same as *tenné*.

**tennis** (ten'is), *n.* [Early mod. E. also *tennise*, *tennis*, *tennes*, *tenis*, *tenys*, *tenyse*; < ME. *tenys*, *teney*s (ML. *tenisia*; also *teniludium*, 'tennis-play'); appar. of OF. origin, but no OF. term appears. The notion that the word is derived from OF. *tenez*, 'hold' or 'take' (i. e. 'take this ball'), conjectured to be a cry of the player who serves, is purely imaginary, and it is inconsistent with the usage of the time (ME. nouns were not formed offhand from OF. imperatives).] 1. A very old and elaborate ball-game played by two, three, or four persons in a building specially constructed for the purpose. The court (96 feet by 32) is surrounded by a wall, from which a sloping roof called the *penthouse* extends on three sides to an inner wall 7 feet high; and a net 5 feet high at the ends to 3 in the middle is placed across the court. The first player (the *server*) hits a ball with a racket so that it strikes the penthouse or the wall above it, and rebounds into the court on his opponent's side of the net. The opposing player (the *striker-out*) has to strike the ball back into the server's court before it strikes the ground, or on its first bound. The player who is the first to drive the ball into the net or beyond the prescribed boundary loses a stroke. If a player fails to return the ball before it strikes the ground twice, a *chase* is noted against him on the marked floor. This does not count at the time, but a stroke may be won or lost from it by subsequent play. When two chases have been made, or when the score of one side reaches 40, the players change ends. Strokes are won and lost in various other ways besides those mentioned above (as by driving the ball into certain openings in the inner wall), the game being extremely complicated. The mode of scoring (by 15, 30, 40, and game, with *deuce* and *advantage*) has been taken from this game by lawn-tennis. Tennis arose in Europe during the middle ages, and was very popular. It is now played under the name of *court-tennis*, to distinguish it from *lawn-tennis*. See *racket*<sup>2</sup> and *lawn-tennis*.

2. Same as *lawn-tennis*.

**tennis** (ten'is), *v. t.* [*L. tennis*, *n.*] To drive, as a ball in playing tennis.

Item, that no man play at *tenys* or pame withyn the yeld halle.

English Gilds (E. E. T. S.), p. 372.

I had as leve tosse a ball here alone as to play at the *tenys* over the corde with the.

Palsgrave, p. 760.

*Tennis* is a game of no use in itself, but of great use in respect it maketh a quick eye and a body ready to put itself into all postures.

Bacon, Advancement of Learning, II. 172.

2. Same as *lawn-tennis*.

**tennis** (ten'is), *v. t.* [*L. tennis*, *n.*] To drive, as a ball in playing tennis.

These fowre garrisons issuing forth, at such convenient times as they shall have intelligence or espial upon the enemy, will so drive him from one side to another, and *tennis* him amongst them, that he shall finde no where safe to keep his creete [cattle].

Spenser, State of Ireland.

**tennis-arm** (ten'is-ärm), *n.* A lameness of tennis-players, said to be caused by a rupture of some of the fibers of the pronator radii teres.

**tennis-ball** (ten'is-bál), *n.* The ball used in tennis or lawn-tennis.

Rather (O Jacob) chuse we all to die,  
Than to betray our Native Libertie;  
Than to become the sporting *Tennis-ball*  
Of a proud Monarch.

Sylvester, tr. of Du Bartas's Weeks, II. The Captaines.

To the Ianizaries furie, who made *Tennis-balls* of their heads.

Purchas, Pilgrimage, p. 287.

**tennis-court** (ten'is-kört), *n.* 1. An oblong edifice in which the game of tennis is played. See *tennis*, 1.

The more spacious that the *tennis-court* is,  
The more large is the hazard.

Webster, Devil's Law-Case, II. 3.

2. The court upon which the game of lawn-tennis is played.

**tennis-elbow** (ten'is-el'bō), *n.* Same as *tennis-arm*.

**tenno** (ten'ō), *n.* [Jap. *tenno*, heavenly ruler, < *ten* (< Chinese *tiên*), heaven, + *wō* (< Chinese *huang*), august ruler.] The king of heaven; emperor: same as Chinese *tiên huang*: a title first adopted in Japan in 782.

**ten-o'clock** (ten'ō-klok'), *n.* The common star-of-Bethlehem, *Ornithogalum umbellatum*: so called from the tardy opening of the flowers. Compare *four-o'clock*.

**tenography** (tē-nog'ra-fi), *n.* [Irreg. < Gr. *τένων*, a tendon (cf. *tendon*), + *-γραφία*, < *γράφω*, write.] The description of tendons.

**tenology** (tē-nol'ō-jī), *n.* [Irreg. < Gr. *τένων*, a tendon, + *-λογία*, < *λέγω*, speak: see *-ology*.] That part of anatomy which relates to tendons.

**tenon** (ten'on), *n.* [Formerly also, irreg., *tenant*; < ME. *tenoun*, < OF. (and F.) *tenon*, a tenon, < *tenir*, hold, < *L. tenere*, hold, keep: see *tenant*<sup>1</sup>.] The projecting end of a piece of wood or other material fitted for insertion into a corresponding cavity or mortise in another piece, in order to form a secure joint. See cuts under *breech-pin*, *dovetail*, and *mortise*.—**Shoulder of a tenon**, the transverse section of a timber, from which the tenon projects. (See also *tease-tenon*, *tusk-tenon*.)

**tenon** (ten'on), *v. t.* [*L. tenon*, *n.*] 1. To fit for insertion into a mortise, as the end of a piece of timber.—2. To join by or as by a tenon.

We *tenon* both these together as an antecedent and consequent.

Bp. Andrews, Sermons, II. 86. (Davies.)

**tenon-anger** (ten'on-ā'gēr), *n.* A hollow auger for cutting circular tenons, as in the movable rollers for window-shades, etc.

**tenoner** (ten'on-ēr), *n.* A machine for forming tenons. Such machines are usually combinations of saws, or saws with cutters and driving mechanism, whereby the shoulders are cut squarely, and the superfluous wood is cut away to leave the tenon.

**Tenonian** (ten-nō'ni-an), *a.* [*L. Tenon* (see *def.*) + *-ian*.] In *anat.*, relating to the French anatomist J. R. Tenon (1724-1816): as, the *Tenonian fascia* or capsule (Tenon's capsule).

**tenoning-chisel** (ten'on-ing-chiz'el), *n.* A double-bladed chisel which makes two cuts, leaving a middle piece to form a tenon. *E. H. Knight*.

**tenoning-machine** (ten'on-ing-ma-shēn'), *n.* In *wood-working*, a machine for cutting tenons. There are three chief types of machine in use—those employing revolving cutters, hollow augers, and chisels respectively. Some of these machines can also be used to cut mortises, and by the addition of other cutting-tools some may be used to finish and dress the work.

**tenonitis** (ten-ō-ni'tis), *n.* [*L. Tenon* (see *Tenonian*) + *-itis*.] Inflammation of Tenon's capsule.

**tenon-saw** (ten'on-sā), *n.* A thin back-saw having eight teeth to the inch, used for fine, accurate sawing, as in forming tenons, dovetails, miters, etc. Also called *tenor-saw*.

**Tenon's capsule**. A tunic of fascia, containing smooth muscular fibers, around the middle of the eyeball, blending with the sclerotic behind the entrance of the ciliary vessels and nerves into the eyeball; the Tenonian fascia.

**tenor** (ten'or), *n.* and *a.* [Formerly also *tenour*, sometimes *tenure*; < ME. *tenour*, *tenor*, *tenoure*, < OF. *tenour*, *tencur* = Fr. Sp. *tenor* = Pg. *teor* = *It. tenore*, < *L. tenor*, a holding on, uninterrupted sense, tone, accent, ML. also, in music, the chief melody (cantus firmus), hence the highest adult male voice, to which the chief melody was assigned; < *tenere*, hold: see *tenant*<sup>1</sup>.] I. *n.* 1. General, usual, or prevailing course or direction.

Along the cool, sequester'd vale of life

They kept the noiseless *tenor* of their way.

Gray, Elegy.

The chief event in the course of the summer which broke the even *tenor* of our lives was a first visit from our great neighbors, Lord and Lady Carlisle.

Lady Holland, Sydney Smith, vii.

2. General course or drift of a thought, saying, discourse, or the like; that course of thought or meaning which holds on or runs through a whole discourse, treatise, statute, or the like; general purport; substance.

Thence he cryed soother that kenne myght alle;  
The true tenor of his tyme he tolde on this wyse.  
—*Allegorical Poems* (ed. Morris), iii. 358.

Mark the tenor of my style,  
Which shall such trembling hearts unfold  
As seldom hath to force been told.

B. Jonson, *Case is Altered*, i. 1.

The tenor of this letter was  
That Robin would submit.

True Tale of Robin Hood (Child's Ballads, V. 366).

Emigration to the new countries was encouraged by the liberal tenor of the royal ordinances passed from time to time.

Prescott, *Ferd. and Isa.*, ii. 9.

3. In law: (a) True intent and meaning; purport and effect: as, the tenor of a deed or instrument of any kind is its purport and effect, but not its actual words. (b) A transcript or copy. It implies that a correct copy is set out, and therefore at common law, under an allegation according to the tenor, the instrument must be set out correctly. 4. Character; nature.

All of a tenor was their after-life,  
No day discoloured with domestic strife.

Dequien, *Pal. and Arc.*, iii. 1148.

5. In music: (a) The highest variety of the ordinary adult male voice. Its compass usually extends about two octaves or less from the first C below middle C. Its quality is properly thin and penetrating, bearing much the same relation to bass that soprano does to alto. Its upper tones often much resemble the middle tones of alto. A tenor voice having somewhat of the breadth and sonority of a barytone is often called (in Italian) a *tenore robusto*, while a light, agile tenor is called a *tenore leggiero*. (b) A singer with such a voice, or a voice-part intended for or sung by such a voice. In ordinary part-writing the tenor is the third voice-part, intermediate between the alto and the bass. (c) An instrument playing a third part; specifically, the viola (which see). (d) In medieval music, also, (1) the hold or pause on a final tone of a piece; (2) the ambitus or compass of a mode; (3) the repercussion of a mode.—**Action of proving the tenor.** See *proving*.—**Middle tenor**, Massachusetts paper currency, 1737–40. See *new tenor* (b).—**New tenor**. (a) In the financial history of Massachusetts and Rhode Island, a form of paper currency of the public issues which began in 1737 in the former colony and in 1740 in the latter, and of which each bill bore a declaration that it should be equal in value to a stated amount of coined silver or of gold coin. (b) In Massachusetts, a new form of such currency, issued in accordance with an act of the year 1741 and subsequent years, and differing but slightly from that above described. The notes of this emission received the name of *new tenor*, which caused the preceding series, which had hitherto borne that name, to be thenceforth called *middle tenor*.—**Old tenor**, in the financial history of Massachusetts and Rhode Island, a form of paper currency of the public issues which preceded one of 1737 in the former colony and one of 1740 in the latter, and of which each bill bore a declaration that it should be in value equal to money.

II. a. In music, of or pertaining to the tenor; adapted for singing or playing the tenor: as, a tenor voice; a tenor instrument; a tenor part.—**Tenor bassoon**, **cornet**, **drum**, **horn**, **trombone**, **trumpet**, etc., varieties of these several instruments whose size and compass make them intermediate between the alto and bass varieties.—**Tenor bell**, the chief bell in a set of bells.—**Tenor C**, in music, the next C below middle C.—**Tenor clef**, in musical notation, a C clef placed on the third line of a staff.—**Tenor violin**. Same as *viola*.

**tenore** (ten-ō-rē), n. [It.: see *tenor*.] See *tenor*.  
**tenorino** (ten-ō-rē-nō), n.; pl. *tenorini* (nē). [It., dim. of *tenore*, tenor: see *tenor*.] A falsetto tenor voice, or a singer with such a voice; particularly, an artificial soprano.

**tenorist** (ten-ō-r-ist), n. [= OF. *tenoriste*, < ML. *tenorista*; as *tenor* + *-ist*.] One who sings a tenor part, or one who plays on a tenor instrument.

**tenorite** (ten-ō-r-it), n. [Named by Semmola in 1841 after Signor Tenore, president of the Academy of Sciences at Naples.] Native oxid of copper, occurring in steel-gray scales of metallic luster on lava at Vesuvius.

**tenoroon** (ten-ō-rōn'), n. and a. [*< tenor* + *-oon*, as *bassoon* from *bass*.] 1. Same as *oboe da caccia* (which see, under *oboe*).

II. a. In organ-building, noting a stop which does not extend below tenor C: as, a *tenoroon* hautboy.

**tenorrhaphy** (tē-nor'ā-fī), n. [*< Gr. τέρον, tendon*, + *ράφω*, a seam, < *ράπτειν*, sew.] Same as *tenosuture*.

**tenosuture** (ten'ō-sū'tūr), n. [*< Gr. τέρον, tendon*, + L. *sutura*, a seam: see *suture*.] The fastening together by suture of the ends of a divided tendon. Also *tenorrhaphy*.

**tenotome** (ten'ō-tōm), n. [*< F. ténotome*, < Gr. τέρον, tendon, + *-τομος*, < *τέμνειν*, *ταμειν*, cut. Cf. *tenotomy*.] In surg., a slender knife specially

suitable for the subcutaneous division of a tendon: a tenotomy knife. Also *tendotome*.

**tenotomize** (ten-not'ō-mīz), v. t.; pret. and pp. *tenotomized*, ppr. *tenotomizing*. [*< tenotomy* + *-ize*.] To divide a tendon or the tendons of.

**tenotomy** (tē-not'ō-mī), n. [= F. *ténotomie*, < Gr. τέρον, tendon, + *-τομή*, < *τέμνειν*, *ταμειν*, cut. Cf. *tendon*.] In surg., the division of a tendon.

High degrees of muscular insufficiency cannot be corrected except by surgical measures: viz., *tenotomy* of one or both external recti muscles.

Buck's *Handbook of Med. Sciences*, V. 96.

**tenpenny** (ten'pen'i), a. Valued at or worth ten pence.—**Tenpenny nail**. See *penny*, 6.

**tenpins** (ten'pinz), n. The game of bowls played with ten pins or men in a long alley. The players strive with three or fewer bowls of the ball to knock down all the pins.

**ten-pounder** (ten'poun'dér), n. 1. See *pounder*, 1 and 2.

Between 1832 and 1865 the *ten-pounders* rose to 463,000. Gladstone.

2. Something that weighs ten pounds.—3. The big-eyed herring, *Elops saurus*. See cut under *Elops*.

**tenrec**, **tanrec** (ten'rek, tan'rek), n. [Malagasy.] 1. A Madagascar hedgehog; any insectivorous mammal of the family *Centetidæ*, as

Centetes ecaudatus.

*Centetes ecaudatus*, *Ericulus spinosus*, and *Echinops telfairi*. The rice-tenrec is *Orzyzomys hova*. Also *tang*. See cut under *sokinah*. These animals are highly characteristic of the Madagascar re-

Tenrec (Ericulus spinosus).

gion. They superficially resemble ordinary hedgehogs (of the different family *Echinacidae*—compare cut under *Erinaceus*), but their structure is peculiar, and their nearest relatives are the West Indian solenodons.

2. [cap.] [NL. (Lacépède, 1798), and in the form *Tanrecus* (Desmarest, 1825).] A generic name for the species of *Centetidæ*: same as *Centetes* in a former broad sense. [Not used.]

**tense**<sup>1</sup> (tens), n. [Formerly also *tence*; < ME. *tens*, *temps*, < OF. *tans*, *tens*, *tenz*, *tems*, *temps*, F. *temps* = Sp. *tiempo* = Pg. It. *tempo*, < L. *tempus*, time, in grammar tense. Cf. *temporal*, *temporary*, etc.] 1. Time. See *temps*.

I warne yow wel, it is to soken ever,  
That future tenses hath maad men to diserver  
In trust therof from all that ever they hadde.

Chaucer, *Prolog.* to Canon's Yeoman's Tale, l. 322.

2. In gram.: (a) Time. (b) One of the forms, or sets of forms, which a verb takes in order to indicate the time of action or of that which is affirmed: extended also to forms indicating the nature of the action as continued, completed, and the like. In English this is effected either by internal vowel change, as in *sing*, *sang*, *lead*, *led*; by terminal inflection, as in *love*, *loved*; or, in verb-phrases, by means of auxiliary words, as in *did love*, *have loved*, *will love*.

We may say now that we have Treasurers of all Tenses, for there are four living, to wit the Lords Manchester, Middlesex, Marlborough, and the newly chosen.

Howell, *Letters*, I. v. 2.

At prime tense, at the first time; at first; instantly.

My self I knowe fulle wel Daungere,  
And how he is feers of his cheere,  
At prime temps Love to manace.

Rom. of the Rose, l. 3373.

Men shulde hym snybbe bitterly  
At prime temps of his tolye.

Rom. of the Rose, l. 4533.

**Future, perfect, pluperfect, present tense.** See the adjectives.—**Historical tenses.** See *historical*, 4. **Sequence or consecution of tenses.** See *sequence*.

**tense**<sup>2</sup> (tens), a. [= Sp. *tenso*, < L. *tensus*, pp. of *tendere*, stretch: see *tend*<sup>1</sup>.] Being in a state of tension; stretched until tight; strained to stiffness; rigid; not lax: often used figuratively.

For the free passage of the sound into the ear it is requisite that the tympanum be tense.

Holder, *Elements of Speech*, p. 161.

Her temples were sunk, her forehead was tense, and a fatal paleness sat upon her cheek.

Goldsmith, *Vicar*, xxviii.

**Tense abdomen**, in entom., an abdomen neither divided into segments nor having segments indicated, as in most spiders, by transverse folds.

**tense**<sup>2</sup> (tens), v. t.; pret. and pp. *tensed*, ppr. *tensing*. [*< tense*<sup>2</sup>, a.] To make tense or taut. [Rare.]

If, instead of a symmetrical movement, the other hand made a maximal effort of *tensing* the extensor instead of the flexor muscles of the hand, . . . no constant effect . . . was observed.

Mind, IX. 109.

**tenseless** (tens'les), a. [*< tense*<sup>1</sup> + *-less*.] Having no tense: as, a *tenseless* verb. *Classical Rev.*, III. 9.

**tenselessness** (tens'les-nes), n. The character of being tenseless. *Amer. Jour. Philol.*, VIII. 59.

**tensely** (tens'li), adv. In a tense manner; with tension.

**tenseness** (tens'nes), n. The state of being tense, or stretched to stiffness; stiffness; rigidity.

**tensibility** (ten-si-bil'i-ti), n. [*< tensible* + *-ity* (see *-bility*).] The property of being tensible or tensile.

**tensile** (ten'si-bl), a. [= Sp. *tensible*, < ML. *tensibilis*, that can be stretched, < L. *tendere*, pp. *tensus*, stretch: see *tend*<sup>1</sup>, *tense*<sup>2</sup>.] Capable of being extended or drawn out; ductile.

Gold . . . is the closest (and therefore the heaviest) of metals, and is likewise the most flexible and tensile.

Bacon, *Nat. Hist.*, § 327.

**tensile** (ten'sil), a. [= It. *tensile*, < NL. *\*tensilis*, < L. *tendere*, pp. *tensus*, stretch: see *tend*<sup>1</sup>, *tense*<sup>2</sup>.] 1. Of or pertaining to tension: as, *tensile* strength.—2. Capable of tension; capable of being drawn out or extended in length or breadth; tensile.

All bodies ductile, and *tensile* [as metals, that will be drawn into wires], . . . have in them the appetite of not discontinuing.

Bacon, *Nat. Hist.*, § 845.

3. In musical instruments, producing tones by means of stretched strings.

**tensiled** (ten'sild), a. [*< tensile* + *-ed*<sup>2</sup>.] Made tensile; rendered capable of tension. [Rare.] *Imp. Dict.*

**tensility** (ten-sil'i-ti), n. [*< tensile* + *-ity*.] The quality of being tensile; tensibility. *Dr. H. More*, *Immortal*, of Soul, ii. 10.

**tension** (ten'shon), n. [= F. *tension* = Sp. *tensión* = Pg. *tensão* = It. *tensione*, < L. *tensio* (n-), a stretching, ML. also a struggle, contest (see *tension*), < *tendere*, pp. *tensus*, stretch, extend: see *tend*<sup>1</sup>, *tense*<sup>2</sup>.] 1. The act of stretching, straining, or making tense; the state of being stretched or strained to stiffness; the condition of being bent or strained.

Voice being raised by stiffe *tension* of the larynx.

Holder, *Elements of Speech*, p. 74.

2. In mech., stress, or the force by which a bar, rod, string, or the like is pulled when forming part of any system in equilibrium or in motion.

In a large suspension bridge the *tension* produced by the occasional load is usually only a small fraction of that produced by the permanent load.

R. S. Ball, *Exper. Mechanics*, p. 232.

3. In physics, a constrained condition of the particles of bodies, arising from the action of antagonistic forces, in which they tend to return to their former condition; elastic force. Tension may be present in a solid body, and also in a liquid in the case of surface-tension (which see), but not in a gas. What is commonly called the *tension* of a gas is properly its pressure simply—due, according to the kinetic theory of gases (see *gas*, 1), to the innumerable impacts of the moving molecules against the confining surface; good writers avoid the use of *tension* in this sense.

4. In static elect., the mechanical stress across a dielectric, due to accumulated charges, as in a condenser; hence, the same as *surface-density* (the amount of electricity at any point of the surface of a charged conductor); more commonly used, in dynamical electricity, to mean about the same as *difference of potential*: thus, a current of high tension is popularly a current of high electromotive force. A body is said to have a

high-tension charge, or a charge of high-tension electricity, and a conductor to carry a high-tension current, when the stress in the medium surrounding the body or the conductor is high. In magnetism an electromagnet surrounded by a coil of many turns and high electrical resistance was called by Henry a *tension magnet*.

Potential is the scientific term for the electrical condition for which the word *tension* has been used.

John. Franklin Inst., CXXV, 57.

5. Mental strain, stretch, or application; strong or severe intellectual effort; strong excitement of feeling; great activity or strain of the emotions or the will.

When the *tension* of mind relating to their daily affairs was over, they sunk into fallow rest.

Mrs. Gaskell, North and South, xl.

In desiring the mind is in a state of active *tension*.

The states of *tension* have a positive influence as any in determining the total condition, and in deciding what the psychosis shall be. W. James, Prin. of Psychol., I, 235.

6. A strained state of any kind; as, political *tension*; social *tension*. — 7. An attachment to a sewing-machine for regulating the strain of the thread. It is made in a variety of forms, the aim being in all cases to put a pressure on the thread to prevent it from running from the spool too freely, and to adjust the strain on the thread to the thickness of the cloth. — *Initial tension*. See *initial*. — *Surface tension*. See *surface-tension*.

**tension** (ten'shun), *v. t.* [*< tension, n.*] To make tense; give the right degree of tension to; draw out; strain. *The Engineer*, LXXI, 120. [Recent.]

A highly *tensioned* string.

Tyndall.

**tensional** ten'shun-al, *a.* [*< tension + -al.*] Of or pertaining to tension; of the nature of tension.

Such members of a structure as are subject to torsional, *tensional*, or transverse stresses.

W. H. Greenwood, Steel and Iron, p. 71.

**tension-bar** (ten'shun-bär), *n.* A bar by means of which a strain of tension is applied, or by which such a strain is resisted. See cut under *car-truck*.

**tension-bridge** (ten'shun-brij), *n.* 1. Same as *bowstring-bridge*. E. H. Knight. — 2. A form of bridge formerly used for street spans, consisting essentially of wooden pieces anchored at the ends, and strained to maintain them as nearly level as possible. E. H. Knight.

**tension-fuse** (ten'shun-füz), *n.* See *fuse*<sup>2</sup>.

**tension-member** (ten'shun-mem'bér), *n.* A rod, bar, or beam forming a member of a frame, truss, beam, or girder, and serving to bear the tensile strain.

**tension-rod** (ten'shun-rod), *n.* A rod in a truss or structure which connects opposite parts and keeps them from spreading asunder.

**tension-roller** (ten'shun-rólér), *n.* An idler, or free pulley, resting against a belt for the purpose of keeping it stretched tight against its working pulleys; a tightening-pulley. See cut under *idle-wheel*.

**tension-spicule** (ten'shun-spik'ül), *n.* In sponges, a flesh-spicule or microscelere. *Bowerbank*.

**tension-spring** (ten'shun-spring), *n.* A spring formed of inner and outer leaves, of which the latter are not connected at the middle with the former, all being secured together at the ends. A pressure upon the outer leaves induces a tensile strain upon the inner ones, which, when stretched to a straight line, form chords to the outer leaves, and thus limit the yielding of the spring. E. H. Knight.

**tensity** (ten'si-ti), *n.* [*< tense<sup>2</sup> + -ity.*] The state of being tense; tenseness. *Imp. Dict.*

**tensive** (ten'siv), *a.* [*< F. tensif = Pg. It. tensivo; as tense<sup>2</sup> + -ive.*] Giving the sensation of tension, stiffness, or contraction.

A *tensive* pain from distension of the parts.

Floyer, Preternatural State of Animal Humours

**tensome** (ten'sum), *a.* Same as *tendsome*.

**tenson** (ten'son), *n.* [Also *tenzon*; *< F. tenson = Pr. tenso = Pg. tensão = It. tenczone, < L. tensio(-n), a stretching, ML. also a struggle, contention: see tension.*] A contention in verse between rival troubadours, before a tribunal of love or gallantry; hence, a subdivision of a chanson composed by one of the contestants or competitors; also, one of the pieces of verse sung by the competitors, for which a peculiar meter was thought appropriate.

While, out of dream, his day's work went  
To tune a crazy *tenson* or sirvent.

Browning, Sordello, ii.

**tensor** (ten'sor), *n.* and *a.* [*NL. < L. tendere, pp. tensus, stretch: see tend<sup>1</sup>, tense<sup>2</sup>.*] I. *n.*; pl. *tensores* (ten-sō-rēz). 1. In *anat.*, one of several muscles which tighten a part, or make

it tense, or put it upon the stretch: differing from an *extensor* in not changing the relative position or direction of the axis of the part: opposed to *laxator*. — 2. In *math.*, the modulus of a quaternion; the ratio in which it stretches the length of a vector. If the quaternion is put into the form  $xi + yj + zk + w$ , the tensor is  $\sqrt{x^2 + y^2 + z^2 + w^2}$ . If the quaternion is expressed as a matrix, the tensor is the square root of the determinant of the matrix. Abbreviated *T.* — **Right tensor**. See *right*. — **Tensor fasciæ latæ**. Same as *tensor vaginæ femoris*. — **Tensor laminae posterioris vaginæ recti abdominis**, small anomalous muscular slips arising near the internal inguinal opening, and inserted into the transversalis fascia beneath the rectus abdominis. — **Tensor palati**. Same as *circumflexus palati*. See *palatum*. — **Tensor parapatagii**, in *ornith.*, the tightener of the parapatagium, a propatagial slip of the ocular muscle which joins the propatagialis longus; the dermotensor patagii. — **Tensor patagii, tensor plicis alaris**, a muscle of birds which stretches the fold of skin on the front border of the wing, in the reentrance between the upper arm and the forearm: several modifications of such a muscle are described, and made use of to some extent in classifying birds. — **Tensor propatagii brevis or longus**. Same as *propatagialis brevis or longus*. See *propatagialis*. — **Tensor tarsi**. See *tarsus*. — **Tensor trochleæ**, the tightener of the pulley of the trochlear or superior oblique muscle of the eyeball, a small muscle occasionally found in man. — **Tensor tympani**, a muscle supposed to increase the tension of the membrani tympani by acting upon the malleus: it arises from the petrous section of the temporal bone, and adjacent parts, passes through a bony canal parallel with the Eustachian tube, enters the tympanum, and is attached to the handle of the malleus. Also called *malleolus*. — **Tensor vaginæ femoris**, a muscle which acts upon the sheath of the thigh, in man arising from the anterior superior spine of the ilium, and inserted into the deep femoral fascia. It presents many modifications in other animals, being wanting in some, or connected with the panniculus carnosus, or external abdominal muscle, or blended with gluteal muscles. It belongs to the latter group, and not to the muscles of the front of the thigh, with which it is usually associated in human anatomy. Also called *tensor fasciæ latæ*, and *vaginotransversus*. See cut under *muscle*.

II. *a.* In *anat.*, noting certain muscles whose function is to render fasciæ or other structures tense.

**tensor-twist** (ten'sor-twist), *n.* In Clifford's biquaternions, a twist multiplied by a tensor.

**ten-strike** (ten'strik), *n.* In *American bowling*, a stroke which knocks down all the ten pins; hence, figuratively, a stroke or act of any kind which is entirely successful or decisive.

**tensure** (ten'sür), *n.* [*< LL. tensura, a stretching, straining, < L. tendere, pp. tensus, stretch, strain: see tend<sup>1</sup>, tense<sup>2</sup>.*] A stretching or straining; tension.

This motion upon the pressure, and the reciprocal thereof, which is motion upon *tensure*, we use to call motion of liberty, which is when any body, being forced to a preternatural extent, . . . restoreth itself to be natural. Bacon, Nat. Hist., § 12.

**tent<sup>1</sup>** (tent), *n.* [*< ME. tente, < OF. tente, tende, F. tente = Pr. tenda = Sp. tienda = Pg. It. tenda, < ML. tenta, tenda, also tentum, a tent, also a place where clothes are spread out to dry, prop. fem. of L. tentus, pp. of tendere, stretch: see tend<sup>1</sup>. Cf. L. tentonum, a tent, from the same verb.*] 1. A covering or shelter, or a portable lodge, made of some flexible material, as

Tent of form shown in manuscripts of 13th and 12th centuries. (From Villiet-le-Duc's "Dict. du Mobilier français.")

skins, coarse cloth, or canvas, supported by one or more poles, and stretched by means of cords secured to tent-pegs, or in some other way. Wandering tribes, as those of Asia, use tents for their common habitation. Among European nations the chief use of tents, which are generally made of canvas, is for soldiers in the field, the larger and more commodious kind being for the use of general officers. Tents are also used in towns to shelter large occasional assemblies, as the spectators at a circus or the audience at a political or religious gathering, and in woods or uninhabited regions by campers or explorers. Large and permanent tents, such as are raised on posts, are known as *pavilions*, and those of an elaborate and decorative character, such as are set up for outdoor entertainments, are called *marquees*.

And these solemn Fêtes ben made with outen, in  
Hales and *Tentes* made of Clothes of Gold and of Tartaries,  
fulle nobely. Mandeville, Travels, p. 233.

It was upon the Plain of Mamre, . . .

. . . whereas the Angels came  
To Abraham in his *tent*, and there with him did feed.  
Drayton, Polyolbion, iii, 145.

2t. A habitation; a dwelling.

Hountee so fix hath in thyn herte his *tente*  
That wel I wot thou wolt my *seccour* be.

Chaucer, A. B. C., i, 9.

3. A raised wooden box or platform set up in the open air, from which clergymen formerly used to preach when the hearers were too numerous to be accommodated within doors: still sometimes used. [Scotch.]

Ev'n godly meetings o' the saunts,

By thee inspir'd,

When gaping they besiege the *tents*,

Are doubly fr'd. Burns, Scotch Drink.

4. An apparatus used in field-photography as a substitute for the dark room. It commonly consists of a tripod supporting a box with a window of red or orange glass or fabric in front, and furnished with drapery at the back, so as to cover the operator and prevent access of white light to the interior. It is generally fitted with shelves and trays for holding various necessary appliances. Now that the dry-plate has superseded the collodion process, it is very seldom used, and when used it is much simpler and lighter than the tent for wet plates, consisting usually of a small box, with sleeves through which the hands and arms are thrust for the purpose of changing the plates in the holders for fresh ones without exposure to light. In the latter form usually called *changing-box*. — **A-tent**, a kind of tent formed by two upright poles and a ridge-pole, and having its sides sloping to the ground without any vertical wall, thus roughly resembling the letter A. — **Bell tent**, a tent circular in plan, with a single pole in the middle: so called from its shape. — **Dark tent**. See *def. 4.* — **Hospital tent**, a large tent used as a field-hospital. — **Shelter-tent**, a kind of tent, easily put up and removed, used by the rank and file of an army on the march. The tent consists of four or more pieces of canvas which button to one another, and can be put up by means of saplings or poles that may be carried with the army. Each piece of canvas is carried by one man on his knapsack, and the number of men covered by each shelter-tent corresponds to the number of pieces. — **Sibley tent**, a light conical tent having a ventilator at the top. It admits of a fire being made in the center, and will accommodate twelve men with their accoutrements, the men sleeping with their feet to the fire: named from Major H. H. Sibley, United States Dragoons. — **Wall-tent**, a tent which has low upright walls formed of hanging curtains of canvas, the sloping top not reaching as far as the tent-pegs.

**tent<sup>1</sup>** (tent), *v. i.* [*< tent<sup>1</sup>, n.*] To pitch one's tent; live in or as in a tent.

The smiles of knaves

Tent in my cheeks, and schoolboys' tears take up

The glasses of my sight. Shak., Cor., iii, 2, 116.

We will be gone for some days probably, *tenting* it in the open air.

Kane, Sec. Grinnell Exp., I, 357.

Where the red chieftain *tented*

In the days that are gone.

R. W. Gilder, Ballad of the Chimney.

**tent<sup>2</sup>** (tent), *v. t.* [*< ME. tenten, also tempten, < OF. tenter, tempter, tancer, F. tenter = Sp. Pg. tatar = It. tentare, try, tempt, < L. tentare, temptare, handle, touch, feel, try, test, tempt, etc., freq. of tenere, pp. tentus, hold (see tenant<sup>1</sup>), or, according to some, of tendere, pp. tentus or tentus, stretch: see tend<sup>1</sup>. Cf. tempt, the same word in another form.*] 1t. To try; test.

Telamon, the tore kyng, *tentes* hir so wele,

And is fuerster of folke by a felle nowmber.

And lappis in hir loue, that leue hir he nyll.

Destruction of Troy (E. E. T. S.), I, 3147.

2. To probe; sound.

Search my wound deeper; *tent* it with the steel

That made it. Webster, White Devil, v, 2.

I have a sword dares *tent* a wound as far

As any. Shirley, Maid's Revenge, iii, 6.

3. To apply a tent or pledget to; keep open with a tent.

I have ben bred in Paris, and learned my humanities  
and my cursus medendi as well as some that call themselves  
learned leeches. Methinks I can *tent* this wound,  
and treat it with emollients.

Scott, Fair Maid of Perth, vii.

4t. To tempt. See *tempt*.

Euelle spiritus is neghand full nere,  
That will gou tarie at this tyme with his *tentyng*.

York Plays, p. 243.

**tent<sup>2</sup>** (tent), *n.* [*< ME. tente, < OF. (and F.) tente = Sp. tienda = Pg. It. tenta, < ML. tenta, a probe, a tent for a wound; from the verb: see tempt.*] 1t. A probe.

Modest doubt is call'd

The beacon of the wise, the *tent* that searches

To the bottom of the worst.

Shak., T. and C., ii, 2, 16.

2. In *surg.*, a piece of some fabric, bunch of horsehairs or threads, or small cylinder of sponge, laminaria, or other substance introduced into some opening, either natural (as the cervical canal of the uterus) or artificial (as a wound), to keep it open or increase its caliber.

Thou speakest lyke a good Chyrurgian, but dealest lyke one vnskilfull, for making a great wound, thou puttist in a small tent. *Lydell, Laphus and his England, p. 365.*

**Tangle tent.** See *tangle*.

**tent**<sup>1</sup> (tent), *v. t.* [*N. ME. tenten*, stretch; a var. of *tenden*, < *L. tendere*, stretch (see *tend*<sup>1</sup>), and cf. *tent*<sup>1</sup>]; or developed from *tenter*<sup>2</sup>, *ME. tenture*: see *tenter*<sup>2</sup>.] To stretch, as cloth. *Prompt. Parv.*, p. 489.

**tent**<sup>2</sup> (tent), *n.* [*ME. tent*; an aphetic form of *atente*, *E. attente*, or of *entente*, *E. intent*.] 1. Heed; care; notice; attention: usually in the phrase *to take tent*. [Obsolete or Scotch.]

Tyl Y come, take tent to redyng, to exortacion, and teching. *Wyclif*, 1 Tim. iv. 13.

The high parliament  
Of Heaven; where Seraphim take tent  
Of ordering all.

*B. Jonson, Underwoods, cii. 1.*

## 2†. Intent; purpose.

Alisaundrine to counseile thei clepud some thanne,  
& telden hire trewli what tent thei were inne.

*William of Palerne* (E. E. T. S.), I. 1662.

**tent**<sup>4</sup> (tent), *v.* [*ME. tenten*; a var. of *tend*<sup>2</sup>, or ult. of *attend*: see *tent*<sup>4</sup>, *n.*] I. *intrans.* To take heed; be careful: generally with *to*. [Obsolete or Scotch.]

But warily tent, when you come to court me,  
An' come na unless the back yett be a-lee.

*Burns, Oh Whistle an' I'll come to you, my Lad.*

II. *trans.* 1. To observe; take note of; give heed to. [Scotch.]

Owre lorde comaunded vs bothe  
To tente the tree of his.

*York Plays*, p. 25.

If there's a hole in a' your coats,

I rede you tent it;

A child's amang you taking notes,

An', faith, he'll prent it.

*Burns, Captain Grose's Peregrinations.*

## 2†. To attend; tend upon; take care of.

Saue the lordys chambur, tho wadrop to,  
Tho vasher of chambur schalle tent tho two.

*Babees Book* (E. E. T. S.), p. 312.

**tent**<sup>5</sup> (tent), *n.* [*Sp. tinto* (= *F. teint*, dyed, colored), < *L. tinctus*, pp. of *tingere*, dye: see *tint*.] A kind of wine of a deep-red color, chiefly from Galicia or Malaga in Spain, much used as a sacramental wine. Also *tent-wine*.

**tentacle** (ten'ta-kl), *n.* [= *F. tentacle* = *Sp. tentáculo*, < *NL. tentaculum*, a feeler, tentacle, < *L. tentare*, handle, touch, feel, test, try: see *tent*<sup>2</sup>, *tempt*.] 1. In *zool.*, some or any elongated and comparatively slender or flexible process or appendage of an animal, used as an organ of touch, or for exploration, prehension, and sometimes locomotion; a feeler; a tentaculum. The name covers a great variety of organs having little or no structural relationship, as horns, antennae, proboscides, rays, and arms. Specifically—(a) One of the barbs, barbels, or other tactile organs about the mouth or head of a fish. (b) One of the arms of a cephalopod. (c) A kind of proboscis of many worms. (d) One of the arms or rays of a crinoid. (e) One of the cirrus legs of a cirriped. (f) One of the long horns, antennae, or feelers of some crustaceans, as lobsters. (g) The antenna of many insects, especially when long and slender, as in a cricket or cockroach. (h) One of the maxillary palps of various insects. (i) Any slender fleshy process on the back of an insect-larva; especially, a tubular process on the back of certain lepidopterous larvae, near the head, or at the other end, from which a slender thread or ill-smelling scent-organ can be thrust for the purpose, it is supposed, of repelling ichneumons and other enemies. See *osmeterium*. (j) One of the soft horns of various mollusks, as snails. (k) The calcar or siphon of a rotifer. (l) In *Actinozoa*, one of the soft hollow processes of the body-wall around the mouth, in one or several series, as the fleshy lobes of a sea-anemone. (m) In *Hydrozoa*, some tentaculiform part, process, or appendage. The tentacles of the Portuguese man-of-war are several feet long. (n) In *Protozoa*, a pseudopod, or prolongation of the body, especially when slender, stiffish, and more or less permanent, as one of the rays of a sun-animalcule or of an acinetiform infusorian. See *Tentaculifera*.

2. In *bot.*, a kind of sensitive hair or filament, such as the glandular hairs of *Drosera*.

A tentacle consists of a thin straight hair-like pedicel, carrying a gland on the summit.

*Darwin, Insectiv. Plants*, p. 5.

3. Figuratively, anything resembling a tentacle; a feeler.—**Auditory tentacle**, a tentaculicyst.—**Branchial, nuchal, ocular**, etc., **tentacle**. See the adjectives.

**tentacled** (ten'ta-kld), *a.* [*< tentacle + -ed*<sup>2</sup>.] Having a tentacle or tentacles. *Amer. Jour. Psychol.*, II. 528.

**tentacle-sheath** (ten'ta-kl-shēth), *n.* In *conch.*, the tentacular sheath.

**tentacula**<sup>1</sup> (ten-tak'ū-lā), *n.*; pl. *tentaculae* (-lē). [*NL.*: see *tentacle*.] Same as *tentacle*.

**tentacula**<sup>2</sup>, *n.* Plural of *tentaculum*.

**tentacular** (ten-tak'ū-lār), *a.* [= *F. tentaculaire* = *Sp. tentacular*; < *NL. tentaculum*, a tentacle,

+ *-ar*<sup>3</sup>.] Of or pertaining to a tentacle, in any sense; of the nature, structure, function, or appearance of a tentacle; adapted or used as a tactile organ; tentaculiform: as, tentacular character, movements, or formation.

At the base of the tentacular circle.

*W. B. Carpenter, Micros.*, § 551.

**Tentacular branch**, one of the branches of a tentacle in some *Hydrozoa*. **Tentacular canal**, in crinoids, the central or common canal, which branches into the tentacles and places their cavities in communication with the common cavity, and so with one another.—**Tentacular person**, a tentacle-like or filamentous part of a compound organism, as a hydroid polyp, provided with an urticating organ; a neotacaly.—**Tentacular sheath**, in *conch.*, a structure which sheathes the bases of the tentacles of various mollusks.

**Tentaculata** (ten-tak'ū-lā'tā), *n. pl.* [*NL.*, neut. pl. of *tentaculatus*: see *tentaculate*.] 1. In some systems, a branch or prime division of echinoderms: contrasted with *Ambulacrata*, and divided into three classes, *Crinoidea*, *Cystoidea*, and *Blastoidea*.—2. A division of ctenophorans, including comb-jellies with two long tentacles. See cuts under *Saccata*.

**tentaculate** (ten-tak'ū-lāt), *a.* [*< NL. tentaculus*, < *tentaculum*, tentacle: see *tentacle*.] 1. Having a tentacle or tentacles; tentaculated; tentaculiferous.—2. Tentaculiform; tentacular: a less careful usage: as, tentaculate processes.—3. Of or pertaining to the *Tentaculata*: as, crinoids are tentaculate echinoderms.

**tentaculated** (ten-tak'ū-lā-ted), *a.* [*< tentaculate + -ed*<sup>2</sup>.] Same as *tentaculate*.

**Tentaculibranchiata** (ten-tak'ū-li-brang-ki-ā'tā), *n. pl.* [*NL.*, neut. pl. of *\*tentaculibranchiatus*: see *tentaculibranchiate*.] The *Bryozoa* or *Polyzoa* considered as a class of the branch *Lophophora* of the phylum *Mollusca*. *E. E. Lankester*.

**tentaculibranchiate** (ten-tak'ū-li-brang'ki-āt), *a.* [*< NL. \*tentaculibranchiatus*, < *tentaculum*, tentacle, + *branchia*, gills.] Of or pertaining to the *Tentaculibranchiata*.

**tentaculicyst** (ten-tak'ū-li-sist), *n.* [*< NL. tentaculum*, tentacle, + *Gr. kystis*, bladder: see *cyst*.] One of the vesicular or cystic tentacles of a hydrozoan; a marginal body representing a reduced and modified tentacle, whose axis is a hollow endodermal process that distinguishes it from the other kinds of marginal bodies, which are wholly of ectodermal origin, as ocellicysts and otcysts. Also *tentaculocyst*. See *lithocyst*, and cut under *Steganophthalmdata*.

**tentaculicystic** (ten-tak'ū-li-sis'tik), *a.* [*< tentaculicyst + -ic*.] Of or pertaining to a tentaculicyst, or having its characters.

**Tentaculifera** (ten-tak'ū-lif'ē-rā), *n. pl.* [*NL.*, neut. pl. of *tentaculifer*: see *tentaculiferous*.]

1. One of three divisions of infusorians, containing the acinetiform animalcules, as distinguished from the flagellate and the ciliate; a class or order of *Infusoria*, characterized by the tentaculiform and usually suctorial nature of their processes, and divided into *Suctorior* and *Actinaria*. These animalcules bear neither flagella nor cilia in the adult state, but take their food and move about by means of tentacles developed from the cuticular surface or from the internal parenchyma. These tentacles may be simply adhesive, or tubular and expanded at the end into a cup-like sucking-disk. An endoplast and one or more contractile vacuoles are usually conspicuous; but trichocysts are seldom if ever present. The creatures inhabit fresh or salt water, and multiply by transverse or longitudinal fission or by external or internal gemmation. There are 6 families and 14 genera. Sometimes called *Polystomata*. See cut under *Actineta*.

2. An order of cephalopods, also called *Tetrabranchiata*: opposed to *Acetabulifera*. See cut under *Tetrabranchiata*.—**Tentaculifera actinaria**, those tentaculiferous animalcules whose tentacles are merely adhesive and not suctorial, including the families *Ephelotidae* and *Ophryotendinidae*. *Kent.*—**Tentaculifera suctorior**, those tentaculiferous animalcules whose tentacles are wholly or partially suctorial. Also called *Suctorior*.

**tentaculiferous** (ten-tak'ū-lif'ē-rus), *a.* [*< NL. tentaculifer*, < *tentaculum*, tentacle, + *L. ferre* = *E. bear*<sup>1</sup>: see *-ferous*.] Bearing, producing, or provided with tentacles; tentaculate. Also *tentaculigerous*. Specifically—(a) In *Infusoria*, of or pertaining to the *Tentaculifera*; acinetiform, as an animalcule. (b) In *Mollusca*, of or pertaining to the *Tentaculifera*; not acetabuliferous, as a cephalopod.

End of a Tentacular Branch of *Hydrozoa*, showing the central canal, the crinoid, the involution investing the sacculus, the end of which is straight with the lateral processes curling around it.

**tentaculiform** (ten-tak'ū-li-fōrm), *a.* [*< NL. tentaculum*, tentacle, + *L. forma*, form.] Having the form or aspect of a tentacle; tentacular: as, tentaculiform thread-cells. *Huxley*.

**tentaculigerous** (ten-tak'ū-lij'ē-rus), *a.* [*< NL. tentaculum*, tentacle, + *L. gerere*, carry.] Same as *tentaculiferous*. *Huxley*.

**tentaculite** (ten-tak'ū-lit), *n.* [*< NL. Tentaculites*.] A fossil pteropod of the family *Tentaculitidae*.—**Tentaculite beds**, in *geol.*, a subdivision of the Ilfracombe group, of Middle Devonian age, occurring in Devonshire, England: it is so named on account of the abundance of *Tentaculites scalaris* which it contains.—**Tentaculite limestone**, in the nomenclature of the New York Survey, a subdivision of the Water-lime group, of Upper Silurian age, abounding in tentaculites.

**Tentaculites** (ten-tak'ū-lit'ēz), *n.* [*NL.*, < *tentaculum*, tentacle: see *tentacle*.] The typical genus of *Tentaculitidae*, having such species as *T. irregularis*.

**Tentaculitidae** (ten-tak'ū-lit'i-dē), *n. pl.* [*NL.*, < *Tentaculites* + *-idae*.] A family of fossil thecosomatous pteropods, typified by the genus *Tentaculites*.

**tentaculocyst** (ten-tak'ū-lō-sist), *n.* Same as *tentaculicyst*. *Encyc. Brit.*, XII. 555.

**tentaculum** (ten-tak'ū-lum), *n.*; pl. *tentacula* (-lā). [*NL.*: see *tentacle*.] A tentacle of any kind; also, a tactile hair; a vibrissa, as one of the whiskers of a cat.

**tentage** (ten'tāj), *n.* [*< tent*<sup>1</sup> + *-age*.] Tents collectively; a camp.

Upon the mount the king his tentage fixt.

*Drayton, Barons' Wars*, ii. 15.

**tentation** (ten-tā'shon), *n.* [*< ME. tentaciun*, < *OF. (and F.) tentacion* = *Sp. tentacion* = *Pg. tentação* = *It. tentazione*, < *L. tentatio* (*n.*), a trial, proof, attack, temptation, < *tentare*, pp. *tentatus*, try, test: see *tent*<sup>2</sup>, *tempt*, and cf. *temptation*, a doublet of *temptation*.] 1†. Trial; temptation.

If grace alone sat in the heart, the hopeless devil would  
forbear his tentations; he knows he hath a friend in our  
house that will be ready to let him in.

*Rev. T. Adams, Works*, I. 21.

2. A method of making adjustments of work by trial or experiment. Specifically—(a) A mode of picking locks by releasing the tumblers one after the other from the stud, while the bolt is steadily pressed backward. (b) A method of adjusting compasses on iron ships by shifting the position of boxes of iron chain and magnets experimentally, until the attraction of the hull on the needle is seen to be neutralized. *E. H. Knight*.

**tentative** (ten'ta-tiv), *a.* and *n.* [*< F. tentatif* = *Sp. Pg. It. tentativo*, < *L. tentativus*, trying, testing, < *tentare*, pp. *tentatus*, try, test: see *tent*<sup>2</sup>, *tempt*.] I. *a.* Based on or consisting in trial or experiment; experimental; empirical.

Falsehood, though it be but tentative, is neither needed nor approved by the God of truth.

*Bp. Hall, Jehu Killing the Sons of Ahab.*

Neither these nor any other speculations concerning ultimate forms can, however, be regarded as anything more than tentative.

*H. Spencer, Prin. of Sociol.*, § 578.

II. *n.* An essay; a trial; an experiment.

We can imagine a variety of hypotheses to explain every unexplained phenomenon, and it is only by successive tentatives that we reach any reliable explanation.

*G. H. Lewes, Probs. of Life and Mind*, I. i. § 24.

**tentatively** (ten'ta-tiv-li), *adv.* In a tentative manner; by way of trial or experiment.

**tent-bed** (ten'ted), *n.* A bed with curtains which hang from a central point overhead, so as to form a covering resembling a tent.

**tent-bedstead** (ten'ted'sted), *n.* A tent-bed.

Tent-caterpillar (*Uta amphiamericana*).  
a, tent, one third of natural size.

Of or pertaining to the tentorium.—Tentorial

**angle**, an angle formed by the intersection of the basiscranial axis with the plane of the tentorium, the apex being directed upward.

**tentorium** (ten-to'ri-um), *n.*; pl. *tentoria* (-i). [NL., < L. *tentorium*, a tent, < *tendere*, stretch; see *tent*.] Cf. *tent*.] 1. A partition, composed of a strong sheet of the dura mater, stretched across the back part of the cranial cavity in man, between the cerebrum and the cerebellum. A tentorium sometimes ossifies, or includes a shelf of bone, the bony tentorium, as in the cat family. More fully called *tentorium cerebelli*.

2. In *zool.* and *anat.*, the endocranium. *Huxley*. —3. Same as *tenture*. **Sinus tentorii**. See *sinus*. **tentory** (ten-to'ri), *n.*; pl. *tentories* (-ries). [OF. *tentoria*, < L. *tentorium*, a tent; see *tentorium*.] An awning; a tent.

The women . . . who are said to weave hangings and curtains for the grove were no other than makers of *tentories* to spread from tree to tree. *Evelyn*, *Sylva*, iv. § 8.

**tent-peg** (tent'peg), *n.* Same as *tent-pin*.

**tent-pegging** (tent'peg'ing), *n.* An equestrian game or exercise common among British soldiers in India, in which the competitors, riding at full gallop, try to strike and carry off on the point of a lance a tent-peg which has been firmly fixed in the ground.

As a last wind up there was a little *tent-pegging*, but, as my husband and Lieutenant Carroll were the only ones who could do anything, it was soon over.

*E. Sartorius*, in *The Soudan*, p. 196.

**tent-pin** (tent'pin), *n.* A stout peg driven into the ground to fasten one of the ropes of a tent to. It is usually of wood, with a notch or nick to confine the bight of the rope, but sometimes of iron, with a hook or ring to receive the rope.

While he [Sisera] was awaried and asleep, Jael drove the *tent-pin* through his head and fastened it to the ground. *The Century*, XXXVIII, 568.

**tent-pole** (tent'pōl), *n.* One of the poles used in pitching a tent. There are usually two uprights, one at the front and one at the rear, connected at the top by a horizontal ridge-pole. In the Sibley and the bell tent there is but one, a central pole or post. The tent-poles of an Indian tepee are several, stacked in a circle, upon which skins are stretched as on a frame.

**tent-rope** (tent'rōp), *n.* One of the several ropes or cords by which a tent is secured to the tent-pins and thus to the ground. These ropes are attached to the tent usually at intervals corresponding to a breadth of the canvas.

**tent-stitch** (tent'stich), *n.* A stitch used in worsted-work and embroidery, single and not crossed, the stitches lying side by side in a diagonal direction. Also called *petit point*.

About a month ago *Tent* and *Turkey-stitch* seemed at a stand; my wife knew not what new work to introduce.

*Johnson*, *The Idler*, No. 13.

Black leather cushions, embroidered in red and blue *tent-stitch*. *S. Judd*, *Margaret*, ii. 11.

**tent-tree** (tent'trē), *n.* A tall species of screw-pine, *Pandanus Forsteri*, of Lord Howe's Island, New South Wales.

**tenture** (ten'tūr), *n.* [F. *tenture*, hangings; see *tenter* and *tent*.] Hangings or decoration for a wall, especially paper-hangings. Also *tentorium*.

**tent-wine** (tent'win), *n.* Same as *tent*.

**tentwise** (tent'wiz), *adv.* In the form of a tent.

**tent-work** (tent'wērk), *n.* Work produced by embroidering with tent-stitch.

Our great grandmothers distinguished themselves by truly substantial *tent-work* chairs and carpets; by needle-work pictures of Solomon and the Queen of Sheba.

*Miss Edgeworth*, *Practical Education*, xx.

**tentwort** (tent'wērt), *n.* A fern, *Asplenium Ruta-muraria*. Also called *wall-rue*.

**tenty** (ten'ti), *a.* [Also *tentie*; a reduced form of *tentive*.] Attentive; cautious; careful. [Scotch.]

Jean slips in twa with *tentie* e'e. *Burns*, *Halloween*.

**tenuate** (ten'ū-āt), *v. t.*; pret. and pp. *tenuated*, ppr. *tenuating*. [F. *tenuatus*, pp. of *tenuare*, make thin or slender, < *tenuis*, thin; see *tenuous*.] To make thin. [Rare.] *Imp. Dict.*

**tenuous**, *n.* Plural of *tenuis*.

**tenuifolious** (ten'ū-i-fō'li-us), *a.* [F. *tenuis*, thin, + *folium*, leaf.] In *bot.*, having slender or narrow leaves.

**tenuious** (te-nū'i-us), *a.* [F. *tenuis*, thin; see *tenuous*.] Same as *tenuous*.

The thing I speak of is as easy to be apprehended as how infection should pass in certain *tenuious* streams through the air from one house to another.

*Glanville*, *Essays*, vi.

*Sir T. Browne*, *Vulg. Err.*, ii. 4.

**tenuiroster** (ten'ū-i-ro'stēr), *n.* [F. *tenuirostris*; see *Tenuirostres*.] A slender-billed bird, as a member of the *Tenuirostres*.

**tenuirostral** (ten'ū-i-ro'stral), *a.* [F. *tenuirostris*; see *tenuirostres*.] Slender-billed, as a bird; formerly specifying the *Tenuirostres*, now simply descriptive. See *cuts under bill* and *Promerops*.

**Tenuirostres** (ten'ū-i-ro'strēs), *n. pl.* [NL., pl. of *tenuirostris*, slender-billed, < L. *tenuis*, thin, + *rostrum*, bill, beak.] 1. A very extensive and unnatural assemblage of chiefly passerine or insectivorous birds in which the beak is slender, as creepers, nuthatches, honey-eaters, sun-birds, humming-birds, hoopoes, and many others having little real affinity: correlated with *Dentirostres*, *Conirostres*, etc., in some of the older systems, as that of Cuvier. By Blyth (1849) the term was restricted to the swifts and humming-birds.—2. In *ornith.*, in Selater's system of 1880, a group of laminiplanar oscine *Passeres*, nearly continuous with Sundevall's *Corynorphinae*.

**tenuis** (ten'ū-is), *n.*; pl. *tenuēs* (-ēz). [NL., < L. *tenuis*, thin, fine, close; see *tenuous*.] In *gram.*, one of the three surd mutes of the Greek alphabet, κ, π, τ, in relation to their respective middle letters, or medials (that is, sonant mutes), γ, β, δ, or their aspirates, χ, φ, θ. These terms are sometimes also applied to the corresponding articulate elements in other languages, as *k*, *p*, *t*.

**tenuity** (te-nū'i-ti), *n.* [Early mod. E. *tenuite*; < OF. *tenuite*, F. *tenuité* = Sp. *tenuidad* = Pg. *tenuidade* = It. *tenuità*, < L. *tenuitas* (-s), thinness, slenderness, fineness, smallness, < *tenuis*, thin; see *tenuous*.] 1. The state of being *tenuous* or thin; want of substantial thickness or depth; fineness; thinness, as applied to a broad substance, or slenderness, as applied to one that is long.

When I sat down my intent was to write a good book, and, as far as the *tenuity* of my understanding would hold out, a wise, ay, and a discreet.

*Sterne*, *Tristram Shandy*, iii., Author's Pref.

He [the bull-dog] is not well shaped; for there is not the quick transition from the thickness of the fore-part, to the *tenuity*—the thin part—behind, which a bull-dog ought to have.

*Johnson*, in *Boswell*, an. 1777.

2. Rarity; rareness; thinness, as of a fluid.

—3. Poverty; indigence.

The *tenuity* and contempt of clergymen will soon let them see what a poor carcass they are, when parted from the influence of that supremacy.

*Edmon Basilike*.

4. Simplicity or plainness; a quality of style opposed to opulence or grandeur.

**tenuous** (ten'ū-us), *a.* [Formerly also *tenuious*, *q. v.*; = F. *tenu* = Sp. *tenu*, *tenuo* = Pg. It. *tenu*, < L. *tenuis*, thin, slender, slim, fine, narrow, close, = E. *thin*; see *thin*.] 1. Thin; small; minute.—2. Rare; rarefied; fine; subtle.

In the Sophist, that bewildering maze of *tenuous* abstractions, a certain mysterious Eleatic stranger conducts the argument to its fitting and convincing close.

*Jour. Spec. Phil.*, XIX, 42.

**tenuousness** (ten'ū-us-ness), *n.* Tenuous or attenuated character or quality; slenderness; thinness; sparseness; rarity.

**tenure** (ten'ūr), *n.* [ME. *\*tenure*, *tennure*, < OF. *tenure*, *tenure*, F. *tenure* (ML. *tenura*), a tenure, or estate in land, < L. *tenere*, hold; see *tenant*.] 1. The nature of the right or title by which property, especially real property, is held; also, the property so held. Land-tenure is, in the main, either *feudal* or *allodial*. According to the latter tenure, the whole right and title to the land rests with the owner, subject only to the right of the state, and this is the principle of United States law; according to the former, the person possessing the land holds it from a superior, and this is the principle of English law. According to the theory in England, all land is held of the crown, either mediately or immediately. The ownership of land is therefore never unlimited as to extent, for he who is the owner of land in fee, which is the largest estate that a man can have in land, is not absolute owner; he owes services in respect of his fee (or fief), and the seignior of the lord always subsists. All land in the hands of any layman is held of some lord, to whom the holder or tenant owes some service; but in the case of church lands, although they are held by tenure, no temporal services are due, but the lord of whom these lands are held must be considered the owner, although the beneficial ownership can never revert to the lord. All the species of ancient tenures may be reduced to four, three of which still subsist: (1) *tenure by knight-service*, which was the most honorable (now abolished); (2) *tenure in free socage*, or by a certain and determinate service, which is either free and honorable or villein and base; (3) *tenure by copy of court-roll*, or *copyhold tenure*; (4) *tenure in ancient demesne*. There was also *tenure in frankalmoin*, or by *free alms*. (See *frankalmoin*.) The tenure in free and common socage has absorbed most of the others. (See *estate*, *tenant*, *copyhold*, *socage*, *villeinage*.) In Scots law the equivalent technical term is *holding*.

And had not I ben, the comens wolde have brennyd his place and all his *tenures*, wher thorough it coste me by my none propre goods at that tyme more than vi. merks in mate and drynke.

*Paston Letters*, I, 133.

2. The consideration or service which the occupier of land pays to his lord or superior for the use of his land, or the condition on which he holds it.

To ride in the lord's train, to go at the lord's bidding wherever he might will, to keep "head-ward" over the manor at nightfall, or horse-ward over its common field, to hedge and ditch about the demesne, or to help in the chase and make the "deer-hedge," were *tenures* by which the villagers held their lands, as well as by labor on the lord's land one day a week throughout the year, and a month's toil in harvest-time.

*J. R. Green*, *Conq. of Eng.*, p. 317.

We served not in Caesar's armies; we took not Caesar's pay; we held no lands by the tenure of guarding Caesar's frontiers.

*E. A. Freeman*, *Amer. Lects.*, p. 117.

3. Holding, or manner of holding, in general; the terms or conditions on which, or the period during which, anything is held.

It is most absurd and ridiculous for any mortal man to look for a perpetual *tenure* of happiness in this life.

*Burton*, *Anat. of Mel.*, p. 94.

4. Quality with respect to proportion of ingredients.

The ores treated in this [Castilian] furnace ought never to contain more than 30 per cent. of metal, and, when richer, must be reduced to about this *tenure* by the addition of slags and other fluxes.

*Ure*, *Dict.*, III, 62.

(a) An act of the United States Congress, May 15th, 1820 (3 Stat. 582), prescribing that large classes of public officers should be appointed for the limited term of four years and removable at pleasure. (b) An act of 1871 (14 Stat. 439; Rev. Stat. § 1767 et seq.), providing that persons appointed to civil offices by the President, and confirmed by the Senate, excepting members of the cabinet, shall hold such offices until their successors are qualified, subject to suspension by the President, during the recess of the Senate, for misconduct; and that they can be removed only with the consent of the Senate.

**tenure-horn** (ten'ūr-hōrn), *n.* A horn by the possession or exhibition of which certain estates were held. Compare *tenure-sword*. The "Bruce horn" of Savernake Forest, Wiltshire, and the "Tutbury horn" of Tutbury in Staffordshire, England, have been exhibited at South Kensington.

**tenure-sword** (ten'ūr-sōrd), *n.* A sword by the exhibition of which at certain times certain lands were held. In most cases the sword so exhibited was sacredly preserved in the family holding the estate. The weapons seem generally to have been falchions, or short curved swords. *J. P. Earwaker*.

**tenury**, *n.* Same as *tenure*.

**tenuto** (te-nō'tō), *a.* [It., pp. of *tenere*, hold, < L. *tenere*, hold; see *tenant*.] In *music*, held; sustained; given full value: used of tones or chords occurring in contrast to staccato tones or chords. It is nearly the same in effect as *legato*. Abbreviated *ten.*—**Tenuto mark**, in *musical notation*, a horizontal stroke over a note or chord, to indicate that it is to be held its full time: thus, *ten.*

**tenzon** (ten'zon), *n.* Same as *tenson*.

**teocalli** (te-ō-kal'i), *n.* [= Sp. *teocalli*, *teucali*, < Mex. *teocalli*, a temple, lit. 'house of a god,' < *teotl*, a god, + *calli*, a house.] A structure of earth and stone or brick, used as a temple or place of worship by the Mexicans and other aborigines of America. They were generally solid four-sided truncated pyramids, built terrace-wise, with the temple proper on the platform at the summit. Many *teocallis* still remain in a more or less perfect state, as the so-called Pyramid of Cholula. Also *teopan*.

**teonet**, *v. t.* A Middle English form of *teen*.

**teonoma** (te-ō-nō-mā), *n.* [An anagram of *Neotoma*, *q. v.*] 1. The large bushy-tailed rat of the Rocky Mountains, *Neotoma cinerea*, the pack-rat.—2. [cap.] [NL.] A genus of such rats, separated from *Neotoma*. *J. E. Gray*.

**teopan** (te-ō-pan), *n.* Same as *teocalli*.

**teosinte** (te-ō-sin'te), *n.* [Mex.] A grass, *Euchlaena luxurians*, native in Mexico and Central America, introduced into cultivation in various parts of the world. It is closely allied to the Indian corn, having the male flowers in a tassel at the top, the seed, however, borne not on a cob, but on slender stems from the joints, inclosed in a loose husk. It is an annual, reaching the height of 12 feet, suitable for forage, and perhaps the most prolific of forage-plants, sending up sometimes sixty or eighty shoots, and springing up again when cut. It endures drought fairly well, though preferring humid soil. Its success in the southern United States is hindered by its not ripening its seed; it is found to do so, however, in some subtropical localities. Also called *Guatemala grass*.

**tepal** (tep'al), *n.* [F. *petal*, transposed for distinction, prob. in imitation of *sepal*.] In *bot.*, an individual segment of a perianth, whether sepal or petal. [Rare.]

**tepee** (té'pē), *n.* [Also *teepee*, *tipi*; Amer. Ind.] An Indian wigwag or tent.

**tepefaction** (tep-ē-fak'shon), *n.* [F. *tepefactio* (n-), < *tepefacere*, make lukewarm; see

*tepefy*. The act or operation of making tepid, or moderately warm. *Imp. Dict.*

**tepefy** (tép'ē-fī), *v.*; pret. and pp. *tepefied*, ppr. *tepefying*. [*L. tepificare*, make lukewarm, < *tepere*, be lukewarm (see *tepid*), + *facere*, make.]

**I. trans.** To make tepid, or moderately warm.  
**II. intrans.** To become moderately warm.

**tepetate** (te-pe-tāh'tē), *n.* A material existing in enormous quantities (5 to 500 feet thick) over the greater portion of the surface of Mexico, and supposed to be consolidated volcanic mud. It some what resembles a sun-baked clay. It is also found less extensively in Central and South America.

**tephramancy** (tēf'rā-man-sī), *n.* Same as *tephromancy*.

**tephrite** (tēf'rīt), *n.* [*L. tephritis*, < Gr. *τῆφρις*, an ash-colored stone, < *τῆφρις*, ash-colored, < *τέφρα*, ashes.] The name of certain modern volcanic rocks of rather varied and uncertain composition. The tephrites bear the same relation to the normal basalts that the phonolites do to the trachytes (Rosenbusch). Among the older eruptive rocks, the tephrite is the representative of tephrite, the essential features of which are that it is porphyritic in structure, the ground-mass containing a soda lime feldspar, which also sometimes occurs in distinct crystals, while to this are added nephelin, leucite, and augite, with apatite, magnetite, and other less abundant minerals. See *nephelin-tephrite* and *leucite-basalt*.

**tephritic** (tēf'rīt'ik), *a.* [*tephrite* + *-ic*.] Of the nature of tephrite; pertaining to tephrite.

**tephritoid** (tēf'rīt'oid), *n.* [*tephrite* + *-oid*.] A variety of tephrite. In this nephelin is wanting, but its base is made up of a material rich in soda, and gelatinizing in acid, by which the nephelin is to a certain extent replaced.

**Tephrodornis** (tēf-rō-dōr'nīs), *n.* [NL. (Swainson, 1831), < Gr. *τεφροδωρ*, ash (< *τέφρα*, ashes), + *ὄρνις*, a bird.] An extensive genus of Indian

*Tephrodornis pondicerranus.*

shrike-like birds, now restricted to 6 species, of which the best-known is the so-called Keroula shrike of Pondicherry, *T. pondicerranus*.

**tephroite** (tēf'rō-īt), *n.* [Irreg. < Gr. *τεφρός*, ash-gray, + *-ite*. Cf. *tephrite*.] A silicate of manganese of an ash-gray or reddish color, commonly occurring in cleavable masses: found in New Jersey, also in Sweden. It belongs to the chrysotile group.

**tephromancy** (tēf'rō-man-sī), *n.* [Also *tephramancy*; < F. *téphromancie*, < NL. *tephromantia*, < Gr. *τέφρα*, ashes, + *μαντεία*, divination.] Augury depending on the inspection of the ashes of a sacrifice.

**Tephrosia** (tēf-rō'sī-ā), *n.* [NL. (Persoon, 1807), < Gr. *τεφρός*, ash-colored, < *τέφρα*, ashes.] A genus of papilionaceous plants, of the tribe *Gallegeæ*, type of the subtribe *Tephrosiæ*. It is characterized by racemose flowers with blunt anthers, the banner-stamen free at the base, but early united with the other stamens at the middle, and the style somewhat

rigid, incurved, and usually bearded at the tip; and by a compressed linear or rarely ovate pod with two thin valves, nerve-like sutures, and numerous seeds sometimes enlarged by a small strophiole. There are about 125 species, widely scattered through warm regions and especially numerous in Australia. A few are found in North America, six occurring within the United States south of Delaware, one of which, *T. Virginiana*, extends northward as far as the Massachusetts coast. They are herbs or shrubs, with odd-pinnate leaves of many leaflets, rarely reduced to three or even to one, often closely hoary with

midrib. The red, purple, or white flowers are conspicuously papilionaceous, with the petals borne on claws, the banner roundish and externally silky, the keel incurved; they form racemes which are often leafy at the base and are terminal, opposite the leaves, or grouped in the upper axils. *T. Virginiana* is locally known as *wild sweet-pea* from its flowers, and as *devil's-shoestrings* and *catgut* from its long, slender, and very tough roots; book-names are *hoary pea* and *goat's rue*. Several species yield a dye, as *T. tinctoria*, used for indigo at Mysore, and *T. Apollinea* (for which see *Egyptian indigo*, under *indigo*). *T. purpurea* in India and *T. toxicaria* in Surinam are used medicinally; the latter, under the name *Surinam poison*, is used in the West Indies and elsewhere to stupefy fish.

**tepid** (tép'id), *a.* [= OF. *tiede* = It. *tepid*, < L. *tepidus*, lukewarm, tepid (cf. *tepor*, heat, = Skt. *tāpas*, heat), < *tepere*, be lukewarm, = Skt. *tap*, be warm.] Moderately warm; lukewarm.

The naked negro, panting at the Line, . . .

Basks in the glare, or stems the tepid wave.

Goldsmith, Traveller, l. 71.

**tepidarium** (tēp-id-ā-rī-um), *n.*; pl. *tepidaria* (-ā). [L., a tepid bath, or the room set apart for it, < *tepidus*, lukewarm, tepid: see *tepid*.] In the ancient Roman baths, an apartment heated to a certain temperature to prepare the body for the great heat of the hot and vapor baths, or to serve as a palliative to the cold of the frigidarium; also, the boiler in which the water was heated for the hot bath.

**tepidity** (tēp'id-i-ti), *n.* [*F. tépidité* = Pr. *tepiditat* = It. *tepidità*, < L. as if *\*tepidita* (-is), lukewarmness, < *tepidus*, lukewarm, tepid: see *tepid*.] Lukewarmness.

They upbraided the tepidity and infidel baseness of the Jewish nation. *Jer. Taylor*, Works (ed. 1835), l. 49.

**tepidly** (tēp'id-li), *adv.* In a tepid manner; lukewarmly.

**tepidness** (tēp'id-nes), *n.* Tepidity.

**tepor** (tēp'or), *n.* [= It. *tepor*, < L. *tepor*, lukewarmness, < *tepere*, be lukewarm: see *tepid*.] Gentle heat; moderate warmth.

The small pox, mortal during such a season, grew more favorable by the tepor and moisture in April. *Arbutnot*.

**tepay**, *n.* See *teapoy*.

**tequesquite** (tek-es-ké'te), *n.* [Said to be so called from a Mexican place-name.] In *Mexican metal*, native carbonate of soda mixed with some sulphate and common salt, which effloresces, after the rainy season, on the surface of the plains in Mexico, and later in the season forms a crust.

In the two Haciendas of the Company (at Sombrerete), La Purisima and La Soledad, amalgamation is but little employed. The ores are usually smelted, and in this process great use is made of the *tequesquite* (carbonate of soda) from La Salada, which is employed as a dissolvent. *Ward*, Mexico, II. 279.

**ter** (tēr), *adv.* [L., thrice, < *tres* (tri-), three: see *three*.] Thrice: used in music to indicate that a measure or phrase to which it is attached is to be repeated three times in succession.

**teraget**, *n.* [ME., appar. < OF. *\*terrage*, land (found only in sense of field-rent), < L. *terra*, land: see *terra*.] Country; territory.

**teramorphous** (ter-a-môr'fus), *a.* [Prop. *\*teratomorphous*, < Gr. *τέρας* (teras), a monster, + *μορφή*, form.] Of the form or nature of a monstrosity.

**terapenet**, *n.* An obsolete form of *terrapin*.

**teraph** (tēr'af), *n.*; pl. *teraphim* (-ā-fim). [Heb.] A household image revered by the ancient Hebrews: in the Bible used only in the plural, and sometimes applied to one image. The teraphim seem to have been either wholly or in part of human form and of small size. They appear to have been revered as penates, or household gods, and in some shape or other to have been used as domestic oracles.

**terapint**, *n.* An obsolete spelling of *terrapin*.

**Teras** (tē'ras), *n.* [NL. (Treitschke, 1829), < Gr. *τέρας*, a monster.] A notable genus of moths,

*Teras malivora*.  
a, larva; A, pupa; c, moth; d, leaf with pupal exuvium.  
(Cross and lines show natural sizes.)

ordinarily placed at the head of the tortricid series. The genus is wide-spread and the species are numerous. *T. malivora* is common in the United States, and feeds in the larval state on the leaves of the apple. *T. caudana* is a curious European species in which the fore wings have a falcate outer margin and an excavation on the costal margin. *T. contaminaria* is known as the *cheekered pebble*.

**teratocali** (tê-rat'ī-kāl), *a.* [*\*teratic*, < Gr. *τεράτιος*, strange, monstrous, < *τέρας* (teras), a sign, wonder, prodigy, monster, a huge animal, a strange creature.] Marvelous; prodigious; incredible.

Herodotus, possibly delighting in teratological stories, might tell what he never heard.

W. Wollaston, Religion of Nature, iii. 16.

**teratogenic** (ter'a-tō-jen'ik), *a.* [*teratogen-y* + *-ic*.] Producing monsters; of or pertaining to teratology.

**teratogeny** (ter-a-toj'ē-ni), *n.* [*Gr. τέρας* (teras), a monster, + *γεννᾶν*, produce.] In *pathol.*, the production of monsters.

**teratoid** (ter'a-toid), *a.* [*Gr. τέρας* (teras), a monster, + *ειδός*, form.] Resembling a monster.—**Teratoid tumor**. Same as *teratoma*.

**teratolite** (ter'a-tō-lit), *n.* [*Gr. τέρας* (teras), a prodigy, + *λίθος*, stone.] A kind of clay or fine-grained silicate of alumina from the coal-formation of Planitz in Saxony, formerly supposed to possess valuable medicinal properties, whence it had its ancient name of *terra miraculosa Saxonie*. Also called *lithomarge*. Sometimes erroneously spelled *terratolite*, as if from Latin *terra*, earth.

**teratologic** (ter'a-tō-loj'ik), *a.* [*teratolog-y* + *-ic*.] Same as *teratological*.

**teratological** (ter'a-tō-loj'ī-kāl), *a.* [*teratologic* + *-al*.] Of or pertaining to teratology.

**teratologist** (ter-a-tol'ō-jist), *n.* [*teratolog-y* + *-ist*.] 1. One who deals in marvels; a marvel-monger. *Imp. Dict.*—2. One versed in teratology.

**teratology** (ter-a-tol'ō-jī), *n.* [= F. *teratologie*, < NL. *teratologia*, < Gr. *τερατολογία*, a telling of marvels or prodigies, < *τέρας* (teras), a sign, marvel, prodigy, monster, + *-λογία*, < *λέγειν*, say, tell (see *-ology*).] 1. Narration of what is marvelous or prodigious; exaggeration in description.

*Teratology* is when bold Writers, fond of the sublime, intermix something great and prodigious in every Thing they write, whether there be Foundation for it in Reason or not, and this is what is call'd Bombast. *Bailey*, 1727.

2. In *anat.*, *zool.*, and *bot.*, the science of animal or vegetable monstrosities; that department of biology which treats of malformations, or monstrous or abnormal growths, in the animal or the vegetable kingdom.

**teratoma** (ter-a-tō'mā), *n.*; pl. *teratomata* (-mā-tā). [NL., < Gr. *τέρας* (teras), a monster, + *-ωμα*.] A complex congenital tumor, often containing very many different tissues, as skin, hair, teeth, connective tissue, cartilage, bone, muscles, and glands: most frequently found at the lower end of the spine, about the head and neck, and in the generative organs. Also called *teratoid tumor*.

**teratomatous** (ter-a-tom'a-tus), *a.* [*teratoma* (t) + *-ous*.] Having the character of a teratoma.

**terbium** (tēr'bi-um), *n.* [NL., < (Yt) *terb(y)* in Sweden: see *erbium*, and cf. *yttrium*.] A rare element, not yet isolated, occurring in the samarskite of North Carolina and certain other rare minerals, associated with erbium and yttrium.

**terce** (tērs), *n.* [Early mod. E. also *terse*; < ME. *\*ters*, *\*terce*, < OF. *ters*, *tiers*, m., *terce*, *terce*, f., third (*terce*, a third part), < L. *tertius* = E. *third*: see *third*, and cf. *terce*.] 1. A third; a third part.

Then we were in ix. degrees and a *terce*, rekenynge ower selues xxx. leagues of the sholes of the ryner cauled Rio Grande.

R. Eden, First Books on America (ed. Arber, p. 380).

Quoted in *Capt. John Smith's Works*, I. 103.

2. Same as *terce*, 3.—3. In *Scots law*, a right corresponding to *dower* in English law; a real right whereby a widow who has not accepted any special provision is entitled to a life-rent of one third of the heritage in which her husband died infert, provided the marriage has endured for a year and a day, or has produced a living child. No widow is entitled to her *terce* until she is regularly *kenned* to it. See *ken*, v. t., 5.—4. In the Roman Catholic and Greek churches, and in religious houses, and as a devotional office in the Anglican Church, the

office of the third hour: originally and properly said half-way between sunrise and noon. See *canonical hours*, under *canonical*.

**tercel** (tér'sel), *n.* [Formerly also *tiercel*, *ter-selle*, *tarsel*, and by assimilation *tassel*, *tassell*; < ME. *tercel*, *tercel*, *tercelle*, *terselle*; < OF. *tercel* = Pr. *tercel* = Sp. *tercello* = It. *terzolo*; < ML. *tertiolus*, a male hawk, lit. 'thirdling,' so called because, in popular notion, of three eggs laid by a hawk, the third was sure to produce a male, of smaller size than the others; dim. of L. *tertius*, third: see *terce*, *tertian*, *third*.] A male falcon; especially, the male of the peregrine falcon.

**tercelet** (tér'slet), *n.* [Also *tiercelet*; < OF. *tercelet*, *tiercelet*, a male hawk, dim. of *tercel*, a male hawk: see *tercel*.] The male of the falcon family, or of birds of prey.

Tho dwelte a *tercelet* me faste by,  
That semed welie of alle gentillesse.

Chaucer, Squire's Tale, l. 496.

**tercellenet** (tér'se-lén), *n.* [< OF. \**tercelin* (?), < *tercel*, a tercel: see *tercel*.] A small male hawk. See the quotation.

Nor must you expect from high antiquity the distinctions of eyes and ramage hawks: . . . nor yet what eggs produce the first prodneeth a female and large hawk, that the first prodneeth a female and large hawk, the second of a middler sort, and the third a smaller bird, *tercellene* or *tassel* of the male sex.

Sir T. Browne, Misc. Tracts, v.

**tercentenary** (tér-sen'te-nā-ri), *a.* and *n.* [< L. *ter*, thrice (see *ter*), + *centenarius*, pertaining to a hundred: see *centenary*.] **I. a.** Comprising three hundred years; including or relating to the interval of three hundred years.

**II. n.** A day observed as a festival in commemoration of some event, as the birth of a great man, or a decisive victory, that happened three hundred years before: as, the Shakspeare *tercentenary*.

**tercentennial** (tér-sen'ten'i-al), *a.* and *n.* [< L. *ter*, thrice, + *centum*, hundred, + *annus*, year: see *centennial*.] Same as *tercentenary*.

At the *tercentennial* celebration of Presbyterism, in Philadelphia, Nov. 20, 1872, . . . was displayed the American flag crossed with the Covenanters' flag of blue silk.

Freble, Hist. Flag, p. 140.

**tercer** (tér'sér), *n.* [< OF. \**tercier*, < ML. *tertarius*, lit. pertaining to a third, < *tertius*, a third: see *terce*.] In law, a tenant in dower; a doweress.

**tercet** (tér'set), *n.* [< F. *tercet*, dim. of *tiers*, third: see *terce*, *tierce*.] **1.** In music, same as *triple*.—**2.** In poetry, a group of three riming lines; a triplet.

**tercine** (tér'sin), *n.* [< F. *tercine*, < L. *tertius*, third: see *terce*.] In bot., a supposed third coat of an ovule, really a layer of the primine or secundine, or the secundine itself. Lindley, Gloss.

**teret**. A Middle English form of *tear*, *tear*<sup>2</sup>, *tar*<sup>1</sup>.

**terebate** (ter'ē-bāt), *n.* [< *tereb*(ic) + *-ate*.] In chem., a compound of terebic acid and a base.

**terebella** (ter'ē-bel'ā), *n.*; pl. *terebellæ* (-ē). [NL., dim. of L. *terebrā*, a borer, a trepan: see *terebrā*.] **1.** In surg., a trepan or trephine.—**2.** A marine tubicolous worm of the genus *Terebella*.—**3.** [cap.] [NL. (Gmelin, 1790).] The typical genus of *Terebellidæ*.

**Terebellidæ** (ter'ē-bel'i-dē), *n. pl.* [NL., < *Terebella* + *-idæ*.] A family of tubicolous polychæatous annelids.

**Terebellum** (ter'ē-bel'um), *n.* [A corruption of Gr. τετραπλευρον, a quadrangle (a name applied to this group by Ptolemy), neut. of τετραπλευρος, four-sided, < τετρα-, four, + πλῆρω, side.] A group of four stars, in the form of a quadrilateral, at the root of the tail of Sagittarius.

**terebene** (ter'ē-bēn), *n.* [< *tereb*(inth) + *-ene*.] A colorless mobile liquid hydrocarbon (C<sub>10</sub>H<sub>16</sub>) having a faint odor, and optically inactive, prepared by treating rectified oil of turpentine with concentrated sulphuric acid in the cold.

**terebic** (tē-reb'ik), *a.* [< *tereb*(inth) + *-ic*.] Of, pertaining to, or obtained from turpentine.—**Terebic acid**, C<sub>7</sub>H<sub>10</sub>O<sub>4</sub>, a monobasic acid, a product of the action of nitric acid on turpentine-oil. Also called *turpentine*, *terebic*, and *terebinic acid*.

**terebinth** (ter'ē-binth), *n.* [Formerly also *teribinth*; < ME. \**terebinth*, *terebynth*, < OF. *terebinth*,

F. *terébinthe* = Pr. *terebinte* = Sp. It. *terebinto* = Pg. *terebinto*, < L. *terebinthus*, ML. also *terebintus* = Gr. τερεβινθος, earlier τεριβινθος, also τριβινθος, *terebinth*, also its resin, turpentine. Cf. *turpentine*, from the same source.] **1.** The turpentine-tree, *Pistacia Terebinthus*, native in the lands about the Mediterranean, the source of Chian turpentine. It is a tree of moderate size, with pinnate leaves and panicles of inconspicuous flowers. It is common in the hot and dry southern and eastern parts of Palestine, there taking the place of the oak. It generally stands isolated, seldom in clumps, never in forests, and is an object of veneration. Also named *Algerine* or *Barbary mastice-tree*.

To make hem save from wormes sette a bough

Of *terebynth*, other a birche stalk.

Palladius, Husbandrie (E. E. T. S.), p. 125.

Here grows Melampode every where,

And *Terebinth*, good for Gotes.

Spenser, Shep. Cal., July.

**2t. Turpentine.**—**Oil of terebinth**, oil of turpentine. **terebinthent, a.** [ME. *terebynten*; < *terebinth* + *-ent*.] Of terebinth.

And putte in everie hole a wegge or pyne,

A birchen here, a *terebynth* there.

Palladius, Husbandrie (E. E. T. S.), p. 97.

**terebinthina** (ter'ē-bin'thi-nā), *n.* [NL., fem. (sc. resina) of *terebinthinus*, of the terebinth: see *terebinthine*.] The official name of turpentine.

**terebinthinate** (ter'ē-bin'thi-nāt), *v. t.*; pret. and pp. *terebinthinated*, ppr. *terebinthinating*. [< *terebinthine* + *-ate*.] To impregnate with turpentine.—**Terebinthinated colloidion**, colloidion to which some fatty, oily, or waxy ingredient has been added for the purpose of making it flexible.—**Terebinthinated ether**, an ethereal solution of oil of turpentine.—**Terebinthinated fumigation**, a vapor-bath of steam charged with turpentine.

**terebinthinate** (ter'ē-bin'thi-nāt), *a.* and *n.* [< *terebinthine* + *-ate*.] **I. a.** Terebinthine; impregnated with the qualities of turpentine.

**II. n.** In med., a preparation of the turpentine of firs.

**terebinthine** (ter'ē-bin'thin), *a.* [< L. *terebinthinus*, < Gr. τερεβινθος, of the terebinth, or of turpentine, < τριβινθος, *terebinth*, turpentine: see *terebinth*. Cf. *turpentine*.] **1.** Of or pertaining to the terebinth or turpentine-tree.—**2.** Of or pertaining to turpentine; consisting of turpentine, or partaking of its qualities.

**terebinthinous** (ter'ē-bin'thi-nus), *a.* [< L. *terebinthinus*: see *terebinthine*.] Same as *terebinthine*, **2.**

**terebinth-tree** (ter'ē-bin'th-trē), *n.* Same as *terebinth*, **1.**

**terebra** (ter'ē-brā), *n.*; pl. *terebrae* (-brē). [NL., < L. *terebrā*, a borer, an auger, a trepan, an engine for piercing a wall, < *terere*, pp. *tritrus*, rub, grind: see *trite*.] **1.** A machine employed by the Romans in sieges to begin a breach in a wall, consisting of a long spear-like beam mounted on an axis, and worked in a groove by machinery.—**2.** In entom., the borer or modified ovipositor of various insects, and especially of the terebrant hymenoptera. With this organ the insects puncture the places in which they lay their eggs.

—**3.** [cap.] A genus of marine toxoglossate gastropods, having a long slender tapering spire, typical of the family *Terebridae*; the auger-shells. Adanson, 1757.

**terebant** (ter'ē-brant), *a.* [< L. *terebrant*(t)s, ppr. of *terebrare*, bore: see *terebrate*.] Boring with a terebra, as a hymenopterous insect; of or pertaining to the *Terebrantia*.

**Terebrantia** (ter'ē-bran'shi-ā), *n. pl.* [NL. (Latreille, 1817), neut. pl. of L. *terebrant*(t)s, boring, boring through: see *terebrant*.] **1.**

*Fimbia conquisitor*.

a, side view of abdomen, showing terebra or ovipositor partly extended; b, anterior extremity of terebra and supports, showing method of attachment; c, ventral view of same; 1, sheaths; 2, upper grooved portions of terebra; 3, the two lower filaments or spicules.

Auger-shells.

a, *Terebra (Rufina) sculpturata*.  
b, *Terebra maculata*.

In Latreille's system, one of the two prime divisions of the order *Hymenoptera*, comprising those forms which have the abdomen of the females furnished with an instrument employed as a saw or a borer for depositing their eggs: opposed to *Aculeata*, in which the abdomen is armed with a sting, and divided into *Securifera* and *Pupivora*. Westwood adopted this division, and divided the section into *Phytophaga* and *Entomophaga*, the former including the saw-flies (*Tenthredinidæ*) and hornets (*Uroceridæ*), and the latter the gall-flies (*Cynipidæ*), the parasitic *Exanidæ*, *Ichnemonidæ*, *Braconidæ*, *Chalcididæ*, and *Terebratridæ* (grouped together under the term *Spiculifera*) and the rubytails or *Chrysididæ*, for which the term *Tubulifera* of MacLeay was adopted.

**2.** In *Crustacea*, the boring or burrowing cirripedes; the *Aleippidæ*.

**terebrate** (ter'ē-brāt), *v.*; pret. and pp. *terebrated*, ppr. *terebrating*. [< L. *terebratus*, pp. of *terebrare*, bore, bore through, < *terebrā*, a borer: see *terebrā*. Cf. *terrier*<sup>3</sup>.] **I. trans.** To bore; perforate. [Rare.]

The teguments of earthworms . . . we shall find completely adapted to their way of life and motion, being made in the most complete manner possible for *terebrating* the earth, and creeping.

Derham, Physico-Theol., iv. 12, note p.

**II. intrans.** To be a bore; make one tired. [Rare.]

O for a world where peace and silence reign,

And blunted dullness *terebrates* in vain!

O. W. Holmes, A Modest Request.

**terebrate** (ter'ē-brāt), *a.* [< *terebrā* + *-ate*.] Provided with a terebra or borer, as a hymenopterous insect; fashioned into a borer, as an ovipositor.

**terebration** (ter'ē-brā'shon), *n.* [< L. *terebratio*(n)-, a boring, < *terebrare*, bore: see *terebrate*.] The act of boring or piercing.

*Terebration* of trees doth make them prosper better.

Bacon, Nat. Hist., § 463.

**Terebratula** (ter'ē-brat'ū-lā), *n.* [NL. (Lhwyd, 1699), dim. of L. *terebratus*, pp. of *terebrare*, bore: see *terebrate*.] **1.** An extensive genus of arthropomatus brachiopods, formerly including all those loosely known as *lamp-shells*, now restricted as type of the family *Terebratulidæ*. They are characterized by a circular perforation (whence the name); the loop is very short, simple, and attached by the crura to the hinge-plate. All are extinct. See cuts under *Terebratulidæ* and *Brachiopoda*. **2.** [l. c.] Any member of this genus, or a similar brachiopod; a lamp-shell.

**Terebratulidæ** (ter'ē-brat'ū-li-dē), *n. pl.* [NL., < *Terebratula* + *-idæ*.] A large family of arthropomatus brachiopods, typified by the genus *Terebratula*. The brachial appendages are variously folded upon themselves, united to one another by a membrane, and more or less supported by a calcified process; the valves are variable in shape, but always have a prominent beak truncated by a circular perforation, partly completed by a deltidium of one or two pieces, and the shell-substance punctuated. All the species have a peduncle passing through the rostral perforation, by which they attach themselves to rocks and other objects on the bottom of the sea. The family is the most extensive of the order; it dates back to the Devonian, and continues to be represented by more living forms than any other family. It is divided into six or more subfamilies. See also cut under *Brachiopoda*.

*Terebratula rusticus*.

a, adductor muscles; f, cardinal muscles; p, peduncle; t, teeth; v, vent.

duncle passing through the rostral perforation, by which they attach themselves to rocks and other objects on the bottom of the sea. The family is the most extensive of the order; it dates back to the Devonian, and continues to be represented by more living forms than any other family. It is divided into six or more subfamilies. See also cut under *Brachiopoda*.

**terebratuliform** (ter'ē-brat'ū-li-fōrm), *a.* [< NL. *Terebratula* + L. *forma*, form.] Resembling or related to the genus *Terebratula*; shaped like the shell of a terebratuline brachiopod.

**terebratuline** (ter'ē-brat'ū-lin), *a.* [< *Terebratula* + *-ine*.] Pertaining to the *Terebratulidæ*, or having their characters.

**terebratulite** (ter'ē-brat'ū-lit), *n.* [< *Terebratula* + *-ite*.] A fossil terebratula, or some similar lamp-shell; a member of the genus *Terebratulites* of Schlotheim.

**Terebridæ** (tē-reb'ri-dē), *n. pl.* [NL., < *Terebra* + *-idæ*.] A family of toxoglossate gastropods, typified by the genus *Terebra*; the awl-shells or auger-shells. The numerous species chiefly inhabit tropical seas. Also called *Terebracæ* and *Acusidæ*. See cuts under *Terebra*.

**teredine** (tē-ē-din), *n.* [< L. *teredo* (-din-), a teredo: see *teredo*.] A borer, as the ship-worm or teredo. Rev. T. Adams, Works, i. 505.

**Teredinidæ** (ter'ē-din'i-dē), *n. pl.* [NL., < *Teredo* (-din-) + *-idæ*.] A family of lamellibranch mollusks, typified by the genus *Teredo*; the teredos or ship-worms. See *Teredo*.

**teredo** (tê-rê'dô, *n.*) [*L. teredo*, < Gr. *terpion*, a worm that gnaws wood, etc., a moth, < *terpe* = *L. terere*, rub; see *terebra*.] 1. A lamelli-branch mollusk of the genus *Teredo*, family *Teredonidae*; the ship-worm. *T. navalis*, conspic-uous for the destruction which it occasions to ships and submerged wood, by perforating them in all directions in order to establish a habitation. It is a worm-shaped grayish-white animal, most of whose length is owed to the elongation of the galled siphons or breathing tubes conveying wa-ter to the gills. The two valves of the shell are small. The vis-cera are mainly con- tained within the valves. In excavating in the wood (the shell is the boring-instrument) every individual is care-ful to avoid the tube formed by its neighbor, and often a very thin leaf of wood alone is left between the cavities, which are lined with a calcareous incrustation. Many methods are in use to protect ships, piers, etc., from this destructive animal, such as copper sheathing (treating with creosote or corrosive sublimate), or driving numbers of short broad-headed nails into the timber, the rust from which spreads and prevents the animal from settling. It is said to have been originally imported from tropical climates; but it has now become an inhabitant of most harbors. (See also cut under *ship-worm*.) *T. gigantea* is a species found in the East Indies in shallow water, where it bores into the hardened mud.

WOOD BORING TEREDO.

2. [*cap.*] [*NL.* (Linnaeus, 1758).] The typical genus of *Teredonidae*, including *T. navalis*, the common teredo or ship-worm. See def. 1. Also called *Septaria*.—3. Any disease in plants pro-duced by the boring of insects. *Lindley*, Gloss.

**terek** (tê-rê'k), *n.* A kind of sandpiper, *Terekia cinerea*.

**Terekia** (tê-rê'ki-ä), *n.* [*NL.* (Bonaparte, 1838), also *Terechia* (Bonaparte, 1841), < *terek*, a native name.] A genus of scolopacine birds, con-taining only the terek sandpiper, *T. cinerea*, resembling the greenshank and some other tat-tlers, and having the bill somewhat recurved. This bird is very widely distributed, visiting in its migra-tions nearly all parts of the Old World, and breeding in

Terek, *Terekia cinerea*.

high latitudes of Asia and Europe. It may be recognized in any plumage by the wholly white axillaries, largely white secondaries, and absence of any white on the pri-maries or rump. It has about twenty different New Latin names, and the genus is also called *Xenus* (of Kaup, 1829) and *Simorhynchus* (of Keyserling and Blasius, 1840, not of Merrem).

**teres** (tê-rêz), *n.* [*NL.* (sc. *musculus*), a round muscle, < *L. teres*, round, smooth; see *terete*.] A terete muscle; specifically, one of two terete muscles of the shoulder, proceeding from the scapula to the humerus. **Teres major** (greater *teres*), a muscle lying externally to the *teres minor*, and with the latissimus dorsi forming the posterior border of the axilla. It is inserted into the posterior bicipital ridge of the humerus.—**Teres minor** (lesser *teres*), a muscle lying along the outer border of the infraspinatus, to which it is closely connected and near which it is inserted into the greater tuberosity of the humerus.

**Teresian** (tê-rê'si-an), *n.* [*L. Teresa* (see def.) + *-ian*.] One of a branch of the Carmelites founded by Saint Teresa in 1562.

**tereti**, *a.* See *terete*.

**terete** (tê-rê't), *a.* [Formerly also *teret*; = *Sp. terete*, < *L. teres* (teret-), round, smooth, < *terere*, rub; see *terebra*, *trite*.] Slender and smooth, with a circular transverse section; cylindrical or slightly tapering. See cut under *petiole*.

Nature hath . . . made them (the stars) round and *teret* like a globe. *Fotherby*, *Athemastix* (1622), p. 326.

**Terete pronator**. Same as *teretipronator*.

**teretial** (tê-rê'shâl), *a.* [*L. terete* + *-ial*.] Same as *terete*. *Owen*. [*Rare*.]

**tereticaudate** (tê-rê'ti-kä'dät), *a.* [*L. teres* (teret-), round, + *cauda*, a tail; see *caudate*.] Round-tailed; having a terete tail; specifically

said of certain reptiles of a former group *Tere-ticaudate*.

**teretipronator** (tê-rê'ti-prô-nä'tor), *n.* [*L. teres* (teret-), round, + *pronator*.] The round pronating muscle of the forearm; the pronator radii *teretis*. See *pronator*. *Cones*, 1887.

**teretiscapularis** (tê-rê'ti-skäp-ü-lä'ris), *n.*; pl. *teretiscapulares* (-rêz). [*NL.* < *L. teres* (teret-), terete, + *scapularis*.] The greater terete mus-cle of the shoulder-blade, commonly called *teres major*. See *teres*. *Cones*, 1887.

**Teretistris** (tê-rê'tis'tris), *n.* [*NL.* (Cabanis, 1855), < Gr. *teretion*, whistle; often misspelled *Teretistris*.] A genus of American warblers, or *Mniotiltidae*, peculiar to Cuba, and of 2 species, *T. fernandina* (Lambeye) and *T. forsteri* (Gund-lach), respectively of the western and eastern parts of the island. They are small and plain-colored birds, 4½ inches long.

**teretoust** (tê-rê'tus), *a.* [*L. teres* (teret-), round, smooth, + *-ous*.] Same as *terete*.

*Teretous*, or long round leaves.

*Sir T. Browne*, *Garden of Cyrus*, iv.

**terflet**, *v. i.* [*ME. terflen*, < *AS. tearflian*, roll about, a freq. form, prob. connected with *terve*.] To roll about; wallow. *Stratmann*.

**terga**, *n.* Plural of *tergum*.

**tergal** (têr'gäl), *a.* [*L. tergum*, back, + *-al*.] 1. Of or pertaining to the back in general; dor-sal; notal: the opposite of *sternal* or *ventral*. Specifically—2. In *entom.*, of or pertaining to a notum, tergum, or tergite.—3. In *echinoderms*, dorsal in the sense of aboral; coronal: the op-posite of *ventral* or *oral*: as, the *tergal* plates of a starfish.—4. In trilobites, of or pertaining to the axis or tergum. See cut under *Trilobita*.—**Tergal facet**, the smooth dorsal anterior surface of the somite of a crustacean, over which the posterior under surface of a preceding somite glides in flexion and extension of the abdomen.

**tergant** (têr'gänt), *a.* [*Heraldic F.*, < *L. tergum*, back; see *tergum*.] In *her.*, turning the back toward the spectator. See *recursant*. Also *tergant*.

**tergater**, *n.* An obsolete form of *target*.

He pulled a *tergate* from one of his souldiours, and cast- ing it in to the water, standyng on it, with his spere conuaid hym selfe with the strene.

*Sir T. Elyot*, *The Governour*, i. 17.

**terginate** (têr-jem'i-nät), *a.* [*L. ter*, thrice, + *geminatus*, doubled; see *geminat*.] Thrice double; specifically applied in botany to a com-pound leaf having at the base a pair of leaflets and then forking, with a pair on each branch, as in *Calliandra tergemina*.

**tergeminous** (têr-jem'i-nus), *a.* [*L. tergemi-nus*, threefold, triple, < *ter*, thrice, + *geminus*, born at the same time, twin; see *gemin*.] Ter-geminate.

**tergiant** (têr'ji-ant), *a.* In *her.*, same as *tergant*. **tergiferous** (têr-jit'e-rus), *a.* [*L. tergum*, back, + *ferre* = *E. bear*<sup>1</sup>; see *-ferous*.] Carry-ing or bearing on the back; dorsigerous or dor-siferous.

**tergite** (têr'jit), *n.* [*L. tergum*, the back, + *-ite*.] The tergum, dorsum, or back of one of the somites or segments of an articulated animal, as an arthropod. A typical tergite consists of a pair of plates or pieces, right and left; but these become fused, and also a number of successive tergites may blend together, as in the cephalothorax of a crustacean.

**tergitic** (têr-jit'ik), *a.* [*L. tergite* + *-ic*.] Ter-gal or dorsal, as a sclerite; of or pertaining to a tergite.

**tergiversate** (têr'ji-vêr-sät), *v. i.*; pret. and pp. *tergiversatus*, ppr. *tergiversating*. [*L. tergiver-satus*, pp. of *tergiversari*, turn one's back, shift; see *tergiverse*.] To shift; practise evasion; make use of shifts or subterfuges.

Who also, as if he were conscious that his assumption to the Platonick theology were not so defensible a thing, doth himself sometime, as it were, *tergiversate* and decline it, by equivocating in the word *Henades*, taking them for the ideas, or the intelligible gods before mentioned.

*Cudworth*, *Intellectual System*, II. 361.

**tergiversation** (têr'ji-vêr-sä'shon), *n.* [*L. F. tergiversation* = *Sp. tergiversación* = *Pg. tergiversação* = *It. tergiversazione*, < *L. tergiversa-tio* (n-), a shifting, evasion, lit. a turning of one's back, < *tergiversari*, pp. *tergiversatus*, turn one's back; see *tergiversate*.] 1. The act of tergiver-sating; a shirting; shift; subterfuge; evasion.

Writing is to be preferred before verbal conferences, as being freer from passions and tergiversation.

*Alp. Branchall*. (Johnson.)

2. The act of changing one's opinions or of turning from them; the act of turning against a cause formerly advocated; fickleness or in-stability of conduct.

The colonel, after all his *tergiversation*, lost his life in the king's service. *Clarendon*.

**tergiversator** (têr'ji-vêr-sä-tor), *n.* [= *F. tergiversator* = *Pg. tergiversador*, < *L. tergiversa-tor*, one who hangs back, a laggard, < *tergiver-sari*, turn one's back; see *tergiversate*.] One who practises tergiversation.

**tergiverset** (têr'ji-vêrs), *v. i.* [*L. tergiverser* = *Sp. Pg. tergiversar* = *It. tergiversare*, < *L. tergiversari*, turn one's back, decline, refuse, evade, shift, < *tergum*, back, + *versari*, turn: see *verse*.] To turn one's back; tergiversate.

The Briton never *tergiversed*.

But was for adverse rubbing.

*Saint George for England*, ii.

**tergolateral** (têr-go-lät'e-räl), *a.* [*L. tergum*, back, + *latus* (later-), side, + *-al*.] Of or per-taining to the tergum and the lateral plates of a cirriped. *Darwin*, *Cirripedia*, Int., p. 5.

**tergorhabdite** (têr-gô-räb'dit), *n.* [*L. tergum*, back, + Gr. *παῖδος*, rod, + *-ite*.] In *entom.*, one of the pieces primarily forming the upper or tergal surface of an insect's abdomen. La-caze-Duthies applied this name to the lower pair of plates forming the ovipositor of a female insect; they are mod-ified tergal pieces of one of the abdominal rings.

**tergum** (têr'gum), *n.*; pl. *terga* (-gä). [*NL.* < *L. tergum*, back.] 1. The back, dorsum, or notum, especially of an arthropod.—2. The tergal or dorsal sclerite of one of the rings or somites of an arthropod or articulate animal; a tergite. A tergum is often composed of two lateral halves. In some of the thoracic segments of insects it is subdivided into parts called, from before backward, *præ-scutum*, *scutum*, *scutellum*, and *postscutellum*.

3. One of the two upper or dorsal plates of the shell in cirripeds. See cut under *Balanus*.

**Terias** (tê'ri-as), *n.* [*NL.* (Swainson, 1821).] A genus of butterflies, of the family *Papilionidæ* and subfamily *Pieridinae*, comprising about a dozen species, nearly all American. The North American are *T. nicippe*, a small bright-orange species, and *T. tea*, still smaller and lemon-yellow in color, both of the southern United States. Their larvæ live upon plants of the genus *Cassia*.

**teriet**, *v.* An obsolete form of *tarry*<sup>2</sup> and *tarry*<sup>3</sup>.

**terint**, *n.* Same as *tarin*.

Thrustles, *terins*, and mays,

That songen for to wyne hem prys.

*Rom. of the Rose*, l. 665.

**term** (têrm), *n.* [Early mod. E. also *tearm*, ear-lier *terme*; < *ME. term*, < *OF. terme*, also in less vernacular form *termine* = *Pr. terme* = *Sp. término* = *Pg. termino* = *It. termino*, *termin* = *D. termin* = *G. Sw. Dan. termin*, < *L. terminus*, O.L. also *termo* (termon-), *termen* (termin-), a bound, boundary, limit, end, M.L. (and Rom.) also a time, period, also a definition (?), word, covenant, etc.; = Gr. *τέρας* (τερον-), *τέμα* (τεμα-), a boundary-line, limit; prob. akin to *E. thru*<sup>1</sup>, *tram*<sup>1</sup>. From *L. terminus* are also ult. *E. terminus*, terminal, terminate, termine, deter-mine, determinate, etc., conterminous, etc.] 1. A bound; a boundary; limit; the extremity of anything, or that which limits its extent; a confine; end; termination; completion.

Here I take the to my liue; tac thou non other to *terme* of liue. *Political Poems*, etc. (ed. Furnivall), p. 229.

God was careful to secure us from death by removing the lepers from the camp, . . . and putting a *term* between the living and the dead.

*Jer. Taylor*, *Works* (ed. 1835), l. 885.

At the decline of day,

Winding above the mountain's snowy *term*,

New banners shone.

*Shelley*, *Revolt of Islam*, vi. 18.

Who does not sometimes . . . await with curious com- placency the speedy term of his own conversation with finite nature? *Emerson*, *Essays*, 1st ser., p. 240.

2. In *geom.*, the extreme of any magnitude, or that which limits or bounds its extent: as, the *terms* of a line are points, the *terms* of a super-ficies are lines, and the *terms* of a solid are su-perficies. See also def. 9.—3. Outcome; final issue.

Yet ought mens good endeouers them confirme, And guide the heavenly causes to their constant *terme*.

*Spenser*, *F. Q.*, III. iii. 25.

4. A figure of Terminus, the god of bounda-ries; a terminal figure. See *terminus*, 3.

An labour feigned of goldsmith's-work, the ornament of which was borne up with *termes* of satyrs.

*B. Jonson*, *Chloridia*.

5. In *ship-building*, a piece of carved work placed under each end of the taffrail, and extending to the foot-rail of the balcony. Also called *term-piece*.—6. A space or period of time to which limits have been set; the time or period through

which something runs its course, or lasts or is intended to last: as, he was engaged for a *term* of five years; his *term* of office has expired.

This lady, that was left at home,  
Hath wonder that the king be come  
Home, for hit was a longer *term*.  
*Chaucer*, Death of Blanche, l. 79.

A spirit,  
To whom, for certain *term* of years, I inherit  
His ease and pleasure with abundant wealth,  
He hath made sale of his soules dearest leath.  
*Timothy Whateley* (L. E. T. S.), p. 53.  
When a race has lived its *term* it comes no more again.  
*Emerson*, Conduct of Life.

Specifically—(a) In universities, colleges, and schools, one of certain stated periods during which instruction is regularly given to students or pupils. At the University of Cambridge, England, there are three terms in the university year—namely, Michaelmas or October term, Lent or January term, and Easter or midsummer term. At the University of Oxford there are four terms—namely, Michaelmas, Hilary, Easter, and Trinity. In American universities and colleges there are usually three terms, beginning in September, January, and April, and called first, second, and third, or fall, winter, and spring terms respectively. (b) *In law*, the period during which a court of justice may hold its sessions from day to day for the trial of causes; a part of the year in which the justices of the superior common-law courts of general jurisdiction hold sessions of the courts, as distinguished from vacations, during which, on religious and business grounds, attendance at the courts cannot be required from parties or witnesses. The importance of the distinction between *term* time and vacation, in both American and English law, is in the fact that for the just protection of the public a court can only exist and exercise its powers within the time as well as at the place prescribed by law; and, while many ministerial acts, such as the bringing of actions, and the course of pleading, the entry of judgment, the issue of process, etc., can be carried on in the clerk's office upon any secular day, actual sessions of the court itself can only be held during term time. In England, before the present judicature act, the law terms were four in number—namely, Hilary term (compare *Hilarymas*), beginning on the 11th and ending on the 31st of January; Easter term, from about the 15th of April to the 8th of May; Trinity term, from the 23d of May to the 12th of June; and Michaelmas term, from the 2d to the 25th of November. These have now been superseded as terms for the administration of justice by "sittings," bearing similar names. For the High Court of Justice in London and Middlesex the Hilary sittings extend from the 11th of January to the Wednesday before Easter, the Easter sittings from the Tuesday after Easter week to the Friday before Whitsunday, the Trinity sittings from the Tuesday after Whitsun week to the 8th of August, and the Michaelmas sittings from the 2d of November to the 21st of December.

*Evelyn*, Diary, Oct. 15, 1640.

The law *terms* were formerly the great times of resort to London, not only for business, but pleasure. . . . Greene calls one of his pamphlets . . . "A Peale of New Villanies rung out, being Musically to all Gentlemen, Lawyers, Farmers, and all sorts of People that come up to the *Termes*."  
*Nares*.

(c) An estate or interest in land to be enjoyed for a fixed period: called more fully *term of years*, *term for years*. (d) The period of time for which such an estate is held. (e) *In Scots law*, a certain time fixed by authority of a court within which a party is allowed to establish by evidence his averment.

7. An appointed or set time. [Obsolete except in specific uses below.]

Yif that ye the *terme* rekens wolde,  
As I or other trewe lovres sholde.  
I pleyne not, God wot, befor my day.  
*Chaucer*, Good Women, l. 2510.

*Merlin* (E. E. T. S.), iii. 563.

Specifically—(a) A day on which rent or interest is payable. In England and Ireland there are four days in the year which are called *terms*, or more commonly *quarter-days*, and which are appointed for the settling of rents—namely, Lady day, March 25th; Midsummer, June 24th; Michaelmas day, September 29th; and Christmas, December 25th. The terms in Scotland corresponding to these are Candlemas, February 2d; Whitsunday, May 15th; Lammas, August 1st; and Martinmas, November 11th. In Scotland houses are let from May 28th for a year or a period of years. The legal terms in Scotland for the payment of rent or interest are Whitsunday, May 15th, and Martinmas, November 11th, and these days are most commonly known as *terms*. (b) The day, occurring half-yearly, on which farm and domestic servants in Great Britain receive their wages or enter upon a new period of service.

8. The menstrual period of women.

In times past . . . no young man married before he slew an enemy, nor the woman before she had her *termes*, which time was therefore festiual.

*Purchas*, Pilgrimage, p. 847.

9. In *math.*: (a) The antecedent or consequent of a ratio.

Proportionality consisteth at the least in three *terms*.  
*Euclid*, Elements, tr. by Rudd (1651), bk. v., def. 9. [It is properly def. 8.]

(b) In algebra, a part of an expression joined to the rest by the sign of addition, or by that of subtraction considered as adding a negative quantity. Thus, in the expression  $x^2 + y + z(u + v)$ , the first term is  $x^2 + y$ , the second is  $-y$ , and the third is  $z(u + v)$ , equivalent to the sum of two terms  $zu$  and  $zv$ . 10. In *logic*, a name, especially the subject or predicate of a proposition; also, a name connected with another name by a relation; a correlative. The word *term*, in its Latin form *terminus*, was used by Boethius to translate Aristotle's *epos*, probably borrowed by him from the nomenclature of mathematical proportions. Aristotle says: "I call a *term* that into which a proposition is resolved, as the predicate or that of which it is predicated." The implication is that a proposition is composed of two terms; but this is incorrect. For, on the one hand, no complex of terms can make a proposition; for a term expresses a mere abstract conception, while a proposition expresses the compulsion of a reality, and so is true or false; and, on the other hand, a proposition need contain but one term, as [the fool has said in his heart] "There is no God"; and indeed the abstract or conceptual part of any proposition may be regarded as a single complex term, as when we express "No man is mortal" in the form "Anything whatever is either non-man-or-mortal." Hence—11. A word or phrase expressive of a definite conception, as distinguished from a mere particle or syncategorematic word; a word or phrase particularly definite and explicit; especially, a word or phrase used in a recognized and definite meaning in some branch of science. Thus, a contradiction in terms is an explicit contradiction; to express one's opinion in set terms is to state it explicitly and directly.

They mowe wel chiteren, as doon these jayes,  
And in her *termes* sette her lust and payne,  
But to her purpos shul they never atteyne.  
*Chaucer*, Canon's Yeoman's Tale, l. 387.

A fool  
Who . . . rail'd on Lady Fortune in good *terms*,  
In good set *terms*; and yet a motley fool.  
*Shak.*, As you Like it, ii. 7. 16.

The more general term is always the name of a less complex idea.  
*Locke*, Human Understanding, III. vi. 32.

When common words are appropriated as technical *terms*, this must be done so that they are not ambiguous in their application.

*Whewell*, Philos. Inductive Sciences (ed. 1840), I. lxx.

12. *pl.* Propositions stated and offered for acceptance; conditions; stipulations: as, the *terms* of a treaty; hence, sometimes, conditions as regards price, rates, or charge: as, board and lodging on reasonable *terms*; on one's own *terms*; lowest *terms* offered.

If we can make our peace  
Upon such large *terms* and so absolute.  
*Shak.*, 2 Hen. IV., iv. 1. 186.

13. *pl.* Relative position; relation; footing: with *on* or *upon*: as, to be *on* good or bad *terms* with a person.

'Tis not well  
That you and I should meet upon such *terms*  
As now we meet.  
*Shak.*, 1 Hen. IV., v. 1. 10.

I thought you two had been upon very good *terms*.  
*B. Jonson*, Epicene, i. 1.

14. *pl.* State; situation; circumstances; conditions.

The *terms* of our estate may not endure  
Hazard so near us.  
*Shak.*, Hamlet, iii. 3. 5.

In the Relation of Hamons Death, his Love is related too, and that with all the Life and Pathos imaginable. But the Description is within the *Terms* of Honour.

*J. Collier*, Short View (ed. 1693), p. 29.

[Shakspeare uses *terms* often in a loose, periphrastical way: as, "To keep the *terms* of my honour precise," M. W. of W., ii. 2. 22 (that is, all that concerns my honor); "In *terms* of choice I am not solely led by nice direction of a maiden's eye" (that is, with respect to the choice). In other cases it is used in the sense of 'point,' 'particular feature,' 'peculiarity': as, "All *terms* of pity," All's Well, ii. 3. 173.]

15. *In astrol.*, a part of a zodiacal sign in which a planet is slightly dignified; an essential dignity.—**Absolute term**. See *absolute*.—**Abstract term**, the name of a character or kind of fact, not of a thing. Thus, *uniform acceleration* is an abstract term, but *material particle* is a concrete term.—**Act term**. See *act*.—**Ampliate term**, a term whose denotation is extended beyond what ordinarily attaches to it.—**Ampliative term**, a term which extends the denotation of another. Thus, in the sentence "No man works miracles, nor ever did," the last word *did* is said to be an *ampliative term*, because it extends the denotation of man to the men who formerly lived.—**Attendant terms**, long leases or mortgages held by the owner or his trustee as a distinct and additional title, to make his estate more secure.—**Robinson**.—**Categorematic or categorematic term**, a term expressive of a definite conception.—**Circumduction of the term**. See *circumduction*.—**Common term**, a general name; a name applicable to whatever there may or might be having certain general characters.—**Complex term**. See *complex notion*, under *complex*.—**Concrete term**, the name of a thing: opposed to *abstract term* (which see, above).—**Confictive, consonant, correlative terms**. See the adjectives.—**Contradiction in terms**. See *contradiction*, and def. 11.—**Definite term**. See *definite*.—**Denominative term**, a term consisting of a word plainly derived from another word.—**Discrete term**. See *discrete*, 1.—**Easter term**. See def. 6 (a) and (b).—**Equity term**. See *equity*.—**Exponible term**, a term which must not be interpreted according to the general principles of language, but which

bears a peculiar meaning not to be inferred from its formation. Such, for example, are most of the phrases of the differential calculus, according to the theory of limits.—**Extreme term** of a syllogism, one of the terms which appears in the conclusion.—**Familiar term**, a word or phrase which bears or has borne a scientifically precise meaning, but which has been caught up by those who do not think with precision. Such are *dynamic*, *objective*, *sanction*, *supply and demand*, *values* (in painting), and so on.—**Finite term**. See *finite*.—**Fixed term**, a term having a single well-settled meaning, as *binomial theorem*, *principle of excluded middle*, *psychical research*, *life-insurance*.—**General term**, a term of court held by the full bench, or a sufficient number of judges to represent the full bench, for the purposes chiefly of appellate jurisdiction. [U. S.]—**Hilary term**. See def. 6 (a) and (b).—**Indefinite term**. See *indefinite*.—**Intermediate terms**. See *intermediate*.—**In terms**, in precise definite words or phraseology; in set terms; in a way or by means of expressions that cannot be misunderstood; specifically, definitely. See def. 11.

Passing over Tigris, [he] disturbed the Romane Province of Mesopotamia, denouncing in hope, and threatening in *tearmes*, all those Asian Provinces.

*Purchas*, Pilgrimage, p. 356.

In *terms* of. (a) In the language or phraseology peculiar to (something else). (b) In modes of: a common misuse as applied to modes of thought (properly, a term is opposed to an idea).

Most persons, on being asked in what sort of terms they imagine words, will say "in *terms* of hearing."

*W. James*, Prin. of Psychology, II. 63.

**Major term**, that extreme of a syllogism which appears as the predicate of the conclusion. See *syllogism*.—**Michaelmas term**. See def. 6 (a) and (b).—**Middle term**, that term of a syllogism which occurs in both premises, but not in the conclusion.—**Minor term**, that extreme of a syllogism which appears as the subject of the conclusion. See *syllogism*.—**Negative term**, a term which determines its object by means of exclusions. Thus, *immediate consciousness* is a negative term, since it indicates the most simple and direct mode of thought by excluding that which is circuitous or sophisticated.—**Outstanding term**, in the English law of real property, a term of years, commonly one thousand or less, given, usually to trustees of a settlement, to secure, by way of lien or charge, income or other payments to one or more of the family to whom the settler of the trust desired to secure them, as paramount to his transfer of the estate subject thereto to a particular heir or other person. The effect of giving such a term in trust was, not to give the trustees possession immediate, but to give them the right to take the rents and profits, or to mortgage, etc., in case the principal grantee under the settlement failed to keep up the periodical payments required. In the course of years, after all the payments required had been made, and the object of the term was accomplished, if it did not by the provisions of the deed then cease, it continued to be an outstanding term, although "satisfied," until by recent legislation the cessation of satisfied terms was provided for. Meanwhile, it was usual for purchasers of land subject to an outstanding term to take an assignment of the term in such a way as not to merge it with the fee, but it, being thereafter "attendant upon the inheritance," was an additional security for the title as against questions which might have arisen since the making of the settlement.—**Partial term**, in the logical nomenclature of De Morgan, an undistributed term, or term not entirely excluded from any sphere by the proposition in which it occurs: opposed to *total* or *distributed term*. Both terms are partial in the propositions "Some X is Y" and "Everything is either an X or a Y." Both terms are total in the propositions "No X is Y" and "Something is neither X nor Y." The term X is partial and Y total in the propositions "Every Y is an X" and "Some X is not Y."—**Positive term**, **privative connotative term**, **reciprocal terms**, **relative term**, **singular term**. See *positive*, *privative*, etc.—**Simple term**, a term not compounded of other terms by logical addition and multiplication.—**Speaking terms**. See *speak*, v. 4.—**Special term**, a term of court held by a single judge: commonly used in reference to a court held without a jury.—**Term of art**, a word or phrase having a special signification in a certain branch of knowledge.—**Term of a substitution**. See *substitution*.—**Term of relation**, a name or thing to which some other name or thing is considered as relative; an object of relation. Thus, in the expression *mother of a boy*, *boy* is the term of the relation of which *mother* is the subject.—**Term of resemblance**. See *resemblance*.—**Term of similitude**. Same as *term of resemblance*.—**Term of thought**, that which is the conclusion or upshot of reflection or deliberation.—**Terms in gross**, terms vested in trustees for the use of persons not entitled to the freehold or inheritance. They pass to the personal representatives of the cestui que trust, are alienable, and are subject to debts, in the main, like legal estates.—**Minor**.—**Terms of sale**. See *sale*.—**The general term of a series**. See *series*.—**Third term**, the minor term of a syllogism. So called owing to Aristotle's usual form of statement.—**To bring to terms**, to reduce to submission or to conditions.

He to no *Terms* can bring  
One Twirl of that reluctant Thing.  
*Congreve*, An Impossible Thing.

To come to terms, to agree; come to an agreement; also, to yield; submit.—**To eat one's terms**. See *eat*.—**To keep a term**, to give attendance during a term of study. See the second quotation.

He will get enough there to enable him to keep his terms at the University.

*Ep. W. Lloyd*, in Ellis's Lit. Letters, p. 188.

A student, in order to keep a *term*, must dine in the hall of his inn three nights, if he be a member of any of the Universities of Oxford, Cambridge, Durham, London, Dublin, Queen's (Belfast), St. Andrew's, Aberdeen, Glasgow, or Edinburgh. In all other cases he must dine six nights, being present in both instances at the grace before dinner, during the whole of dinner, and until the concluding grace shall have been said.

*Slater*.

To keep Hilary term, to be joyful or merry.

This joy, when God speaks peace to the soul, is ineffable gaudium. . . . It gives end to all pains, doubts, and differences. . . . and makes a man keep *his* term all his life. *Ree, T. Adams, Works, I. 68.*

To make terms, to come to an agreement. — To speak in terms, to speak in precise language, or in set terms. See def. 11.

Says I that well: I can not speak in terms.

*Chaucer, Prolog. to Pandur's Tale, I. 25.*

To stand upon one's terms, to insist upon conditions: followed by *with*.

I had rather be the most easy, tame, and resigned be-  
liever in the most gross and imposing church in the world  
... than one of those great and philosophical minds who  
stand upon their terms with God.

*Bp. Atterbury, Sermons, II. viii.*

Total term. See *partial term*, above. Transcendent term, a term which signifies something not included under any of the ten predicaments, especially *everything* and *nothing*.

Trinity term. See def. 1 (a) and (b). — Vague term, a word or phrase sometimes used as a term, but without fixed meaning. — *Syn. II. Word, Term, Expression, Phrase*, vocable, name. Word is generic; term and expression are specific: every term is a word; a phrase is a combination of words generally less than a sentence; an expression is generally either a word or a phrase, but may be a sentence. A term is, in this connection, especially a word of exact meaning: as, "phlebitis" is a medical term. See *dictionary*.

term (tér'm), *v. t.* [Early mod. E. also *tearm*; < *term*, *n.*] To name; call; denominate; designate.

A certaine pamphlet which he termed a cooling carde for Philautus, yet generally to be applied to all lovers.

*Lyly, Euphues, Anat. of Wit, p. 105.*

Britan hath bin anciently termed Albion, both by the Greeks and Romans.

*Milton, Hist. Eng., i.*

terma (tér'mä), *n.*; pl. *termata* (-mä-tä). [NL. (B. G. Wilder, 1881), < Gr. *τέρμα*, a limit, terminus.] The lamina terminalis, or terminal lamina, of the brain; a thin lamina between the præcommissura and the chiasma, constituting a part of the boundary of the aula. See cut under *sulcus*.

termagancy (tér'ma-gan-si), *n.* [ < *termagan* (t) + *-cy*.] The state of being termagant; turbulence; tumultuousness.

termagant (tér'ma-gant), *n.* and *a.* [Early mod. E. also *Termagant*, also *Turmagant*, also *Ternagant*; < ME. *Termagant*, *Ternagant*, < OF. *Tervagant*, *Tervagant*, \**Tarragant*, also \**Trivagant*, *Tryvagant*, < It. *Trivagante*, *Trivagante*, *Terragante*, etc.; prob. a name of Ar. origin brought over by the Crusaders. Of the various theories invented to explain the name, one refers it, in the It. form *Trivagante*, to lunar mythology, < L. *tres* (*tri*), three, + *vagan* (t)-s, ppr. of *vagare*, wander; i. e. the moon wandering under the three names of Selene (or Luna) in heaven, Artemis (or Diana) on the earth, and Persephone (Proserpine) in the lower world.] *I. n. 1.* [cap.] An imaginary deity, supposed to have been worshipped by the Mohammedans, and introduced into the moralities and other shows, in which he figured as a most violent and turbulent personage.

Child, by Termagant,

But if thou prike out of myn haunt,

Anon I sle thy stede.

*Chaucer, Sir Thopas, l. 99.*

I would have such a fellow whipped for o'erdoing Termagant; it out-herods Herod. *Shak., Hamlet, iii. 2. 15.*

Ile march where my Captaine leads, wer't into the Presence of the great Termagant.

*Heywood, Royal King (Works, ed. Pearson, 1874, VI. 23).*

2†. A turbulent, brawling person, male or female.

This terrible termagant, this Nero, this Pharaoh.

*Bp. Bale, Yet a Course at the Romysh Foxe, fol. 39 b*  
[1543]. (*Latham.*)

Wealth may do us good service, but if it get the mastery of our trust it will turn tyrant, termagant; we condemn ourselves to our own galleys.

*Rev. T. Adams, Works, I. 149.*

3. A boisterous, brawling, or turbulent woman; a shrew; a virago; a scold.

She threw his periwig into the fire. Well, said he, thou art a brave termagant. *Tatler.*

If she [woman] be passionate, want of manners makes her a termagant and a scold, which is much at one with Lunatic. *Defoe* (Arber's Eng. Garner, II. 267).

II. *a.* Violent; turbulent; boisterous; quarrelsome; scolding; of women, shrewish.

'Twas time to counterfeit, or that hot termagant Scot had paid me scot and lot too. *Shak., 1 Hen. IV., v. 4. 114.*

Yet it is oftentimes too late with some of you young, termagant, flashy sinners—you have all the guilt of the intention, and none of the pleasure of the practice.

*Congreve, Old Bachelor, i. 4.*

Hath any man a termagant wife?

*Barham, Ingoldsby Legends, I. 136.*

termagantly (tér'ma-gant-li), *adv.* In a termagant, boisterous, or scolding manner; like a termagant; outrageously; scandalously. *Tom Brown, Works, II. 148.* (*Darvies.*)

termata, *n.* Plural of *terma*.

termatic (tér-mat'ik), *a.* and *n.* [ < *terma* (t) + *-ic*.] *I. a.* Pertaining to the terma, or lamina terminalis of the brain.

II. *n.* The termatic artery, a small vessel arising from the junction of the precerebral arteries, or from the precommunicant when that vessel exists, and distributed to the terma, the adjacent cerebral cortex, and the genu. *New York Med. Jour., March 21, 1885, p. 325.*

term-day (tér'm'dā), *n.* [ < ME. *terme-day*; < *term* + *day*.] 1. A fixed or appointed day.

He had broke his terme-day

To come to her.

*Chaucer, Death of Blanche, l. 730.*

2. Same as *term*, 7 (a) or (b). — 3. Specifically, one of a series of days appointed for taking special and generally very frequent observations of magnetic or meteorological elements at different stations, in accordance with a uniform system.

termier (tér'mér), *n.* [ < *term* + *-er*.] 1. One who travels to attend a court term; formerly, one who resorted to London in term time for dishonest practices or for intrigues—the court terms being times of great resort to London both for business and for pleasure.

*Salewood.* Why, he was here three days before the Exchange gaped.

*Rear.* Fie, such an early termier?

*Middleton, Michaelmas Term, i. 1.*

2. In law, same as *termior*.

Termes (tér'méz), *n.* [NL. (Linnaeus, 1748), < LL. *termes*, a wood-worm: see *termite*.] 1. An important genus of pseudoneuropterous insects, typical of the family *Termitidae*. It includes those termites or white ants which have the head large, rounded, and with two ocelli, the prothorax small and heart-shaped, the costal area free, and the plantula

White Ant (*Termes flavipes*).

a, larva; b, winged male; c, worker; d, soldier; e, large female; f, nymph. (Lines show natural sizes.)

absent. It is a wide-spread genus of many species. *T. flavipes* of North America is a well-known example which bores in the timbers of dwellings, particularly south of the latitude of Washington, and often causes great annoyance, not only from destruction of property, but from the swarming of the winged individuals at certain seasons of the year. 2. [*l. c.*] A termite. *Imp. Dict.*

term-fee (tér'm'fē), *n.* In law, a fee or certain sum allowed to an attorney as costs for each term his client's cause is in court.

terminable (tér'mi-nā-bl), *a.* [= It. *terminabile*, < L. as if \**terminabilis*, < *terminare*, terminate: see *terminate*.] Capable of being terminated; limitable; coming to an end after a certain term: as, a terminable annuity.

terminableness (tér'mi-nā-bl-nes), *n.* The state of being terminable.

terminal (tér'mi-nāl), *a.* and *n.* [ < F. *terminal* = Pr. *terminal* = Sp. Pg. *terminal* = It. *terminale*, < LL. *terminalis*, pertaining to a boundary or to the end, terminal, final, < L. *terminus*, a bound, boundary, limit, end: see *term*, *terminus*.] *I. a.* 1. Of, pertaining to, or forming the terminus or termination of something; forming a boundary or extreme limit; pertaining to a term (see *term*, 1 and 2): as, a terminal pillar; the terminal edge of a polyhedron; the terminal facilities of a railway. — 2. In bot., growing at the end of a branch or stem; terminating: as, a terminal peduncle, flower, or spike. — 3. In logic, constituted by or relating to a term. — 4. Occurring in every term; representing a term.

If he joins his College Boat Club . . . he will be called upon for a terminal subscription of £1 at least.

*Dickens's Dict. Oxford, p. 52.*

5. In anat. and zool., ending a set or series of like parts; apical: as, the middle sacral artery is the terminal branch of the abdominal aorta; the last coccygeal bone is the terminal one of the coccyx; a terminal mark or spine; the terminal joint of an antenna. See cuts under *Colaspis* and *Erotylus*. Terminal alveolus, an air-sac, or pulmonary alveolus. — Terminal dementia, dementia forming the final and permanent stage of many cases of acute insanity, such as mania, melancholia, or other psychoneurosis. — Terminal figure. Same as *terminus*, 3. — Terminal margin of the wing, in entom., a portion of the wing-margin furthest removed from the base: between the costal or anterior and the posterior margin. — Terminal moraine. See *moraine*. — Terminal mouth, in entom., a mouth situated at the end of the head, as in most *Coleoptera*. — Terminal pedestal, a name often given to a pedestal which tapers toward the bottom. The name is inexact, as such a pedestal is of *gaine* shape and not terminal shape. — Terminal quantity, the quantity of a term, as universal or particular. The phrase implies that the quantities of a proposition attach to the terms; but this is incorrect. The quantities really belong to the subjects, or purely designated elements, and not to the terms, or conceptual elements. Thus, in the proposition "Every man is son of a woman" there are three terms but only two quantities, because only two subjects. — Terminal stigma. See *stigma*, 6. — Terminal value, terminal form, in math., the last and most complete value or form given to an expression. — Terminal velocity, in the theory of projectiles, the greatest velocity which a body can acquire by falling freely through the air, the limit being arrived at when the retardation due to the resistance of the air becomes equal to the acceleration of gravity.

II. *n.* 1. That which terminates; the extremity; the end; especially, in elect., the clamping-screw at each end of a voltaic battery, used for connecting it with the wires which complete the circuit. — 2. In crystal., the plane or planes which form the extremity of a crystal. — 3. A charge made by a railway for the use of its termini or stations, or for the handling of freight at stations.

The cost of collection, loading, covering, unloading, and delivering, which are the chief items included under the determination of terminals, falls upon the railways for most descriptions of freight.

*Contemporary Rev., LI. 82.*

4. A terminus, as of a railroad. [Recent.]

Terminalia<sup>1</sup> (tér-mi-nā'li-ä), *n. pl.* [L., neut. pl. of (LL.) *terminalis*, pertaining to boundaries or to Terminus: see *terminal*.] In *Rom. antiq.*, a festival celebrated annually in honor of Terminus, the god of boundaries. It was held on the 23d of February, its essential feature being a survey or perambulation of boundaries.

Terminalia<sup>2</sup> (tér-mi-nā'li-ä), *n.* [NL. (Linnaeus, 1767), so called with ref. to the crowding of the leaves at the ends of the twigs; < LL. *terminalis*, pertaining to the end, terminal: see *terminal*.] A genus of plants, of the order *Combretaceæ* and suborder *Combretæ*. It is characterized by apetalous flowers consisting mainly of a cylindrical calyx-tube consolidated with the one-celled ovary, five calyx-teeth surmounting a somewhat bell-shaped border, and ten exserted stamens in two series. The ovary contains two or rarely three pendulous ovules, and ripens into an ovoid angled compressed or two- to five-winged fruit which is very variable in size and shape and contains a hard one-seeded stone. There are about 90 species, natives of the tropics, less frequent in America than in the Old World. They

are trees or shrubs, usually with alternate entire and petioled leaves crowded at the ends of the branches. The small sessile flowers are green, white, or rarely of other colors, usually forming loose elongated spikes often produced from scaly buds before the leaves. They are often tall forest-trees, as *T. latifolia*, the breadfruit, a common species in Jamaica, which reaches 100 feet. A sweet conserve, known as *chebula*, is made from the fruit in India. For several species of the wingless section *Myrobalanus*, see *myrobalan*. *T. Catappa*, the (Malabar) almond, in the West Indies also country

*Terminalia Catappa.*

*almond*, is a handsome tree from 30 to 50 feet high with horizontal whole branches producing a large white almond-like seed, eaten raw or roasted and compared to the filbert in taste. It is a native of India, Arabia, and tropical Africa cultivated in many warm regions, and introduced in America from Cuba to Central America. In the mountains two species, *T. argentea* and *T. macrocarpa* known as *gale benzoin* yield a fragrant resin used as incense. This is made in India from the stringy galls which form on the twigs of *T. chalcidifera*. Many species produce valuable wood, as *T. bainesii*, for which see *sp.* *T. bainesii*, the babela or myrobalan-wood, is valuable in India for making planks, canoes, etc. *T. chalcidifera*, known as *lanna*, and *T. bialata*, known as *chondron*, are used in making furniture. *T. alaba*, the dala-malaba of Pegu is a source of masts and spars for ships. The latter and *T. arjuna*, the urjoon of India, with about a dozen other species, are sometimes separated as a genus *Prodaphna*, on account of their remarkable leathery egg-shaped fruit, which is traversed lengthwise by from five to seven equidistant and similar wings.

**Terminaliaceæ** (têr-mi-nâ-li-a-sê-sê, *n. pl.* [NL, *Jaume St. Hilaire*, 1805, *Terminales* + *-acea*].) A former order of plants, now known as *Combretaceæ*.

**terminally** (têr-mi-nâ-li), *adv.* With respect to a termination; at the extreme end.

**terminant** (têr-mi-nânt), *n.* [*L. terminant* (-is), ppr. of *terminare*, terminate; see *terminative*.] Termination; ending.

Neither of both are like *terminant*, either by good orthography or in natural sound.

*Puttenham*, *Arte of Eng. Poesie*, p. 67.

**terminate** (têr-mi-nâ-ti), *v. t.* pret. and ppr. *terminated*, ppr. *terminating*. [*L. terminatus*, ppr. of *terminare*, set bounds to, bound, limit, end, close, terminate, *< terminus*, a bound, limit, end; see *term*, *terminus*. Cf. *terminus*.] *I. trans.* 1. To bound; limit; form the extreme outline of; set a boundary or limit to; define.

It is no church at all, my lord: it is a spire that I have built against a tree, a field or two off, to *terminate* the prospect. One must always have a church, or an obelisk, or a something to *terminate* the prospect, you know. That's a rule in taste, my lord!

*Colman*, *Clandestine Marriage*, ii.

She was his life,  
The ocean to the river of his thoughts,  
Which *terminated* all. *Byron*, *The Dream*.

2. To end; put an end to.—3. To complete; put the closing or finishing touch to; perfect.

During this interval of calm and prosperity, he [Michael Angelo] *terminated* two figures of slaves, destined for the tomb, in an incomparable style of art.

*J. S. Harford*, *Michael Angelo*, I. xi.

=*Syn.* 2. To close, conclude.

*II. intrans.* 1. To be limited in space by a point, line, or surface; stop short; end.

The left extremity of the stomach [of the kangaroo] is blind, and *terminates* in two round cul-de-sacs.

*Owen*, *Anat.*, § 25.

2. To cease; come to an end in time; end.

Human aid and human solace *terminate* at the grave.

*D. Webster*, Speech commemorative of Adams and Jefferson, Aug. 2, 1826.

The festival *terminated* at the morning-call to prayer.

*E. W. Lane*, *Modern Egyptians*, II. 205.

**terminate** (têr-mi-nât), *a.* [*L. terminatus*, ppr.: see the verb.] Capable of coming to an end; limited; bounded: as, a *terminate* decimal. A *terminate* number is an integer, a mixed number, or a vulgar fraction. See *terminative*.

**termination** (têr-mi-nâ'shon), *n.* [*OF. terminatio*, vernacularly *terminaison*, *F. terminaison* = *Sp. terminacion* = *Pg. terminação* = *It. terminazione*, *< L. terminatio* (-is), a bounding, fixing of bounds, determining, *< terminare*, ppr. *terminatus*, bound, limit: see *terminate*.] 1. Bound; limit in space or extent: as, the *termination* of a field.—2. The act of limiting, or setting bounds; the act of terminating; the act of ending or concluding: as, Thursday was set for the *termination* of the debate.—3. End in time or existence: as, the *termination* of life.

From the *termination* of the schism, as the popes found their ambition thwarted beyond the Alps, it was diverted more and more towards schemes of temporal sovereignty.

*Hadam*, *Middle Ages*, ii. 7.

4. In *gram.*, the end or ending of a word; the part annexed to the root or stem of an inflected word (a case-ending or other formative), or in general a syllable or letter, or number of letters, at the end of a word.—5. Conclusion; completion; issue; result: as, the affair was brought to a happy *termination*.—6. Decision; determination. [Rare.]

We have rules of justice in us; to those rules  
Let us apply our angers; you can consider  
The want in others of these *terminations*,  
And how unfurnish'd they appear.

*Fletcher* (and another), *Love's Pilgrimage*, ii. 1.

7. That which ends or finishes off, as, in architecture, a finial or a pinnacle.—8. Word; term.

She speaks poniards, and every word stabs; if her breath were as terrible as her *terminations*, there were no living near her; she would infect to the north star.

*Shak.*, *Much Ado*, ii. 1, 256.

9. The extremity of a crystal when formed by one or more crystalline faces. A crystal whose natural end has been broken off is said to be without *termination*.

**terminational** (têr-mi-nâ'shon-al), *a.* [*< terminatio* + *-al*.] Of, pertaining to, forming, or formed by a termination; specifically, forming the concluding syllable.

*Terminational* or other modifications.

*Craik*, *Hist. Eng. Lit.*, I. 52.

**terminative** (têr-mi-nâ-tiv), *a.* [= *F. terminatif* = *Sp. Pg. It. terminativo*; as *terminate* + *-ive*.] Tending or serving to terminate; definitive; absolute; not relative.

This objective, *terminative* presence flows from the fecundity of the Divine Nature.

*Ep. Rust*, *Discourse of Truth*, § 15.

**terminatively** (têr-mi-nâ-tiv-li), *adv.* In a terminative manner; absolutely; without regard to anything else.

Neither can this be eluded by saying that, though the same worship be given to the image of Christ as to Christ himself, yet it is not done in the same way: for it is *terminatively* to Christ or God, but relatively to the image: that is, to the image for God's or Christ's sake.

*Jer. Taylor*, *Dissuasive from Popery*, I. ii. § 11.

**terminator** (têr-mi-nâ-tor), *n.* [*L. LL. terminator*, one who limits, *< L. terminare*, terminate: see *terminate*.] 1. One who or that which terminates.—2. In *astron.*, the dividing-line between the illuminated and the unilluminated part of a heavenly body.

Except at full-moon we can see where the daylight struggles with the dark along the line of the moon's sunrise or sunset. This line is called the *terminator*. It is broken in the extreme, because the surface is as rough as possible.

*H. W. Warren*, *Astronomy*, p. 155.

**terminatory** (têr-mi-nâ-tô-ri), *a.* [*< terminare* + *-ory*.] Bounding; limiting; terminating.

**terminet** (têr-min), *v. t.* [*< ME. terminen*, *terminen*, *< OF. terminer* = *Sp. Pg. terminar* = *It. terminare*, *< L. terminare*, set bounds to, bound, determine, end: see *terminate*. Cf. *determine*.] 1. To limit; bound; terminate.

Eningia had in owld tyme the tytyle of a kingdom. . . . It is *termined* on the north syde by the southe line of Ostobothnia, and is extended by the mountaynes.

*R. Eden*, tr. of *Jacobus Zieglerus* (First Books on America, [ed. Arber, p. 306].

2. To come to a conclusion regarding; determine; decide.

Foulis of ravyne

*Chaucer*, *Parliament of Fowls*, l. 530.

**terminer** (têr-mi-nèr), *n.* [*< OF. terminer*, inf. used as a noun: see *termine*.] In *law*, a determining: as, oyer and *terminer*. See *court of oyer and terminer*, under *oyer*.

**termini**, *n.* Plural of *terminus*.

**termininet**, *n.* [Appar. an error for *terminant*.] A limit or boundary.

All jointly move upon one axletree,

Whose *terminine* [var. *terminie*] is termed the world's wide pole.

*Marlowe*, *Faustus*, ii. 2 (ed. Bullen).

**terminism** (têr-mi-niz-m), *n.* [*< L. terminus*, a term (see *term*), + *-ism*.] 1. In *logic*, the doctrine of William of Occam, who seeks to reduce all logical problems to questions of language.—2. In *theol.*, the doctrine that God has assigned to every one a term of repentance, after which all opportunity for salvation is lost.

**terminist** (têr-mi-nist), *n.* [*< termin-ism* + *-ist*.] An upholder of the doctrine of terminism, in either sense.

**terminological** (têr-mi-nô-loj'i-ka-l), *a.* [*< terminolog-y* + *-ic-al*.] Of or pertaining to terminology.

**terminologically** (têr-mi-nô-loj'i-ka-li), *adv.* In a terminological manner; in the way of terminology; as regards terminology. *F. B. Winslow*, *Obscure Diseases of Brain and Mind*. (*Latium*.)

**terminologie** (têr-mi-nô-lô-jî), *n.* [= *F. terminologie*, *< L. terminus*, a term, + *Gr. -λογία*, *< λέγω*, speak: see *-ology*.] 1. The doctrine or science of technical terms; teaching or theory regarding the proper use of terms.

They are inquiries to determine not so much what is, as what should be, the meaning of a name; which, like other practical questions of *terminologie*, requires for its solution that we should enter . . . into the properties not merely of names but of the things named.

*J. S. Mill*, *Logic*, I. viii. § 7.

2. Collectively, the terms used in any art, science, or the like; nomenclature: as, the *termin-*

*nology* of botany. It is sometimes restricted to the terms employed to describe the characters of things, as distinguished from their names, or a *nomenclature*. See *nomenclature*, 2, and compare *vocabulary*.

Hence botany required not only a fixed system of names of plants, but also an artificial system of phrases fitted to describe their parts: not only a *Nomenclature*, but also a *Terminology*.

*Whewell*, *Philos. of Inductive Sciences*, I. p. lxi.

**terminthust** (têr-min'thus), *n.*; pl. *terminthi* (-thi). [NL, *< Gr. τέρινθος*, earlier form of *τερέβινθος*, terebinth: see *terebinth*.] In *med.*, a sort of carbuncle, which assumes the figure and blackish-green color of the fruit of the turpentine-tree.

**terminus** (têr-mi-nus), *n.*; pl. *termini* (-ni). [*L. terminus*, a bound, boundary, limit, the god of boundaries, the end: see *term*.] 1. A boundary; a limit; a stone, post, or other mark used to indicate the boundary of a property.—2. [*cap.*] In *Rom. myth.*, the god of boundaries; the deity who presided over boundaries or landmarks. He was represented with a human head, but without feet or arms, to intimate that he never moved from whatever place he occupied.

3. A bust or figure of the upper part of the human body, terminating in a plain block of rectangular form; a half-statue or bust, not placed upon but incorporated with, and as it were immediately springing out of, the square pillar which serves as its pedestal. Termini are employed as pillars, balusters, or detached ornaments for niches, etc. Compare *gaine*. Also called *term* and *terminal figure*.

4. Termination; limit; goal; end.

Was the Mosaic economy of their nation self-dissolved as having reached its appointed *terminus* or natural euthanasia, and lost itself in a new order of things?

*De Quincey*, *Secret Societies*, ii.

5. The extreme station at either end of a railway, or important section of a railway.—6. The point to which a vector carries a given or assumed point.—**Terminus ad quem**, the point to which (something tends or is directed); the terminating-point.—**Terminus a quo**, the point from which (something starts); the starting-point.

**termitarium** (têr-mi-tâ-ri-um), *n.*; pl. *termitaria* (-â). [NL, *< Termes* (*Termit*) + *-arium*.]

1. A termitary; a nest or mound made by termites, or white ants. Those of some tropical species, built on the ground, are a yard or two in height, and of various forms. Others are built in trees, and are globular or irregular in shape; from these central nests covered passages run in all directions, as far as the insects make their excursions, and new ones are constantly being constructed, the termites never working without shelter.

2. A cage or vessel for studying termites under artificial conditions.

Last night I took a worker *Eutermes* from a nest in my garden and dropped it into the midst of workers in my *termitarium*.

*P. H. Dudley*, *Trans. New York Acad. Sci.*, VIII. lvi. 103.

**termitary** (têr-mi-tâ-ri), *n.*; pl. *termitaries* (-riz). [*< NL. termitarium*, q.v.] A termitarium. *H. A. Nicholson*.

**termite** (têr-mit), *n.* [*< NL. Termes* (*Termit*), a white ant, *< LL. termes* (*termit*), *< L. tarmes* (*tarmit*), a wood-worm, prob. *< terere*, rub: see *trite*.] A white ant; any member of the *Termitidæ*.

**Termitidæ** (têr-mit'i-dæ), *n. pl.* [NL (Westwood, 1839), *< Termes* (*Termit*) + *-idæ*.] A family of insects; the white ants, placed in the order *Pseudoneuroptera*, and according to Brauer forming, with the *Psocidæ* and *Mallophaga*, the order *Corrodentia*. The termite form is an old one, geologically speaking, occurring in the coal-measures of Europe. At the present day, although mainly tropical, species are found in most temperate regions. Each exists in several forms. Besides the winged male and female (the latter losing her wings after impregnation), there are curiously modified sexless forms known as *soldiers* and *workers*, the former possessing large square heads and long jaws, the latter heads of moderate size and small jaws. The true impregnated females grow to an enormous size and lay many thousands of eggs. Great damage is done by these insects in tropical countries to buildings, furniture, and household stores. See cut under *Termes*.

Terminus  
Archaic Greek statue of Pan, in the British Museum.

**termitine** (ter'mi-tīn), *a.* and *n.* [*< termit + -ine*.] *I. a.* Resembling or related to white ants; belonging to the *Termitidae*.

*II. n.* A white ant; a termite.  
**termitophile** (ter'mi-to-fīl), *n.* [*< NL. "termito-philius," see Termitophilus*.] An insect which lives in the nests of white ants. Insects of several orders are found in those nests, notably members of the rove-beetle genus *Philothermus*.  
**termitophilous** (ter'mi-to-fī-lus), *a.* [*< NL. "termitophilus," < termit (termit-), termite, + Gr. -philos, love*.] Fond of termites; noting insects which live in the nests of white ants. *E. J. Sclerax*, Proc. Entom. Soc., Washington, I, 160.  
**termless** (tér'm'les), *a.* [*< term + -less*.] 1. Having no term or end; unlimited; boundless; endless; limitless.

No hath their day, no hath their blisse, an end,  
But there their *termless* time in pleasure spend.  
*Spenser*, Hymn of Heavenly Love, l. 75.

2. Nameless; inexpressible; indescribable. [Rare.]

His phoenix down began but to appear  
Like unshorn velvet on that *termless* skin.  
*Shak.*, Lover's Complaint, l. 94.

**termly** (tér'm'li), *a.* [*< term + -ly*.] Occurring, paid, etc., every term.

The clerks are partly rewarded by that mean also [petty fees, . . . besides that *termly* fee which they are allowed.  
*Bacon*, Office of Alienations.

**termly** (tér'm'li), *adv.* [*< term + -ly*.] Term by term; every term.

The fees, or allowances, that are *termly* given to these deputies, receiver, and clerks, for recompence of these their pains, I do purposely pretermitt.

*Bacon*, Office of Alienations.

If there was any particular thing in the business of the house which you disliked, . . . I would . . . put it in order for you *termly* or weekly, or daily. *Scott*, Rob Roy, II.

**termor** (tér'm'or), *n.* [*< term + -or*.] In law, one who has an estate for a term of years or for life. Also *termor*.

**term-piece** (tér'm'pēs), *n.* Same as *term*, 5.

**termysont**, *n.* Termination. *Piers Plowman* (C), iv, 409.

**tern**<sup>1</sup> (térn), *n.* [Also *tar-n*; *< Dan. ternu = Sw. tärna = Icel. thérna*, a term. Some connect *tern*<sup>1</sup> with *ME. tarne, therne*, girl, maid-servant, *G. dirn*, etc. (see *therne*); but the connection is not obvious.] A bird of the family *Laridae* and subfamily *Sterninae*; a stern or sea-swallow. Terns differ from gulls in their smaller average size (though a few of them are much larger than some gulls), slenderer body, usually long and deeply forked tail, very small feet, and especially in the relatively longer and slenderer bill, which is parangathous instead of hypogathous (but some of the stouter terns, as the gull-billed, are little different in this respect from some of the smaller gulls, as of the genus *Chroicocephalus*). To the slender form of the body, with sharp-pointed wings and forficulate tail, conferring a buoyant and dashing flight, the terns owe their name *sea-swallow*. The characteristic coloration is snow-white, sometimes rose-tinted, with pearly-blue mantle, silver-black primaries, jet-black cap, and coral-red, yellow, or black bill and feet; some terns (the noddies) are sooty-brown. A few are chiefly black (genus *Hydrochelidon*); some have a black mantle (*Sterna fuliginosa*), the sooty tern, type of the subgenus *Haliastur*; the genus *Gygis* is pure-white; and *Inca* is slaty-black, with curly white plumes on the head. Several species abound in most countries, both inland over large bodies of water and coastwise, and some of them are almost cosmopolitan in their range. The sexes are alike in color, but the changes of plumage with age and season are considerable. The eggs, two or three in number, and heavily spotted, are laid on the ground (rarely in a frail nest on bushes), generally on the shingle of the sea shore, sometimes in a tussock of grass in marshes. Most terns congregate in large numbers during the breeding-season. (See *egg-bird*.) The voice is peculiarly shrill and querulous; the food is small fishes and other aquatic animals, procured by dashing down into the water on the wing. From 50 to 75 species are recognized by different ornithologists, mostly belonging to the genus *Sterna* or its subdivisions. See phrases below.—**Aleutian tern**, *Sterna aleutica*, a tern white with very dark pearl-gray upper parts, a white crescent in the black cap, and black bill. It resembles the sooty terns.—**Arctic tern**, *Sterna paradisaea*, or *S. arctica*, or *S. macrura*, a tern with extremely long and deeply forked tail, very small coral- or lake-red feet, lake- or carmine-red bill, rather dark pearl-blue plumage, little paler below than above, and black cap. It is from 14 to 17 inches long according to the varying development of the filamentous lateral tail-feathers, and about 30 in extent of wings. This tern chiefly inhabits arctic and cold temperate parts of both hemispheres. Its synonymy is intricate, owing to confusion of names with the common and roseate terns, and the description of its varying plumages under specific designations.—**Black tern**, any tern of the genus *Hydrochelidon*; specifically, *H. fuscipes* or *laviformis*. The white-winged black tern is *H. leucophaea*. The whiskered black tern is *H. leucophaea*. There are others. These are marsh-terns of most parts of the world, with semipalmate feet, comparatively short and little-forked tail, extremely ample as well as long wings, black bill, dark feet, and most of the plumage of the adults black or of some dark ashy shade. **Boys's tern**, the Sandwich tern, one of whose former names was *Sterna boysi*, after Dr. Boys of Kent, England.—**Bridled tern**, *Sterna (Haliastur) anthracina*, a member of the sooty tern group, found in some of the warmer parts of the world. The

frontal lunule is very long, the feet are scarcely more than semipalmate, and the length is 14 or 15 inches.

**Cabot's tern**, the American sandwich tern, which Dr. Cabot once named *Sterna aculeifrons*. **Caspian tern**, *Sterna (Thalasseus) caspia*, the imperial tern. It is the largest tern known, being from 20 to 33 inches long, and 4 to 4½ feet in spread of wings; it is white, with pearl mantle, black cap and feet, and red bill. It is widely distributed in Asia, America, and elsewhere. The name *S. isidoreana* was given to it by Lepechin, before Lallas named it *caspia*.

**Cayenne tern**, *Sterna (Thalasseus) macrura*, formerly *S. cayennensis* or *cayana*, the largest tern of America except the imperial, 18 or 20 inches long, and from 42 to 44 in extent. It is white, with pearl mantle, black cap and feet, and coral or yellow bill. It inhabits most of both Americas, and is common along the Atlantic coast of the United States. See cut under *Thalasseus*.—**Common tern**, *Sterna hirsuta*, a bird of most parts of the world, about 14½ inches long, 31 in extent, and with pearly-white under parts, pearl mantle, black cap, coral feet, and vermilion black-tipped bill. It is needlessly named *Wilson's tern*. Also called *gull-killer*, *kirk-mew*, *picket*, *picketary*, *pirr*, *rippock*, *ritock*, *scrag*, *spurre*, *turny*, *larrt*, *turnck*. See cut under *Sterna*.—**Ducal tern**, the Sandwich tern. *Coues*, 1884.

**Elegant tern**, *Sterna (Thalasseus) elegans*, a bird of South and Central America and the Pacific coast of the United States, resembling the Cayenne tern. **W. Gambel**. **Emperor tern**. See *emperor*. **Fairy tern**, a fairy-bird; one of the least terns.—**Forster's tern**, *Sterna forsteri*, an American tern abounding in the United States and British America. It closely resembles but is distinct from the common tern, as was first noted in 1834 by Thomas Nuttall, who dedicated it to John Reinhold Forster.—**Greater tern**, the common tern.—**Gull-billed tern**, a marsh-tern, *Sterna (Gelocheidon) anglica*; so called from its thick bill. See cut under *Gelocheidon*.—**Havell's tern**, Forster's tern in immature plumage. *Audubon*, 1839. **Hooded tern**, a rare name of the least tern.—**Imperial tern**, the American Caspian tern, *Sterna (Thalasseus) imperator*. *Coues*, 1882.—**Kentish tern**, the Sandwich tern.—**Least terns**, the small terns which constitute the subgenus *Sternula*, of several species. That of Europe is *S. minuta*; of America, *S. antillarum*; of South Africa, *S. balaenarum*, etc. They are the smallest of the family, of the usual coloration, but with a white crescent in the black cap, yellow bill tipped with black, and yellow or orange feet; the tail is not deeply forked; the length is 9 inches or less. See cut under *Sternula*.—**Marsh-tern**. (a) The gull-billed tern. (b) A black tern; any member of the genus *Hydrochelidon*. See cut under *Hydrochelidon*.—**Noddy tern**. See *noddy*, 2, and *Anous*.—**Panay tern**, an old name of the bridled tern, considered a distinct species under the name *Sterna panayensis*. *Latham*, 1785.—**Paradise tern**, the roseate tern; a name derived from *Sterna paradisaea* of Brunnich, 1764, which is of doubtful identification, and probably means the arctic tern.—**Portland tern**, a young arctic tern; named from the city of Portland in Maine. *R. Ridgway*, 1874.—**Princely tern**, the elegant tern. *Coues*, 1884.—**Roseate tern**. See *roseate*.—**Royal tern**, the Cayenne tern. *W. Gambel*.—**Sandwich tern**, *Sterna (Thalasseus) caesiaca*, a tern originally described from Kent, England, and in some of its forms found in most parts of the world. It has many technical names. The American

Sandwich Tern (*Sterna fuscata*).

form has been distinguished as *S. aculeifrons*. This is one of the smallest of the large terns (section *Thalasseus*), and has a long and slender black bill tipped with yellow, black feet and cap, pearl mantle, and the general plumage white, as usual. It is 15 or 16 inches long. **Sea-tern**, a name of several terns, especially of the large species of the section *Thalasseus*, which are mainly maritime.—**Short-tailed tern**. See *short-tailed*. **Sooty tern**. See *sooty*.—**Surinam tern**, an old name of the common black short-tailed tern of North America, *Hydrochelidon fuscipes*, called *H. fuscipes surinamensis* when it is specifically distinguished from its European conspecific *H. fuscipes*.—**Trudeau's tern**, *S. trudeausi*, a South American tern supposed by Audubon (1839) to occur also in the United States. It is of about the size of the common tern, of a pearly-bluish color all over, whitening on the head, and with a yellow or orange bill.—**Whiskered tern**, *Hydrochelidon leucophaea* (after Natterer in Temminck's "Manual," 1820), one of the black terns, with a large white stripe on each side of the head.—**Wilson's tern**. See *common tern*.

**tern**<sup>2</sup> (térn), *a.* and *n.* [= *F. terne*, a three (in dice), three numbers (in a lottery), = *Pr. terna* = *Sp. terna*, *terno* = *Pg. It. terno*, *n.*, a set of three, < *L. ternus*, pl. *terni*, three each, < *tres*, three (*ter*, thrice): see *three*.] *I. a.* Same as *terne*.

*II. n.* 1. That which consists of three things or numbers together; specifically, a prize in a lottery gained by drawing three favorable numbers, or the three numbers so drawn.

She'd win a *tern* in Thursday's lottery.  
*Mrs. Brauning*, Aurora Leigh, vii.

2. In *nuth.*, a system of three pairs of conjugate trihedra which together contain the

twenty-seven straight lines lying in a cubic surface.

**tern**<sup>3</sup> (térn), *n.* [Origin uncertain.] A three-masted schooner; a three-master. [Local, New Eng.]

**ternal** (tér'n'al), *a.* [*< ML. ternalis* (used as a noun), < *L. terni*, by threes: see *tern*<sup>2</sup>.] Consisting of three each; threefold.—**Ternal proposition**. See *proposition*.

**ternary** (tér'n'ar-i), *a.* and *n.* [= *F. ternaire* = *Pr. ternari* = *Sp. Pg. It. ternario*, < *LL. ternarius*, consisting of threes, < *L. terni*, by threes: see *tern*<sup>2</sup>.] *I. a.* Proceeding by threes; consisting of three: as, a ternary flower (that is, one having three members in each cycle); a ternary chemical substance (that is, one composed of three elements).—**Ternary compounds**, in *old chem.*, combinations of binary compounds with each other, as of sulphuric acid with soda in Glauber's salt.—**Ternary cubic**. See *cubic*.—**Ternary form**, in *music*. Same as *rondo form* (which see, under *rondo*).—**Ternary measure or time**, in *music*. Same as *triple rhythm* (which see, under *rhythm*, 2 (b)).—**Ternary quadrics**. See *quadric*.

*II. n.*; pl. *ternaries* (-riz). The number three; a group of three.

Of the second ternary of stanzas (in "The Progress of Poetry"), the first endeavours to tell something.  
*Johnson*, Gray.

**Ternatan** (tér-nā'tan), *a.* [*< Ternate* (see *def.*) + *-an*.] Of or pertaining to Ternate, an island, town, and Dutch possession in the East Indies: specifically noting a kingfisher of the genus *Tanyptera*.

**ternate** (tér'nāt), *a.* [*< NL. ternatus*, arranged in threes, < *L. terni*, by threes: see *tern*<sup>2</sup>.] Arranged in threes; characterized by an arrange-

ment of parts by threes; in *bot.*, used especially of a compound leaf with three leaflets, or of leaves whorled in threes. If the three divisions of a ternate leaf are subdivided into three leaflets each, the leaf is *biternate*, and a still further subdivision produces a *triternate* leaf. See also cut of *Thalictrum*, under *leaf*.

**ternately** (tér'nāt-li), *adv.* In a ternate manner; so as to form groups of three.

**ternatisect** (tér-nat'i-sekt), *a.* [*< NL. ternatus*, in threes, + *L. secare*, pp. *sectus*, cut.] In *bot.*, cut into three lobes or partial divisions.

**ternatopinnate** (tér-nā-tō-pin'āt), *a.* [*< NL. ternatus*, in threes, + *L. pinnatus*, feathered: see *pinnate*.] In *bot.*, noting a compound leaf with three pinnate divisions.

**terne**<sup>1</sup>, *n.* A Middle English form of *tern*<sup>1</sup>.

**terne**<sup>2</sup> (térn), *n.* [Short for *terne-plate*.] Same as *terne-plate*.

**terne-plate** (térn'plāt), *n.* [*< F. terne*, dull, + *E. plate*.] An inferior kind of tin-plate, in making which the tin used is alloyed with a large percentage of lead. It is chiefly used for roofing, and for lining packing-cases to protect valuable goods from damage in transportation by sea.

**ternery** (tér'nèr-i), *n.*; pl. *terneries* (-iz). [*< tern*<sup>1</sup> + *-ery*.] A place where terns or sea-swallows breed in large numbers.

**ternion** (tér'ni-on), *n.* [*< LL. ternio(n)*, the number three, < *L. terni*, by threes: see *tern*<sup>2</sup>.] 1. A group of three.

So, when Christ's Glory Isay would declare,

**Ternstroemia** (térn-stré'mi-ä), *n.* [*NL. (Linnaeus filius, 1781), named after the Swedish naturalist Ternström*.] A genus of polypetalous plants, type of the order *Ternstroemiaceae* and tribe *Ternstroemieae*. It is characterized by bracted flowers with free sepals, imbricated petals united at the base, smooth basifixed anthers, and a superior ovary with an undivided style and two to three cells each usually with two ovules pendulous from the apex. The fruit is indehiscent, its seeds large and hippocrepiform, with fleshy albumen and an inflexed embryo. There are about 40 species, mostly of tropical America, with 5 or 6 in warm parts of Asia and the Indian archipelago. They are evergreen trees and shrubs, with coriaceous leaves and recurved lateral peduncles which are solitary or clustered and bear each a single rather large flower with numerous stamens. *T. aboratis* is known in the West Indies as *scarletseed*, and other species as *ironwood*. The genus is sometimes known by the name *Dupina*.

**Ternstroemiaceae** (térn-stré-mi-ä'sé-è), *n.* pl. [*NL. (De Candolle, 1823), < Ternstroemia* +

-aceæ.] An order of polypetalous plants, of the series *Phalanthaceæ* and cohort *Guttiferales*. It is characterized by usually bisexual and racemed flowers with numerous stamens and by alternate coriaceous undivided leaves without stipules; but some genera are exceptional in their pinnate, solitary, or unisexual flowers and opposite or digitate leaves. It includes about 310 species of 41 genera classed in 6 tribes, natives of the tropics, especially in America, Asia, and the Indian archipelago, and sometimes extending northward in eastern Asia and America. They are trees or shrubs, rarely climbers, with feather-veined leaves which are entire or more often serrate. The regular, usually 5-merous flowers are often large and handsome, the fruit fleshy, coriaceous, or woody, or very often a capsule with a persistent central columella. The seeds are borne on a placenta which is frequently prominent and fleshy or spongy, usually with a curved, bent, hypocotyledon, or spiral embryo. The types of the principal tribes are *Ternstroemia*, *Marcgravia*, *Saurauia*, *Gordonia*, and *Bomarea*. See also *Staurtia*, and *Camellia*, which includes the tea-plant, the most important plant of the order.

**Ternstroemiæ** (térn-stré-mé-é), *n. pl.* [NL. (Mirbel, 1813), < *Ternstramia* + *-æ*.] A tribe of plants (see *Ternstroemiaceæ*), including 8 genera, of which *Ternstroemia* is the type, distinguished by their imbricated petals, basifixed anthers, and one-flowered peduncles.

**terpene** (tér-pén), *n.* [A modified form of *terebene*.] Any one of a class of hydrocarbons having the common formula  $C_{10}H_{16}$ , found chiefly in essential oils and resins. They are distinguished chiefly by their physical properties, being nearly alike in chemical reactions. With their closely related derivatives they make up the larger part of most essential oils.

**terpentine**, *n.* An obsolete form of *turpentine*.

**terpodion** (tér-pō-di-on), *n.* [Gr. *τέρπειν*, delight, + *ὄδῳ*, a song: see *ode*.] A musical instrument invented by J. D. Buschmann in 1816, the tones of which were produced by friction from blocks of wood. It was played by means of a keyboard.

**Terpsichore** (térp-sik'ō-rē), *n.* [Gr. *Τερψιχόρη* (Attic *Τερψιχόρη*). *Terpsichore*, fem. of *τερπίζω*, delighting in the dance, < *τερπεῖν*, fut. *τερπείν*, enjoy, delight in, + *χορὸς*, dance, dancing: see *chorus*.] In classical myth., one of the Muses, the especial companion of Melpomene, and the patroness of the choral dance and of the dramatic chorus developed from it. In the last days of the Greek religion her attributions became restricted chiefly to the province of lyric poetry. In art this Muse is represented as a graceful figure clad in flowing draperies, often seated, and usually bearing a lyre. Her type is closely akin to that of Erato, but the latter is always shown standing.

**Terpsichorean** (térp'si-kō-rē'an), *a. and n.* [Gr. *Τερψιχόρη* + *-an*.] *I. a.* [cap. or *l. c.*] Relating to the Muse Terpsichore, or to dancing and lyrical poetry, which were sacred to this Muse: as, the *terpsichorean art* (that is, dancing).

*II. n. [l. c.] A dancer. [Colloq.]*

**Terpsiphone** (térp-si-fō'nē), *n.* [NL. (C. W. L. Gloger, 1827), < Gr. *τέρψις*, enjoyment, delight, + *φωνή*, voice.] A genus of Old World *Muscicapidae*. The leading species is the celebrated paradise flycatcher, *T. paradisæa*, remarkable for the singular development of the tail. This bird was originally figured and described more than a century ago by Edwards, who called it the *pieb bird of paradise*. It was long mistaken for a bird of Africa, as by Levaillant, who figured it under the name

51 inches, the wing less than 4 inches. The female is quite different, only 7½ inches long, without any peculiarity of the tail, and with plain rufous-brown, gray, and white colors, the crest, however, being glossy greenish-black. A similar species of the Indian archipelago is *T. affinis*. *T. mutata* belongs to Madagascar; and there are about a dozen other species of this beautiful and varied genus, whose members are found from Madagascar across Africa and India to China, Japan, the Malay peninsula, Java, Sumatra, Borneo, and Flores.

**terpuck** (tér'puk), *n.* [Russ. *terpuk*, lit. a rasp; so called on account of the roughness of the scales.] A fish of the family *Clariidæ* (or *Heugrammidae*), as *Heugrammus lagocephalus* and *H. octogrammus*. See John Richardson.

**terra** (tér'ä), *n.* [= F. *terre* = Sp. *tierra* = Pg. *terra*, < L. *terra*, earth, land, ground, soil; orig. \**tersa*, 'dry land,' akin to *torrere*, dry, or parch with heat, Gr. *τέρεσθαι*, become dry: see *thirst*, and cf. *torrent*.] Earth, or the earth: sometimes personified, *Terra*: used especially in various phrases (Latin and Italian).—**Terra alba** ('white earth'), pipe-clay.—**Terra a terrat**. [= F. *terre a terre* = Sp. *tierra a tierra* = It. *terra a terra*, close to the ground, lit. 'ground to ground.'] An artificial gait formerly taught horses in the manege or riding-school. It was a short, half-prancing, half-leaping gait, the horse lifting himself alternately upon the fore and hind feet, and going somewhat sidewise. It differed from curvets chiefly in that the horse did not step so high. It is much noticed in the horse-market literature of the seventeenth and eighteenth centuries.

I rid first a Spanish Horse, a light Bay, called Le Superbe, a beautiful horse. . . . He went in curvets forwards, backwards, sideways, . . . and went *Terra a Terra* Perfectly. The second Horse I Rid was another Spanish Horse, . . . a Brown-Bay with a White star in his Forehead; no Horse ever went *Terra a Terra* like him, so just, and so easy; and for the Pirouette, etc.

**terrace** (ter'äs), *n.* [Early mod. E. also *terras*, *tarras*, *tarrasse*; < OF. *terrace*, *terrasse*, a terrace, gallery, F. *terrasse*, < It. *terraccia*, *terrazzo*, a terrace, < *terra*, < L. *terra*, earth, land: see *terra*.] 1. A raised level faced with masonry or turf; an elevated flat space: as, a garden terrace; also, a natural formation of the ground resembling such a terrace.

This is the *tarrasse* where thy sweetheart tarries.

2. In *geol.*, a strip of land, nearly level, extending along the margin of the sea, a lake, or a river, and terminating on the side toward the water in a more or less abrupt descent; a beach; a raised beach. Also called in Scotland a *carse*, and in parts of the United States where Spanish was formerly spoken a *mesa*, or *meseta*. Terraces are seen in many parts of the world, and vary greatly in width, height, and longitudinal extent, as well as in the mode of their formation. Marine terraces, or raised beaches, have usually been caused by the elevation of the land, the pre-existing beach having been thus lifted above the action of the water, and a new one sea-margins of this kind form conspicuous features in the coast topography of various regions, as of Scandinavia, Scotland, and the Pacific coast of North and South America. Some river- and lake-terraces may have been formed by the upheaval of the region where they occur; but a far more important and general cause of their existence is the diminution of the amount of water flowing in the rivers or standing in the lakes—a phenomenon of which there are abundant proofs all over the world, and the beginning of which reaches back certainly into Tertiary times, but how much further is not definitely known, since the geological records of such change of climate could not be preserved for an indefinite period, and very little is known in regard to the position of rivers, or bodies of water distinctly separated from the ocean, at any remote geological period. Rarely called a *bench*.

This stream runs on a hanging terrace, which in some parts is at least sixty feet above the Barrady.

Poocke, *Description of the East*, II. i. 123.

3. A street or row of houses running along the face or top of a slope: often applied arbitrarily,

as a fancy name, to ordinary streets or ranges of houses.—4. The flat roof of a house, as of Oriental and Spanish houses.—5†. A balcony, or open gallery.

There is a rowe of pretty little *tarrasses* or *rayles* be-twixt every window.

**terra-cotta** (ter'ä-kot'ä), *n.* [= F. *terre cuite*, < It. *terra cotta*, < L. *terra cotta*, lit. baked earth: *terra*, earth; *cotta*, fem. of *coctus*, pp. of *coquere*, cook, bake: see *coct*, *cook*.] 1. A hard pottery made for use as a building-material and for similar purposes, of much finer quality and harder baked than brick; in the usual acceptation of the term, all unglazed pottery, or any article made of such pottery. It differs in color according to the ingredients employed. The color is usually the same throughout the paste; but terra-cotta is made also with an enameled surface, and even with a surface specially colored without enamel. Earthenware similar to this, but from materials chosen and prepared with special care, is made in the form of artistic works, as bas-reliefs, statuettes, etc.

2. A work in terra-cotta, especially a work of art: specifically applied to small figures (statuettes) or figurines in this material, which have held an important place in art both in ancient and in modern times, and are of peculiar

**terræ filius** (ter'ë fil'i-us), [L.: *terræ*, gen. of *terra*, earth; *filius*, son.] 1. A person of obscure birth or of low origin.—2†. A scholar at the University of Oxford appointed to make jesting satirical speeches. He often indulged in considerable license in his treatment of the authorities of the university.

Paradise Flycatcher (*Terpsiphone paradisa*, male; female in background).

*tchitree-bé* (the original of Lesson's genus *Tchitree*); it has also been placed in the larger genera *Muscicapa*, *Muscipeta*, and *Muscivora* of the early writers of the present century. It is native of India and Ceylon. The adult male is chiefly pure-white and black, with glossy steel-green head, throat, and crest; the bill is blue, the mouth is yellow, and the eyes are brown. The total length is about 17 inches, of which 12 or 13 inches belong to the two middle tail-feathers, the tail with this exception being

**terrage**<sup>1</sup> (ter'aj), *n.* [*< F. terre (< L. terra)*, earth, + *-age*, (*< L. terrage*).] A mound of earth, especially a small one, as in a flower-pot, in which plants can be set for household decoration.

**terrage**<sup>2</sup> (ter'aj), *n.* [Also *terragge*; *< OF. terrage*, hold-rent, *< terre*, land; see *terra*.] In *old Eng. law*, an exaction or fee paid to the owner of the land for some license, privilege, or exemption, such, for instance, as leave to dig or break the earth for a grave, or in setting up a market or fair, or for freedom from service in tillage, or for being allowed an additional holding, etc.

**terrain** (te-rân'), *n.* [Also sometimes *terrane*, *< F. terrain, terren*, ground, a piece of ground, soil, rock, = *It. terreno*, *< L. terrenum*, land, ground, prop. neut. of *terrenus*, consisting of earth, *< terra*, earth; see *terra, terren*.] A part of the earth's surface limited in extent; a region, district, or tract of land, either looked at in a general way or considered with reference to its fitness or use for some special purpose, as for a building-place or a battle-field: a term little used in English except in translating from the French, and then with the same meaning which it has in the original. The word is, however, also used in various phonetic expressions, in translating a number of which the English word "ground" is most properly employed: as, "gagner du terrain," to gain ground; "perdre du terrain," to lose ground, favor, or credit; also with various metaphorical significations: as, "être sur son terrain," to have to do with, or to speak of, that with which one is thoroughly familiar; "sonder le terrain," examine the conditions, or look into the matter, etc. As used by French geologists, the word *terrain* has a somewhat vague meaning, and is usually limited by some qualifying terms, as, "terrain de transition," "terrain primitif." This word was introduced into English geological literature by the translator of Humboldt's "Essai Géognostique," where it was used, as he remarks, "because we have no word in the English language which will accurately express *terrain* as used in geology by the French." Also spelled (but rarely) *terrane*.

Rocks which alternate with each other, and which are found usually together, and which display the same relations of position, constitute the same formation; the union of several formations constitutes a geological series or a district (*terrain*); but the terms rocks, formations, and *terrains* are used as synonymous in many works on geognosy.

Humboldt, Geognostical Essay on the Superposition of [Rocks (trans.), p. 2.]

This term [*terrane*] is used for any single rock or continuous series of rocks of a region, whether the formation be stratified or not. It is applied especially to metamorphic and igneous rocks, as a basaltic *terrane*, etc.

J. D. Dana, Man. of Geol. (rev. ed.), p. 81.

**terramara** (ter-â-mâ-râ), *n.*; pl. *terramare* (-re). [*< It. terra amara*, bitter earth (a term used in the vicinity of Parma); *terra*, *< L. terra*, earth; *amara*, fem. of *amarus*, *< L. amarus*, bitter.] Any stratum or deposit of earthy material containing organic or mineral matter (such as bones or phosphates) in sufficient quantity to furnish a valuable fertilizer; hence, a deposit containing prehistoric remains, as fragments of bones and pottery, cinders, etc., of similar character to the deposits called in northern Europe *kitchen-middens*. There are large numbers of these terramare on the plain traversed by the Via Emilia between the Po and the Apennines; some of them are intermediate in character between the kitchen-middens of Denmark and the palafittes of Switzerland, appearing to mark sites of settlements originally built on piles in shallow lakes (or perhaps on marshy ground subject to frequent inundation), which have gradually become desiccated while the stations continued to be occupied.

**terrane**, *n.* See *terrain*.

**terranean** (te-râ'nê-us), *a.* [*< L. terra*, earth, + *-an* + *-e-an* (after *subterranean*, *mediterranean*, etc.).] Being in the earth; belonging to the earth, or occurring beneath the surface of the earth.

The great strain on the trolley wire which would be a necessary incident of *terranean* supply renders such a system impracticable. *Elect. Rev. (Amer.)*, XVIII. i. 9.

**terraneous** (te-râ'nê-us), *a.* [*< L. terra*, earth, + *-an* + *-e-ous* (after *subterraneous*).] In bot., growing on land.

**terrapenet**, *n.* An obsolete variant of *terrapin*. **Terrapenes** (ter-a-pê-nêz), *n. pl.* [NL.: see *terrapin*.] A subdivision of *Emyda* (which see), in which the pelvis is free, the neck bends in a vertical plane, and the head may be almost completely retracted within the carapace.

Huxley. The group contains such genera as *Emys*, *Cistuda*, *Chelonia*, *Cuora*, *Chelonia*, and *Staurotyphlus*. The other subdivision of *Emyda* is *Chelodina*. See cuts under *Cuora*, *Chelonia*, *Cistuda*, and *terrapin*.

Those under 5 or 6 inches in total length of the under shell are termed *cullings*, of which it takes from 18 to 24 or more to make a "dozen." Those of 6 inches and more are *counts* or *counters*, of 12 to the dozen. Only the cows reach 6½ to 7 inches in this measurement; these are known to dealers as *full counts*, and are especially valuable because they usually contain eggs; the bulls are tougher as well as smaller, and of less market value.

2. Some other tortoise or turtle: as, the elephant *terrapin* of the Galapagos.—3. A dish made of the diamond-back.

The extent or compass of land and the waters thereof within the bounds or belonging to the jurisdiction of any sovereign, state, city, or other body; any separate tract of land as belonging to a state; dominion; sometimes, also, a domain or piece of land belonging to an individual.

But if thou linger in my territories  
Longer than swiftest expedition  
Will give thee time to leave our royal court,  
By heaven! my wrath shall far exceed the love  
I ever bore my daughter or thyself.

Shak., *T. G. of V.*, iii. 1. 163.

Those who live thus mewed up within their own contracted territories, and will not look abroad beyond the boundaries that chance, conceit, or laziness has set to their inquiries. Locke, *Conduct of the Understanding*, § 3.

Gentlemen, I thought the deck of a Massachusetts ship was as much the territory of Massachusetts as the floor on which we stand. Emerson, *West Indian Emancipation*.

2. Any extensive tract, region, district, or domain: as, an unexplored territory in Africa.

From hence being brought to a subterranean territory of cellars, the courteous friars made us taste a variety of excellent wines. Evelyn, *Diary*, May 21, 1645.

3. [*cap.*] In the United States, an organized division of the country, not admitted to the complete rights of Statehood (see *state*, 13). Its government is conducted by a governor, judges, and other officers appointed from Washington, aided by a Territorial legislature. Each Territory sends one delegate to Congress, who has a voice on Territorial matters, but cannot vote. Territories are formed by act of Congress. When a Territory has sufficient population to entitle it to one representative in the National House of Representatives, it is usually admitted by act of Congress to the Union as a State. Nearly all the States (except the original thirteen) have passed through the Territorial condition. There are now (1891) four organized Territories—Utah, New Mexico, Arizona, and Oklahoma; and there are also two unorganized Territories—the Indian Territory and Alaska. Several countries of Spanish America have a system of Territories analogous to that of the United States.

The territory is an infant state, dependent only till it is able to walk by itself.

E. A. Freeman, *Amer. Lects.*, p. 351.

The nation has never regretted delay in erecting a territory into a state. The Nation, Jan. 28, 1886.

**Cell territory**, in *anat.* and *physiol.*, the range of extracellular substance supposed to be influenced by each individual cell of any tissue. Virchow. Territory of a judge, in *Scots law*, the district over which a judge's jurisdiction extends in causes and in judicial acts proper to him, and beyond which he has no judicial authority. = *Syn.* 1 and 2. Quarter, province.

**terror** (ter'or), *n.* [Formerly also *terroure*; < F. *terreur* = Pr. Sp. Pg. *terror* = It. *terrore*, < L. *terror*, great fear, dread, terror, < *terrere*, put in fear, frighten, make afraid.] 1. Extreme fear or fright; violent dread.

The sword without and terror within. Deut. xxxii. 25.

Amaze,  
Be sure, and *terroure* seiz'd the rebel host.

Milton, *P. L.*, vi. 647.

Panting with terror, from the bed he leapt.

William Morris, *Earthly Paradise*, I. 383.

2. A person or thing that terrifies or strikes with terror; a cause of dread or extreme fear: often used in humorous exaggeration.

Rulers are not a terror to good works, but to the evil. Rom. xiii. 3.

There is no terror, Cassius, in your threats.

Shak., *J. C.*, iv. 3. 66.

That bright boy you noticed in my class, who was a terror six months ago, will no doubt be in the City Council in a few years. Harper's Mag., LXVIII. 1963.

**King of terrors**, *See King*. Reign of Terror, in French hist., that period of the first Revolution during which the country was under the sway of a faction who made the execution of persons of all ages, sexes, and conditions who were considered obnoxious to their measures one of the cardinal principles of their government. This period may be said to have begun in March, 1793, when the revolutionary tribunal was appointed, and to have ended in July, 1794, with the overthrow of Robespierre and his associates. Also called *The Terror*. — *Syn.* 1. *Apprehension*, *Fright*, etc. — *See above*.

**terror** (ter'or), *v. t.* [*< terror, n.*] To fill with terror. [Rare.]

They, *terror'd* with these words, demand his name.

Heywood, *Hierarchy of Angels*, p. 515.

**terror-breathing** (ter'or-brē'ing), *a.* Inspiring terror; terrifying. [Rare.]

Through the stern throat of terror-breathing war.

Drayton, *Minstrel to Queen Isabel*.

**terror-haunted** (ter'or-hän'ted), *a.* Haunted with terror; subject to visitations of extreme fear. [Rare.]

Till at length the lays they chanted  
Reached the chamber terror-haunted.

Longfellow, *Norman Baron*.

**terrorisation, terrorise, etc.** See *terrorization, etc.*

**terrorism** (ter'or-izm), *n.* [= F. *terrorisme* = Sp. Pg. It. *terrorismo*; as *terror* + *-ism*.] Resort to terrorizing methods as a means of coercion, or the state of fear and submission produced by the prevalence of such methods.

Let the injury inflicted under this terrorism be appreciated, and full compensation awarded on the district by the Judge of Assize or of County Court, and the barbarian will die out. Fortnightly Rev., N. S., XL. 212.

**terrorist** (ter'or-ist), *n.* [= F. *terroriste* = Sp. Pg. *terrorista*; as *terror* + *-ist*.] One who favors or uses terrorizing methods for the accomplishment of some object, as for coercing a government or a community into the adoption of or submission to a certain course; one who practises terrorism. Specifically—(a) An agent or partizan of the revolutionary tribunal during the Reign of Terror in France.

Thousands of those hell-hounds called terrorists, whom they had shut up in prison on their last revolution as the satellites of tyranny, are let loose on the people.

Burke, *A Regicide Peace*, iv.

(b) In Russia, a member of a political party whose purpose is to demoralize the government by terror. See *nihilism*, 4 (b).

Whether such wrongs and cruelties are adequate to excuse the violent measures of retaliation adopted by the terrorists is a question to which different answers may be given by different people.

G. Kennan, *The Century*, XXXV. 755.

**terroristic** (ter'or-ist'ik), *a.* [*< terrorist + -ic.*] Of or pertaining to terrorists.

Terroristic activity, in the shape of bomb-throwing and assassination. The Century, XXXV. 50.

**terrorization** (ter'or-i-zā'shon), *n.* [*< terrorize + -ation.*] The act of terrorizing, or the state of being terrorized. Also spelled *terrorisation*.

**terrorize** (ter'or-iz), *v. t.*; pret. and pp. *terrorized*, ppr. *terrorizing*. [= F. *terroriser* = Pg. *terrorizar*; as *terror* + *-ize*.] To fill with terror; control or coerce by terror; terrify; appal. Also spelled *terrorise*.

Secret organizations, which control and terrorize a district until overthrown by force.

The Century, XXXVI. 840.

The people are terrorized by acts of cruelty and violence which they dare not resist. Edinburgh Rev., CLXIII. 567.

**terrorizer** (ter'or-i-zēr), *n.* One who terrorizes. Also spelled *terroriser*.

Gortchakoff, Ignatieff, and other Slavonic terrorizers of the Germans. Love, Bismarck, II. 152.

**terrorless** (ter'or-less), *a.* [*< terror + -less.*]

1. Free from terror.

How calm and sweet the victories of life,

How terrorless the triumph of the grave!

Shelley, *Queen Mab*, vi.

2. Harmless. [Rare.]

Some human memories and tearful lore

Render him terrorless; . . . dread him not!

Poe, *Silence*.

**terror-smitten** (ter'or-smit'n), *a.* Smitten or stricken with terror; terrified.

**terror-stricken, terror-struck** (ter'or-strik'n, ter'or-struk), *p. a.* Stricken with terror; terrified; appalled.

**terror-strike** (ter'or-strik), *v. t.* To smite or overcome with terror. [Rare.]

He hath baffled his suborned, terror-struck him.

Coleridge, *Remorse*, iv. 2.

**terrosity**, *n.* [*< \*terrous* (< F. *terreur* = Pr. *terros*, < L. *terrosus*, full of earth, earthy, < *terra*, earth: see *terra*, and cf. *terrenus*) + *-ity*.] Earthiness.

Rhenish wine . . . hath fewer dregs and less *terrosity* (read *terrosity*) or gross earthiness than the Clared wine hath. W. Turner (Arber's Eng. Garner, II. 114).

**terry** (ter'i), *n.* [Origin obscure.] 1. A textile fabric of wool or silk, woven like velvet, but with the loops uncut.

The furniture was in green terry, the carpet a harsh, brilliant tapestry. Howells, *Annie Kilburn*, xi.

2. In *rapé-making*, an open reel. E. H. Knight. — Terry poplin. See *poplin*. — Terry velvet, uncut velvet.

**Tersanctus** (tēr'sangk'tus), *n.* [*< L. ter, thrice* (see *ter*), + *sanctus*, holy (see *saint*): so called because it begins with the word *Sanctus*, said thrice.] Same as *Sanctus*.

**terse** (tērs), *a.* [= Sp. Pg. It. *terso*, < L. *ter-sus*, wiped off, clean, neat, pure, pp. of *tergere*, wipe, rub off, wipe dry, polish.] 1. Wiped; rubbed; appearing as if wiped or rubbed; smooth.

Many stones also, both precious and vulgar, although terse and smooth, have not this power attractive.

Sir T. Browne, *Vulg. Err.*, II. 4.

2. Refined; accomplished; polished: said of persons.

Your polite and terse gallants.

Massinger.

3. Free from superfluity; neatly or elegantly compact or concise; neat; concise.

In eight terse lines has Phœdrus told  
(So frugal were the bards of old)  
A tale of goats; and clos'd with grace  
Plan, moral, all, in that short space.

W. Whitehead, *The Goat's Beard*.

**terse**, *n.* See *terce*.

**tersely** (tērs'li), *adv.* 1. In an accomplished manner.

Fastidious Brisk, a neat, spruce, affecting courtier, . . . speaks good remnants; . . . swears tersely and with variety. B. Jonson, *Every Man out of his Humour*.

2. In a terse manner; neatly; compactly; concisely.

**terseness** (tērs'nes), *n.* 1. The state or property of being terse; neatness of style; compactness; conciseness; brevity.

Under George the First, the monotonous smoothness of Byron's versification and the terseness of his expression would have made Pope himself envious.

Macaulay, *Moore's Byron*.

2. Shortness. [Rare.]

The cylindrical figure of the mole, as well as the compactness of its form, arising from the terseness of its limbs, proportionally lessens its labour.

Paley, *Nat. Theol.*, xv.

**tersion** (tēr'shon), *n.* [*< L. tergere*, pp. *tersus*, wipe.] The act of wiping or rubbing; friction; cleaning.

He [Boyle] found also that heat and tersion (or the cleaning or wiping of any body) increased its susceptibility of [electric] excitation. Encyc. Brit., VIII. 3.

**ter-tenant**, *n.* See *terre-tenant*.

**tertial** (tēr'shāl), *a.* and *n.* [*< L. \*tertialis*, < *tertius*, third: see *terce*.] I. *a.* Of the third rank or row among the flight-feathers of a bird's wing; tertiary, as a quill-feather.

II. *n.* A tertiary flight-feather; one of the pennæ, or large feathers, of a bird's wing of the third set, which grow on the elbow or upper arm; one of the tertiaries. The word was intended to signify only the third set of flight-feathers, in the same relation to the humerus that the secondaries bear to the ulna, and the primaries to the manus; but in practice two or three of the innermost secondaries are called tertials when in any way distinguished from the rest. Also *tertiary*, *tertiary feather*. See cuts under *bird* and *covert*, n., 6.

The two or three longer innermost true secondaries, growing upon the very elbow, are often incorrectly called tertials, especially when distinguished by size, shape, or color from the rest of the secondaries.

Coues, *Key to N. A. Birds*, p. 113.

**tertian** (tēr'shan), *a.* and *n.* [I. *a.* < ME. *tercian*, < L. *tertianus*, of the third (day), < *tertius*, third: see *terce*. II. *n.* < ME. *tercian*, *terciane*, < OF. *tertiane* = Sp. *terciana* = Pg. *terçã*, < L. *tertiana* (sc. *febris*), a tertian fever, fem. of *tertianus*, of the third (day): see I.] I. *a.* Occurring every second day: as, a tertian fever.

If it do, I dar wel lye a grote

That ye shul have a fevère terciane.

Chaucer, *Nun's Priest's Tale*, l. 139.

**Double tertian fever.** See *fever*. — **Tertian ague**, intermittent fever with a paroxysm every other day. — **Tertian fever.** See *fever*.

II. *n.* 1. A fever or other disease whose paroxysms return after a period of two days, or on the third day, reckoning both days of consecutive occurrence: an intermittent whose paroxysms occur after intervals of about forty-eight hours.

By how much a hectic fever is harder to be cured than a *tertian* . . . by so much is it harder to prevail upon a triumphing lust than upon its first insinuations.

*See* *Paul's Works* (ed. 1835), I, 119.

2. In *organ-building*, a stop consisting of a tierce and a larget combined.—3<sup>d</sup>. A measure of 84 gallons, the third part of a tun. *Statute of Henry VI.*—4. A curve of the third order. [Rare.]

**tertiary** (tér'shi-á-ri), *a.* and *n.* [= *F. tertiaire* = *Sp. terciario* = *It. terziario* = *It. terziario*, < *L. tertiarus*, containing a third part, < *tertius*, third: see *tertian*.] 1. *a.* 1. Of the third order, rank, or formation; third.—2. [Usually *cap.*] In *geol.*, of, pertaining to, or occurring in the Tertiary. See II. (*a*).

In a word, in proportion as the age of a *tertiary* formation is more modern, so also is the resemblance greater of its fossil shells to the testaceous fauna of the actual seas. *Lyell, Elements of Geology* (1st ed., 1838), p. 283.

3. In *ornith.*, same as *tertiary*: distinguished from *secondary* and from *primary*. See cuts under *bird* and *covert*, *n.*, 6.—4. [*cap.* or *i. c.*] Belonging or pertaining to the Tertiaries. See II. (*b*).

Guido buried him [Dante] with due care in a stone urn in the burying ground of the Franciscans, who loved him, and in whose *tertiary* habit he was shrouded in the supreme hour.

*N. and Q.*, 7th ser., XI, 389.

**Tertiary alcohol.** See *alcohol*, *n.* **Tertiary color,** a color produced by the mixture of two secondary colors, as citrine, russet, or olive. See II. (*c*). **Tertiary feather.** Same as *tertiary*—**Tertiary syphilis.** See *syphilis*.

II. *n.* One who or that which is tertiary,

or third in order or succession. Specifically (a) [*cap.*] In *geol.*, that part of the series of geological formations which lies above the Mesozoic or Secondary and below the Quaternary; the "Cenozoic" of some authors, while others include in this division both Tertiary and Quaternary. The term *Tertiary* belongs to an early period in the history of geology, the entire series having been divided into Primary, Secondary, and Tertiary. The term *transition* was afterward introduced (see *transition*), and *Quaternary* still later; but the Quaternary has been considered by some as being rather a subdivision of the Tertiary, since it seems to have been of relatively short duration, and not anywhere preceded by any break to be compared in importance with that which in various regions characterizes the passage from Mesozoic to Tertiary. The Tertiary was divided by Lyell into three groups or systems, the basis of this classification being the percentage of living species of *Mollusca* in each group; these divisions were designated by him as the Eocene, Miocene, and Pliocene, to which a fourth was added later by Beyrich, namely the Oligocene, intercalated between the Eocene and Miocene. This scheme of subdivision is still accepted as convenient and philosophical, although strict regard is not paid to the precise percentages of living species indicated by Lyell. The subdivisions of these larger divisions which have been found necessary in different regions vary considerably in number and character. The break between the Cretaceous and the Tertiary in northwestern Europe is, on the whole, very marked in character; in various other parts of the world it is much less apparent. The more important and striking features of the Tertiary may be very concisely summed up as follows: evidence of the greatly increasing importance of the surface of the land as compared with that of the water, as shown by the local and detrital character, and the small and rapidly varying thickness, of the deposits, together with the rapidly increasing development of a land-fauna and -flora; the uplifting of the great mountain-chains of the globe, an operation performed on a gigantic scale, some parts of the early Tertiary having been raised to an elevation of nearly 20,000 feet above the sea-level; the almost entire disappearance of many of those forms of animal life which were prominent during the Mesozoic epoch, as of the cephalopods, the gigantic reptiles, and especially the development of the *Mammalia* in ever-increasing numbers and diversity of type; the very much diminished importance both as respects numbers and size of many of those forms of vegetable life which were most prominent in pre-Tertiary times, such as the ferns, the lycopsids, and the cycads, and the development of modern forest vegetation, in which the dicotyledonous angiosperms play a very important part; the zonal distribution of life and climate; the evidence, furnished in abundance in various parts of the world, of a marked diminution in temperature going on through Tertiary times, the proof of which, if begun before the Tertiary, could only be obtained with great difficulty, if at all, owing to the small relative importance of the land-areas; and, finally, the appearance of man upon the earth, an event which took place, so far as is known from present available evidence, some time before the close of the Pliocene. See also *Post-tertiary*, *Quaternary*, and *recent*, *a.* (*b*) [*cap.*] A member of the third order (*tertius ordo de penitentia*) of monastic bodies. An order of this kind was first organized by St. Francis of Assisi. It was instituted as a sort of middle term between the world and the cloister, and members were required to dress more soberly, fast more strictly, pray more regularly, hear mass more frequently, and practise works of mercy more systematically than ordinary persons living in the world. The Dominicans also have their third order, and the example was followed by various other monastic bodies.

The Order of St. Francis had, and of necessity, its *Tertiaries*, like that of St. Dominic.

*Milman, Latin Christianity*, ix, 10.

(c) A color, as russet, citrine, or olive, produced by the mixture of two secondary colors. Tertiaries are grays, and are either red-gray, blue-gray, or yellow-gray when these primaries are in excess, or violet-gray, orange-gray, or green-gray when these secondaries are in excess. *Fairholt*. (d) Same as *tertiary*.

**tertiary** (tér'shi-át), *c. t.*; pret. and pp. *tertiated*, pp. *tertiating*. [*< L. tertius*, pp. of *tertiare*, to do every third day, to do for the third time, < *tertius*, third: see *terce*.] 1. To do for the third time. *Johnson*.—2. In *gun.*, to examine, as a piece of artillery, or the thickness of its metal, to test its strength. This is usually done with a pair of caliper compasses.

To *tertiary* a piece of ordnance is to examine the thickness of the metal, in order to judge of its strength, the position of the trunnions, etc. *Wilhelm, Mil. Dict.*

**tertium quid** (tér'shi-um kwid). [*L. tertium*, neut. of *tertius*, third; *quid*, something, somewhat, neut. of indef. pronoun *quis*, somebody: see *what*, *who*.] 1. Something neither mind nor matter; especially, an idea regarded as not a mere modification of the mind nor a purely external thing in itself. Hence—2. Something mediating between essentially opposite things.

**tertium sal** (tér'shi-um sal). [*L. tertium*, neut. of *tertius*, third; *sal*, salt.] In *old chem.*, a neutral salt, as being the product of an acid and an alkali, making a third substance different from either.

**Tertullianism** (tér-tul'yan-izm), *n.* The doctrine and discipline of the Tertullianists, involving special rigor as to absolution of penitents, opposition to second marriages, etc.

About a year after this, he [Mr. Cotton] practically appeared in opposition to *Tertullianism*, by proceeding unto a second marriage. *Cotton Mather, Mag. Chris.*, III, i.

**Tertullianist** (tér-tul'yan-ist), *n.* [*< Tertullian* (LL. *Tertullianus*) + *-ist*.] A member of a branch of the African Montanists, of the third and fourth centuries, holding to the doctrines of Montanism as modified by Tertullian. The divergence of the Tertullianists from orthodoxy seems to have been much less marked than that of the original Asiatic Montanists. They called themselves "Pneumatics," or spiritual men, and the Catholics "Psychics," natural or sensual men.

**teruncius** (tè-run'shi-us), *n.*; pl. *teruncii* (-i). [*L.*, three twelfths of an as (see *as*), hence a trifle, < *ter*, three times, thrice, + *uncia*, the twelfth part of anything: see *ounce*.] An ancient Roman coin, being the fourth part of the as, and weighing 3 ounces.

**teru-tero** (tér-ò-fer-ò), *n.* [*S. Amer.*; imitative of the bird's note.] The Cayenne lapwing,

*Teru-tero. Belon pterus cayennensis*

or spur-winged plover, *Vanellus* or *Belonopterus cayennensis*, a South American bird of the plover kind. It resembles the common plover, but is easily distinguished. The wings are spurred, and there is a minute hallux. The back and wings are resplendent with metallic iridescence of violet-green and bronze; the breast is black; the lining of the wings is white; the head is crested. During incubation it attempts to lead enemies away from its nest by feigning to be wounded, like many other birds. The eggs are esteemed a delicacy. Its wild and weird notes often disturb the stillness of the pampas. **terver**, *v.* [*ME. terren, terric*, < *AS. turrjan*, in comp. *getyrjan* (= *OHG. zerben*), fall. Cf. *torve*, *terry*, *topsyterry*. Also in comp. *overterve*, *ME. overterven*, used awkwardly in one passage with *toppe* preceding, as if \**top-overterve* (an expression appar. connected with the later *topsyterry*, now *topsyterry*, *q. v.*). Cf. *terry*, *trife*.] 1. *intrans.* To fall; be thrown down.

And I schal crye rightful kyng,

Ilk man haue as the serue,

The right schul ryse to ryche reynynge,

Truyt and tregret to helle schal terve.

*Holy Rood* (ed. Morris), p. 207.

II. *trans.* 1. To dash down; cast; throw; in composition with *over*, to overthrow; overturn.

*Ouyr* (tyr'yyn) (*ouyr* tyryyn, *K.* ouerturnen, *S. H. ouyrturayn*, *P.* Subverto, evertro. *Prompt. Parv.* (1440), p. 373.

So dred they hym, they durst no thing *ouer terue*

Againe his lawe nor peace.

*J. Hardyng, Chron.* of Eng. (ed. Ellis, 1812), p. 47.

The lawe and peace he keppe, and conserved,  
Which hym ypheld, that he was *never ouer terued*.

*J. Hardyng, Chron.* of Eng. (ed. Ellis, 1812), p. 75.

2. To turn down or back; roll or fold over.

**tervee**, *v.* See *terry*.

**tervy** (tér'vi), *v. i.* [*Also tervec, turvec, tarvy*. Cf. *terve*.] To struggle; kick or tumble about; as to get free. *Hallwell*. [*Prov. Eng.*]

**teryt**, *a.* A Middle-English spelling of *teary*.

**terza-rima** (tér'sä-ré'mä), *n.* [*It. terza rima*: *terza*, fem. of *terzo*, third; *rima*, rime: see *terce* and *rime*.] A form of verse in iambic rhythm used by the early Italian poets. In it the lines consist of ten or eleven syllables, and are arranged in sets of three that are closely connected. The middle line of the first tercet rhymes with the first and third lines of the second tercet, the middle line of the second tercet rhymes with the first and third lines of the third tercet, and so on. At the end of the poem or canto there is an extra line which has the same rime as the middle line of the preceding tercet. In this form of verse Dante's "Divina Commedia" is written. The most conspicuous example of its use in English literature is Byron's "Prophecy of Dante."

**terzetto** (tér-tset-ò), *n.* [*It.* < *terzo*, third: see *terce*.] In *music*, a composition for three voices; a vocal trio.

**tesa** (tè'zä), *n.* See *teesa*.

**teschenite** (tesh'en-it), *n.* [*< Teschen*, a town in Austrian Silesia, + *-ite*.] The name given by Hohenegger to certain eruptive rocks intercalated and intrusive in the Cretaceous on the borders of Silesia and Moravia, and which have been the subject of discussion among geologists since 1821. Tschermak described them in 1866, and considered them as belonging to two quite different groups, one of which included rocks identical with or analogous to the picrites, while for the other he adopted Hohenegger's name. The latter group (the teschenites of Tschermak) have again been divided by Rosenbusch, who refers a part of them to the diabases, while the other portion is considered by him to have been originally essentially a mixture of plagioclase and nephelin, but now greatly altered, and accompanied by various accessory constituents. Rocks of somewhat similar character have been described from various other regions, as from the Caucasus and Portugal, and have been supposed to consist in part of nephelin. The question of the composition of the teschenites still remains obscure, since one of the latest investigators (Rohrbach) maintains that none of the rocks described under that name contains nephelin.

**tesho-lama** (tesh'ò-lä'mä), *n.* [*Tibetan*.] One of the two lama-popes of the Buddhists of Tibet and Mongolia, each of whom is supreme in his own district, the other being the dala-lama, who, though nominally his equal, is really the more powerful. Also called *bogdo-lama*. See *dala-lama*.

**Tesia** (tè'si-ä), *n.* [*NL.* (Hodgson, 1837), from a Nepaulese name.] A generic name under which Hodgson originally, and after him other writers, described several small wren-like birds of India, later determined to represent different genera and conventionally referred to the *Timeliidæ*. Hodgson in 1841 proposed to replace the name *Tesia* by *Anura*, which, however, being preoccupied, was by him in 1845 changed to *Procygna*; and at the same time he proposed a new generic name *Oligura* for some of the birds he had before called *Tesia*. The result is that (a) some authors discard *Tesia*, and separate its species into the two genera *Procygna* and *Oligura*, while (b) most authors use *Tesia* for the species of *Oligura*, and put there the other birds which had been called *Tesia*. The species of *Tesia* in sense (b) are 3 in number—*T. castaneicoronata*,

*T. cyaneiventris*, and *T. superciliosa*; they belong to the eastern Himalayan region and southward. Compare the figure here given with that under *Procygna*.

*Tesia cyaneiventris* (Hodgson, 1837)

**tessarace** (tes-sä-rä'se), *n.* [*< Gr. tessares*, four, + *aké*, a point.] A tetrahedral summit.

**tessaradecad** (tes-sä-rä-dek-ad), *n.* [*< Gr. tessares*, four (see *four*), + *deka*, ten (see *ten*), the number ten; see *decad*.] A group of fourteen individuals; an aggregate of fourteen. *Farrar*.

**tessarescadecahedron** (tes-sä-res-è-dek-a-hè-dron), *n.* [*LGr. tessarescadecahedron*, < *Gr. tessarescadeka*, fourteen (see *fourteen*), + *èdron*, base or face of a polyhedron.] A solid having fourteen faces. The cuboctahedron, the truncated octahedron, and the truncated cube are examples of such bodies. See *Archimedean solid*, under *Archimedean*.

**Tessaria** (tè-sä'ri-ä), *n.* [*NL.* (Ruiz and Pavon, 1794), named after L. Tessari, professor

**test**<sup>3</sup> (tes't, *v.* [*F. tester* = Sp. Pg. *testar* = It. *testare*, < L. *testari*, bear witness, testify, < *testis*, one who attests, a witness: see *test*<sup>2</sup>, *n.*]) *I. trans.* In law, to attest and date: as, a writing duly *tested*.

*II. intrans.* To make a will or testament. [*Old Eng. and Scotch.*]

A wife has power to *test* without the consent of her husband. *Bell.*

**testa** (tes'tā, *n.*; pl. *testae* (-tē). [*L.*: see *test*<sup>2</sup>]) 1. In *zool.*, a test.—2. In *bot.*, the outer integument or coat of a seed: it is usually hard and brittle, whence the name, which answers to *seed-shell*. See *seed*, 1. Also *test*, *spermoderm*, and *epispirm*.—3. [*cap.*] A name of the star Vega.

**testable** (tes'tā-b'l, *a.* [*< OF. testable* = It. *testabile*, < L. *testabilis*, that has a right to testify, < *testari*, testify: see *test*<sup>3</sup>, *v.*]) 1. That may be tested.—2. In *law*: (*a*) Capable of being devised or given by will or testament. (*b*) Capable of witnessing or of being witnessed.

**Testacea** (tes-tā'sē-ā, *n.* pl. [*N.L.*, neut. pl. of *L. testaceus*, consisting of tiles, covered with a shell: see *testaceous*]) A group of testaceous animals: variously used. (*a*) The third order of *Feruss* in the Linnean system, including the testaceous mollusks or shellfish. (*b*) An order of accephalous mollusks in the Cuvierian system, distinguished from the *Nudator* ascidians, which Cuvier treated as mollusks; the bivalves otherwise called *Conchiformia*. (*c*) A suborder of thecomatous pteropods, including all having calcareous shells. (*d*) In *Pr. legum*, those conchiform pteropods which secrete a testa or shell, through perforations of which pseudopodia protrude. *Arceutha* and *Diploria* are well-known representative genera.

**testacean** (tes'tā'sē-ān, *a.* and *n.* [*< L. testaceus* + *-an*]) 1. *A.* Having a test or shell; belonging to any group of animals called *Testacea*.

*II. n.* A member of the *Testacea*, in any sense. **Testacella** (tes'tā-sel'ā, *n.* [*N.L.* (Lamarck, 1801), dim. of *L. testaceus*, consisting of tiles: see *Testacea*]) The typical genus of *Testacellidae*, having the shell very small.

**Testacellidae** (tes'tā-sel'i-dē, *n.* pl. [*N.L.*, < *Testacella* + *-idae*]) A family of geophilous pulmonate gastropods, typified by the genus *Testacella*. They are without a jaw, with the radular teeth elongated, acuminate, and more or less pen-like but curved, and with the shell small and incapable of inclosing the soft parts. It is a small family of chiefly Eurasiatic carnivorous species, which feed upon worms and slugs. They are sometimes called *burrowing slugs*.

*Testacella* (mollusk, a shell)

**testaceography** (tes-tā'sē-og'ra-fī, *n.* [*< Testacea* + Gr. *-γραφία*, < *γράφω*, write]) The description of or a treatise on testaceous animals, as mollusks; descriptive testaceology.

**testaceology** (tes-tā'sē-ol'ō-jī, *n.* [*< Testacea* + Gr. *-λογία*, < *λέγω*, speak: see *-ology*]) The science of testaceous mollusks; conchology; malacology.

**testaceous** (tes-tā'shi-us, *a.* [= *F. testacé* = Sp. Pg. It. *testaceo*, < L. *testaceus*, consisting of tiles or sherds, having a shell, < *testa*, tile, shell: see *test*<sup>2</sup>]) 1. Of or pertaining to shells, or testacean animals, as shell-fish; testacean.—2. Consisting of a hard continuous shell or shelly substance; shelly: thus, an oyster-shell is *testaceous*.—3. Having a hard shell, as oysters, clams, and snails: distinguished from *crustaceous*, or soft-shelled, as a lobster or crab.—4. Derived or prepared from shells of mollusks or crustaceans: as, a *testaceous* medicine; a pearl is of *testaceous* origin.—5. In *bot.* and *zool.*, dull-red brick-color; brownish-yellow, or orange-yellow with much gray.

**testacy** (tes'tā-sī, *n.* [*< testa* (te) + *-cy*]) In *law*, the state of being testate, or of leaving a valid testament or will at death.

**testacyet**, *a.* [*< L. testaceus*: see *testaceous*]) Testaceous.

Nowe yote on that sayment clept *testacye*  
Sey fynger thicke, and yerdes is noo synne  
To all to flappe it with.

*Palladius*, *Husbandrie* (E. E. T. S.), p. 156.

**testā**, *n.* Plural of *testa*.

**testament** (tes'tā-mēt), *n.* [*< ME. testament*, < OF. (and F.) *testament* = Pr. *testament* = Sp. Pg. It. *testamento* = i. Dan. Sw. *testament*, < L. *testamentum*, the publication of a will, a will, testament, in *LL.* one of the divisions of the Bible (an incorrect translation, first in Tertullian, of Gr. *διαθήκη*, a covenant (applied in this sense to the two divisions of the Bible), also, in another use, a will, testament), < *testari*, be a witness, testify, attest, make a will: see *test*<sup>3</sup>, *v.*]) 1. In *law*, a will; a disposition of property or rights, to take effect at death. Originally will,

in English law, signified such a disposition of real property, *testament* such a disposition of personal property. *Will* now includes both, and *testament* is rarely used in modern law, except in the now tautological phrase *last will and testament*.

"Fare well," quath the frere, "for y mot hethen fonden [go hence],  
And hyen to an houswife that hath vs bequethen  
Ten pounds in hir *testament*."

*Piers Plowman's Creed* (E. E. T. S.), l. 410.

The succession of the crown, it was contended, had been limited, by repeated *testaments* of their princes, to male heirs.

*Prescott*, *Ferd.* and *Isa.*, ll. 4.

2. A disposition of the rights of two parties, defining their mutual relation, and the rights conceded by one to the other; a covenant, especially between God and his people. Hence—3. (*a*) A dispensation: used especially of the Mosaic or old dispensation and of the Christian or new. (*b*) [*cap.*] A collection of books containing the history and doctrines of each of these dispensations, and known severally as the *Old Testament* and the *New Testament*. The word *testament* in the authorized version of the Bible always represents the Greek word *διαθήκη* (elsewhere rendered 'covenant'), which in early Christian Latin and regularly in the Vulgate is rendered 'testamentum,' perhaps from its use in Heb. ix. 15–20. In this passage the idea of a covenant as involving in ancient times a sacrifice with shedding of blood is blended with that of a last will made operative by the death of the testator. In Mat. xxvi. 28 and parallel passages the phrase "blood of the new testament" is connected with the cup in the Lord's Supper. In 2 Cor. iii. 14 the expression "reading of the old testament" shows the transition of meaning to our application of the title *Old Testament* to the Hebrew Scriptures. (Compare 1 Mac. i. 57.) When used alone the word commonly means a copy of the New Testament: as, a gift of Bibles and Testaments.

She having innocently learn'd the way

Thro' both the serious Testaments to play.

*J. Beaumont*, *Psyche*, l. 70.

In its pre-Christian stage the religion of revelation is represented as a covenant between the spiritual God and His chosen people the Hebrews. In accordance with this, and in allusion to Jer. xxxi. 31, Jesus speaks of the new dispensation founded in His death as a new covenant (1 Cor. xi. 25). Hence, as early as the 2d century of our era, the two great divisions of the Bible were known as the books of the Old and of the New Covenant respectively. Among Latin-speaking Christians the Greek word for covenant was often incorrectly rendered *testamentum*, and thus Western Christendom still uses the names of the Old and New Testaments. *Encyc. Brit.*, III. 634.

**Derogatory clause in a testament.** See *clause*. **Infamous testament.** See *infamous*.—**Mancipatory testament**, a kind of testament allowed by the early Roman law, and continued in use till the middle ages in the form of a public and irrevocable conveyance of the testator's estates, rights, privileges, and duties: also called the *testament with copper and scales*, from the formality of producing a scale for the uncoined copper money of ancient Rome. *Maine*.—**Military testament.** See *military*.—**Pretorian testament**, a will allowed by the Pretorian edicts, by which legacies could be made, and the transfer could be directed to be kept secret till death. *Maine*.

**testamentary** (tes'tā-men'tā-ri), *a.* [*< LL. testamentarius*, of or pertaining to a will, < L. *testamentum*, a will: see *testament*]) Relating to or of the nature of a testament or will; testamentary.

The testamentary cup I take,

And thus remember thee.

*Montgomery*, According to thy gracious word.

**testamentarily** (tes'tā-men'tā-ri-li), *adv.* By testament or will.

The children . . . were turned out testamentarily.

*R. D. Blackmore*, *Cripps the Carrier*, i.

**testamentary** (tes'tā-men'tā-ri), *a.* [= *F. testamentaire* = Sp. Pg. It. *testamentario*, < L. *testamentarius*, of or belonging to a will, < *testamentum*, a will: see *testament*]) 1. Relating or pertaining to a will or wills; also, relating to administration of the estates of deceased persons.

He is in the mater as souverain juge and ordinaire principale under the Pope in a cause *testamentarie*, and also by cause the will of my said Lord is aproved in his court before his predecessour. *Paston Letters*, I. 373.

This spiritual jurisdiction of *testamentary* causes is a peculiar constitution of this island; for in almost all other (even in popish) countries all matters *testamentary* are under the jurisdiction of the civil magistrate.

*Blackstone*, *Comm.*, III. vii.

2. Given or bequeathed by will.

How many *testamentary* charities have been defeated by the negligence or fraud of executors! *Ep. Atterbury*.

3. Set forth or contained in a will.

To see whether the portrait of their ancestor still keeps its place upon the wall, in compliance with his *testamentary* directions. *Hutchinson*, *Seven Gables*, xviii.

4. Done or appointed by, or founded on, a last will or testament: as, *testamentary* guardians (that is, guardians appointed by testament or will).—**Letters testamentary.** See *letter*.

**testamentate** (tes'tā-men'tāt), *v. i.* [*< testamentum* + *-ate*]) To make a will or testament.

**testamentation** (tes'tā-men-tā'shōn), *n.* [*< testamentum* + *-ation*]) The act or power of giving by will. [*Rare.*]

By this law the right of *testamentation* is taken away, which the inferior tenures had always enjoyed.

*Burke*, *Tracts on the Popery Laws*, ii.

**testamentize** (tes'tā-men-tīz), *v. i.* [*< testamentum* + *-ize*]) To make a will or testament.

He [Leoline, bishop of St. Asaph] asked leave of King Edward the First to make a will. . . because Welch bishops in that age might not *testamentize* without royal assent.

*Fuller*, *Worthies*, *Denbighshire*, III. 532.

**testamur** (tes-tā'mēr), *n.* [*So called from the opening word, L. testamur, we certify, 1st pers. pl. pres. ind. of testari, testify, certify: see test*<sup>3</sup>, *v.*]) A certificate given to an English university student, certifying that he has successfully passed a certain examination.

Outside in the quadrangle collect by twos and threes the friends of the victims waiting for the re-opening of the door, and the distribution of the *testamurs*. These *testamurs*, lady readers will be pleased to understand, are certificates under the hands of the examiners, that your sons, brothers, husbands, perhaps, have successfully undergone the torture. *T. Hughes*, *Tom Brown at Oxford*, II. i.

Before presenting himself for this Examination, every Candidate must show to the Professor of Music either his *Testamur* for Responsum or . . .

*Oxford University Calendar*, 1890, p. 72.

**testate** (tes'tāt), *a.* and *n.* [*< L. testatus*, pp. of *testari*, bear witness, declare, make a last will: see *test*<sup>3</sup>, *v.*]) 1. *A.* Having made and left a valid will or testament.

Persons dying *testate* and intestate. *Ayliffe*, *Parergon*.

*II. n.* 1. In *law*, one who has made a will or testament; one who dies leaving a will or testament in force.—2. Witness; testimony.

But thanks to violate an oath no sin,

Though calling *testates* all the Stygian gods?

*Heywood*, *Jupiter and Io* (Works, ed. Pearson, 1874, VI. 278).

**testation** (tes-tā'shōn), *n.* [= Sp. *testacion* = It. *testazione*, < L. *testatio* (n), < *testari*, pp. *testatus*, make a will: see *testate*.] 1. A witnessing; a bearing witness; witness.

How clear a *testation* have the inspired prophets of God given of old to this truth!

*Ep. Hall*, *Satan's Fiery Darts Quenched*.

2. A giving by will.

In those parts of India in which the collective holding of property has not decayed as much as it has done in Lower Bengal, the liberty of *testation* claimed would clearly be foreign to the indigenous system of the country.

*Maine*, *Village Communities*, p. 41.

**testator** (tes-tā'tor), *n.* [= *F. testateur* = Sp. Pg. *testador* = It. *testatore*, < L. *testator*, one who makes a will, *LL.* also one who bears witness, < *testari*, bear witness, make a will: see *testate*, *test*<sup>3</sup>.] One who makes a will or testament; one who has made a will or testament and dies leaving it in force.

**testatrix** (tes-tā'triks), *n.* [= *F. testatrice* = It. *testatrice*, < *LL. testatrix*, fem. of *L. testator*, one who makes a will: see *testator*.] A woman who makes a will or testament; a woman who has made a will or testament and dies leaving it in force.

**testatum** (tes-tā'tum), *n.* [*L.*, neut. of *testatus*, pp. of *testari*, make a will: see *testate*.] One of the clauses of an English deed, including a statement of the consideration money and the receipt thereof, and the operative words of transfer. Also called the *witnessing* or *operative clause*.

**test-box** (tes't'box), *n.* In *telegr.*, a box containing terminals to which telegraph-wires are connected for convenience of testing.

**teste** (tes'tē), *n.* [*So called from the first word in the clause, "Teste A. B. . . " "A. B. being witness": teste*, abl. of *testis*, a witness: see *test*<sup>3</sup>.] In *law*, the witnessing clause of a writ or other precept, which expresses the date of its issue. *Wharton*. See *writ*. The word is also in general use, in connection with the name of a person or a treatise, to indicate that such person or treatise is the authority for a statement made.

**tester**<sup>1</sup> (tes'tēr), *n.* [*< testari* + *-er*]) 1. One who tests, tries, assays, or proves.—2. Any instrument or apparatus used in testing: as, a steam-gage *tester*; a vacuum-*tester*.

**tester**<sup>2</sup> (tes'tēr), *n.* [*Early mod. E.* also *testar*, *testor*; < ME. *tester*, *testor*, *testor*, a head-piece, helmet, tester for a bed; OF. *testier*, a head-piece, the crown of a hat, etc.; F. *titier* = Pr. *testiera* = Sp. *testera* = Pg. *testera* = It. *testiera*, a head-piece, < L. *testa*, a shell, *ML.* the skull, head: see *test*<sup>2</sup>.] 1. A canopy.

He th' Azure *Tester* trimm'd with golden marks.

And richly spangled with bright glistring sparks.

*Sylvestre*, tr. of *Du Bartas's Weeks*, i. 4.

Specifically—(*a*) The frame which connects the tops of the posts in a four-post bedstead, and the material stretched upon it, the whole forming a sort of canopy.

Beddes, *testars*, and pillowes besemeth nat the halle.

*Sir T. Elyot*, *The Governour*, i. 1.

Thou shalt put into the ark the *testimony* which I shall give thee. *Ex. xxx. 16.*

**Immediate, indirect, mediate testimony.** See the *adjectives*. Perpetuation of testimony. See *perpetuation*. Tables of the testimony. See *table*.—**Testimony of disownment**, an official document issued by the monthly meeting of the Society of Friends to announce the expulsion of a member of the meeting.—*Syn. 2.* Deposition, attestation.—*1, 2, and 4. Prout, etc. See evidence.*

**testimony** (tes'ti-mō-ni), *v. t.* [*< testimony, n.*]

To witness.

Let him be but *testimonied* in his own bringings-forth, and he shall appear to the envious a scholar, a statesman, and a soldier. *Shak., M. for M., iii. 2. 153.*

**testiness** (tes'ti-nes), *n.* The state or character of being testy; irascibility; petulance.

Macrobios saith there is much difference betwixt ire and *testiness*: because ire growth of an occasion, and *testiness* of evil condition. *Guevara, Letters (tr. by Hellowes, 1577), p. 114.*

**testing-box** (tes'ting-boks), *n.* Same as *test-box*.

**testing-clause** (tes'ting-klāz), *n.* In *Scots law*, the clause in a formal written deed or instrument by which it is authenticated according to the forms of law. It is essentially a statement of the name and designation of the writer, the number of pages in the deed, the names and designations of the witnesses, the name and designation of the person who penned the deed, and the date and place of signing.

**testing-gage** (tes'ting-gāj), *n.* A gage for ascertaining pressure, as of gas in a soda-water bottle, etc. *E. H. Knight.*

**testing-hole** (tes'ting-hōl), *n.* In the steel-cementation process, same as *tap-hole (c).*

**testing-slab** (tes'ting-slab), *n.* A plate of white glazed porcelain having cup-shaped depressions, for the examination of liquids which give colored precipitates.

**testis** (tes'tis), *n.*; pl. *testes* (-tēz). [*L.*] **1.** A testicle.—**2.** Some rounded formation likened to a testicle: as, the *testes* of the brain.—**Aberrant duct of the testis.** See *aberrant*.—**Mediastinum testis.** See *mediastinum*.—**Pia mater testis.** Same as *tunica vasculosa*.—**Testis cerebri** (the testicle of the brain), the postopticus; one of the posterior pair of the optic lobes or corpora quadrigemina. See *quadrigemini*, *2.*

**Testis muliebris**, a woman's testicle—that is, the ovary. *Galen.*

**test-meal** (tes't-mēl), *n.* A meal of definite quantity and quality given with a view to examining the contents of the stomach at a later hour, and thus determining the normal or abnormal condition of the gastric functions.

**test-meter** (tes't-mē'tēr), *n.* An apparatus for testing the consumption of gas by burners.

**test-mixer** (tes't-mik'sēr), *n.* A tall cylindrical bottle of clear glass, with a wide foot and a stopper. It is graduated from the bottom up into equal parts, and is used for the preparation and dilution of test-alkalis, test-acids, etc. *E. H. Knight.*

**testo** (tes'tō), *n.* [*It.* = *E. text.*] In *music*, same as (a) *theme* or *subject*, or as (b) *text* or *libretto*.

**test-object** (tes't-ob'jekt), *n.* In *micros.*, a minute object, generally organic, whereby the excellence of an objective, more particularly as to defining and resolving power, may be tested, only superior objectives being capable of showing such objects, or of enabling their markings or peculiar structure to be clearly seen. The muscular fibers of the *Mammalia*, parts of the eye of fishes, scales of the wings of insects, and the shells or frustules of the *Diatomaceæ* are very generally employed. See *test-plate*.

**teston** (tes'ton), *n.* [*< OF. (and F.) Sp. teston* (= *It. testone*), a coin, so called from having the figure of a head, *< teste*, head: see *test*<sup>2</sup>. Cf. *tester*<sup>3</sup>.] **1.** A silver coin of Louis XII. of France.—**2.** A name given both officially and popularly to the shilling coined by Henry VIII., from its resemblance in appearance and value to the French coin. The value of the coin was reduced later to sixpence. Also *testoon*.

Threepence; and here's a *teston*; yet take all.

*Middleton, Blurt, Master-Constable, ii. 2.*

The book he had it out of cost him a *teston* at least.

*B. Jonson, Every Man in his Humour, iv. 1.*

**testone** (tes'tō-ne), *n.* [*< It. testone*: see *teston*.] A silver coin worth about 1s. 4d. (32 United States cents), formerly current in Italy.

**testoon**, *n.* Same as *teston*. *Cotgrave.*

**testorn** (tes'torn), *n.* Same as *tester*<sup>3</sup>.

**test-paper** (tes't-pā'pēr), *n.* **1.** In *chem.*, a paper impregnated with a chemical reagent, as litmus, and used for detecting the presence of certain substances, which cause a reaction and a change in the color of the paper.—**2.** In *law*, a document allowed to be used in a court of justice as a standard of comparison for determining a question of handwriting. [*U. S.*]

**test-plate** (tes't-plāt), *n.* **1.** A glass plate with a band, or usually a series of bands, of very finely ruled lines, used in testing the resolving power of microscopic objectives, particularly of high powers. The best known are those ruled by Nobert (hence called *Nobert's plates*); one of these, the 19-band plate, has a series of 19 bands, ruled at rates varying from 11,300 to 112,000 lines to the inch. The finest band of another plate is ruled at the rate of about 200,000 lines to the inch. Moller's test-plate has a series of 20 or more test diatom-frustules with very fine striations, in some cases running up to nearly 100,000 per inch.

**2.** In *ceram.*, a piece of pottery upon which the vitrifiable colors are tried before being used on the pieces to be decorated, usually a plate with the different colors painted on its rim.

**test-pump** (tes't-pump), *n.* A force-pump used for testing the strength or tightness of metal cylinders, etc. It has a pressure-gage attached to its discharge-pipe, means for connecting the latter with the pipe, etc., to be tested, a check-valve or cock for preventing regurgitation through the discharge-pipe, and generally also a cistern of moderate capacity for holding a supply of water for the pump-barrel, in which latter works a solid plunger operated by a hand-lever. The pump is supplied with lifting-handles or with wheels for moving it easily about to any position in a shop.

**testrill** (tes'tril), *n.* Same as *tester*<sup>3</sup>.

*Sir Toby.* Come on; there is sixpence for you; let's have a song.

*Sir Andrew.* There's a *testrill* of me, too.

*Shak., T. N., ii. 3. 34.*

**test-ring** (tes't-ring), *n.* See *test*<sup>1</sup>.

**test-spoon** (tes't-spōn), *n.* A small spoon with a spatula-shaped handle, used for taking up small portions of flux, powder, etc., as in chemical experiments. *E. H. Knight.*

**test-tube** (tes't-tüb), *n.* **1.** A cylinder of thin glass closed at one end, used in testing liquids.

—**2.** A chlorometer.—

**Test-tube culture.** See *culture*.

**test-types** (tes't-tips), *n.*

pl. Letters or words printed in type of different sizes, used to determine the acuteness of vision.

**testudinal** (tes-tū'di-nāl), *a.* [*< L. testudo* (-din-), a tortoise (see *testudo*), + *-al*.] Pertaining to or resembling a tortoise.

**Testudinaria** (tes-tū-di-nā'ri-ä), *n.* [*NL. (Salisbury, 1824), < L. testudo* (-din-), a tortoise, + *-aria*.] A genus of monocotyledonous plants, of the order *Dioscoreaceæ*. It is distinguished from *Dioscorea* by its downwardly winged seeds and its large hemispherical tessellated tuber or rootstock, which is either fleshy and solid or woody, and rises above the ground, forming a globular mass sometimes 4 feet in diameter, its outer woody or corky substance becoming cracked into large angular protuberances resembling the shell of a tortoise. (See *tortoise-plant*.) The 2 species are natives of South Africa. They are lofty climbers with slender twining stems, alternate leaves, and small racemose flowers, which are dioecious and spreading or broadly bell-shaped, with a three-celled ovary becoming in fruit a three-winged capsule. They are known as *elephant's-foot* and as *Hottentot's-bread*.

**testudinarius** (tes-tū-di-nā'ri-us), *a.* Resembling tortoise-shell in color; mottled with red, yellow, and black, like tortoise-shell.

**Testudinata** (tes-tū-di-nā'tä), *n. pl.* [*NL. (Opepel, 1811), neut. pl. of L. testudinatus*: see *testudinate*.] **1.** An order of *Reptilia*, having toothless jaws fashioned like the beak of a bird, two pairs of limbs fitted for walking or swimming, and the body incased in a bony box or leathery shell, consisting of a carapace and a plastron, to the formation of which the ribs and

All the cranial bones are united by sutures, excepting the articulation of the lower jaw. The pelvis consists as usual of ilium, ischium, and pubis, but it has a peculiar shape, and is generally discrete from the sacrum. The penis is single and intraclacal, and the anus is a longitudinal cleft. Also called *Chelonina*. See also cuts under *Aspidonectes*, *carapace*, *Chelonina*, *Chelonidæ*, *leatherback*, *plastron*, *Pleurospindylia*, *Pycnia*, *slider*, *terrapin*, and *Testudo*, *4.*

**2.** In a restricted sense, one of three suborders of *Chelonina*, contrasted with *Athecæ* and *Trionychoidæ*, and containing the whole of the order excepting the *Sphargididæ* and the *Trionychidæ*. **testudinate** (tes-tū'di-nāt), *a. and n.* [*< L. testudinatus*, *< testudo* (-din-), a tortoise: see *testudo*.] **1. a. 1.** Resembling the carapace of a tortoise; arched; vaulted; fornicated. Also *testudinated*. —**2.** Of or pertaining to the *Testudinata*; chelonian.

**II. n.** One of the *Testudinata* or *Chelonina*.

**testudinated** (tes-tū'di-nā-ted), *a.* [*< testudinate* + *-ed*<sup>2</sup>.] Same as *testudinate*, *1.*

**testudineal** (tes-tū-din'ē-äl), *a.* [*< testudineous* + *-al*.] Same as *testudinal*.

**testudineous** (tes-tū-din'ē-us), *a.* [*< L. testudineus*, of or pertaining to a tortoise or tortoise-shell, *< testudo* (-din-), a tortoise: see *testudo*.] Resembling the carapace of a tortoise.

**Testudinidæ** (tes-tū-din'i-dē), *n. pl.* [*NL. < Testudo* (-din-) + *-idæ*.] A family of cryptodirous tortoises, named from the genus *Testudo*, containing numerous genera, both fossil and recent, the latter found in all temperate and tropical regions except the Australian. The plastron has the typical number of nine bones, the carapace has epidermal scutes, the nuchal bone is without a costiform process, and the caudal vertebrae are procoelous. It has been by far the largest family of the order, including several genera usually put in other families, but is now often restricted to land-tortoises with high, arched, and vaulted carapace and short clubbed feet. *Chersidæ* is a synonym. See cuts under *pyxis* and *Testudo*, *4.*

**testudo** (tes-tū'dō), *n.*; pl. *testudines* (-di-nēz). [*L.*, a tortoise-shell, a defensive cover so called, *< testa*, a shell, etc.: see *test*<sup>2</sup>.] **1.** Among the ancient Romans, a defensive cover or screen which a body of troops formed by overlapping

above their heads their oblong shields when in close array. This cover somewhat resembled the back of a tortoise, and served to shelter the men from missiles thrown from above. The name was also given to a structure movable on wheels or rollers for protecting sappers. Formerly also called *snail*.

**2.** A shelter similar in shape and design to the above, employed as a defense by miners and others when working in ground or rock which is liable to cave in.—**3.** In *med.*, an encysted tumor, which has been supposed to resemble the shell of a turtle. Also called *talpa*.—**4. [*cap.*] [*NL.*] In *herpet.*, the typical genus of *Testudinidæ*, of widely varying limits with different authors, and much confused with *Cistudo*. It now contains such tortoises as *T. græca* of Europe and some others. See cut on following page, also that under *Testudinata*.**

**5.** In *anat.*, the fornix: more fully called *testudo cerebri*. See *cerebrum*.—**6.** In *anc. music*, a species of lyre: so called in allusion to the lyre of Mercury, fabled to have been made of the shell of the sea-tortoise. The name was also extended in medieval music to the lute.

Testudo elephant-pus, one of the Testudinata.

dorsal vertebrae are specially modified; the turtles and tortoises. The carapace is usually covered with hard horny epidermal plates called *tortoise-shell*. There is no true sternum, its place being taken by a number of bones, typically nine, which compose the plastron, or under shell. The dorsal vertebrae are immovably fixed.

longing to the *Tetrabranchiata*, or having their characters.

**II. n.** A cephalopod of the order *Tetrabranchiata*, as an ammonite or a pearly nautilus.

**Tetrabranchiata** (tet-ra-brang-ki-sa'ti), *n. pl.* [NL., neut. pl. of *tetrabranchiatus*; see *tetrabranchiate*.] An order of *Cephalopoda*, named by Owen from the two pairs of gill-plumes, or etymological branchiate. The nephridia are also two pairs; two vesicary cardiac orifices open upon the exterior; and the oviducts and spermatiducts are paired, but the left is rudimentary. There are many sheathed circumoral tentacles, not bearing suckers, two hollow eyes, two olfactory organs, no ink-bag, and a large many-chambered shell, straight or coiled. The order has included both ammonoid and nautilus forms, but has also been restricted to the latter. They abounded in former times, as is shown by the immense number and variety of fossils, but are now nearly extinct, being represented by the pearly nautilus only. See also cut under *nautilus*.

*Pearly Nautilus. Nautilus pompilius.*  
C, heart; l, liver; k, kidney; p, pancreas; br, branchiate; gn, gill; r, radial; ann, annular; ov, ovary; gal, gall; sph, siphon; ch, chamber.

**tetrabranchiate** (tet-ra-brang-ki-at), *a. and n.* [NL., *tetrabranchiatus*, < Gr. *τετρα-*, four, + *βράγχια*, gills.] Same as *tetrabranch*.

**tetracarous** (tet-ra-kam'a-rus), *a.* [< Gr. *τετρα-*, four, + *καρπία*, a vault.] In *bot.*, having four closed carpels.

**tetracarpellary** (tet-ra-kir'pe-lä-ri), *a.* [< Gr. *τετρα-*, four, + NL. *carpellum*, carpel, + *-ary*.] In *bot.*, having four carpels.

**Tetracaulodon** (tet-ra-kä'lō-don), *n.* [NL. (Godman), < Gr. *τετρα-*, four, + *καύλον*, stem, + *δόντις*, tooth.] A genus of mastodonts. See *Mastodontidae*.

**Tetracera** (te-tras'e-rä), *n.* [NL. (Linnaeus, 1737), so called from the four horn-like carpels of the original species; < Gr. *τετρα-*, four, + *κέρας*, horn.] A genus of polypetalous plants, of the order *Dilleniaceae* and tribe *Delinieae*. It is characterized by flowers in terminal panicles, each usually with five spreading sepals, as many petals, numerous stamens, and three to five acuminate carpels, usually shining, coriaceous and foliaceous in fruit, and containing one to five seeds surrounded by a lacerate aril. There are about 36 species, widely scattered through the tropics. They are shrubby climbers, or rarely trees, smooth or rough-hairy, with parallel feather-veined leaves and the panicles mostly yellow and loosely many-flowered. Several species are sometimes cultivated as greenhouse climbers; several are used as astringents, as the decoction of *T. oblongata* in Brazil, and in Cayenne the infusion of *T. tinctoria* the tignara, or red creeper. *T. alba*, the water-tree of Sierra Leone, is so named from the clear water obtained by cutting its climbing stems.

**Tetraceras** (te-tras'e-ras), *n.* [NL. (Hamilton Smith, 1827), also *Tetracerus*, *Tetracerus*, < Gr. *τετρακερας*, four-horned, < *τετρα-*, four, + *κέρας*, horn.] A genus of four-horned *Boridæ*, as *T. quadricornis*, an Indian antelope. The female is hornless. See cut under *ramie-deer*.

**Tetracerata** (tet-ra-ser'a-ti), *n. pl.* [NL., pl. of *tetracerata*; see *Tetracerata*.] One of two families of De Blainville's (1825) polybranchiate *Paracephalophora*, consisting of various genera, not all of which were properly grouped together. They are mostly nudibranchiate or notobranchiate gastropods. The family is contrasted with *Dicercata*. Also *Tetracera*.

**tetracerous** (te-tras'e-rus), *a.* [< Gr. *τετρακερας*, four-horned, < *τετρα-*, four, + *κέρας*, horn.] In *conch.*, having four horns or feelers, as a snail.

**Tetracha** (tet-ra-kä), *n.* [NL. (Hope, 1838), < Gr. *τετραχα*, in four parts, < *τετρα-*, four.] A notable genus of tiger-beetles, of the family *Cicindelidae*, comprising about 50 species, mainly South American and West Indian, a few, however, inhabiting Australia, North America, southern Europe, and northern Africa. They have the hind coxae contiguous, the eyes large and prominent, and the third joint of the maxillary palpi longer than the fourth. *T. carolina* and *T. virginica*, two large handsome metallic beetles, are found in the United States; the latter is crepuscular, and both are noted enemies of certain injurious larvae. See cut under *tiger-beetle*.

**tetrachænium** (tet-ra-kä-ni-um), *n.* [NL. *tetrachænium* (L.).] Also *tetrachænium*; < Gr. *τετρα-*, four, + *χάινω*, open.] In *bot.*, a fruit formed by the separating of a single ovary into four nuts, as in the *Labiatae*. *Henslow*. [Rare.]

**Tetrachætæ** (tet-ra-kä'tê), *n. pl.* [NL., pl. of *tetrachætus*; see *tetrachætous*.] A division of brachycerous *Diptera*, containing those flies which are tetrachætous: correlated with *Dichætæ* and *Hæchætæ*.

**tetrachætous** (tet-ra-kä'tus), *a.* [< Gr. *τετρα-*, four, + *χάινω*, open; see *chætæ*.] Having the haustellum composed of four (not of two or six) pieces, as a fly; or of pertaining to that division of brachycerous dipterous insects whose haustellum is of this character: correlated with *dichætous* and *hæchætous*. See cuts under *Syrphus* and *Milesia*.

**tetrachirus** (tet-ra-kir'rus), *n. pl. tetrachiri* (-ri). [NL., < Gr. *τετραχίρ*, four-handed, < *τετρα-*, four, + *χίρ*, hand.] In *teratol.*, a monster with four hands.

**tetrachord** (tet-ra-körd), *n.* [= F. *tétracorde*, < Gr. *τετραχορδ*, having four strings, < *τετρα-*, four, + *χορδή*, a string, chord; see *chord*.] In *music*: (a) An instrument with four strings.—(b) The interval of a perfect fourth. (c) A diatonic series of four tones, the first and last of which are separated by a perfect fourth.

The tetrachord was the unit of analysis in ancient music, like the hexachord in early medieval music, or the octave in modern music. It is asserted that originally the term was applied to a series consisting of a given tone, its octave, its fourth, and a tone a fourth below the octave (as, E, E', A, B); but in its usual form it was a diatonic series. Three varieties were recognized, differing in the position of the semitone. The *Dorian* tetrachord had the semitone at the bottom, the *Phrygian* in the middle, and the *Lydian* at the top, thus:

Dorian,	
Phrygian,	
Lydian,	

Of these the *Dorian* was regarded as the chief or standard. Scales were made up by adding tetrachords together. When successive tetrachords had a tone in common, they were called *conjunct*; when they were separated by a whole step, *disjunct* (thus, E-A, A-D would represent the former, and E-A, B-E' the latter). Octave-scales were made up of two disjunct tetrachords, the separating interval being called the *diatessaron* tone. (See *model 7* (a).) The completed system of tones finally adopted by the Greeks embraced a total compass of two octaves, extending upward from a tone probably nearly equivalent to the second A below middle C, as tones are now named. The various tones of this system were distributed among five tetrachords, and named accordingly, as follows:

a, note hyperborean; b, paraneite hyperborean; c, trite hyperborean; d, note diezeugmenon; e, paraneite diezeugmenon; f, trite diezeugmenon; g, paraneite diezeugmenon; h, note synemmenon; i, paraneite synemmenon; j, trite synemmenon; k, note meson; l, paraneite meson; m, trite meson; n, note hypaton; o, paraneite hypaton; p, trite hypaton; q, note psithyrion; r, paraneite psithyrion; s, trite psithyrion. The terms *hyperborean*, *diezeugmenon*, *synemmenon*, *meson*, and *psithyrion* are really genitives plural, but are sometimes loosely used as names of the tetrachords.

It should further be noted that the Greeks recognized two other varieties of tetrachords—the *chromatic*, consisting of two semitones and a minor third, and the *enharmonic*, consisting of two quarter-tones and a major third. The tetrachord is more or less recognized in modern music, the major scale being conceived of as made up of two disjunct *Lydian* tetrachords, and the minor scale of two disjunct tetrachords, the lower *Phrygian*, and the upper either *Dorian* (in the descending minor) or *Lydian* (in the ascending).

**tetrachordal** (tet-ra-kör-dal), *a.* [< *tetrachord* + *-al*.] In *music*, pertaining to a tetrachord, or consisting of tetrachords: as, the *tetrachordal* musical theory of the Greeks.—**Tetrachordal system**, a name applied to one of the early forms of the tonic sol-fa system of teaching music.

**tetrachordon** (tet-ra-kör'don), *n.* [NL.: see *tetrachord*.] A musical instrument in which, while it has strings and a keyboard, like the pianoforte, the tones are produced from the strings by pressing them, by means of the digitals, against a revolving cylinder of india-rubber covered with rosin. Compare *harmonichord*, *harpy-gurdy*, and *keyed violin* (under *keyed*).

**tetrachotomous** (tet-ra-kot'6-mus), *a.* [< Gr. *τετραχότος*, in four parts (< *τετρα-*, four, + *χότος*, cut), < *τετρα-*, four, + *χότος*, cut.] In *zool.* and *bot.*, doubly dichotomous; arranged in four ranks or rows; quadrifarious; divided into four parts, or into sets of four; quadripartite.

**tetrachronous** (tet-trak'rō-nus), *a.* [< Gr. *τετραχρονος*, of four times, < *τετρα-*, four, + *χρονος*, time.] In *anc. pros.*, having a magnitude of four primary or fundamental times; tetrasemic.

**tetracladine** (tet-ra-klad'in), *a.* [< Gr. *τετρα-*, four, + E. *cladine*.] Cladose, or branching into

a number of variously shaped processes, as a caltrop or sponge-spicule of the tetraxon type. *Encyc. Brit.*, XXII, 417.

**tetracladose** (tet-ra-klä'dos), *a.* [< Gr. *τετρα-*, four, + E. *cladose*.] Same as *tetracladine*.

**tetracoccus** (tet-ra-kek'us), *a.* [< Gr. *τετρα-*, four, + *κόκος*, berry.] In *bot.*, having four seeds or carpels. See cut under *coccos*.

**tetracolic** (tet-ra-kō'lik), *a.* [< *tetracol* (on) + *-ic*.] In *anc. pros.*, consisting of four cola or series.

**tetracolon** (tet-ra-kō'lon), *n.* [NL., pl. *tetracola* (-lä).] [NL., < Gr. *τετρακόλον*, neut. of *τετρακόλος*, < *τετρα-*, four, + *κόλον*, a limb, a member; see *colon*.] In *anc. rhet.* and *pros.*, a period consisting of four cola.

**Tetracoralia** (tet-ra-kō-räl'ä), *n. pl.* [NL., < Gr. *τετρα-*, four, + *κόραλλον*, coral.] A division of corals, corresponding to the *Rugosa*.

**tetracoraline** (tet-ra-kō-rä-lin), *a.* [< *Tetracoralia* + *-ine*.] Of or pertaining to the *Tetracoralia*; rugose, as a stone-coral. See *Cyathaxoniidae*.

**tetract** (tet'rakt), *a.* [< Gr. *τετρα-*, four, + *ἀκτίς*, a ray, beam.] Having four rays, as a sponge-spicule; quadriradiate. See cut under *sponge-spicule*.

**tetractinal** (te-trak'ti-näl), *a.* [< *tetractine* + *-al*.] Having four rays, as a sponge-spicule.

**tetractine** (te-trak'tin), *a.* [As *tetract* + *-ine*.] Having four rays, or being quadriradiate, as a sponge-spicule.

**tetractinellid** (te-trak-ti-nel'id), *a. and n.* **I. a.** Pertaining to the *Tetractinellida*, or having their characters.

**II. n.** A member of the *Tetractinellida*.

**Tetractinellida** (te-trak-ti-nel'i-dä), *n. pl.* [NL., < Gr. *τετρα-*, four, + *ἀκτίς* (*ἀκτις*), ray, + *-ella* + *-ida*; see *tetract*.] In Sollas's classification of sponges, the second tribe of *Silicispongiæ*, contrasted with *Monaxonida*, including those *Demospongiæ* which possess quadriradiate or triene spicules or lithistid scleres. It includes the great majority of existing sponges, and is divided into *Choriada* and *Lithistida*.

**tetractinellidan** (te-trak-ti-nel'i-dan), *a.* [< *Tetractinellida* + *-an*.] Same as *tetractinellid*.

**tetractinelline** (te-trak-ti-nel'in), *a.* [< *Tetractinellida* + *-ine*.] Same as *tetractinellid*.

**tetractomy** (te-trak'tō-mi), *n.* [Properly *\*tetractotomy* (cf. *dichotomy*, *tetrachotomous*).] < Gr. *τετραχμία*, in four parts, + *-τομία*, a cutting, < *τεμνω*, *ταμνω*, cut.] A division into four parts.

The one key to St. Paul's meaning is the principle that, besides body and soul—which make up man's natural being—regenerated man possesses spirit, the principle of supernatural life. This has been somewhat unfairly called Bull's theory, and accused of making up a *tetractomy*—body, soul, spirit, and Holy Spirit.

*Speaker's Commentary*, 1 Thes. v. 23.

**tetracyclic** (tet-ra-sik'lik), *a.* [< Gr. *τετρα-*, four, + *κύκλος*, ring.] In *bot.*, having four circles or whorls of floral organs: said of flowers.

**tetrad** (tet'rad), *n.* [< Gr. *τετρας* (*-ας*).] **1.** The number four, < *τετρα-*, four; see *tetra-*. **2.** The number four; also, a collection of four things. Also *quadrad*.—**3.** In *chem.*, an atom the equivalence of which is four, or an element one atom of which is equivalent, in saturating power, to four atoms of hydrogen.—**4.** In *morphology*, a quaternary unit of organization resulting from individuation or integration of an aggregate of triads. See *triad*, *dyad*.

**tetradactyl**, **tetradactyle** (tet-ra-dak'til), *a. and n.* [< Gr. *τετραδάκτυλος*, having four fingers or toes, < *τετρα-*, four, + *δάκτυλος*, a finger, toe; see *dactyl*.] **I. a.** Having four fingers or toes; quadridigitate: noting either (a) the fore feet or the hind feet of a quadruped, or (b) a four-toed bird, or (c) a quadruped only (when four-toed before and behind).

**II. n.** A four-toed animal.

**tetradactylity** (tet-ra-dak'til'i-ti), *n.* [< *tetradactyl* + *-ity*.] Tetradactyl character or state. *Nature*, XLIII, 329.

**tetradactylous** (tet-ra-dak'til-i-us), *a.* [< *tetradactyl* + *-ous*.] Same as *tetradactyl*.

**tetrad-deme** (tet-rad-dém), *n.* A colony or aggregate of undifferentiated tetrads. See *triad-deme*, *dyad-deme*. *Encyc. Brit.*, XVI, 843.

**tetradecapod** (tet-ra-dek'ä-pod), *a. and n.* [< Gr. *τετρα-*, four, + *δεκά*, ten, + *ποδ* (*ποδος*) = E. *foot*.] **I. a.** Having fourteen feet; of or pertaining to the *Tetradecapoda*.

**II. n.** A member of the *Tetradecapoda*.

**Tetradecapoda** (tet-ra-de-kap'6-dä), *n. pl.* [NL.: see *tetradecapod*.] Fourteen-footed crustaceans; an order of *Crustacea* corresponding

one who has married four times, < Gr. *tetra-*, four, + *gamos*, marriage. Cf. *digamy*.) A fourth marriage; marriage for the fourth time. [Rare.]

**tetradimorphous** (tet-ra-dim'or-fus), *a.* [*tetra-*, four, + *dimorphous*, having two forms.] Having two forms.

**tetradymite** (tet-ra-dim'it), *n.* [*tetra-*, four, + *dimite*, from *dimos*, common.] A mineral.

**tetradymous** (tet-ra-dim'us), *a.* [*tetra-*, four, + *dimous*, from *dimos*, common.] Having four forms.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

one who has married four times, < Gr. *tetra-*, four, + *gamos*, marriage. Cf. *digamy*.) A fourth marriage; marriage for the fourth time. [Rare.]

**tetradimorphous** (tet-ra-dim'or-fus), *a.* [*tetra-*, four, + *dimorphous*, having two forms.] Having two forms.

**tetradymite** (tet-ra-dim'it), *n.* [*tetra-*, four, + *dimite*, from *dimos*, common.] A mineral.

**tetradymous** (tet-ra-dim'us), *a.* [*tetra-*, four, + *dimous*, from *dimos*, common.] Having four forms.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetradynomus** (tet-ra-din'om-us), *n.* [*tetra-*, four, + *dynamus*, power.] A genus of insects.

**tetragonous** (te-trag'ō-nus), *a.* [*tetragon* + *-ous*.] Same as *tetragonal*.

**tetragram** (tet-ra-gra'm), *n.* [*tetra-*, four, + *gram*, a word of four letters (not found in the sense of 'a figure of four lines'), < *tetpa-*, four, + *gamma*, a line, letter: see *gram*.] 1. A word of four letters.—2. In *geom.*, a figure formed by four right lines.

**Tetragrammaton** (tet-ra-gra'm'a-ton), *n.* [*tetra-*, four, + *gramma*, a word of four letters, < *tetpa-*, four, + *gamma*, a line, letter: see *gram*.] A complex of four letters: applied to the mystic name *Jehovah* (see *Jehovah*) as written with four Hebrew letters, and sometimes transferred to other similar combinations.

When God the Father was pleased to pour forth all his glories, and imprint them upon his holy Son in his exaltation, it was by giving him his holy name, the *Tetragrammaton*, or *Jehovah* made articulate.

*Jer. Taylor, Works* (ed. 1835), I, 744.

It follows from all this that the true representative of the *Tetragrammaton* is the name itself, whether the form preferred be *Jahveh*, or the venerable and euphonious *Jehovah*. *Nineteenth Century*, XX, 47.

**tetragyn** (tet-ra-jin'), *n.* [*tetra-*, four, + *gynē*, a female (in mod. bot. a pistil).] In bot., a hermaphrodite plant having four pistils; a plant of the order *Tetragynae*.

**Tetragynia** (tet-ra-jin'i-ā), *n. pl.* [NL.: see *tetragyn*.] An order of plants in several of the classes in the Linnean system, comprehending those plants which have four pistils, as the holly.

**tetragynian** (tet-ra-jin'i-an), *a.* [*tetragyn* + *-ian*.] In bot., having the characters of the *Tetragynia*; tetragynous.

**tetragynous** (te-tra-jin'i-nus), *a.* [*tetragyn* + *-ous*.] Having a gynoecium of four carpels.

**tetrahedral** (tet-ra-hē'dral), *a.* [Also *tetraëdral*; < *tetrahedron* + *-al*.] 1. Pertaining to a tetrahedron.—2. In *crystal.*: (a) Having the form of the regular tetrahedron. (b) Pertaining or relating to a tetrahedron, or to the system of forms to which the tetrahedron belongs: as, *tetrahedral hemihedrism* (see *hemihedrism*).—**Tetrahedral angle**, in *geom.*, a solid angle bounded or inclosed by four plane angles. **Tetrahedral coordinates**. See *coordinate*.—**Tetrahedral garnet**, *helvite*: so called because, while related to garnet in composition, it occurs in tetrahedral crystals.—**Tetrahedral group**. See *group*.

**tetrahedrally** (tet-ra-hē'dral-i), *adv.* In a tetrahedral form. Also *tetraëdrally*.

**tetrahedrite** (tet-ra-hē'drit), *n.* [Also *tetrahedron* + *-ite*.] A mineral often occurring in tetrahedral crystals (whence the name), also massive, of an iron-black color and brilliant metallic luster. It is essentially a sulphid of copper and antimony, but the antimony may be replaced by arsenic or less frequently by bismuth, and the copper may be replaced by silver (in the variety *freibergite*), mercury (in the variety *schwartzite*), also iron, zinc, lead, and in small amounts cobalt and nickel. It is commonly called *Fahlerz* in Germany (whence the English *fahlerz*). It is sometimes an important silver ore.

**tetrahedroid** (tet-ra-hē'droid), *n.* [*tetrahedron* + *-oid*.] A quartic surface the envelop of a quadric surface touching eight given lines; a surface obtained by a homographic transformation of the wave-surface; a Kummer's surface whose sixteen nodes lie in fours upon the faces of a tetrahedron through whose summits the sixteen double planes pass by fours; a quartic surface cut by each of the planes of a tetrahedron in pairs of conics in respect to which the three summits in this plane are conjugate points, and such that one of the points of intersection of the conics (and therefore all) is a node of the surface: so named by Cayley in 1846.

**tetrahedron** (tet-ra-hē'dron), *n.*; *pl.* *tetrahedra*, *tetrahedrons* (-drā, -dronz). [Also *tetraëdron*; = *F. tétraèdre* = *Sp. Pg. tetraedro*, < *Gr. tetra-*, four, + *ēdō*, seat, base.] A solid comprehended under four plane faces; especially, the regular tetrahedron, or triangular pyramid having its base and sides equilateral triangles. In crystallography and in geometry the tetrahedron is regarded as a hemihedral form of the octahedron, four of whose faces form the *plus*, and the four alternate faces (two above and two below) the *minus* tetrahedron. The figures represent the tetrahedron in the position required to exhibit its relation to the octahedron. See *hemihedral*.—**Orthogonal tetrahedron**, a tetrahedron the pairs of whose opposite edges are at right angles—in other words, the planes through these edges and the shortest line between them are at right angles. Such a tetrahedron is dis-

tinguished by having an orthocenter. **Polar tetrahedron**, a tetrahedron the planes of which are the polars of the vertices of another tetrahedron. **Tetrahedron of Mobius**, one of a pair of tetrahedra each inscribed in the other. **Truncated tetrahedron**, a solid formed by cutting off each corner of a tetrahedron by a plane parallel to the opposite face to such an extent as to leave the faces regular hexagons. At the truncated parts there are regular triangles. It is one of the thirteen Archimedean solids.

**tetrahexahedral** (tet-ra-hék-sá-hé'drál), *a.* [*<* *tetrahexahedron* + *-al*.] Having the form of a tetrahexahedron. Also *tetrakisexahedral*.

**tetrahexahedron** (tet-ra-hék-sá-hé'drón), *n.* [*<* *Gr. tetra-, four*, + *ἕξ, six*, + *ῥα, seat, base* (see *hexahedron*).] A solid bounded by twenty-four equal triangular faces, four corresponding to each face of the cube. In crystallography this solid belongs to the isometric system. In geometry the name is especially applied to that variety in which all the adjacent faces are equally inclined to one another. Also called *tetrakisexahedron*, and sometimes *fluorid*, as being a form common with fluor-spar.

**tetrakisexahedron** (tet-ra-kis-hék-sá-hé'drón), *n.* [*<* *Gr. τετράκις, tetráki, four times*, + *E. hexahedron*.] Same as *tetrahexahedron*.

**tetralemma** (tet-ra-lem'á), *n.* [*<* *Gr. tetra-, four*, + *λίμα, a proposition*; see *lemma*.] A dilemma in which four different possibilities are considered.

**tetralogy** (tet-ra-ló-jí), *n.* [= *F. tétalogie*. *<* *Gr. τετραλογία, a group of four dramas*, *<* *tetra-, four*, + *λογία, speech*.] A group of four dramatic compositions, three tragic and one satyric, which were exhibited in connection on the Athenian stage for the prize at the festivals of Bacchus. The term has been extended to a group of four operatic works treating of related themes, and intended to be performed in connection.

**tetralophodont** (tet-ra-lóf'ó-dónt), *n.* [*NL.*, *<* *Gr. τετρα-, four*, + *λόφος, ridge*, + *ὀδών (ὀδώντ-) = E. tooth*.] Having that dentition which is characteristic of the true mastodons, whose molars are four-ridged.

**tetramastigote** (tet-ra-mas'ti-gát), *a.* [*<* *Gr. τετρα-, four*, + *μάστιξ (μάστιγ-) , a whip*, + *-at-*.] Having four flagella, as an infusorian.

**Tetrameles** (te-tram'e-léz), *n.* [*NL.* (Robert Brown, 1826), from its 4-merous flowers; *<* *Gr. τέτρα, four*, + *μέλος, a limb, member*.] A genus of plants, of the order *Datisceae*, characterized by apetalous dioecious flowers, with four calyx-lobes and four elongated stamens or four styles. The only species, *T. nudiflora*, is a native of India, Ceylon, and Java. It is a tall tree—the only tree in an otherwise entirely herbaceous order; it bears broad long-petioled deciduous leaves, preceded by numerous small flowers in long and slender panicle racemes. It is known in India as *jungle-bendy*, and in Java as *veenong-tree*.

**Tetramera** (te-tram'e-rá), *n. pl.* [*NL.*, neut. pl. of *tetramerus*; see *tetrameros*.] In entom.: (a) In Latreille's system, a division of *Coleoptera*, containing those beetles all of whose tarsi are usually or apparently tetrameros or four-jointed. Also called *Cryptopentamera* and *Pseudotetramera*. (b) A prime division of the hymenopterous family *Chalcididae*, comprising six subfamilies in which the tarsi are four-jointed.

**tetrameral** (te-tram'e-rál), *a.* [*<* *tetramerous* + *-al*.] Four-parted; having parts in fours; tetrameros, as a polyp; of or pertaining to the *Tetrameralia*.

**Tetrameralia** (te-tram'e-rá'li-á), *n. pl.* [*NL.*; see *tetrameral*.] The tetrameral polyps, as a subclass of scyphomedusans distinguished from *Octomeralia*, and composed of the three orders *Calycozoa*, *Peromedusae*, and *Cubomedusae*.

**tetramerism** (te-tram'e-rizm), *n.* [*<* *tetramerous* + *-ism*.] In zool. and bot., division into four parts, or the state of being so divided; four-partedness. *Amer. Nat.*, XXII, 941.

**tetrameros** (te-tram'e-rus), *a.* [*<* *NL.* *tetrameros*, *<* *Gr. τετραμερής, four-parted*, *<* *tetra-, four*, + *μέρος, part*.] Consisting of or divided into four parts; characterized by having four parts. Specifically—(a) In bot., having the parts in fours; as, a *tetrameros* flower (that is, one having four members in each of the floral whorls). It is frequently written *4-merous*. (b) In zool.: (1) Four-parted: especially noting an actinozoan having the radiating parts or organs arranged in fours or multiples of four. Compare *hexameros*. (2) In entomology, having four joints, as the tar-

sus of an insect; having four-jointed tarsi, as a beetle or chalcid; of or pertaining to the *Tetramera*. See cuts under *Phyllophaga* and *Tetramera*.

**tetrameter** (te-tram'e-tér), *a. and n.* [*<* *L.L. tetrametrus*, *<* *Gr. τετράμετρος, having four measures*, neut. *τετράμετρον*, a verse of four measures, *<* *tetra-, four*, + *μέτρον, measure*.] **I. a.** Having four measures.

**II. n.** In pros., a verse or period consisting of four measures. A trochaic, iambic, or anapestic tetrameter consists of four dipodies (eight feet). A tetrameter of other rhythms is a tetrapody, or period of four feet. The name is specifically given to the trochaic tetrameter catalectic. An example of the acatalectic tetrameter is

Once upon a midnight dreary, as I pondered weak and weary.

**tetramorph** (tet-ra-môrf), *n.* [*<* *Gr. τετράμορφος, four-shaped, fourfold*, *<* *tetra-, four*, + *μορφή, form*.] In Christian art, the union of the four attributes of the evangelists in one figure, winged, and standing on winged fiery wheels, the wings being covered with eyes. It is the type of unparalleled velocity. *Fairholt*.

**tetrander** (te-tran'dér), *n.* [*<* *Gr. tetra-, four*, + *άνδρ (άνδρ-) , male* (in mod. bot. a stamen).] In bot., a monoclinous or hermaphrodite plant having four stamens.

**Tetrandria** (te-tran'dri-á), *n. pl.* [*NL.*; see *tetrandr*.] The fourth class of plants in the Linnean system, comprehending such as have four stamens. The orders belonging to this class are *Monogynia*, *Digynia*, *Tetragynia*. The teasel, dodder, and pond-weed are examples.

**tetrandrian** (te-tran'dri-an), *a.* [*<* *tetrandr* + *-ian*.] In bot., belonging to the class *Tetrandria*; tetrandrous.

**tetrandrous** (te-tran'drus), *a.* [*<* *tetrandr* + *-ous*.] In bot., having four stamens; characteristic of the class *Tetrandria*.

**tetrant** (tet'ránt), *n.* [*<* *Gr. tetra-, four*, + *-ant*.] A quadrant. *Weale*. [Rare.]

**Tetranychidae** (tet-ra-nik'i-dé), *n. pl.* [*NL.*, *<* *Tetranychus* + *-idae*.] A family of mites, containing those forms known as *spinning-mites*, and founded on the genus *Tetranychus*. In common with the *Trombididae* or harvest-mites, the *Tetranychidae* have an appendiculate terminal palpal joint, but are smaller and more highly colored than the harvest-mites, and are plant-feeders exclusively. Next to *Tetranychus*, *Bryobia* is the most noticeable genus. *B. pratensis* frequently enters houses in the United States in enormous numbers in the fall.

**Tetranychus** (te-tran'i-kus), *n.* [*NL.* (Dufour, 1832), prop. *Tetraonychus*, *<* *Gr. tetra-, four*, + *ώνυχ (ώνυχ-) , claw*.] A very large and widespread genus of spinning-mites, having legs with seven joints, the feet short and curved, and the mouth with a barbed sucking-apparatus. It contains minute yellowish or reddish species, most of which spin more or less of a web on the under side of leaves, and are noted as injurious to vegetation. The so-called *red-spider*, a cosmopolitan hothouse pest, is *T. telarius*.

**Tetrao** (tet'rā-ō), *n.* [*NL.*, *<* *L. tetrao*, *<* *Gr. τετραών, a pheasant*, a grouse.] The leading genus of *Tetraonidae*, formerly including all the grouse, but subsequently variously restricted, now to the capercaillie, *T. urogallus*, and some closely related species. See cut under *capercaillie*.

**tetraodion** (tet-ra-ō'di-on), *n.* [*<* *MGr. τετραώδιον*, *<* *Gr. tetra-, four*, + *ὄδή, ode*.] In the *Gr. Ch.*, a canon of four odes.

**Tetraodon**, **tetraodont**, etc. See *Tetrodon*, etc.

**Tetraogallus** (tet'rā-ō-gal'us), *n.* [*NL.* (J. E. Gray, 1833-4), *<* *L. tetrao*, a grouse, + *gallus, cock*.] A genus of snow-partridges. These birds are near relatives of *Lerva nivicola*, another species of

snow-partridge (see *Lerva*); they are indifferently known as *snow-pheasants*, *snow-cocks*, and *snow-chukars*, one of them being also specified as the *chourka*. This is *T. caspius*; three other species are named—*T. himalayensis*, *T. alpinus*, and *T. tibetanus*. The whole range of the genus is from Asia Minor to western China, but only in mountain-ranges at altitudes up to 18,000 feet. In some respects the genus approaches *Tetraophasis* (which see). The size is large, the males attaining a length of two feet or more; the sexes are nearly alike in plumage, which is of varied dark coloration. The birds frequent open rocky places, generally in flocks, and nest on the ground, laying 6 to 9 eggs of an olive color with reddish spots. Also called *Chourka*.

**tetraonid** (tet'rā-ō-nid), *a. and n.* **I. a.** Of or pertaining to the *Tetraonidae*, or grouse family.

**II. n.** Any grouse, or other member of the *Tetraonidae*.

**Tetraonidae** (tet-rā-on'i-dé), *n. pl.* [*NL.*, *<* *Tetrao* (-n-) + *-idae*.] A family of gallinaceous birds, of the order *Gallinae*, of which the type is the genus *Tetrao*; the grouse family, having the tarsi and nasal fossae more or less completely feathered. The leading genera besides *Tetrao* are *Lyrurus*, *Canace* (or *Dendragapus*), *Falcipennis*, *Lagopus* (*Centrocercus*), *Pedivectes*, *Cupidonia* (or *Tympanuchus*), and *Bonasa*. They are confined to the northern hemisphere, and include, besides the birds usually called *grouse*, the capercaillie, prairie-hen, sage-cock, ptarmigan, and others. The family has been used in a more comprehensive sense, including then an indefinite number of genera of partridges, quails, and similar birds. See cuts under *black-cock*, *Bonasa*, *Canace*, *capercaillie*, *Centrocercus*, *Cupidonia*, *grouse*, *Oreortyx*, *partridge*, *Pedivectes*, and *ptarmigan*.

**Tetraoninae** (tet'rā-ō-nī'né), *n. pl.* [*NL.*, *<* *Tetrao* (-n-), a grouse, + *-inae*.] The grouse family, *Tetraonidae*, rated as a subfamily of gallinaceous birds, or a restricted division of that family in its widest sense.

**tetraonine** (tet'rā-ō-nin), *a.* Of or pertaining to the *Tetraoninae*.

The true Gallinae offer two types of structure, "one of which may be called Galline, and the other *Tetraoninae*." *Encyc. Brit.*, XVIII, 333.

**Tetraonomorpha** (tet'rā-ō-nō-mór'fē), *n. pl.* [*NL.*, *<* *Gr. τετραών, a grouse*, + *μορφή, form*.] In Sundevall's system of ornithological classification, a cohort of *Gallinae*, consisting of the sand-grouse (*Pteroclidæ*) and grouse proper (*Tetraonidae*).

**Tetraonychidae**, **Tetraonychus**. More correct forms of *Tetranychidae*, *Tetranychus*.

**Tetraoperdix** (tet'rā-ō-pér'diks), *n.* [*NL.*, *<* *Gr. τετραών, a grouse*, + *πέρδιξ, a partridge*.] In ornith., same as *Lerva*.

**Tetraophasis** (tet-rā-ō'ā-sis), *n.* [*NL.* (Jules Verreaux, 1870), *<* *Gr. τετραών, a grouse*, + *φάσις, the river Phasis*, with ref. to *φασιανός, pheasant*; see *pheasant*.] A genus of gallinaceous birds peculiar to Tibet, with one species, *T. obscurus*, in some respects intermediate between pheasants and grouse. It is about 20 inches long, and of dark-brown and -gray colors, alike in both sexes.

**tetrapetalous** (tet-ra-pet'a-lus), *a.* [*<* *Gr. tetra-, four*, + *πέταλον, leaf (petal)*.] In bot., having four petals.

**tetrapharmakon** (tet-ra-fär'ma-kon), *n.* [*NL.*, also *tetrapharmacum*; *<* *Gr. τετραφάρμακον, a compound of wax, resin, lard, and pitch*, neut. of *τετραφάρμακος*, compounded of four drugs, *<* *tetra-, four*, + *φάρμακον, drug*; see *pharmacoon*.] An ointment composed of wax, resin, lard, and pitch.

**tetrapharmacum** (tet-ra-fär'ma-kum), *n.* Same as *tetrapharmakon*.

**tetraphony** (tet'rā-fō-ní), *n.* [*<* *Gr. tetra-, four*, + *φωνή, voice*.] In early medieval music, diaphony for four voices.

**Tetraphyllidea** (tet'rā-fī-lid'ē-ā), *n. pl.* [*NL.*, *<* *Gr. tetra-, four*, + *φύλλον, a leaf*.] A division of *Cestodea*, including tapeworms of various fishes, in which the head is furnished with four lobes, suckers, or tentacles, or in any way distinguished by fours into sets of parts or organs. The group includes the genera *Tetrarhynchus*, *Echinobothrium*, and *Acanthobothrium*.

**tetraphyllidean** (tet'rā-fī-lid'ē-ān), *a.* Of or belonging to the *Tetraphyllidea*.

**tetraphyllous** (tet-ra-fīl'us), *a.* [*<* *Gr. tetra-, four*, + *φύλλον, a leaf*.] In bot., four-leaved; consisting of four distinct leaves or leaflets.

**Tetrapla** (tet'rā-plā), *n.* [*<* *Gr. τετραπλή, neut. pl. of τετραπλός, tetraplōs, fourfold*, *<* *tetra-, four*, + *πλός, fold*.] An edition of the Bible in four versions. The name is specially given to a work by Origen, containing the Greek versions of Aquila, Symmachus, and Theodotion and the Septuagint. Compare *Tetrapla*, *Octapla*.

**Tetrapleura** (tet-ra-plō'rā), *n. pl.* [*NL.*, *<* *Gr. tetra-, four*, + *πλευρά, a rib*.] Those organic forms which are tetrapleural; distinguished from *Dipleura*.

Tetrahedron.

Tetrandria. Jussiaea decurrens.

1. *Lamia angustata*; 2, 3. enlarged tarsi. Other *Tetramera*.

Snow-partridge. *Tetraogallus himalayensis*.

τετρα-, four, + *σύνθεσις*, a syllable: see *syllable*.]

A word consisting of four syllables.

**tetrasymmetry** (tet-ra-sim'e-tri), *n.* In *biol.*, that symmetry which may be expressed by tetrameral division into like or equal parts; symmetrical tetramerism, as of some crinoids. *Geol. Jour.*, XLV, ii, 362. [Rare.]

**tetrathecal** (tet-ra-thē'kal), *a.* [*Gr.* τετρα-, four, + *θεός*, case: see *thea*.] In *bot.*, having four loculements or cavities in the ovary.

**tetratheism** (tet'ra-thē-izm), *n.* [*Gr.* τετρα-, four, + *θεός*, god, + *-ism*.] In *theol.*, the doctrine that in the Godhead there are, in addition to the Divine Essence, three persons or individualizations—the Father, the Son, and the Holy Spirit—making in the Godhead three and one instead of three in one.

**tetratheite** (tet'ra-thē-it), *n.* [*Gr.* τετρα-, four, + *θεός*, god, + *-ite*.] One who believes in tetratheism.

**tetrathionic** (tet'ra-thi-on'ik), *a.* [*Gr.* τετρα-, four, + *θεός*, sulphur, + *-ic*.] Containing four atoms of sulphur.—**Tetrathionic acid**, an unstable acid, H<sub>2</sub>S<sub>4</sub>O<sub>6</sub>. It is a colorless odorless acid liquid.

**tetratomic** (tet-ra-tom'ik), *a.* [*Gr.* τετρατομ-, fourfold (< τετρα-, four, + *τομή*, < *τεμνέω*, *tauvē*, cut), + *-ic*.] Same as *tetratomic*.

**tetratone** (tet-ra-tōn), *n.* [*Gr.* τετρατόνος, having four tones or notes, < τετρα-, four, + *τῶνος*, tone.] In *music*, an interval composed of four whole steps or tones—that is, an augmented fifth. Compare *tritone*.

**tetratop** (tet-ra-top), *n.* [*Gr.* τετρα-, four, + *τοπος*, a place.] The four-dimensional angular space enclosed between four straight lines drawn from a point not in the same three-dimensional space.

**tetraxial** (te-trak'si-āl), *a.* [*Gr.* τετρα-, four, + *L. axis*, axis.] Having four axes, as the spicules of some sponges.

**tetraxile** (te-trak'sil), *a.* Same as *tetraxial*.

**tetraxon** (te-trak'son), *a.* and *n.* [*Gr.* τετρα-, four, + *ἄξων*, axis, axle.] **I.** *a.* Having four axes, as a sponge-spicule; tetraxial.

**II.** *n.* A sponge-spicule with four axes.

**tetraxonian** (tet-rak-sō'ni-an), *a.* Same as *tetraxon*. *Amer. Nat.*, XXI, 938.

**Tetraxonida** (tet-rak-sō'nī-dā), *n. pl.* [NL.: see *tetraxon*.] A group of sponges, a suborder of *Chondrospongia* or *Spiculispongia*, characterized by the isolated tetraxial spicules. It contains the lithistids and choristids, in all about 12 families.

**tetric** (tet'rik), *a.* [*OF.* *tetricus* = *Sp.* *tétrico* = *Pg.* *It.* *tétrico*, < *L.* *tétricus*, *tétricus*, harsh, sour, < *tāter*, offensive, foul.] Froward; perverse; harsh; sour; crabbed.

In a thick and cloudy air (saith Lemnius) men are tetric, sad, and peevish. *Burton*, *Anat. of Mel.*, p. 151.

**tetrical** (tet'ri-kal), *a.* [*Gr.* *tetric* + *-al*.] Same as *tetric*.

The entangling perplexities of school-men; the obscure, tetric, and contradictory assertions of Popes. *Rev. T. Adams*, *Works*, I, 92.

**tetricalness** (tet'ri-kal-nes), *n.* The state or quality of being tetric; frowardness; perverseness; crabbedness. *Bp. Gauden*.

**tetricity** (te-tris'i-ti), *n.* [*L.* *tétricitas* (*t*), gravity, seriousness, < *tétricus*, harsh, sour, serious: see *tetric*.] Crabbedness; perverseness; tetricness. *Bailey*, 1731.

**tetricous** (tet'ri-kus), *a.* [*L.* *tétricus*: see *tetric*.] Same as *tetric*. *Bailey*, 1727.

**Tetrodon** (tet'rō-don), *n.* [NL. (Linnaeus, 1766), orig. *Tetraodon* (Linnaeus, 1758); < *Gr.* τετρα-, four, + *ὄδον* (*ōdōn*) = *E.* *tooth*.] **1.** A genus of plectognath fishes, typical of the family *Tetrodontidae*. The species are numerous in warm seas. *T. turgidus* is an abundant blower, puffer, or swell-toad of the Atlantic coast of the United States, attaining a foot in length. See cut under *balloon-fish*.

**2.** [*l. c.*] A fish of this genus or of the family *Tetrodontidae*.

**tetrodont** (tet'rō-dont), *a.* and *n.* [*NL.* *Tetrodon* (*t*).] **I.** *a.* In *ichth.*, having (apparently) four teeth; of or pertaining to the *Tetrodontidae*.

**II.** *n.* Same as *tetrodon*, 2.

Also *tetraodont*.

**Tetrodontidae** (tet'rō-don'ti-dē), *n. pl.* [NL., < *Tetrodon* (*t*) + *-idae*.] A family of plectognath fishes, of which the typical genus is *Tetrodon*; those globe-fishes whose jaws present the appearance of four large front teeth, owing to the presence of a median suture in each jaw. The species figured in the next column in illustration of the family is found on the Atlantic coast of the United States as far north as Cape Cod. Also *Tetraodontidae*. See also cut under *balloon-fish*.

Rabbit fish, or Smooth Puffer (*Lagocephalus laietatus*), a member of the *Tetraodontidae*. (From Report of U. S. Fish Commission.)

**tetryl** (tet'ril), *n.* [*Gr.* τετρα-, four, + *-yl*.] The hypothetical radical C<sub>4</sub>H<sub>9</sub>, the fourth member of the (C<sub>n</sub>H<sub>2n-1</sub>) series: same as *butyl*.

**tetrylamine** (tet'ril-am-in), *n.* [*Gr.* *tetryl* + *amine*.] A colorless transparent liquid, having a strongly ammoniacal and somewhat aromatic odor, and producing dense white fumes with hydrochloric acid; C<sub>4</sub>H<sub>9</sub>NH<sub>2</sub>. It is produced by the action of potash on butyl cyanate. It has basic properties, and forms crystalline salts. Also called *butylamine*.

**tetrylene** (tet'ri-lēn), *n.* [*Gr.* *tetryl* + *-ene*.] Oil-gas (C<sub>4</sub>H<sub>6</sub>); a gaseous hydrocarbon of the olefine series, first obtained by the distillation of oil. See *coal-gas*. Also called *butylene*.

**tetty** (tet'), *n.* [Origin obscure; cf. *tate*.] A plait; a knot.

At ilka tette of her horse's mane

Hung fifty siller bells and nine.

*Thomas the Rhymer* (Child's Ballads, I, 109).

**tetter** (tet'er), *n.* [Formerly also *tettar*; < ME. *teter*, *tetere*, < AS. *teter*, *tetter*; cf. OHG. *zitaroh*, MHG. *ziteroch*, & dial. *zitteroch*, *zitrich* (cf. *G. zittermal*), *tetter*; cf. **tetterwort** (tet'er-wert), *n.* The larger celandine, *Chelidonium majus*, so named from its use in cutaneous diseases; also, in America, sometimes the bloodroot, *Sanguinaria Canadensis*.

**tettiga** (tet'i-gā), *n.* Same as *tettix*, 1.

**Tettiginæ** (tet'i-jī'nē), *n. pl.* [NL., < *Tettix* (*-ig*) + *-inæ*.] A prominent subfamily of short-horned grasshoppers, or *Acridiidae*, containing the forms sometimes known as *grouse-locusts*. They are small species in which the pronotum is lengthened posteriorly into a projection as long as the wings, or longer. They are very active, and are found abundantly in low wet meadows and along watercourses. The principal genera are *Tettix*, *Tettigidea*, and *Batrachedra*. Also, as a family, *Tettigidae*.

**Tettigonia** (tet'i-gō'nī-ā), *n.* [NL. (Linnaeus, 1748), < *Gr.* τέτιγξ (*tētiγξ*), a cicada.] A very large and somewhat loosely characterized genus of leaf-hoppers, typical of the family *Tettigoniidae*. The British Museum catalogue gives 127 species, from all parts of the world—largely, however, from South America.

**tettigonian** (tet'i-gō'nī-an), *n.* [*Gr.* *Tettigonia* + *-an*.] A leaf-hopper of the genus *Tettigonia* or some related genus.

**Tettigoniidae** (tet'i-gō'nī-i-dē), *n. pl.* [NL., < *Tettigonia* + *-idae*.] A large and important family of leaf-hoppers, typified by the genus *Tettigonia*. They are small to medium-sized forms with long bodies, an expanded face, bristle-shaped antennæ placed in a cavity beneath the rim of the vertex, and ocelli upon the vertex. It is a wide-spread group, occurring most abundantly in tropical regions. Species of *Proconia* and *Diedro-*

## Teuthididae

*cephala* injure crops in the United States, and members of the former genus secrete large quantities of very liquid honeydew, producing the phenomena of so-called "weeping trees." Also *Tettigoniidae*, *Tettigoniidae*.

**tettix** (tet'iks), *n.* [*Gr.* τέτιγξ, a cicada.] **1.** A cicada.—**2.** [*cap.*] [NL.] A genus of *Acridiidae*, or short-horned grasshoppers, typical of the subfamily *Tettiginæ*, and having the pronotum horizontal and the antennæ thirteen- or fourteen-jointed. Nine species are known in the United States.

**tetty** (tet'i), *a.* [Cf. *tettish*, *teatish*.] Techy; peevish; irritable.

If they lose, though it be but a trifle, . . . they are so choleric and tetty that no man may speak with them.

*Burton*, *Anat. of Mel.*, p. 119.

**teuch**, **tough** (tūch), *a.* A dialectal (Scotch) form of *tough*.

Unco thick in the soles, as ye may weel mind, forbye being tough in the upper-leather.

*Scott*, *Old Mortality*, xlviii.

**teuchit** (tūch'it), *n.* [An imitative name. Cf. *pewit* and *teuhit*.] The lapwing, *Vanellus cristatus*; the pewit. [*Scotch*.]

**Teucrian** (tū'kri-an), *a.* and *n.* [*L.* *Teucris*, *Teucris* (see def.), + *-an*.] **I.** *a.* Relating to the ancient Trojans (Teucri) or to the Troad.

**II.** *n.* One of the Teucri; one of the inhabitants of ancient Teucris, or the Troad; a Trojan.

**Teucrum** (tū'kri-um), *n.* [NL. (Rivinus, 1690; earlier in Matthioli, 1554), < *L.* *teucrion*, < *Gr.* *τεύκριον*, germander, spleenwort; appar. connected with *τεύκρος*, Teucer, and so said to have been used medicinally by Teucer, first king of Troy.] A genus of gamopetalous plants, of the order *Labiata* and tribe *Agajoidæ*. It is characterized by flowers with a short corolla-tube, a prominent lower lip, the other lobes small and inconspicuous, and the four stamens far exerted from a posterior fissure. It includes almost 100 species, scattered over many temperate and warm regions, especially near the Mediterranean. They are herbs or shrubs of varied habit; the leaves are either entire, toothed, or cut, and the flowers are in axillary clusters, or terminal spikes, racemes, or heads. The species are known in general as *germander* (which see, and compare *poly*, and *herb mastic*, under *herb*). England and the United States contain each 4 different species, of which *T. Canadense*, the common American germander, of low open ground and fence-rows from Canada to Texas and Mexico, bears an erect spike of rather conspicuous reddish-purple flowers. *T. Cubense*, widely distributed from the West Indies, Texas, and California to Buenos Ayres, represents the section of the genus with small solitary flowers in the axils of incised or multifid leaves. The other American species are western or southwestern. Many species were once highly esteemed in medicine, but are now discarded; especially the three following, which are widely dispersed through Europe and Asia: *T. Chamaedrys*, the wall-germander, once used for rheumatism and as a febrifuge; *T. Scordium*, the water-germander, a creeping marsh-plant with the odor of garlic when bruised, once used as an antiseptic, etc.; and *T. Scorodonia*, the wood-, garlic-, or mountain-sage, a very bitter plant resembling hops in taste and odor. (See cut under *Didymamia*, and compare *ambrose* and *scordium*.) Many other species have a pleasant fragrance. *T. Marum*, the cat-thyme, is in use for its scent, and is remarkable as a sternutatory. *T. corymbosum* of Australia is there known as *licorice*. *T. betonicum*, the Madeira betony, with loose spikes of fragrant crimson flowers, and several other species from Madeira, are handsome greenhouse shrubs. *T. fruticosum*, the tree-germander of Spain, and *T. racemosum*, a dwarf evergreen of Australia, are also occasionally cultivated, and many annual species are showy border-plants.

Upper Part of the Flowering Stem of American Germander (*Teucrium Canadense*), a flower.

**tough** (tūch), *a.* See *teuch*.

**Teut.** An abbreviation of *Teutonic*.

**Teuthidæ** (tū'thi-dē), *n. pl.* [NL., < *Teuthis* + *-idæ*.] **1.** In *conch.*, a family of decaceros cephalopods, named from the genus *Teuthis*; synonymous with *Loliginidæ*.—**2.** In *ichth.*, same as *Teuthididae*. *De Kay*, 1842.

**teuthidan** (tū'thi-dan), *a.* and *n.* [*Gr.* *Teuthis* + *-an*.] **I.** *a.* Of or pertaining to the *Teuthidæ*.

**II.** *n.* A member of the *Teuthidæ*.

*Chaucer*, *Prolog. to Parson's Tale*, l. 56.

**Textual commentary.** See *commentary*, 1.

II.† *n.* One versed in texts; a textualist.

Wherefore they were called Karaim, that is Bible-men, or *Textuals*, and in the Roman tongue they call them Saduces. *Purphas*, *Pilgrimage*, p. 143.

**textualism** (teks'tū-al-izm), *n.* [*< textual + -ism.*] Strict adherence to the text.

**textualist** (teks'tū-al-ist), *n.* [*< textual + -ist.*] 1. One who is well versed in the Scriptures, and can readily quote texts.

How nimble *textualists* and grammarians for the tongue the Rabbins are, their comments can witness.

*Lightfoot*, *Miscellanies*, vi.

2. One who adheres strictly to the letter of texts.

**textually** (teks'tū-al-i), *adv.* In or as regards the text; according to the text.

A copy in some parts *textually* exact.

*Lowell*, *Among my Books*, 2d ser., p. 30.

**textuary** (teks'tū-ā-ri), *a.* and *n.* [*< L. textus*, + *-ary*.] *I. a.* 1. Of or pertaining to the text; textual.

He extends the exclusion unto twenty days, which in the *textuary* sense is fully accomplished in one.

*Sir T. Browne*, *Vulg. Err.*, iii. 16.

2†. Having the authority or importance of a text; that ranks as a text, or takes chief place; regarded as authoritative, or as an authority.

I see no ground why his reason should be *textuary* to ours, or that God intended him an universal headship. *Glanville*.

Some who have had the honour to be *textuary* in divinity are of opinion that it shall be the same specific fire with ours. *Sir T. Browne*, *Religio Medici*, l. 50.

II. *n.*; pl. *textuaries* (-riz). 1. A textualist; one who adheres strictly to the text.—2†. An expounder or critic of texts; a textual expositor or critic.

In Luke xvi. 17, 18, . . . this clause against abrogating is inserted immediately before the sentence against divorce, as if it were called thither on purpose to defend the equity of this particular law against the foreseen rashness of common *textuaries*. *Milton*, *Tetrachordon*.

The greatest wits have been the best *textuaries*.

*Swift*, *To a young Poet*.

**textuel†**, *a.* A Middle English form of *textual*. **textuist†** (teks'tū-ist), *n.* [*< L. textus*, text, + *-ist*.] One who adheres too strictly to the letter of texts; a textualist.

When I remember the little that our Saviour could prevail about this doctrine of charity against the crabbed *textuists* of his time, I make no wonder.

*Milton*, *Divorce*, *To the Parliament*.

**Textularia** (teks-tū-lā'ri-ā), *n.* [NL. (D'Orbigny, 1826), *< L. \*textula*, dim. of *textus*, text, + *-aria*.] The typical genus of the family *Textulariidae*.

**textularian** (teks-tū-lā'ri-an), *a.* and *n.* [*< Textularia + -an*.] *I. a.* Belonging to or having the characters of *Textularia* in a broad sense; textularidean. *W. B. Carpenter*, *Micros.*, § 458.

II. *n.* A textularian foraminifer.

**Textulariidea** (teks'tū-lā-ri-dē-ā), *n. pl.* [NL., *< Textularia + -id-ēā*.] The *Textulariidae* advanced to the rank of an order, and divided into *Textularina*, *Buliminina*, and *Cassidulinina*.

**textularidean** (teks'tū-lā-ri-dē-an), *a.* and *n.* [*< Textulariidea + -an*.] *I. a.* Textularian in a broad sense; of or pertaining to the *Textulariidea*.

II. *n.* A textularian in a broad sense.

**Textulariidae** (teks'tū-lā-ri-dē-ā), *n. pl.* [NL., *< Textularia + -id-ēā*.] A family of perforate foraminifers, typified by the genus *Textularia*. The test is arenaceous or hyaline, with or without a perforate calcareous basis, and the chambers are normally arranged in two or more alternating series, or spiral and labyrinthine. Dimorphic and trimorphic forms may also be found.

**textural** (teks'tūr-al), *a.* [*< texture + -al*.] Of or relating to texture: as, *textural* differences between rocks.

It may be the result of congestion or inflammation of the nerve, . . . or of other *textural* changes.

*Quain*, *Med. Dict.*, p. 52.

**Textural anatomy.** See *anatomy*.

**texture** (teks'tūr), *n.* [*< F. texture* = Pr. *texura*, *texura* = Sp. Pg. *textura* = It. *testura*, *< L. textura*, a weaving, web, texture, structure, *< texere*, pp. *textus*, weave: see *text*.] 1†. The art or process of weaving.

God made them . . . coats of skin, which, though a natural habit unto all before the invention of *texture*, was something more unto Adam.

*Sir T. Browne*, *Vulg. Err.*, v. 25.

2. Anything produced by weaving; a woven or textile fabric of any sort; a web.

His high throne, which, under state  
Of richest *texture* spread, at the upper end  
Was placed in regal lustre. *Milton*, *P. L.*, x. 446.

Others, apart far in the grassy dale,  
. . . their humble *texture* weave.

*Thomson*, *Spring*, l. 641.

3. The peculiar or characteristic disposition of the threads, strands, or the like which make up a textile fabric: as, cloth of loose *texture*.—

4. By extension, the peculiar disposition of the constituent parts of any body—its make, consistence, etc.; structure in general.

In the next place, it seems to be pretty well agreed that there is something also in the original frame or *texture* of every man's mind which, independently of all exterior and subsequently intervening circumstances, and even of his radical frame of body, makes him liable to be differently affected by the same exciting causes from what another man would be.

*Bentham*, *Introd. to Morals and Legislation*, vi. 29.

The mind must have the pressure of incumbent duties, or it will grow lax and spongy in *texture* for want of it.

*O. W. Holmes*, *Old Vol. of Life*, p. 231.

When scenes are detached from the *texture* of a play, each scene inevitably loses something of the effect which, in the dramatist's conception, belonged to it as part of "a single action." *Classical Rev.*, II. 248.

5. In *biol.*, a tissue; the character or mode of formation of tissues.—6. In the *fine arts*, the surface quality of animate or inanimate objects, natural or artificial, which expresses to the eye the disposition and arrangement of their component tissues.—**Cavernous texture.** See *cavernous*.—**Texture of rocks.** the mode of aggregation of the mineral substances of which rocks are composed. It relates to the arrangement of their parts viewed on a smaller scale than that of their structure. The texture of rocks may be compact, earthy, granular, scaly, etc. See *structure*.

**texture** (teks'tūr), *v. t.*; pret. and pp. *textured*, ppr. *texturing*. [*< texture, n.*] To form a texture of or with; interweave. [Rare.]

**textureless** (teks'tūr-less), *a.* [*< texture + -less*.] Having no discernible structure; amorphous: as, a *textureless* membrane.

**textury†** (teks'tū-ri), *a.* [*< texture + -y1*.] Same as *texture*, 1.

**textus** (teks'tus), *n.* [*< L. textus*, text: see *text*.] 1. The text of any book, especially of the Bible or of a part of it: as, the *Textus Receptus* (see phrase below).—2†. A book containing the liturgical gospels.

The book of the gospels, or *textus*, had, in general, a binding of solid gold, studded with gems, and especially pearls, and was used for being kissed; the other, the gospel-book, which served for reading out of, was often as richly adorned.

*Rock*, *Church of our Fathers*, III. ii. 192.

**Textus Receptus**, the received text of the Greek Testament. Strictly speaking, this name belongs to the Elzevir edition of 1633, to which the printers had prefixed the statement "*Textum ergo habes nunc ab omnibus receptum*." (You have now therefore the text received by all). This text is founded chiefly upon Erasmus's editions. The name is, however, loosely applied to any similar text, such as that on which the authorized version of the New Testament is based. The *Textus Receptus* represents Greek manuscripts of late date.

**textus-case** (teks'tus-kās), *n.* A case for a textus, or book of the gospels: usually a decorative case of the middle ages, or older, as of stamped leather, silver, or silver-gilt.

**text-writer** (tekst'wī-ter), *n.* 1†. One who, before the invention of printing, copied books for sale. *Encyc. Dict.*—2. A writer of text-books and compends: as, a legal *text-writer*.

The notion that the extraordinary harshness of the Hindoo *text-writers* to widows is of sacerdotal origin.

*Maine*, *Village Communities*, p. 54.

**teylet†**, *n.* See *tilet†*.

**teyl-tree** (til'trē), *n.* Same as *teil-tree*. See *teil*.

**teynet†**, *n.* A Middle English variant of *tain*.

**teyntet†**, *n.* An occasional Middle English form of *tent†*.

**th.** A common English digraph. See *T†*.

**Th.** 1. An abbreviation of *Thursday*.—2. In *chem.*, the symbol for *thorium*.

**-th1**. [*< ME. -th, -t, -eth, < AS. -th, -t, etc.*, of various origin: see etymologies of words containing this formation.] A suffix used in forming abstract nouns from adjectives or verbs, as in *health* from *whole* or *heal*, *stealth* from *steal*, *filth* from *foul*, *tillth* from *till*, *growth* from *grow*, *truth*, *troth*, from *true* or *trow*, *drouth* from *dry*, *highth* from *high*, etc. It is little used as a modern formative, the more recent examples, like *blowth*, *spilth*, being chiefly poetical. The words in which it occurs are mostly old, and accordingly often differ somewhat, in their modern form, from the modern form of the original adjective or verb, as *filth* from *foul*, *drouth* from *dry*, etc. In many cases the relation of the noun in *-th* to its original verb is more remote, and is to be explained by the history of the particular word, as in *death* from the original form of *die*, *ruth* from *rue*, etc. In certain positions the *-th* becomes *-t*, and sometimes *-d*. Some modern forms in *-t* coexist with forms in *-th*, as *drought*, *height*, beside the now archaic *drouth*, *highth*; and in some *-t* has replaced the earlier *-th*, as in *sight*. In many nouns *-th* is of other, and often obscure, origin, as in *north*, *south*, *both*, etc.

**-th2**. [*Also -eth*; *< ME. -th, -eth, -the, -ethe, < AS. -tha, -the (-o-tha), etc.*, = *L. -tus* = Gr. *-τος*, etc.; an adj. formative (orig. identical with the superl. suffix *-t*, in *-est*), used to form ordinal from cardinal numerals: see the etymologies of the ordinals concerned.] A suffix (*-eth* after a vowel) used in forming ordinal from cardinal numerals, as in *fourth*, *fifth*, *sixth*, etc., *twentieth*, *thirtieth*, *hundredth*, *thousandth*, *millionth*, etc. It appears as *-d* in *third*, and was formerly *-t* in *fift*, *sixt*, etc., now *fifth*, *sixth*, etc. In *first* the suffix is the superlative *-st*. In *eighth*, pronounced as if spelled *\*eightth*, the radical *t* is anomalously omitted in spelling.

**-th3**. [*< ME. -th, -eth, < AS. -eth, -ath, -iath* = D. *-t* = G. *-t*, etc.] A suffix (in older form *-eth*) used in forming the third person singular (and in Middle English all persons plural) of the pres-

A. Agassiz, *Three Cruises of the Blake*, I. vii.

**thalassography** (thal-a-sog'ra-fi), *n.* [*Gr.* *thalassos*, the sea; *graphein*, to write.] The science of the ocean; oceanography; that branch of physical geography which has to do with the phenomena of the ocean.

The need of some simple word to express the science which treats of oceanic basins has led to the construction of this term [*thalassography*].

A. Agassiz, *Three Cruises of the Blake*, I. i.

**thalassometer** (thal-a-som'e-tér), *n.* [*Gr.* *thalassa*, the sea, + *metron*, measure.] A tide-gage.

**Thalassophila** (thal-a-sof'i-lä), *n. pl.* [NL., neut. pl. of *Thalassophilus*; see *thalassophilous*.]

A suborder or other group of pulmonate gastropods, living on sea-shores or in salt-marshes, as the *Siphonariidae* and *Amphibolidae*.

**thalassophilous** (thal-a-sof'i-lus), *a.* [*Gr.* *thalassa*, the sea, + *philein*, love.] Fond of the sea; inhabiting the sea; specifically noting the *Thalassophila*.

**thale-cress** (thäl'kres), *n.* [*Gr.* *thalē* (abbr. *Thalia*); see def., so called from a German physician *Thal* or *Thaliss*, + *cress*.] The mouse-ear cress, *Sisymbrium Thaliana*, a low slender herb of the northern Old World, naturalized in the United States.

**Thaleichthys** (thal-ē-ik'this), *n.* [NL. (Girard, 1859), *Gr.* *thalēia*, blooming, + *ichthys*, a fish.] A genus of argentinoid fishes, related to the smelts and caplins. *T. pacificus* is the candle-fish or eulachon. See cut under *candle-fish*, I.

**thaler** (tä'lér), *n.* [*G.* *thaler*, a dollar; see *dollar*.] A large silver coin current in various German states from the sixteenth century.

The thaler of the present German empire is equivalent to three marks, and is worth about 38. English (72 cents).

**Thalessa** (thä-les'sä), *n.* [NL.] 1. A subgenus of *Parapara*, Adams, 1858. 2. A curious genus of ichneumon-flies, of the subfamily *Pimplinae*, notable for their size and the great length of the ovipositor. The larva live externally upon those of horn-tails and wood-boring beetles, and the long ovipositor of the adult enables it to bore for a considerable distance through solid wood. *T. atrata* and *T. lunator* are common parasites of *Tremex columba* in the United States. Holmgren, 1859.

**Thalia** (thä-li'ä), *n.* [= *F. Thalie*, *L. Thalia*, sometimes *Thalea*, *Gr.* *thalēia*, one of the Muses, *thalēia*, luxuriant, blooming, *thalēiv*, be luxuriant or exuberant, bloom.] 1. In *Gr. myth.*, the joyful Muse, to whom is due the bloom of life. She inspired gaiety, was the patroness of the banquet accompanied by song and music, and also favored rural pursuits and pleasures. At a late period she became the Muse of comedy, and to the Romans was little known in any other character. In the later art she is generally represented with a comic mask, a shepherd's crook, and a wreath of ivy. See cut in next column, and cut under *mask*, 1.

2. The twenty-third planetoid, discovered by Hind in London in 1852.—3t. In *zool.*: (a) A genus of salps, giving name to the *Thalie* or *Thaliacea*; same as *Salpa*, 1. (b) A genus of coleopterous insects. Hope, 1838.

**Thaliacea** (thä-li-ä'sē-ä), *n. pl.* [NL. (Menke, 1830), *Gr.* *thalēia* (in allusion to its phosphorescence: see *Thalia*) + *-acea*.] A division of tunicates, containing the free-swimming forms, or the salps and doliolids: distinguished from *Ascidacea*. Also *Thalie*, *Thaliada*, *Thalida*, *Thalides*.

Thalia.—Fr. n. an antique in the British Museum.

**thaliacean** (thä-li-ä'sē-an), *a.* and *n.* I. *a.* Of or pertaining to the *Thaliacea*.

II. *n.* A member of the *Thaliacea*, as a salp or doliolid.

**Thalian** (thä-li'an), *a.* and *n.* [*Gr.* *Thalia* + *-an*.] I. *a.* 1. Of or relating to Thalia, especially considered as the Muse of pastoral and comic poetry; comic.—2. [*l. c.*] In *zool.*, same as *thaliacean*.

II. *n.* Same as *thaliacean*.

**Thalictrum** (thä-lik'trum), *n.* [NL. (Tournefort, 1700), *Gr.* *thalictum*, *thalitrum*, *Gr.* *thaliktron*, a plant, prob. *Thalictrum minus*; perhaps so called from the abundant early bright-green foliage, *Gr.* *thalēiv*, be luxuriant: see *thalus*.] A genus of plants, of the order *Ranunculaceæ* and tribe *Anemoneæ*. It is distinguished from the similarly apetalous genus *Anemone* by its lack of an involucre. It includes about 70 species, mostly natives of the north temperate or frigid regions, with a few in tropical India, the Cape of Good Hope, and the Andes. They are delicate or tall herbs with a perennial base, and ornamental ternately decompound leaves of many leaflets, which are often rounded and three-lobed, suggesting those of the columbine or maidenhair fern (see cut under *leaf*). The flowers are commonly small, polygamous, and panicled, pendulous in *T. dioicum* and *T. minus*, and reduced to a raceme in *T. alpinum*. They consist chiefly of four or five greenish, yellowish, purple, or whitish sepals; the seven or many carpels commonly become compressed stalked tailless achenes; the anthers are usually long and exserted or pendent, giving the inflorescence a graceful feathery appearance, and are especially conspicuous in *T. aquilegifolium* and *T. flavum* from their yellow color. The species are known in general as *meadow-rue*; 3 are natives of England, and 10 or more of the United States; the former *T. anemonoides*, the rue-anemone, a favorite early spring flower of the eastern and central United States, is now classed as *Anemone thalictrifolia*, or by some as *Anemone thalictrifolia*. (See cut under *apocarpous*.) A few dwarf species are used for borders or rock-work, as *T. minus* and *T. alpinum*, the latter native of the mountains of Europe and Asia, as also of the Rocky Mountains, and reaching latitude 66° N. About 24 of the taller species are in cultivation, especially *T. glaucum* of Spain and the Austrian *T. aquilegifolium*, known as *Spanish tuft* and *feathered* or *tufted columbine*. *T. polygamum* (formerly *T. Cornuti*), a conspicuous ornament of wet meadows in the United States, reaches the height of 4, sometimes 7, feet. *T. flavum* is known in England as *fen-rue* or *maidenhair rue*, and as *false monk's* or *poor-man's rhubarb*. *T. foliolosum*, the yellowroot of the Himalayas, produces tonic and aperient roots used in India in intermittent fevers.

**thallic** (thal'ik), *a.* [*Gr.* *thallium* + *-ic*.] In *chem.*, of, pertaining to, or containing thallium: as, *thallic acid*.

**thalliform** (thal'i-fôrm), *a.* [*Gr.* *thallus*, *q. v.*, + *L. forma*, form.] In *bot.*, having the form of a thallus.

**thalline** (thal'in), *a.* [*Gr.* *thallos*, of or pertaining to a green shoot, *Gr.* *thallos*, a green shoot: see *thallus*.] In *bot.*, relating to, of the character of, or belonging to a thallus.—**Thalline** exiple. See *exiple*.

**thallious** (thal'i-us), *a.* [*Gr.* *thallium* + *-ous*.] Same as *thallic*.

**thallite** (thal'it), *n.* [*Gr.* *thallos*, a green shoot (see *thallus*), + *-ite*.] Same as *epidote*.

**thallium** (thal'i-um), *n.* [NL., so called in allusion to the green line it gives in the spectrum, which led to its discovery; *Gr.* *thallos*, a green shoot: see *thallus*.] Chemical symbol, Tl; atomic weight, 204.2. A rare metal which was discovered in the residuum left from the distillation of selenium by Crookes, in 1861, and was

first supposed to contain tellurium, but afterward proved, by the aid of the spectroscopic, to be new. Thallium as prepared artificially has a bluish-white tint and the luster of lead. It is malleable, and so soft that it can be scratched with the finger-nail. Its specific gravity is 11.8. Thallium is somewhat widely distributed, but never occurs in large quantities. The rare mineral called *crookesite*, found in Sweden, is an alloy of thallium, selenium, and copper, with a little silver. Thallium seems to be present in both iron and copper pyrites from various localities, and it is from the fluo-dust from sulphuric-acid works in which pyrites is burned that the metal is chiefly obtained. Thallium is chemically classed with the metals of the lead group, but its reactions are in certain respects very peculiar and exceptional. It has been employed in the manufacture of glass, and is said to furnish a glass of extraordinary brilliancy and high refractive power.

**thallium-glass** (thal'i-um-gläs), *n.* Glass in which thallium is used instead of lead, to give density and brilliancy. Compare *crystal*, 2.

**thalloidic** (tha-lod'ik), *a.* [*Gr.* *thallos* + *-oid* (-oid) + *-ic*.] In *bot.*, of or pertaining to the thallus; thalline.

**thallogen** (thal'ô-jen), *n.* [*Gr.* *thallos*, a young shoot (see *thallus*), + *-genesis*, producing: see *-gen*.] In *bot.*, same as *thallophyte*.

**thallogenous** (tha-loj'e-nus), *a.* [*Gr.* *thallogen* + *-ous*.] In *bot.*, of or belonging to the thallogens.

**thalloid** (thal'oid), *a.* [*Gr.* *thallos* + *-oid*.] In *bot.*, resembling or consisting of a thallus.—**Thaloid hepaticæ**, hepaticæ in which the vegetative body does not consist of a leafy axis.

**thallome** (thal'ôm), *n.* [*Gr.* *thallos* + *-ome* (-oma).] In *bot.*, a thallus; a plant-body undifferentiated into members, characteristic of the *Thallophyta*.

**Thallophyta** (tha-lof'i-tä), *n. pl.* [NL., pl. of *thallophytum*: see *thallophyte*.] A subkingdom or group of the vegetable kingdom, embracing the *Myxomycetes*, *Diatomaceæ*, *Schizophyta*, *Algae*, and *Fungi*—the lower cryptogams, as they are still most frequently called. They are plants in which the vegetative body usually consists of a thallus, which shows no differentiation into stem, leaf, and root, or if there is such differentiation it is but rudimentary. In regard to complexity of structure, they set out from the simplest forms which show no outward distinction of parts, and ascend through numberless transitions to more and more complex forms of cell and tissue, but even in the higher forms they are never differentiated into the sharply separated systems of tissue that characterize the higher plants. They never have either true vessels or woody tissue. In regard to the modes of reproduction, they are in as great variety as are the grades of structural complexity, ranging from the forms which are propagated by simple fission to forms that have the sexes as clearly differentiated and almost as perfect and complex as are to be found in the higher plants. Compare *Bryophyta*, *Pteridophyta*, *Spermatophyta*, and *Cornophyta*.

**thallophyte** (thal'ô-fit), *n.* [*Gr.* *thallos*, a green shoot, + *phuton*, a plant.] A plant of the subkingdom *Thallophyta*; one of the lower cryptogams.

Arboreal plants having structures akin to those of *thallophytes*. Pop. Sci. Mo., XXXII. 792.

**thallophytic** (thal'ô-fit'ik), *a.* [*Gr.* *thallophyte* + *-ic*.] In *bot.*, of or pertaining to the *Thallophyta* or thallophytes.

**thallose** (thal'ôs), *a.* [*Gr.* *thallos* + *-ose*.] In *bot.*, same as *thalloid*.

**thallus** (thal'us), *n.* [NL., *L. thallus*, *Gr.* *thallos*, a young shoot or twig, *Gr.* *thallos*, be luxuriant, bloom, sprout.] In *bot.*, a vegetative body or plant-body undifferentiated into root, stem, or leaves; the plant-body characteristic of the *Thallophyta*. Also *thalamus*. See cut under *aplanate*.—**Filamentous thallus**. Same as *fruticose thallus*.—**Foliateous or frondose thallus**, in lichens, a flat more or less leaf-like thallus which spreads over the surface of the substratum, but is attached at only a few points and can be easily separated therefrom without much injury.—**Fruticose thallus**, in lichens, a thallus which is attached to the substratum by a narrow base only, from which it grows upward as a simple or more or less branched shrub-like body.—**Stratified thallus**. See *stratified*.

**Thalmud**, **Thalmudist**, *n.* Obsolete forms of *Talmud*, *Talmudist*.

**thalweg** (*G.* pron. täl'vech), *n.* [*G.*, *thal*, valley, + *weg*, way.] A line upon a topographical surface which is a natural watercourse, having everywhere the direction of greatest slope, and distinguished by having the lines of straight horizontal projection which cut it at right angles on the upper sides of the curves of equal elevation to which they are tangent.

**Thammuz** (tham'uz), *n.* Same as *Tammuz*, 2. Milton, P. L., i. 446, 452.

**thamnium** (tham'ni-um), *n.* [NL., *Gr.* *tham-nion*, dim. of *thamnos*, a bush, shrub, *Gr.* *thamnion*, equiv. to *thamnos*, crowded, thick, close-set, cf. *thamnos*, in pl. *thamnos*, thick, close-set; cf. *thamnos*, often.] In *bot.*, the branched bush-like thallus of fruticose lichens.

**thanksgiver** (thangks-giv'ér), *n.* [*< thanks, pl. of thank, + giver*.] One who gives thanks, or acknowledges a benefit, a kindness, or a mercy.

Wherefore we find (our never-to-be-forgotten) example, the devout *thanksgiver*, David, continually declaring the great price he set upon the divine favours.

*Barrow*, *Works*, I. viii.

**thanksgiving** (thangks-giv'ing), *n.* [*< thanks, pl. of thank, + giving*.] 1. The act of rendering thanks or of expressing gratitude for favors, benefits, or mercies; an acknowledgment of benefits received: used in the Old Testament for acknowledgment by the act of offering.

If he offer it for a *thanksgiving*, then he shall offer with the sacrifice of *thanksgiving* unleavened cakes.

*Lev.* vii. 12.

Every creature of God is good, and nothing to be refused, if it be received with *thanksgiving*.

*1 Tim.* iv. 4.

2. A public celebration of divine goodness; specifically [*cap.*], in the United States, Thanksgiving day (see the phrase below).

Great as the preparations were for the dinner, everything was so contrived that not a soul in the house should be kept from the morning service of *Thanksgiving* in the church, and from listening to the *Thanksgiving* sermon, in which the minister was expected to express his views freely concerning the politics of the country, and the state of things in society generally, in a somewhat more secular vein of thought than was deemed exactly appropriate to the Lord's day. *H. B. Stone*, *Oldtown*, p. 340.

3. A form of words expressive of thanks to God; a grace.

There's not a soldier of us all that, in the *thanksgiving* before meat, do relish the petition well that prays for peace.

*Shak.*, *M. for M.*, i. 2. 15.

**General Thanksgiving**, in the Book of Common Prayer, a form of thanksgiving, preceding the last two prayers of morning or evening prayer or of the litany, for the general or ordinary blessings of life: so called as distinguished from the forms provided for special persons and occasions.—**Thanksgiving day**, a day set apart for a public celebration of divine goodness; specifically, in the United States, an annual festival appointed by proclamation, and held usually on the last Thursday of November. It is celebrated with religious services and social festivities. The first celebration was held by the Plymouth Colony in 1621, and the usage soon became general in New England. After the revolution the custom gradually extended to the Middle States, and later to the West, and more slowly to the South. Since 1863 its observance has been annually recommended by the President.—**The Great Thanksgiving**, in early and Oriental liturgies, a form ascribing praise to God for the creation of the world and his dealings with man, now represented by the preface and part of the canon. On the first day of the festival (probably not every year) there was an expiatory sacrifice of two persons, for the men and the women of the state respectively, the victims being condemned criminals; on the second day there were a procession and a contest for a tripod between cyclic choruses provided by choragi.

Cases of adoption were very frequent among the Greeks and Romans. . . . In the interest of the next of kin, whose rights were affected by a case of adoption, it was provided that the registration should be attended with certain formalities, and that it should take place at a fixed time—the festival of the *Thargelia*.

Thaspiaceae

Thaspiaceae, a small American butterfly, is a member of the Pieridae family. It is characterized by its white wings with dark markings. The species is named in honor of the Thaspiaceae family. The butterfly is shown in a resting position, with its wings spread. The background is a simple, light-colored surface.

that is, the subject of the sentence, is the one who is doing the action. In the sentence "That vulture in you, to devour so many," the subject is "that vulture in you." The verb is "to devour." The object is "so many." The sentence is a statement of fact.

the end of the clause: thus, the man of whom I spoke, the book from which I read, the spot near which he stood, the pay for which he works; but not the man of that I spoke, etc., though one may say, the man that I spoke of, the book that I read from, the place that he stood near, the pay that he works for, and so on. When the relative clause conveys an additional idea or statement, or is parenthetical, *who* and *which* are in modern English rather to be used than *that*: thus, "James, whom I saw yesterday, told me," but not "James that, etc." That more often introduces a restrictive or definitive clause, but *who* and *which* are frequently used in the same way.  trast.

That on me hette, that othir dede me colde.  
 Chaucer, Parliament of Fowls, I. 145.

That . . . he = who; that . . . his (or her) = whose;  
 that . . . him = whom; that . . . they = who; which  
 that = whom.

My herthes Ioie, all myn hole plesance,  
 Welche that y sarue, and schall do faithfully  
 With treue Entente.  
 Political Poems, etc. (ed. Furnivall), p. 40.

A Knight ther was, and that a worthy man,  
 That fro the tyme that he first bigan  
 To ryden out, he loved chivalrye.  
 Chaucer, Gen. ProL to C. T., I. 44.

Now fele I wel the goodnesse of this wyf,  
 That bothe after her deeth and in her lyf  
 Her grette bountee doubleth her renoun.  
 Chaucer, Good Women, I. 521.

This man to you may falsly ben accused,  
 That as by right him oghte ben excused.  
 Chaucer, Good Women, I. 351.

[That came in during the twelfth century to supply the  
 place of the indeclinable relative *the*, and in the fourteenth  
 century it is the ordinary relative. In the sixteenth cen-  
 tury, *which* often supplies its place; in the seventeenth  
 century, *who* replaces it. About Addison's time, that had  
 again come into fashion, and had almost driven *which* and  
*who* out of use.

Morris, Historical Outlines of Eng. Accidence, p. 132.]

that (that), conj. [*< ME. that, that, < AS. that = D. dat = OHG. MHG. dat., G. dass = Goth. thata, that; orig. the neut. pron. or adj. that used practically as a def. article qualifying the whole sentence: see that, pron.]* 1. Introduc-  
 ing a reason: in that; because.

Thus I speak, not that I would have it so; but to your  
 shame. Latimer, Sermon of the Plough.

Not that I loved Caesar less, but that I loved Rome more.  
 Shak., J. C., III. 2. 23.

Streams of grief  
 That I have wrong'd thee, and as much of joy  
 That I repent it, issue from mine eyes.  
 Beau. and Fl., Philaster, v. 5.

It is not that I love you less  
 Than when before your feet I lay.  
 Waller, The Self-Banished.

Weep not that the world changes. Bryant, Mutation.

2. Introducing an object or final end or pur-  
 pose: equivalent to the phrases in order that,  
 for the purpose that, to the effect that.

Treat it kindly, *that* it may  
Wish at least with us to stay.

*Comben, The Epicure, i. 9.*

The life blood of the slain  
Poured out where thousands die *that* one may reign.

*Shak., C. of E., iii. i. 69.*

Where is my father, *that* you come without him?

*Beau. and Fl., Laws of Candy, ii. 1.*

6. Formerly often used after a preposition,  
introducing a noun-clause as the object of the  
preposition: as, *before that* he came, *after that*  
they had gone, etc., where at present *that*  
is omitted and the preposition has become a  
conjunction; also, by mistaken analogy with  
such cases, *that* was occasionally added after  
real conjunctions, as *when that*, *where that*.

Go, litil bill, and say thoue were with me

This same day at myne vp-Ryssinge,

Where *that* y be-sought god of merci

Tho to haue my souerein in his kepeing.

*Political Poems, etc. (ed. Furnivall), p. 40.*

### 7. Sometimes used in place of another con- junction, in repetition. [A Gallicism.]

Albeit Nature doth now and then . . . commit some  
errors, and *that* sometimes the things shee formeth haue  
too much, and sometimes too little, yet deliuereth shee  
nothing broken or disseuered.

*Verstegan, Restitution of Decayed Intelligence (ed. 1628),  
[p. 98.]*

### 8. Used elliptically to introduce a sentence or clause expressive of surprise, indignation, or some kindred emotion.

*That* a brother should

Be so perfidious! *Shak., Tempest, i. 2. 67.*

O God, *that* men should put an enemy in their mouths

to steal away their brains! *Shak., Othello, ii. 3. 291.*

### 9. Used as an optative particle, or to introduce a phrase expressing a wish: would *that*: usually with *O!*

*O, that* you bore

The mind *that* I do! *Shak., Tempest, ii. 1. 267.*

This was the very first suit at law *that* ever I had with  
any creature, and *O that* it might be the last!

*that* (THAT), adv. [*that*, *pron.* or *a.*; abbr. of such phrases as *to that extent*, *to that degree*.] *To that extent*; *to that degree*; *to such a de-  
gree*; so: as, I did not go *that* far; I did not

care *that* much about it: the comparison being  
with something previously said or implied, as  
in the preceding examples: used colloquially  
to express emphasis. A similar Scotch use of the  
word, following a negative, corresponds to the Latin *ita*  
(as in Cicero's *non ita multo*): as, *no that* bad; *nae that*  
*far awa*!

Ye think my muse nae *that* ill-faured.

*Skinner, Misc. Poetry, p. 109. (Jamieson.)*

This was carried with that little noise *that* for a good  
space the vigilant Bishop was not awak'd with it

*Bp. Hacket, Abp. Williams, ii. 67. (Davies.)*

Death! To die! I owe *that* much

To what, at least, I was. *Browning, Paracelsus, iv.*

Women were there . . . because Mr. Elsmere had been  
"that good" to them that anything they could do to oblige  
him "they would, and welcome."

*Mrs. Humphry Ward, Robert Elsmere, xlix.*

Lith. *stogas*, roof: see *thatch*, *v.*] **1.** The cover-  
ing of a roof or the like, made of straw or  
rushes, and in tropical countries of coconut-  
leaves and other long and thick-growing palm-  
leaves. The material is laid upon the roof to the thick-  
ness of a foot or more in such manner that the fibers run  
in the direction which the rain-water should take, and are  
held in place by cords which secure the upper part of  
each bundle, or in some similar manner. Long strips of  
wood loaded with stones are also used to keep *thatch* in  
place, and to resist the action of wind.

They would ever in houses of *thacke*

*Swift.*

**thatch-grass** (thach'gräs), *n.* Grass or grass-  
like plants used for thatching; specifically,  
*Elegia deusta* (*Restio Chondropetalum*), of the  
*Restiaceæ*, found at the Cape of Good Hope.

**thatching** (thach'ing), *n.* [Verbal *n.* of *thatch*,  
*v.*] **1.** The act or process of applying *thatch*,  
as to a roof.—**2.** The fibrous material of which  
*thatch* is composed, as straw.

**thatching-fork** (thach'ing-förk), *n.* A fork  
with a long handle, by which the bundles of  
straw, or the like, for thatching are brought up  
to the roof. *Gwilt.*

**thatching-spade** (thach'ing-späd), *n.* Same  
as *thatching-fork*.

**thatch-palm** (thach'päm), *n.* One of various  
palms whose leaves are suitable for thatching,  
particularly in the West Indies the royal pal-  
metto, *Sabal umbraculifera*, and in Lord Howe's  
Island (Australia) *Howea Forsteriana*. See  
*thatch* and *thatch-tree*.

**thatch-rake** (thach'räk), *n.* A utensil for rak-  
ing or combing straight the straw or other ma-  
terial used in thatching, consisting of a straight  
bar in which curved teeth or points are set.  
In heraldry it is represented with five or six such curved  
teeth toward one end, the other end being left free as if  
for use as a handle.

**thatch-sparrow** (thach'spar'ö), *n.* The com-  
mon sparrow, *Passer domesticus*. Also *thack-

wonder, marvel (*< θαύμα*, a wonderful thing, a  
wonder), + *-ite*².] A mineral occurring in mas-  
sive forms of a dull-white color, consisting of  
the silicate, carbonate, and sulphate of cal-  
cium with water. The name has reference to  
its unusual composition.

**thaumatogenist** (thä'mä-toj'e-nist), *n.* [*< thaumatogen-y* + *-ist*.] One who supports or  
believes in *thaumageny*: opposed to *nomog-  
enist*. *Owen*. [Rare.]

**thaumatogeny** (thä'mä-toj'e-ni), *n.* [*< Gr. θαύμα(τ-)*, a wonderful thing, a wonder, + *-γενία*,  
*< -γενής*, producing; see *-geny*.] The fact or the  
doctrine of the miraculous origin of life: op-  
posed to *nomogeny*. [Rare.]

*Nomogeny or Thaumageny?*

**thaumatography** (thä'mä-tog'ra-fi), *n.* A de-  
scription of the wonders of the natural world.

**thaumatolathy** (thä'mä-tol'a-tri), *n.* [*< Gr. θαύμα(τ-)*, a wonderful thing, a wonder, + *λατρεία*, wor-  
ship.] Excessive admiration for what is won-  
derful; admiration of what is miraculous. *Imp.  
Dict.* [Rare.]

**thaumatrope** (thä'mä-tröp), *n.* [Irreg. for \**thau-  
matotrope*, < Gr. θαύμα(τ-), a wonder, + τροπή, a  
turning.] An optical apparatus dependent for  
its effects upon the persistence of retinal im-  
pressions. It consists of a cylinder or disk upon which  
is depicted a series of images representing periodic phases  
of the same picture. When the disk or cylinder is rapidly  
revolved, the image of one phase persists while the image  
of the next falls upon the retina; so that the object seems  
to go through a series of movements.

**thaumaturge** (thä'mä-térj), *n.* [= F. *thauma-  
turge* = Sp. *taumaturgo*, < ML. *thaumaturgus*, <  
Gr. θαυματουργός, wonder-working, < θαύμα(τ-),  
a wonder, + \*τέγειν, work: see *work*.] A worker  
of miracles; a wonder-worker; one who deals  
in wonders or (alleged) supernatural works.

He is right also in comparing the wonderful works of  
Mohammed (who, however, according to the repeated  
and emphatic declaration of the Koran, was by no means a  
*thaumaturge*) with the Mosaic and Christian miracles.

*The Academy.*

**thaumaturgi**, *n.* Plural of *thaumaturgus*.

**thaumaturgy** (thä'mä-tër'jik), *a.* [*< thauma-  
tur-gy* + *-ic*.] Of or pertaining to miracles or  
wonders; having the characteristics of a mir-  
acle; miraculous; also, in contempt, magical.

toyes. *Burton, Anat. of Mel., p. 279.*

**thaumaturgics** (thä'mä-tër'jiks), *n. pl.* [Pl. of  
*thaumaturgy* (see *-ics*).] Miraculous or mar-  
velous acts; feats of magic or legerdemain.

endwise through a hole, ring, or link and then turning it into a position which prevents its withdrawal.—2. A short bar welded or riveted to the end of another bar at a right angle, as in a form of anchor for masonry.

**theandric** (thē-an'drik), *a.* [*< Gr. θεάνδριος, being both (god and man, < θεός, god, + ἀνδρ-, man.)*] Relating to or existing by the union of the divine and human natures, or by the joint agency of the divine and human natures: as, the *theandric* operation (the harmonious coöperation of the two natures in Christ).

**theanthropic** (thē-an-throp'ik), *a.* [*< theanthrop-y + -ic.*] Both divine and human; being or pertaining to the God-man.

The written word of God, like Christ, the personal Word, is *theanthropic* in origin, nature, and aim, and can only be fully understood and appreciated under this twofold character. *Schaff, Christ and Christianity, p. 11.*

**theanthropical** (thē-an-throp'ikal), *a.* [*< theanthropic + -al.*] Same as *theanthropic*.

**theanthropism** (thē-an'thrō-pizm), *n.* [*< theanthrop-y + -ism.*] 1. The union or combination of the divine and human natures; also, belief in such a union or combination. [Rare.]—2. The deification of man, or the humanizing of divinity. [Rare.]

The anthropomorphism, or *theanthropism*, as I would rather call it, of the Olympian system. *Gladstone.*

**theanthropist** (thē-an'thrō-pist), *n.* [*< theanthrop-y + -ist.*] One who advocates the doctrine of theanthropism. [Rare.]

**theanthrophagy** (thē-an'thrō-pof'a-ji), *n.* [*< Gr. θεάνθρωπος, the god-man (see theanthropy), + φάγειν, eat.*] See the quotation.

Cardinal Perron . . . says that they [the primitive Christians] deny anthropophagy, but did not deny *theanthrophagy*—saying, "that they did not eat the flesh, nor drink the blood of a mere man, but of Christ, who was God and man"—which is so strange a device, as I wonder it could drop from the pen of so great a wit.

*Jer. Taylor, Real Presence, xii. § 14.*

**theanthropy** (thē-an'thrō-pi), *n.* [*< F. théanthropie, < Gr. θεάνθρωπια, < θεάνθρωπος, the god-man, < θεός, god, + ἄνθρωπος, man.*] Same as *theanthropism*, 1.

**thearchic** (thē-är'kik), *a.* [*< thearch-y + -ic.*] Divinely sovereign or supreme.

**thearchy** (thē-är-ki), *n.*; pl. *thearchies* (-kiz). [*< Gr. θεαρχία, the supreme deity, prop. rule of God, < θεός, god, + ἀρχεῖν, rule.*] 1. Government by God; also, theocracy.—2. A body of divine rulers; an order or system of deities.

**theater, theatre** (thē'a-tēr), *n.* [Early mod. *E. reg. theater*, sometimes *theatre*; *< ME. theatre, < OF. theatre, F. théâtre = Sp. It. teatro = Pg. teatro = G. Dan. theater = Sw. teater, < L. theatrum, < Gr. θέατρον, a place for seeing shows, a theater, < θέασις, view, behold, < θέα, a view, sight. Cf. amphitheater.* The proper modern spelling is *theater* (as in *amphitheater, diameter*, etc.); it so appears in Cotgrave (1611), Minshew (1617, 1625), Sherwood (1632), Bullokar (1641), Cockeram (1642), Blount (1670), Holyoke (1677), Hexham (1678), etc. The spelling *theatre* appears to have obtained currency in the latter part of the 17th century and since (Coles, 1708, Johnson, 1755; both *theater* and *theatre* in Bailey, 1727, etc.), owing to the constant and direct association of the word with the modern *F. théâtre* (itself a false form in respect to accent).] 1. A building appropriated to the representation of dramatic spectacles; a play-house. Among the Greeks and Romans theaters were among the most important and the largest public edifices, very commonly having accommodation for from 10,000 to 40,000 spectators. The Greek and Roman theaters resembled each other in their general distribution, the Roman theater being developed from the Greek with the modifications, particularly about the orchestra and the stage, due to the difference from the Greek of Roman dramatic ideals. The auditorium, including the orchestra, was commonly in general plan a segment of a circle, usually a half-circle in Roman examples, greater than a half-circle in Greek, and was not, unless very exceptionally, covered by a roof or awning. It was termed *cavea* by the Romans and *κοίλον* by the Greeks. The seats were all concentric with the orchestra, and were intersected by diverging ascents or flights of steps, which divided the auditorium into wedge-shaped compartments (*cunei, κρηίδες*), and also by one longitudinal passage or more (see *diapoma*). The stage of the Roman theater formed the chord of the segment, and was called the *scena* (σκήνη). The Greek theater of the great dramatic period in the fifth century B. C. had no stage, the action taking place in the orchestra, or space below the seats, in which actors and chorus figured together, the orchestra proper being a circle in the center of which stood the *thymele*, or altar of Dionysus. The Romans appropriated the orchestra for the seats of the senators. The later Greek theaters had

stages, at first wholly beyond the circle of the orchestra; but under the Roman domination in Greece the stage of nearly all the Greek theaters was moved forward until at last it occupied the position adopted by the Romans

themselves. Besides these essential parts there were the *λογεῖον, proscenium, or pulpitum*, the stage proper, and the *postscenium*, or structure behind the stage, in which parts the Greek and Roman theaters differed considerably. Almost all surviving Greek theaters were profoundly modified in Roman times, but the original disposition can still be followed in several, as those of Epidauros and Sicyon. Scenery, in the modern sense of the word, was little employed, but the stage machinery became elaborate with the advance of time. In the early days of the modern theater the buildings were only partially roofed, and the stage but scantily if at all provided with scenery. The interior of the theaters of the present day is usually constructed on a horseshoe or semicircular plan, with several tiers of galleries round the walls. The stage has a slight downward slope from the back, and is furnished with movable scenes, which give an air of reality to the spectacle which was unsought in the ancient theater. See *bozz, curtain, orchestra, parquet, pit, postscenium, proscenium, scene, stage, stall, thymele*.

As for their theaters in halfe circle, they came to be by the great magnificence of the Romain princes and people sumptuously built with marble & square stone in forme all round, & were called Amphitheaters, wherof as yet appears one amōg the ancient ruines of Rome.

Sceaw-stow. A Theater, a Shew-place, a beholding-place.  
*Verstegan, Restitution of Decayed Intelligence (ed. 1628), p. 231.*

2. A room, hall, or other place, with a platform at one end, and ranks of seats rising stepwise as the tiers recede from the center, or otherwise so arranged that a body of spectators can have an unobstructed view of the platform. Places of this description are constructed for public lectures, academic exercises, anatomical demonstrations, surgical operations before a class, etc.: as, an operating theater.

Stately theatres,

Bench'd crescent-wise. In each we sat, we heard  
The grave Professor. *Tennyson, Princess, ii.*

3. A place rising by steps or gradations like the seats of a theater.

Shade above shade, a woodie Theatre  
Of stateliest view.

*Milton, P. L. (1st ed.), iv. 141.*

Helps the ambitious hill the heavens to scale,  
Or scoops in circling theatres the vale.

*Pope, Moral Essays, iv. 60.*

4. A place of action or exhibition; a field of operations; the locality or scene where a series of events takes place or may be observed; scene; seat: as, the *theater* of war.

Men must know that in this theatre of man's life it is reserved only for God and angels to be lookers on.

*Bacon, Advancement of Learning, ii.*

This City was for a long time the Theatre of Contention between the Christians and Infidels.

*Maunderell, Aleppo to Jerusalem, p. 54.*

5. The drama; the mass of dramatic literature; also, theatrical representation; the stage: as, a history of the French theater.

But now our British theatre can boast  
Drolls of all kinds, a vast, unthinking host!

*Addison, Prol. to Steele's Tender Husband.*

6. An amphitheater; hence, a circular reservoir or receptacle; a basin. [Rare.]

A cascade . . . precipitating into a large theatre of water.

*Evelyn, Diary, May 5, 1745.*

Patent theater, in England, a theater, as the Covent Garden and Drury Lane theaters, established by letters patent from the crown. *Doran, Annals of the Stage, I. 387.*

**theater-goer** (thē'a-tēr-gō'ēr), *n.* One who frequents theaters.

**theater-going** (thē'a-tēr-gō'ing), *n.* The practice of frequenting theaters.

**theateriant**, *n.* [*< theater + -ian.*] An actor. [Rare.]

(Players I meane) *Theaterians*, pouch-mouth Stage-walkers. *Dekker, Satiromastix.*

**theater-party** (thē'a-tēr-pār'ti), *n.* An entertainment where the invited guests first dine and then go in a party to a theater, or go first to a theater and afterward to supper. [U. S.]

A little dinner at the Café Anglais or at the Bristol Restaurant, with a box to follow at the Français or the Criterion, doubtless is a good kind of a thing enough in its way, but is a mere colorless adumbration of a New York theatre-party.

*Arch. Forbes, Souvenirs of some Continents, p. 150.*

**theater-seat** (thē'a-tēr-sēt), *n.* An ordinary double car-seat having two separate seat-bottoms. *Car-Builder's Dict.*

**Theatin, Theatine** (thē'a-tin), *a. and n.* [*< F. Theatin, < NL. Theatinus, < L. Theat (H. Chieti), a place in Naples.*] 1. *a.* Of or pertaining to the Theatins.

II. *n.* One of a monastic order of regular clerks founded at Rome in 1524, principally by the archbishop of Chieti in Italy, with the purpose of combating the Reformation. Besides taking the usual monastic vows, the Theatins bound themselves to abstain from the possession of property and from soliciting alms, and to trust wholly to Providence for support, expecting, however, that this support would be derived from the voluntary contributions of the charitable. There were also Theatin nuns. The order flourished to some extent in Spain, Bavaria, and Poland, but its influence is now confined chiefly to Italy. *Also Teatin.*

**theatral** (thē'a-tral), *a.* [= *F. théatral = Sp. teatral = Pg. teatral = It. teatrale, < L. theatralis, of or pertaining to a theater, < theatrum, a theater: see theater.*] Of or pertaining to a theater. *Blount, 1670.*

**theatric** (thē-a'trik), *a.* [*< LL. theatricus, < Gr. θεατρικός, < θέατρον, a theater: see theater.*] Same as *theatrical*.

Therefore avault all attitude, and stare,  
And start theatric, practis'd at the glass!

*Couper, Task, ii. 431.*

It is quite clear why the Italians have no word but recitare to express acting, for their stage is no more *theatric* than their street.

*Lovell, Fireside Travels, p. 260.*

**theatrical** (thē-a'tri-kal), *a. and n.* [*< theatric + -al.*] 1. *a.* Of or pertaining to a theater or scenic representations; resembling the manner of dramatic performers: as, *theatrical* performances; *theatrical* gestures.

Sheridan's art, from its very beginning, was *theatrical*, if we may use the word, rather than dramatic.

*Mrs. Oliphant, Sheridan, p. 54.*

2. Calculated for display; extravagant; showy; pretentious: as, a *theatrical* flourish.

Dressed in ridiculous and *theatrical* costumes.

*Fortnightly Rev., N. S., XLIII. 8.*

3. Artificial; affected; assumed.

How far the character in which he [Byron] exhibited himself was genuine, and how far *theatrical*, it would probably have puzzled himself to say.

*Macaulay, Moore's Byron.*

**Theatrical perspective**, the doctrine of the imitation of effects of distance by means of stage scenery; especially, the geometrical theory of such scenery.

II. *n.* 1. *pl.* All that pertains to a dramatic performance; also, a dramatic performance itself: applied usually to amateur performances: as, to engage in private *theatricals* (a dramatic performance in a private house).

In a general light, private *theatricals* are open to some objection.

*Jane Austen, Mansfield Park, xiii.*

2. A professional actor.

The next morning we learned from the maid that Macbeth's blasted heath was but a few miles from Nairn; all the *theatricals* went there, she said.

*Harper's Mag., LXXVII. 945.*

**theatricalise**, *v. t.* See *theatricalize*.

**theatricalism** (thē-a'tri-kal-izm), *n.* [*< theatrical + -ism.*] 1. The theory and methods of scenic representations.—2. Stagniness; artificial manner.

**theatricality** (thē-a'tri-kal'i-ti), *n.* [*< theatrical + -ity.*] The state or character of being theatrical; theatrical appearance; histrionism.

The very defects of the picture, its exaggeration, its *theatricality*, were especially calculated to catch the eye of a boy.

*Kingsley, Alton Locke, vi.*

**theatricalize** (thē-a'tri-kal-iz), *v. t.*; pret. and pp. *theatricalized*, ppr. *theatricalizing*. [*< theatrical + -ize.*] To render theatrical; put in dramatic form; dramatize. Also spelled *theatricalise*.

I think I shall occasionally *theatricalize* my dialogues.

*Mme. D'Arley, Diary, I. 63.*

**theatrically** (thē-a'tri-kal-i), *adv.* In a theatrical manner; in a manner befitting the stage.

Dauntless her look, her gesture proud,

Her voice *theatrically* loud,

And masculine her stride.

*Pope, Imit. of Earl of Dorset, Artemisia.*

**theatricalness** (thē-a'tri-kal-nes), *n.* Theatricality.

**thecate** (thē'kāt) [*theca* + *-ate*] Having a theca; contained in a theca; sheathed.

**thecosomate** (thē-kō-sō'māt), *a.* Same as the-

Was not the *thefteous* stealing away of the daughter from her own father the first ground whereupon all this great noise hath since proceeded?  
*King James I.* To Bacon, Aug. 23, 1617.

By means of its twining and *theftuous* roots it [Sacculina] imbibes automatically its nourishment ready-prepared from the body of the crab.

*H. Drummond*, *Natural Law in the Spiritual World*, p. 342.  
Rebellious to all labor and petty *theftuous*, like the English gypsies. *The Century*, XXVII, 1st.

**theftuously** (thēf'tū-us-lī), *adv.* [Formerly also *theftously*; < *theftuous* + *-ly*.] By theft; thievishly. [Rare.]

One little villainous Turkey knob breasted rogue came *theftously* to snatch away some of my lardons. *Equihart*, tr. of Rabelais, ii. 14.

Any citizen occupying immovables or holding movables as his own, provided they were unscapable, and he had not taken them *theftuously*, acquired a quiritary right, . . . simply on the strength of his possession. *Encyc. Brit.*, XX, 690.

**thegither** (THĒ-gĪTH'ēr), *adv.* A Scotch form of *together*.

**thegn**, *n.* The Anglo-Saxon form of *thane*, used in some historical works. See *thane*.

**thegnhood**, *n.* Same as *thanehood*.

**theic** (thē'ik), *n.* [NL. *thea*, tea, + *-ic*.] One who is addicted to the immoderate use of tea; a tea-drunkard. *Med. News*, XLIX, 305.

**theiform** (thē'i-fōrm), *a.* [NL. *thea*, tea, + *L. forma*, form.] Like tea.

**theight**, *conj.* and *adv.* A Middle English variant of *though*.

**theina** (thē-i'nā), *n.* Same as *theine*.

**theine** (thē'in), *n.* [NL. *theina*, *thea*, tea.] A bitter crystallizable volatile principle (C<sub>8</sub>H<sub>10</sub>N<sub>4</sub>O<sub>2</sub>) found in tea, coffee, and some other plants, tea yielding from 2 to 4 per cent. It is considered to be the principle which gives to tea its refreshing and gently stimulating qualities: same as *cafféin*.

**their** (THĀr), *pron.* See *they*<sup>1</sup>.

**theirs** (THĀrz), *pron.* See *they*<sup>1</sup>.

**theism**<sup>1</sup> (thē'izm), *n.* [= *F. théisme* = *Sp. teísmo* = *Pg. theísmo* = *It. teismo* = *G. theismus*, < NL. *theismus*, < Gr. *theos*, god. The Gr. *theos* cannot be brought into connection with *L. deus*, god, except by assuming some confusion in one case or the other: see *deity*.] Belief in the existence of a God as the Creator and Ruler of the universe. Theism assumes a living relation of God to his creatures, but does not define it. It differs from deism in that the latter is negative, and involves a denial of revelation, while the former is affirmative, and underlies Christianity. One may be a theist and not be a Christian; but he cannot be a Christian and not be a theist.

Thinking . . . that it would be an easy step . . . from thence (the assault of Christianity) to demolish all religion and *theism*. *Cudworth*, *Intellectual System*, Pref.

Speculative *theism* is the belief in the existence of God in one form or another; and I call him a theist who believes in any God.

*Theodore Parker*, *Views of Religion*, p. 59.

**theism**<sup>2</sup> (thē'izm), *n.* [NL. *thea*, tea, + *-ism*.] A morbid affection resulting from the excessive use of tea.

*Theism* belongs, rather, to that class of diseases in which morphinism, caffeine, and vanillism are found. *Science*, VIII, 183.

**theist** (thē'ist), *n.* [= *F. théiste* = *Sp. teísta* = *Pg. teísta* = *It. teísta*, < NL. *\*theísta*, < Gr. *theos*, god: see *theism*<sup>1</sup>.] One who believes in the existence of a God; especially, one who believes in a God who sustains a personal relation to his creatures. In the former sense opposed to *atheist*, in the latter to *deist*.

Averse as I am to the cause of theism or name of deist, when taken in a sense exclusive of revelation, I consider still that, in strictness, the root of all is theism; and that to be a settled Christian it is necessary to be first of all a good theist. *Shaftesbury*, *The Moralists*, i. § 2.

No one is to be called a *Theist* who does not believe in a Personal God, whatever difficulty there may be in defining the word "Personal."

*J. H. Newman*, *Gram. of Assent*, p. 119.

**theistic** (thē-is'tik), *a.* [ < *theist* + *-ic*.] Pertaining to theism or to a theist; according to the doctrine of theists.

It was partly through political circumstances that a truly *theistic* idea was developed out of the chaotic and fragmentary ghost theories and nature-worship of the primeval world. *J. Fiske*, *Idea of God*, p. 72.

**Theistic Church**, a church founded in London in 1871 for the purpose of promulgating the views of the Rev. C. Voysey, "which the decision of the Privy Council (1870) has debarr'd him from preaching as vicar of Healaugh." Its theological basis is a simple theism. *Encyc. Diet.*—**Theistic idealism**. Same as *Berkeleyan idealism* (which see, under *idealism*).

**theistical** (thē-is'ti-kāl), *a.* [ < *theistic* + *-al*.] Same as *theistic*.

That future state which, I suppose, the *theistical* philosophers did not believe. *Warburton*, *Divine Legation*, iii. § 2.

**Thelephora** (thē-lef'ō-rā), *n.* [NL. (Ehrhart, 1787), < Gr. *thēlē*, a teat, + *φάειν* = *E. bear*.] A genus of hymenomycetous fungi, typical of the family *Thelephoraceæ*. They are coriaceous fungi,

having inferior or amphigenous hymenia, clavate basidia, rarely globose tetraspores and globose spores. There are about 140 species, among them *T. pedicellata*, which is somewhat injurious to the pear, eating into the bark.

**Thelephoræ** (thel-ē-fō'rē-ē), *n. pl.* [NL., < *Thelephora* + *-æ*.] A family of hymenomycetous fungi, typified by the genus *Thelephora*.

**thelephoroid** (thel-ē-fō'-roid), *a.* [ < *Thelephora* + *-oid*.] In bot., resembling, characteristic of, or belonging to the genus *Thelephora* or the family *Thelephoraceæ*.

**Thelotrema** (thel-ō-trē'mā), *n.* [NL. (Achærius, 1810), < Gr. *thēlē*, a teat, + *τρίμα*, a perforation, depression, alluding to the shape of the apothecia.] A large genus of gymnocarpous lichens, of the family *Lecanorei*, having an urceolate apothecium and a crustaceous uniform thallus.

**thelotrematous** (thel-ō-trem'a-tus), *a.* [ < *Thelotrema* (+ *-ous*).] In bot., same as *thelotremoid*.

**thelotremoid** (thel-ō-trē'moid), *a.* [ < *Thelotrema* + *-oid*.] In bot., of the nature of, or belonging to, the genus *Thelotrema*.

**Thelphusa** (thel-fū'sā), *n.* [NL. (Latreille, 1819), prop. *Thelphusa* or *\*Thelphusa*, < Gr. *Τήλφουσα*, *Θέλφουσα*, a city in Arcadia.] A genus of

River-crab, *Thelphusa fluviatilis*.

fresh-water crabs, typical of the family *Thelphusidæ*, as the common river-crab, *T. fluviatilis*, of Europe, or *T. depressa*. See *river-crab*.

**thelphusian** (thel-fū'shi-an), *a. and n.* [NL. *Thelphusa* + *-ian*.] *I. a.* Relating or pertaining to the genus *Thelphusa*; belonging to the *Thelphusidæ*.

*II. n.* A fluviatile crab of the genus *Thelphusa* or family *Thelphusidæ*.

**Thelphusidæ** (thel-fū'si-dē), *n. pl.* [NL., < *Thelphusa* + *-idæ*.] A family of fluviatile short-tailed ten-footed crustaceans, typified by the genus *Thelphusa*; the fresh-water crabs.

**thelyblast** (thel'i-blāst), *n.* [ < Gr. *thēlyv*, female, + *βλαστός*, germ.] A female genoblast (which see): opposed to *arsenoblast*. *C. S. Minot*, *Proc. Bost. Soc. Nat. Hist.*, XIX, 170.

**thelyblastic** (thel-i-blas'tik), *a.* [ < *thelyblast* + *-ic*.] Having the character of a thelyblast.

**thelycum** (thel'i-kum), *n.*: *pl. thelyca* (-kū). [NL., < Gr. *thēlyv*, feminine, < *thēlyv*, of female sex, female, < *θάλα*, suckle.] A peculiar structure on the ventral surface of the pereon in the female of some crustaceans. *C. Spence Bate*.

**Thelygonææ** (thel-i-gō'nē-ē), *n. pl.* [NL. (Dumortier, 1829), < *Thelygonum* + *-ææ*.] A tribe of plants, of the order *Urticaceæ*. It consists of the genus *Thelygonum*.

**Thelygonum** (thē-lig'ō-num), *n.* [NL. (Linneus, 1737), < *L. thelygonon*, < Gr. *thēlygōnon*, name of several plants, as *Satyrion*, so called from reputed medicinal properties, neut. of *thēlygōnos*, producing female offspring, < *thēlyv*, female, + *-gonos*, producing: see *gony*.] A genus of plants, formerly known as *Cynocrambe*, constituting the tribe *Thelygonææ* in the order *Urticaceæ*. It is characterized by numerous straight anthers and an erect ovule. *T. Cynocrambe* (*Cynocrambe prostrata*), the only species, known as *dog's-cabbage*, is found throughout the Mediterranean region, where it is used like spinach. It is a procumbent fleshy branching annual, with ovate entire leaves and small axillary flowers, and has somewhat purgative properties.

**Thelymitra** (thē-lim'i-trā), *n.* [NL. (Forster, 1776), so called from the hooded or cup-like body formed of wings on the column near the stigma; < Gr. *thēly*, having a woman's girdle or head-band, < *thēlyv*, female, + *μίτρα*, a girdle, head-band, turban: see *miter*.] A genus of orchids, of the tribe *Neottieæ* and subtribe *Diurideæ*. It is characterized by flowers with an inferior lip similar to the spreading sepals and petals, an erect pistillum broadly hollowed and stigmatic in front, and a stem with a single leaf. There are about 30 species, all Australian except three or four which are natives of New Zealand, one of them, *T. Javanica*, widely diffused throughout Australasia and Malaysia. They are slender terrestrial herbs from ovoid tubers, having a leaf varying from linear to ovate, and a raceme usually of numerous flowers with

shorter bracts. *T. nuda*, known as *Tasmanian hyacinth*, resembles the *Calopogon pulchellus*, or swamp-pink, of the United States.

**Thelyphonidæ** (thel-i-fon'i-dē), *n. pl.* [NL., < *Thelyphonus* + *-idæ*.] A family of pulmonate *Arachnida*, of the order *Pedipalpī* or *Phrynidæ*. They have the segmented abdomen distinct from the cephalothorax and terminating in a very long setiform post-abdomen or tail, somewhat like a scorpion's, but slenderer and many-jointed and not ending in a sting; the first pair of legs long, slender, and somewhat palpaliform; the pedipalps long and stout and ending in chelate claws; and eight eyes. The general aspect of the *Thelyphonidæ* is that of scorpions, which they superficially resemble more nearly than they do the other members (*Phrynidæ*) of their own order. They are known as *whip-scorpions*. See cut under *Pedipalpī*.

**Thelyphonus** (thē-lif'ō-nus), *n.* [NL. (Latreille, 1806), < Gr. *thēlyv*, female, + *-φονος*, < *\*φένειν*, slay.] The typical genus of *Thelyphonidæ*, containing such species as *T. giganteus*. See cut under *Pedipalpī*.

**thelytokous** (thē-lit'ō-kus), *a.* [ < Gr. *thēlyv*, female, + *-τοκος*, *τακτην*, *τεκεν*, to bear, produce.] Producing females only: noting those parthenogenetic female insects which have no male progeny: opposed to *arrhenotokous*.

**them** (THĒm), *pron.* See *they*<sup>1</sup>.

**thema** (thē'mā), *n.*; *pl. themata* (-mā-tā). [NL., < Gr. *θέμα*, theme: see *theme*.] *1.* A thesis.

His *Thema*, to be maintained, is that the King could not break with the King of France because he had sold himself to him for Money.

*Roger North*, *Examen*, III. vi. § 74. (Davies.)

*2.* Same as *theme*, 8.—*3.* In *logic*, an object of thought—namely, a term, proposition, or argument. Also *theme*.

**thematic** (thē-mat'ik), *a. and n.* [ < Gr. *θεματικός*, < *θέμα*, theme: see *thema*.] *I. a.* *1.* In *music*, pertaining to themes or subjects of composition, or consisting of such themes and their development: as, *thematic treatment* or *thematic composition* in general. *Counterpoint* is the technical name for thematic composition of the strictest kind; but many passages in works not contrapuntal as a whole are truly thematic.

*2.* In *philol.*, relating to or belonging to a theme or stem.

Almost all adjectives in German admit of use also as adverbs, in their uninflected or *thematic* form.

*Whitney*, *German Grammar*, § 363.

**Thematic catalogue**, a catalogue of musical works in which not only the names and numbers are given, but also the opening themes of the works or of their several sections or movements (in musical notation).

*II. n.* That part of logic which treats of the-mata, or objects of thought.

**thematical** (thē-mat'i-kāl), *a.* [ < *thematic* + *-al*.] Same as *thematic*. *Athenæum*, No. 3262, p. 579.

**thematically** (thē-mat'i-kāl-i), *adv.* In a thematic manner; with regard to a theme or themes. *Athenæum*, No. 3248, p. 125.

**thematist** (thē-ma-tist), *n.* [ < Gr. *θέμα(τ-)*, theme, + *-ιστ*. Cf. *θεματίζων*, lay down, propose, take for a theme.] A writer of themes.

**theme** (thēm), *n.* [Early mod. E. also *theam*; now altered to suit the L. form; < ME. *teme*, *teeme*, < OF. *teme*, *tesme*, *theme*, F. *thème* = Pr. *thema* = *Sp. tema* = *Pg. tema* = *It. tema* = *G. thema*, < L. *thema*, < Gr. *θέμα*, what is laid down, a deposit, a prize, a proposition, the subject of an argument, a primary word or root, a military district, a province, < *τιθέναι* (√ *θε*), set, place, dispose: see *do*<sup>1</sup>. Cf. *thesis*.] *1.* A subject or topic on which a person writes or speaks; anything proposed as a subject of discourse or discussion.

Ac ich wiste neuere freek that . . . made eny sarmon,

That took this for his *teme* and told hit with-oute glose.

*Piers Plowman* (C), xvi. 82.

When a soldier was the *theme*, my name

Was not far off. *Shak.*, *Cymbeline*, iii. 3. 59.

Fools are my *theme*, let satire be my song.

*Byron*, *English Bards and Scotch Reviewers*, l. 6.

*2.* That which is said or thought on a given topic.

Alone, it was the subject of my *theme*;

In company I often glanced it.

*Shak.*, *C. of E.*, v. 1. 65.

*3.* Question; subject; matter.

Why, I will fight with him upon this *theme*

Until my eyelids will no longer wag.

*Shak.*, *Hamlet*, v. 1. 289.

*4.* A short dissertation composed by a student on a given subject; a brief essay; a school composition; a thesis.

Forcing the empty wits of children to compose *themes*, verses, and orations, which are the acts of ripest judgment.

*Milton*, *Education*.

The making of *themes*, as is usual in schools, helps not one jot toward it [speaking well and to the purpose].

*Locke*, *Education*, § 171.

**theodicæa, theodicea** (thē ō-di-sē'ā), *n.* [NL.] Same as *theodicy*. *Encyc. Brit.*, XIX, 820.

**theodicean** (thē ō-di-sē'ān), *a.* [*< NL. theodicea* (see *theodicy*) + *-an*.] Of or pertaining to theodicy.

**theodicy** (thē-ōd'i-si), *n.* [Also *theodicee*, *theodicea*, *theodicee*; = F. *theodicee*, *< NL. theodicea* (Leibnitz), *< Gr. theō*, god, + *dike*, right, justice (*> dikē*, just).] An exposition of the theory of divine Providence with a view to the vindication of the attributes, particularly of the holiness and justice, of God, in establishing the present order of things, in which evil, moral as well as physical, largely exists. The word in this sense was used by Leibnitz in a series of essays, in which he maintained that metaphysical evil is necessary to moral beings, that physical evil is a means of a greater good, and that moral evil was permitted by God as necessary to the best possible world, as a set-off to moral good, which it increases by contrast.

The second [part of the work] will . . . be speculative, and will contain a new *theodicee*, and what will perhaps appear to many a new basis of morals.

Coleridge, To Sir George Beaumont (Memorials of Coleridge, I, 45).

**theodolite** (thē-ōd'ō-lit), *n.* [Formerly *theodolite*; sometimes *theodolit*; G. Dan. *theodolit*; = F. *theodolite* = Sp. *teodolita* = It. *teodolito* (all *< E.*); *< NL. "theodolitus*, first in the form *theodolitus* (L. Digges, "Pantometria," 1571), defined as "a circle divided in 360 grades or degrees, or a semicircle parted in 180 portions"; origin unknown. The word has a Gr. semblance, but no obvious Gr. basis. It has been variously explained: (a) *< Gr. theōdōtai*, see, + *dōs*, way, + *litos*, smooth, even, plain; (b) *< Gr. theōdōtai*, see, + *dolichos*, long; (c) *< Gr. theō*, run, + *dolichos*, long; (d) *< Gr. theōdōtai*, see (that, a seeing), + *dōlitos*, slave; (e) "the O delitus" or "deletus," i. e. the O crossed out, a fanciful name imagined to have been given in view of the circle marked off in degrees by numerous diameters, giving the effect of a circle or "O" erased; with other equally futile conjectures. (f) A recent explanation makes it a corrupt form of *alidade*.] A surveying-instrument for measuring horizontal angles upon a graduated circle. It may also be provided with a vertical circle, and if this is not very much smaller than the horizontal circle, the instrument is called an *altazimuth*. If it is provided with a delicate striding level and is in every way convenient for astronomical work, it is called a *universal instrument*. A small altazimuth with a concentric magnetic compass is called a *surveyors' transit*. A theodolite in which the whole instrument, except the feet and their connections, turns relatively to the latter, and can be clamped in different positions, is called a *repeating circle*. The instrument shown in the figure follows the system of the United States Coast Survey of attaining simplicity of construction by adaptation to a single purpose—in this case to the measurement of horizontal angles only. This instrument is low and consequently very steady. Within the upright pillar is a truncated cone of steel, and upon this and fitting to it turns

Theodolite, constructed by Brunner Brothers of Paris.

the hollow brass pillar carrying the telescope and microscopes. Except for an excessively thin layer of oil, the brass movable part bears directly on the steel, and its weight tends to keep it centered. The pressure is relieved by a small plate of some elasticity fastened to the movable part over the axis and adjustable with screws. It is thus made to turn, as nearly as possible, about a mathematical line. This is the conical bearing of Cambray. The base, which is as low as possible, consists of a round central part, and three arms having screw-feet with binding-screws. A circular guard for the circle (indistinguishable from the latter in the figure) forms a part of the base. The graduated circle is made slightly conical, so that the microscopes may be more convenient. This circle, with its eight radii and interior ring, forms one solid casting, which bears upon the steel axis conically. It is held in place, in imitation of an instrument by Stackpole of New York, by the pressure of a ring above, which can readily be loosened so as to permit the circle to be turned round alone. The telescope is provided with a filar micrometer, with a view of facilitating reiterated pointings—a new principle of much value. The instrument is leveled by means of a striding level. There are four micrometer microscopes (although some geodesists insist upon an odd number), made adjustable so that one division of the circle shall be very nearly covered by two and a half turns of the

micrometer-screw. The illumination for these microscopes is made through their objectives by light brought, according to the plan of Messrs. Brunner, by prisms from a point vertically over the axis, where a horizontal ground glass is hung in the daytime and a lamp with a porcelain shade at night, so that the images of the lines placed by the graver in the polished surface of the circle shall not be displaced by oblique illumination. The clamp is attached to an arm from a ring about the brass upright, and bears upon the circular guard outside the circle proper. The tangent screw is contrived so as to eliminate dead motion. The arm carrying the clamp is balanced by another bearing a small finding microscope. Theodolites are made upon manifold models; but the one figured in preceding column is a good example of a modern first-class instrument.

**theodolite-magnetometer** (thē-ōd'ō-lit-magne-tom'e-tēr), *n.* An instrument employed as a declinometer to measure variations in declination, and as a magnetometer in determinations of force.

**theodolitic** (thē-ōd'ō-lit'ik), *a.* [*< theodolite* + *-ic*.] Of or pertaining to a theodolite; made by means of a theodolite. *Imp. Dict.*

**Theodosian** (thē-ō-dō'si-an), *a.* and *n.* [*< Theodosius*, *< Gr. Θεοδοσιος*, a man's name (lit. 'gift of God,' *< θεός*, god, + *δόσις*, gift: see *dose*), + *-an*.] 1. a. Pertaining to any one named Theodosius, particularly to either of the emperors Theodosius I. (379-395) and Theodosius II. (408-450).—**Theodosian code**. See *code*.

II. *n.* One of a body of Russian dissenters who purify by prayer all articles purchased from unbelievers: so called from their founder, Theodosius, a Russian monk in the sixteenth century.

**Theodotian** (thē-ō-dō'shi-an), *n.* [*< Theodotus*, *< Gr. Θεοδοτος*, a man's name (lit. 'given by God,' *< θεός*, god, + *δότος*, verbal adj. of *δίδωμι*, give), + *-ian*.] One of a party of anti-Trinitarians or Monarchians, followers of Theodotus the Tanner, of Byzantium, about A. D. 200, who taught that Christ was a mere man.

**theogonic** (thē-ō-gon'ik), *a.* [*< theogony* + *-ic*.] Of or relating to theogony.

The theogonic and cosmogonic notions of Homer and Hesiod. *Ueberweg*, Hist. Philosophy (trans.), I, 24.

**theogonism** (thē-ō-g'ō-nizm), *n.* [*< theogony* + *-ism*.] Theogony. *Imp. Dict.*

**theogonist** (thē-ō-g'ō-nist), *n.* [*< theogony* + *-ist*.] One who is versed in theogony. *Imp. Dict.*

**theogony** (thē-ō-g'ō-ni), *n.* [= F. *théogonie* = Sp. *teogonia* = Pg. *teogonia* = It. *teogonia*, *< L. theogonia*, *< Gr. θεωγονία*, a generation or genealogy of the gods, *< θεός*, god, + *-γονία*, *< γένος*, generation: see *-gony*.] That branch of non-Christian theology which teaches the genealogy or origin of the deities; in a particular sense, one of a class of poems which treat of the generation and descent of the gods: as, the ancient Greek *theogony* of Hesiod.

He [Epicurus] means the evil Genius and the good Genius in the *theogony* of the Persians.

Landor, Imag. Conv., Epicurus, Leontion, and Ternissa.

In the hymns of the Rig-Veda we still have the last chapter of the real *Theogony* of the Aryan races.

Max Müller, Sci. of Lang., 2d ser., p. 429.

**theol.** An abbreviation: (a) of *theological*; (b) of *theology*.

**theolog, n.** See *theologue*. [Colloq.]

**theological** (thē-ōl'ō-gal), *n.* [= F. *théologal* = Sp. *teologal* = Pg. *teologal*, theological, the ological, = It. *teologale*, *< NL. "theologalis*, *< L. theologus*, theologue: see *theologue*.] Same as *canon theologian* (which see, under *theologian*).

**theologaster** (thē-ōl'ō-gas-tēr), *n.* [*< L. theologus*, a theologue, + *dim. -aster*.] A quack in theology; a shallow or pretended theologian. [Rare.]

This sorely distresses our *theologaster*: yet, instead of humbling himself under the weight of his own dullness, he turns, as is his way throughout, to insult the Author of The Divine Legation.

Warburton, On Several Occasional Reflections, I, App.

**theologate** (thē-ōl'ō-gāt), *n.* [*< NL. "theologatus*, *< L. theologus*, theologue: see *theologue* and *-ate*.] The theological course of a student or novice preparing for the priesthood of the Roman Catholic Church. *Worcester*.

**theologer** (thē-ōl'ō-jēr), *n.* [*< theology* + *-er*.] A theologian. [Rare.]

Can any sound *Theologer* think that these great Fathers understood what was Gospel, or what was Excommunication?

Milton, Reformation in Eng., i.

The ancient tradition, insisted on by heathen priests and theologians, is but a weak foundation.

Hume, Nat. Hist. of Religion, xi.

**theologian** (thē-ō-lō'jī-an), *a.* and *n.* [= F. *théologien* = Pr. *theologian*; as *LL. theologia*, theology, + *-an*.] I. *a.* Theological. [Rare.]

II. *n.* 1. A man skilled in theology, especially Christian theology; a divine.

A *Theologian*, from the school Of Cambridge on the Charles, was there; Skillful alike with tongue and pen.

Longfellow, Wayside Inn, Prelude.

The priest made by a sacred caste belongs to the caste that made him; but the great *theologian*, though sprung out of one Church, belongs to all the Churches, supplies them with truth, learning, literature.

Contemporary Rev., LI, 219.

2. A professor of or writer on theology; any person versed in theology: as, the lawyer was a very respectable *theologian*. **Canon theologian**, in the Rom. Cath. Ch., a lecturer on theology and Holy Scripture who is attached to a cathedral church, or other church having a large body of clergy. Also called *theologian* and *theologus*.

**theologic** (thē-ō-loj'ik), *a.* [= F. *théologique* = Sp. *teológico* = Pg. *teológico* = It. *teologico*, *< LL. theologicus*, *< Gr. θεολογικός*, of or pertaining to theology, *< θεολογία*, theology: see *theology*.] Same as *theological*.

In those days the great war of theology which has always divided New England was rife, and every man was marked and ruled as to his opinions, and the *theologic* lines passed even through the conjugal relation, which often, like everything else, had its Calvinistic and its Arminian side.

H. B. Stowe, Oldtown, p. 53.

**theological** (thē-ō-loj'i-kal), *a.* [*< theologic* + *-al*.] 1. Pertaining to theology or divinity: as, *theological criticism*; a *theological seminary*.

Solemn themes Of *theological* and grave import.

Courper, Task, v. 682.

2. Based upon the nature and will of God as revealed to man.

It may be wondered, perhaps, that in all this while no mention has been made of the *theological* principle: meaning that principle which professes to recur for the standard of right and wrong to the will of God.

Bentham, Introd. to Morals and Legislation, ii, 18.

The *theological* virtues [faith, hope, and charity] presuppose a knowledge of the revealed nature of God as a condition of their exercise, while the moral virtues issue in such a knowledge.

Blunt, Dict. Theology, p. 797.

**Theological ceremonial law**. See *law*.

**theologically** (thē-ō-loj'i-kal-i), *adv.* In a theological manner; according to the principles of theology; in respect to theology.

**theologies** (thē-ō-loj'iks), *n.* [Pl. of *theologic* (see *-ics*).] The essence of theology. [Rare.]

What angels would those be who thus excel In *theologies*, could they sew as well!

Young, Love of Fame, v. 374.

**theologise, theologiser**. See *theologize, theologizer*.

**theologist** (thē-ōl'ō-jīst), *n.* [*< theology* + *-ist*.] Same as *theologian*. [Rare.]

There be diuers conjectures made by the *Theologists*, Why men should doubt or make question whether there be a God or no.

Heywood, Hierarchy of Angels, p. 82.

**theologium** (thē-ō-lō-jī-um), *n.* [NL., *< Gr. θεολογείον* (see *def.*), *< θεός*, god, + *λογεῖον*, a place for speaking, *< λόγος*, word, speech, *< λέγειν*, speak, say.] A small upper stage or balcony in the scene or stage-structure of the ancient theater, on which the impersonators of divinities sometimes appeared.

**theologize** (thē-ōl'ō-jī-z), *v.*; pret. and pp. *theologized*, ppr. *theologizing*. [= Sp. *teologizar*; as *theology* + *-ize*.] I. *trans.* To render theological.

School-divinity was but Aristotle's philosophy theologized. *Glancville*, Pre-existence of Souls, iv. (Latham.)

II. *intrans.* To theorize or speculate upon theological subjects; engage in theological discussion.

The mind of the Church must meditate, reflect, reason, philosophize, and *theologize*.

Schaff, Christ and Christianity, p. 49.

Also spelled *theologise*.

**theologizer** (thē-ōl'ō-jī-zēr), *n.* [*< theologize* + *-er*.] One who theologizes; a theologian. Also spelled *theologiser*. [Rare.]

**theologue** (thē-ō-lōg), *n.* [Also *theolog*; *< F. théologue* = Sp. *teólogo* = Pg. *teólogo* = It. *teologo* = G. *theolog* = Sw. *dan. teolog*, *< L. theologus*, *< Gr. θεολόγος*, one who speaks of the gods (as Homer, Hesiod, Orpheus) or of the divine nature, in later use, eccles., a theologian, a divine; prop. adj., speaking of God or of the gods, *< θεός*, god, + *λέγειν*, speak: see *-ology*.] 1. A theologian. [Now rare.]

The cardinals of Rome, which are *theologues*, and friars, and schoolmen, have a phrase of notable contempt and scorn towards civil business.

Bacon, Praise (ed. 1887).

2. A theological student. [Colloq.]

The *theologues* of the Hartford Seminary frequently find striking examples of practical theology in their mission work.

Religious Herald, April 15, 1886.

theology, *n.* [*theol.*] The science of God and his relations to the universe, and of the Christian revelation in particular, and the ascertaining, formulating, and explaining of all that is known respecting God and his relations to the universe, in such form as to make manifest its scientific trustworthiness. Systematic theology presupposes exegetical, Biblical, and historical theology, and is the basis of applied or practical theology.

his attributes, and of our relation to him, raises up in the minds of different persons, or in that of the same person at different times. *Hartley, On Man, I. iv. 5.*

**theophanic** (thē-ō-fan'ik), *a.* [*< theophany + -ic.*] Relating to a theophany; pertaining to an actual appearance of a god to man.

The notion of angels as divine armies is not like that of the individual "messenger" closely connected with the theophanic history. *W. R. Smith, Encyc. Brit., II. 27.*

**theophany** (thē-ō-fā-ni), *n.* [= *OF. theophanie, theophania, thephania, thephania, F. theophanie* = *OLT. thephania, thephania* = *G. thephania*, < *ML. thephania, thephania*, < *Gr. thephania, thephania*, < *θεός, god, + φαίνωμαι, appear.*] 1. A manifestation of God or of gods to man by actual appearance. The term is applied specifically to the appearance of God to the patriarchs in angelic or human form, and to Christ's nativity, baptism, and second coming.

The Creator alone truly is; the universe is but a sublime theophany, a visible manifestation of God.

*Milman, Latin Christianity, [viii. 5.]*

The surest means of obtaining a knowledge of the [Homeric] gods, and of their will, was through their direct personal manifestation, in visible theophanies. *G. P. Fisher, Begin. of Christianity, p. 84.*

2. [*cap.*] The festival of the Epiphany.

**theophilanthropic** (thē-ō-fil-an-thrōp'ik), *a.* [*< theophilanthropy + -ic.*] Of or pertaining to theophilantrhopism or the theophilanthropists; uniting love to God with love to man.

The theophilanthropic ideas of the Society for the Diffusion of Useful Knowledge.

*Contemporary Rev., XLIX. 341.*

**theophilanthropism** (thē-ō-fil-an-thrō-pizm), *n.* [*< theophilanthropy + -ism.*] Love to both God and man; the doctrines or tenets of the theophilanthropists. Also theophilanthropy.

**theophilanthropist** (thē-ō-fil-an-thrō-pist), *n.* [*< theophilanthropy + -ist.*] 1. One who practises or professes theophilanthropism. — 2. One of a society formed at Paris in the period of the Directory, having for its object the establishment of a new religion in place of Christianity, which had been abolished by the Convention. The system of belief thus attempted to be established was pure deism.

**theophilanthropy** (thē-ō-fil-an-thrō-pi), *n.* [*< Gr. theos, god, + φιλανθρωπία, love to man: see philanthropy.*] Same as theophilanthropism. *T. Paine.*

**theophile** (thē-ō-fil), *n.* [*< Gr. θεός, god, + φίλος, love.* Cf. *Gr. θε φίλος, dear to the gods.*] One who loves God. [*Rare.*]

Afflictions are the Proportion [portion] of the best Theophiles. *Hawell, Letters, ii. 41.*

**theophilosophic** (thē-ō-fil-ō-sof'ik), *a.* [*< Gr. theos, god, + φιλοσοφία, philosophy, + -ic.*] Combining, or pertaining to the combination of, theism and philosophy.

**Theophrasta** (thē-ō-fras'tā), *n.* [*NL. (Linnaeus, 1737), < L. Theophrastus, < Gr. Θεόφραστος, Theophrastus, a Greek philosopher (about 373–288 B. C.).*] A genus of plants, type of the tribe *Theophrasteae* in the order *Myrsineae*. It is characterized by a cylindrical corolla bearing on its base five extorse anthers and as many scale-shaped stamens. There are 3 species, all natives of Hayti. They are smooth shrubs, with a robust erect trunk, and spreading spiny-toothed leaves crowded toward the top. The large white flowers are compactly clustered in short racemes. Many species once included in this genus are now separated under the name *Clavija* (Ruiz and Pavon, 1794). *T. Jus-sieu* is cultivated under glass for its handsome leaves; in Hayti, where it is known as *le petit coco*, a bread is prepared from its pounded seeds.

**Theophrastea** (thē-ō-fras'tē-ē), *n. pl.* [*NL. (H. G. L. Reichenbach, 1828), < Theophrasta + -ea.*] A tribe of gamopetalous plants, of the order *Myrsineae*, characterized by the presence of stamens on the base of the corolla. It includes 5 genera of shrubs or small trees, principally natives of tropical America, of which *Theophrasta* (the type), *Clavija*, and *Jacquinia* are the chief, two species of the last named occurring within the United States.

**theopneustic** (thē-op-nūs'tik), *a.* [*< theopneust-y + -ic.*] Given by inspiration of the Spirit of God. *Imp. Dict.*

**theopneusty** (thē-op-nūs-ti), *n.* [= *F. theopneustie, < Gr. theopneustos, inspired of God, < Gr. θεός, god, + πνεύω, inspired, < πνέω, breathe, blow.*] Divine inspiration; the supernatural influence of the Divine Spirit in qualifying men to receive and communicate revealed truth.

**theorbist** (thē-ōr'bist), *n.* [*< theorbo + -ist.*] A performer on the theorbo.

**theorbo** (thē-ōr'bō), *n.* [= *F. théorbe, téorbe* = *Sp. tiorba, < It. tiorba, a musical instrument: origin unknown.*] A musical instrument of the lute class, having two necks, the one above the other, the lower bearing the melody strings, which were stretched over a fretted finger-

board, and the upper bearing the accompaniment strings or "diapasons," which were deeper in pitch, and were played without being stopped. The number and tuning of the strings varied considerably, as did the size and shape of the instrument as a whole. The theorbo was much used in the seventeenth century for accompaniments of all kinds, and was an important constituent of the orchestra of the period. Many lutes were made over into theorbos by the addition of a second neck. The essential differences between the theorbo, the archlute, and the chitarrone appear to be small, though their general shape varied considerably; and the names were used more or less interchangeably. Also called *cithara vijana*, or *double-necked lute*.

Some, that delight to touch the sterner wiry Chord,  
The Cythron, the Pandore, and the theorbo strike.

Drayton, Polyolbion, iv. 361.

**theorem** (thē'ō-rem), *n.* [= *F. théorème* = *Sp. teorema* = *Pg. theorema* = *It. teorema* = *G. theorema*, (L. *theorema* = *Gk. θεωρημα*, a sight, spectacle, a principle contemplated, a rule, theorem, *θεωρεῖν*, look at, view, contemplate, *θεωρῶς*, a spectator, *θεωρεῖν*, see, view. Cf. *theory*.] 1. A universal demonstrable proposition. In the strict sense, a *theorem* must be true; it cannot be self-evident; it must be capable of being rendered evident by necessary reasoning and not by induction merely; and it must be a universal, not a particular proposition. But a proposition the proof of which is excessively easy or involves no genuine diagrammatic reasoning is not usually called a *theorem*.

The schoolmen had framed a number of subtle and intricate axioms and *theorems*, to save the practice of the Church.

Bacon, Superstition (ed. 1887).

By my *theorems*,

Which your polite and terser gallants practise,  
I re-refine the court, and civilize  
Their barbarous natures.

Massinger, Emperor of the East, i. 2.

2. In *geom.*, a demonstrable theoretical proposition. There is a traditional distinction between a *problem* and a *theorem*, to the effect that a *problem* is practical, while a *theorem* is theoretical. Pappus, who makes this distinction, admits that it is not generally observed by the Greek geometers, and it has not been in general use except by editors and students of Euclid. It is recommended, however, by the circumstance that a *theorem* in the general and best sense is a universal proposition, and as such substantially a statement that something is impossible, while the kind of proposition called in geometry a *problem* is a statement that something is possible; the former demands demonstration only, while the latter requires solution, or the discovery of both method and demonstration.

I hope that it may not be considered as unpardonable vanity or presumption on my part if as my own taste has always led me to feel a greater interest in methods than in results, so it is by methods, rather than by *theorems* which can be separately quoted, that I desire and hope to be remembered.

Sir W. R. Hamilton.

**Abel's theorem**, the proposition that if we have several functions whose derivatives can be roots of the same algebraic equation having all its coefficients rational functions of one variable, we can always express the sum of any number of such functions as the sum of an algebraic and a logarithmic function, provided we establish between the variables of the functions in question a certain number of algebraic relations: named after Niels Henrik Abel (1802-29), who first published it in 1826.—**Addition theorem**, a formula for a function of a sum of variables, such as

$$\sin(a+b) = \sin a \cos b + \cos a \sin b.$$

**Arbogast's theorem**, a rule for the expansion of functions of functions, given in 1800 by L. F. A. Arbogast (1759-1803).—**Aronhold's theorem**, one of a number of propositions constituting the foundations of the theory of ternary cubics, given in 1849 by S. H. Aronhold (born 1819), the founder of modern algebra.—**Bayes's theorem**, the proposition that the probability of a cause is equal to the probability that an observed event would follow from it divided by the sum of the corresponding probabilities for all possible causes. This fallacious rule was given by Rev. Thomas Bayes in 1763.—**Becker's theorem**, the proposition that in all moving systems there is a tendency to motions of shorter period, and that if there is a sufficient difference in the periods compared this tendency is a maximum: given by G. F. Becker in 1886.—**Beltrami's theorem**, the proposition that the center of a circle circumscribed about a triangle is the center of gravity of the centers of the inscribed and escribed circles.—**Berger's theorem**, one of a number of theorems relating to the limiting values of means of whole numbers, given by A. Berger in 1880. One of these theorems is that for  $n = \alpha$  the average sum of the divisors of  $n$  is  $\frac{1}{2} \pi n$ .—**Bernoulli's theorem**, (a) The doctrine that the relative frequency of an event in a number of random trials tends as that number is increased toward the probability of it, or its relative frequency in all experience. This fundamental principle, which is not properly a theorem, was given by Jacob Bernoulli (1654-1705). (b) The proposition that the velocity of a liquid flowing from a reservoir is equal to what it would have if it were to fall freely from the level in the reservoir; or, more generally, if  $p$  is the pressure,  $\rho$  the density,  $V$  the potential of the forces,  $q$  the resultant velocity,  $A$  a certain quantity constant along a streamline, then

$$\int \frac{dp}{\rho} + V + \frac{1}{2} q^2 = A:$$

given by Daniel Bernoulli (1700-82) in 1738.—**Bertrand's theorem**, the proposition that when a dynamical system receives a sudden impulse the energy actually acquired exceeds the energy by any other motion consistent with the conditions of the system and obeying the law of energy, by an amount equal to the energy of the motion which must be compounded with the supposed motion to produce the actual motion: an extension of a known

proposition, given by J. L. F. Bertrand (born 1822).—**Betti's theorem**, the proposition that the loci of the points of a surface for which the sum on the one hand and the difference on the other of the geodesic distances of two fixed curves on the surface are constant form an orthogonal system: given by E. Betti in 1858, and by J. Weingarten in more general form in 1863.—**Bézout's theorem**, the proposition that the degree of the equation resulting from the elimination of a variable between two equations is equal to the product of the degrees of these equations, which was shown by E. Bézout (1730-83) in 1779.—**Binet's theorem**, (a) The proposition that the principal axes for any point of a rigid body are normals to three quadric surfaces through that point confocal with the central ellipsoid: given by J. P. M. Binet (1786-1856) in 1811. (b) The generalized multiplication theorem of determinants (1812).—**Binomial theorem**. See *binomial*.—**Bitonti's theorem**, one of certain metrical theorems regarding the intersections of conics demonstrated by V. N. Bitonti in 1870.—**Boltzmann's theorem**, the proposition, proved by L. Boltzmann in 1868, that the mean living force of all the particles of a mixed gas will come to be the same.—**Boole's theorem**, the expansion

$$\begin{aligned} \phi(x+h) - \phi(x) &= B_1(2^1-1)2! \frac{1}{1!} \phi'(x+h) + \phi'(x) \{ \\ &- B_1(2^1-1)4! \frac{1}{3!} \phi'''(x+h) + \phi'''(x) \{ \\ &+ B_1(2^1-1)6! \frac{1}{5!} \phi^{(5)}(x+h) + \phi^{(5)}(x) \{ \dots \end{aligned}$$

given by the eminent English mathematician George Boole (1815-64).—**Bour's theorem**, the proposition that helicoids are deformable into surfaces of revolution: given in 1862 by the French mathematician J. E. Bour (1832-1866).—**Brianchon's theorem**, the proposition that the lines joining opposite vertices of a hexagon circumscribed about a conic meet in one point: given by C. J. Brianchon (born 1785, died after 1823) in 1806. It was the earliest application of polar reciprocals.—**Budan's theorem**, the proposition that if the roots of an algebraic equation are diminished first by one number and then by another, there cannot be more real roots whose values lie between those numbers than the number of changes of sign of the coefficients in passing from one to the other: given and demonstrated in 1811 by the French mathematician Budan.—**Bürmann's theorem**, a formula for developing one function in terms of another, by an application of Lagrange's theorem.—**Cagnoli's theorem**, in *spherical trigon.*, the formula for the sine of half the spherical excess in terms of the sides: given by the Italian astronomer Andrea Cagnoli (1743-1816).—**Cantor's theorem**, the proposition that if for every value of  $x$  greater than  $a$  and less than  $b$  the formula holds that limit  $(A_n \sin nx + B_n \cos nx) = 0$ , then also limit  $A_n = 0$  and limit  $B_n = 0$ : given by G. Cantor in 1870.—**Carnot's theorem**, (a) The proposition that if the sides of a triangle ABC (produced if necessary) cut a conic, AB in C' and C'', AC in B' and B'', BC in A' and A'', then  $AB' \times AB'' \times BC' \times BC'' \times CA' \times CA'' = CB' \times CB'' \times BA' \times BA'' \times AC' \times AC''$ . (b) The proposition that in the impact of inelastic bodies vis viva is always lost. (c) The proposition that in explosions vis viva is always gained. These theorems are all due to the eminent mathematician General L. N. M. Carnot (1753-1823), who published (a) in 1803 and (b) and (c) in 1786. (d) The proposition that the ratio of the maximum mechanical effect to the whole heat expended in an expansive engine is a function solely of the two temperatures at which the heat is received and emitted: given in 1824 by Sadi Carnot (1796-1832): often called *Carnot's principle*.—**Casey's theorem**, the proposition that if  $S_1 = 0, S_2 = 0, S_3 = 0$  are the equations of three circles, and if  $l_1, l_2, l_3$  are respectively the lengths of the common tangents from contact to contact of the last two, the first and last, and the first two, then the equation of a circle which touches all three circles is

$$l_1 l_2 S_1 + l_2 l_3 S_2 + l_3 l_1 S_3 = 0:$$

given by John Casey in 1866.—**Catalan's theorem**, the proposition that the only real minimal ruled surface is the square-threaded screw-surface  $x = a$  and  $y(y/z)$ : named after E. C. Catalan (born 1814).—**Cauchy's theorem**, (a) The proposition that if a variable describes a closed contour in the plane of imaginary quantity, the argument of any synectic function will in the process go through its whole cycle of values as many times as it has zeros or roots within that contour. (b) The proposition that if the order of a group is divisible by a prime number, then it contains a group of the order of that prime. The extension of this—that if the order of a group is divisible by a power of a prime, it contains a group whose order is that power—is called *Cauchy and Sylow's theorem*, or simply *Sylow's theorem*, because proved by the Norwegian L. Sylow in 1872. (c) The rule for the development of determinants according to binary products of a row and a column. (d) The false proposition that the sum of a convergent series whose terms are all continuous functions of a variable is itself continuous. (e) Certain other theorems are often referred to as Cauchy's, with or without further specification. All these propositions are due to the extraordinary French analyst, Baron A. L. Cauchy (1789-1857).—**Cavendish's theorem**, the proposition that if a uniform spherical shell exerts no attraction on an interior particle, the law of attraction is that of the inverse square of the distance: given by Henry Cavendish (1731-1810).—**Cayley's theorem**, the proposition that every matrix satisfies an algebraic equation of its own order: also called the *principal proposition of matrices*: given by the eminent English mathematician Arthur Cayley.—**Cesaro's theorem**, the proposition that if the vertices A, B, C of one triangle lie respectively on the sides (produced if necessary) B'C', C'A', A'B' of a second triangle, which sides cut the sides of the first triangle in the points A'', B'', C'' respectively, and if S be the area of the first triangle, S' that of the second, then

$$\begin{aligned} CB'' \cdot BA'' \cdot AC'' &= AB'' \cdot BC'' \cdot CA'' \\ &= AE \cdot BC \cdot CA'' \cdot S''^2 \cdot AA'' \cdot BB'' \cdot CC'' \\ &= A'B' \cdot B'C' \cdot C'A' \cdot S'^2 \cdot AA' \cdot BB' \cdot CC': \end{aligned}$$

given by E. Cesaro in 1885. It is an extension of Ceva's theorem.—**Ceva's theorem**, the proposition that if the straight lines connecting a point with the vertices of a triangle ABC meet the opposite sides in A', B', C', the product of the segments CB' × BA' × AC' is equal to

the product AB' × BC' × CA': given by Giovanni Ceva in 1678.—**Chasles's theorem**, the proposition that of a unidimensional family of conics in a plane the number which satisfy a simple condition is expressible in the form  $\mu\alpha + \beta\nu$ , where  $\alpha$  and  $\beta$  depend solely on the nature of the condition, while  $\mu$  is the number of conics of the family passing through an arbitrary point, and  $\nu$  is the number touched by an arbitrary line: given in 1864 by M. Chasles (1793-1880) without proof.—**Clairaut's theorem**, the proposition that if the level surface of the earth is an elliptic spheroid symmetrical about the axis of rotation, then the compression or ellipticity is equal to the ratio of  $\frac{1}{2}$  the equatorial centrifugal force less the excess of polar over equatorial gravity to the mean gravity: given in 1743 by Alexis Claude Clairaut (1713-65).—**Clapeyron's theorem**, the proposition that if a portion of a horizontal beam supported at three points A, B, C has uniform loads  $w_1$  and  $w_2$  on the parts AB and BC respectively, the lengths of which are respectively  $l_1$  and  $l_2$ , and if  $\alpha, \beta, \gamma$  are the bending moments at the three points of support, then

$$\alpha l_1 + 2\beta(l_1 + l_2) + \gamma l_2 = \frac{1}{2}(w_1 l_1^3 + w_2 l_2^3):$$

given by B. P. E. Clapeyron (1799-1868): otherwise called the *theorem of three moments*.—**Clausen's theorem**. Same as *Staudt's theorem*.—**Clausius's theorem**, the proposition that the mean kinetic energy of a system in stationary motion is equal to its virial: given by R. J. E. Clausius (born 1822) in 1870; otherwise called the *theorem of the virial*.—**Clebsch's theorem**, the proposition that a curve of the  $n$ th order with  $\frac{1}{2}(n-1)(n-2)$  double points is capable of rational parametric expression: given in 1866 by K. F. A. Clebsch (1833-72).—**Clifford's theorem**, the proposition that any two lines in a plane meet in a point, that the three points so determined by three lines taken two by two lie on a circle, that the four circles so determined by four lines taken three by three meet in a point, that the five points so determined by five lines taken four by four lie on a circle, that the six circles so determined by six lines taken five by five meet in a point, and so on indefinitely: given in 1871 by W. K. Clifford (1845-79).—**Coriolis's theorem**, the kinematical proposition that the acceleration of a point relative to a rigid system is the resultant of the absolute acceleration, the acceleration of attraction, and the acceleration of compound centrifugal force: named from its author, G. Coriolis (1792-1843).—**Cotesian theorem**. Same as *Cotes's properties of the circle* (which see, under *circle*).—**Coulomb's theorem**, the proposition that when a conductor is in electrical equilibrium the whole of its electricity is on the surface: given by C. A. Coulomb (1736-1806).—**Crocechi's theorem**, the proposition that if  $\Sigma p$  denotes what  $(x_1 + x_2 + \dots + x_m) \rho$  becomes when the coefficients of the development are replaced by unity, and if  $\rho p = x_1^p + x_2^p + x_3^p + \dots + x_m^p$ , then

$$\begin{aligned} \Sigma p \cdot \Sigma p &= \Sigma p \\ \Sigma p \cdot \Sigma p + \Sigma p \cdot \Sigma p &= \Sigma p \end{aligned}$$

$\Sigma p \cdot \Sigma p + \Sigma p \cdot \Sigma p + \dots + \Sigma p \cdot \Sigma p = (m-1) \Sigma p \cdot \Sigma p$ : given by L. Crocechi in 1880.—**Crofton's theorem**, the proposition that if  $L$  be the length of a plane convex contour,  $\Omega$  its inclosed area,  $\omega$  an element of plane external to this, and  $\theta$  the angle between two tangents from the point to which  $\omega$  refers, then

$$\int (\theta - \sin \theta) d\omega = \frac{1}{2} L^2 - \pi \Omega:$$

given by Morgan W. Crofton in 1868. Certain symbolic expansions and a proposition in least squares are also so termed.—**Culmann's theorem**, the proposition that the corresponding sides of two funicular polygons which are in equilibrium under the same system of forces cut one another on a straight line.—**D'Alembert's theorem**, the proposition that every algebraic equation has a root: named from Jean le Rond d'Alembert (1717-83). See also *D'Alembert's principle*, under *principle*.—**Dandelin's theorem**, the proposition that if a sphere be inscribed in a right cone so as to touch any plane, its point of contact with that plane is a focus and the intersection with that plane of the plane of the circle of contact of sphere and cone is a directrix of the section of the cone by the first plane: named from G. P. Dandelin (1794-1847), who gave it in 1827; but he is said to have been anticipated by Queletec. The theorem that the locus of a point on the tangent of a fixed conic at a constant distance from the point of contact is a stereographic projection of a spherical conic is by Dandelin.—**Darboux's theorem**, the proposition that if  $y$  is a function of  $x$  having superior and inferior limits within a certain interval of values of  $x$ , and if this interval is cut up into partial intervals  $I_0, I_1, \dots, I_n$ , in which the largest values of  $y$  are respectively  $M_0, M_1, \dots, M_n$ , then  $\Sigma M_i$  will tend toward a fixed limit as the number of intervals is increased, without reference to the mode of dissection: named from its author, J. G. Darboux.—**De Moivre's theorem**. (a) The proposition that  $(\cos \theta + i \sin \theta)^n = \cos n\theta + i \sin n\theta$ : better called *De Moivre's formula*. (b) Same as *De Moivre's property of the circle* (which see, under *circle*). (c) A certain proposition in probabilities. All these are by Abraham De Moivre (1667-1754).—**Desargues's theorem**. (a) The proposition that when a quadrilateral is inscribed in a conic every transversal meets the two pairs of opposite sides and the conic in three pairs of points in involution. (b) The proposition that if two triangles ABC and A'B'C' are so placed that the three straight lines through corresponding vertices meet in a point, then also the three points of intersection of corresponding sides (produced if necessary) lie in one straight line, and conversely. Both were discovered by Gérard Desargues (1593-1662).—**Descartes's theorem**. Same as *Descartes's rule of signs* (which see, under *rule*).—**Diophantus's theorem**, the proposition that no sum of three squares of integers is a sum of two such squares: given by a celebrated Greek arithmetician, probably of the third century.—**Dostor's theorem**, the proposition that in a plane triangle, where  $b, c$  are two of the sides,  $A$  the angle included between them, and  $\delta$  the inclination of the bisector of this angle to the side opposite,

$$\tan \delta = \frac{b+c}{b-c} \tan \frac{1}{2} A:$$

**Laurent's theorem**, a rule for the development of a function in series, expressed by the formula

$$f(x) = \sum_{n=0}^{\infty} c_n x^n + \sum_{n=1}^{\infty} \frac{c_{-n}}{x^n} \quad (1)$$

$$\frac{1}{2\pi i} \int_{\gamma} f(z) dz = \sum_{n=0}^{\infty} c_n x^n + \sum_{n=1}^{\infty} \frac{c_{-n}}{x^n}$$

where  $\gamma$  is a closed curve which is comprised between  $R$  and  $R'$ ;  $P$  is a point in the interior of the curve  $\gamma$ ;  $R$  and  $R'$  are the radii of the sphere and the plane triangle respectively. If the sides of a spherical triangle are very small compared with the radius of the sphere and a plane triangle be formed whose sides are equal to those of the spherical triangle, then each angle of the plane triangle is very nearly equal to the corresponding angle of the spherical triangle less one third of the spherical excess. This is near enough the basis of the proposition given by A. M. Legendre.

**Leibnitz's theorem**, a proposition concerning the successive differentials of a product; namely, that

$$d(uv) = u dv + v du$$

is valid to the same after development of  $(Du + Dv)^n$  by the binomial theorem, where  $Du$  denotes differentiation as if  $u$  were constant, and  $Dv$  differentiation as if  $v$  were constant.

**Lejeune-Dirichlet's theorem**, a proposition discovered by the German arithmetician P. G. Lejeune-Dirichlet (1805-59), to the effect that any irrational may be represented by a fraction whose denominator  $m$  is a whole number less than any given number  $n$  with an error less than  $1/n$ .

**Lexell's theorem**, one of two propositions expressing relations between the sides and angles of polygons, given in 1775 by A. J. Lexell (1740-84).—**Lhuillier's theorem**, the proposition that if  $a, b, c$  are the sides of a spherical triangle and  $E$  the spherical excess, then

$$\tan \frac{1}{2} E = \tan \frac{1}{2} (a+b+c) \tan \frac{1}{2} (a-b-c)$$

given by S. A. J. Lhuillier (1750-1840).—**Listing's theorem**, an equation between the numbers of points, lines, surfaces, and spaces, the cycloids, and the periphraxis of a figure in space; given in 1847 by J. B. Listing. Also called the *consistency theorem*.—**Lueroth's theorem**, the proposition that a Riemann's surface may in every case be so constructed that there shall be no cross-lines except between consecutive sheets.—**McClintock's theorem**, a very general expansion formula by E. McClintock.

**MacCullagh's theorem**, the proposition that a triangle being inscribed in an ellipse, the diameter of its circumscribed circle is equal to the product of the elliptic diameters parallel to the sides divided by the product of the axes; discovered by the Irish mathematician James MacCullagh (1809-47), and published in 1855.—**Maclaurin and Braikenridge's theorem**, the proposition that  $n$  fixed points and  $n-1$  fixed lines in one plane being given, the locus of the vertex of an  $n$ -gon whose other vertices lie on the fixed lines while its sides pass through the fixed points is a conic; given by Colin Maclaurin and G. Braikenridge in 1735.

**Maclaurin's general theorem concerning curves**, the proposition that if through any point  $O$  a line be drawn meeting a curve in  $n$  points, and at these points tangents be drawn, and if any other line through  $O$  cut the curve in  $R, R', R'',$  etc., and the system of  $n$  tangents in  $r, r', r'',$  etc., then the sum of the reciprocals of the lines  $OR$  is equal to the sum of the reciprocals of the lines  $Or$ .—**Maclaurin's theorem**, a formula of the differential calculus for the development of a function according to ascending powers of the variable; named after the Scotch mathematician Colin Maclaurin (1688-1746). It is an immediate corollary from Taylor's theorem, and is written

$$F(x) = F(0) + F'(0)x + \frac{1}{2!} F''(0)x^2 + \frac{1}{3!} F'''(0)x^3 + \dots$$

**Malus's theorem**, the law of double refraction; given in 1810 by E. L. Malus (1775-1812).—**Mannheim's theorem**. Same as *Schönemann's theorem* (which see, below).—**Mansion's theorem**. Same as *Smith's theorem* (which see, below).—**Matthew Stewart's theorem**, one of sixty-four geometrical propositions given in 1746 by the philosopher Dugald Stewart's father (1717-85), especially that if three straight lines drawn from a point  $O$  are cut by a fourth line in the points  $A, B, C$  in order, then  $(OA)(AB) + (OB)(AC) + (OC)(AB) = AB \cdot BC \cdot CA$ .

**Menelaus's theorem**, the proposition that if a triangle  $QRS$  is cut by a transversal in  $C, A$ , and  $B$ , the product of the segments  $QA, RB, SC$  is equal to the product of the segments  $SA, QB, RC$ ; given by the Greek geometer Menelaus, of the first century.—**Meusnier's theorem**, the proposition that the radius of curvature of an oblique section of a surface is equal to the radius of curvature of the normal section multiplied by the cosine of the inclination to the normal; given in 1775 by J. B. M. C. Meusnier de la Place (1754-93).

**Minding's theorem**, a certain proposition in statics.—**Miquel's theorem**, the proposition that if five straight lines and five parabolas are so drawn in a plane that each of the latter is touched by four of the former, and vice versa, then the foci of the parabolas lie on a circle; given by A. Miquel.—**Mittag-Leffler's theorem**, the proposition that if any series of isolated imaginary quantities,  $a, a', a'', \dots, a_n$ , etc., be given, and a corresponding series of functions,  $\psi, \psi', \psi'', \dots, \psi_n$ , etc., of the form

$$\psi_n = \sum_{m=1}^{\infty} A_m n(z - a_n)^{-m}$$

a monodromic function  $fz$  can always be found having for critical points  $a_0, a_1, \dots, a_n$ , etc., and such that

$$fz = \psi_0 + \psi_1 + \dots + \psi_n + \psi_{n+1} + \dots$$

$z$  being a function for which  $a_n$  is not a critical point; given by G. Mittag-Leffler.—**Multinomial theorem**. See *multinomial*.—**Newton's theorem**. (a) The proposition that if in the plane of a conic two lines be drawn through any point parallel to any two fixed axes, the ratio of the products of the segments is constant; given by Sir Isaac Newton (1642-1726) in 1711. (b) The proposition that the three diagonals of a quadrilateral circumscribed about a circle are all bisected by one diameter of the circle.—**Painvin's theorem**, the proposition that a tetrahedron

whose edges are all tangent to a sphere, has the property that the sum of the squares of the edges is equal to the sum of the squares of the distances from the center of the sphere to the vertices. This is a special case of a more general theorem due to Painvin. The theorem is also valid for a tetrahedron circumscribed about a sphere of any radius.

**Pappus's theorem**, a proposition in geometry, discovered by Pappus of Alexandria (c. 340 A.D.), to the effect that if two lines,  $AB$  and  $CD$ , intersect at  $P$ , and if  $A, B, C, D$  are points on these lines, then the lines  $AC, BD, AD, BC$  are concurrent. This is a special case of a more general theorem due to Pappus. The theorem is also valid for two lines in space.

**Parseval's theorem**, a proposition in mathematics, discovered by Marc-Antoine Parseval (1798-1841), to the effect that if  $f(x)$  and  $g(x)$  are two functions which are periodic with period  $2\pi$ , and if  $a_n$  and  $b_n$  are the Fourier coefficients of  $f(x)$  and  $g(x)$  respectively, then

$$\int_{-\pi}^{\pi} f(x) g(x) dx = \pi \sum_{n=1}^{\infty} a_n b_n$$

given by S. A. J. Lhuillier (1750-1840).—**Listing's theorem**, an equation between the numbers of points, lines, surfaces, and spaces, the cycloids, and the periphraxis of a figure in space; given in 1847 by J. B. Listing. Also called the *consistency theorem*.—**Lueroth's theorem**, the proposition that a Riemann's surface may in every case be so constructed that there shall be no cross-lines except between consecutive sheets.—**McClintock's theorem**, a very general expansion formula by E. **MacCullagh's theorem**, the proposition that a triangle being inscribed in an ellipse, the diameter of its circumscribed circle is equal to the product of the elliptic diameters parallel to the sides divided by the product of the axes; discovered by the Irish mathematician James MacCullagh (1809-47), and published in 1855.—**Maclaurin and Braikenridge's theorem**, the proposition that  $n$  fixed points and  $n-1$  fixed lines in one plane being given, the locus of the vertex of an  $n$ -gon whose other vertices lie on the fixed lines while its sides pass through the fixed points is a conic; given by Colin Maclaurin and G. Braikenridge in 1735.

**Maclaurin's general theorem concerning curves**, the proposition that if through any point  $O$  a line be drawn meeting a curve in  $n$  points, and at these points tangents be drawn, and if any other line through  $O$  cut the curve in  $R, R', R'',$  etc., and the system of  $n$  tangents in  $r, r', r'',$  etc., then the sum of the reciprocals of the lines  $OR$  is equal to the sum of the reciprocals of the lines  $Or$ .—**Maclaurin's theorem**, a formula of the differential calculus for the development of a function according to ascending powers of the variable; named after the Scotch mathematician Colin Maclaurin (1688-1746). It is an immediate corollary from Taylor's theorem, and is written

$$F(x) = F(0) + F'(0)x + \frac{1}{2!} F''(0)x^2 + \frac{1}{3!} F'''(0)x^3 + \dots$$

**Pappus's theorem**, a proposition in geometry, discovered by Pappus of Alexandria (c. 340 A.D.), to the effect that if two lines,  $AB$  and  $CD$ , intersect at  $P$ , and if  $A, B, C, D$  are points on these lines, then the lines  $AC, BD, AD, BC$  are concurrent. This is a special case of a more general theorem due to Pappus. The theorem is also valid for two lines in space.

**Parseval's theorem**, a proposition in mathematics, discovered by Marc-Antoine Parseval (1798-1841), to the effect that if  $f(x)$  and  $g(x)$  are two functions which are periodic with period  $2\pi$ , and if  $a_n$  and  $b_n$  are the Fourier coefficients of  $f(x)$  and  $g(x)$  respectively, then

$$\int_{-\pi}^{\pi} f(x) g(x) dx = \pi \sum_{n=1}^{\infty} a_n b_n$$

given by S. A. J. Lhuillier (1750-1840).—**Listing's theorem**, an equation between the numbers of points, lines, surfaces, and spaces, the cycloids, and the periphraxis of a figure in space; given in 1847 by J. B. Listing. Also called the *consistency theorem*.—**Lueroth's theorem**, the proposition that a Riemann's surface may in every case be so constructed that there shall be no cross-lines except between consecutive sheets.—**McClintock's theorem**, a very general expansion formula by E. McClintock.

(c) Consolation, coaxing, or quieting, as in hushing a child: as, *there! there! go to sleep.*  
**thereabout** (THär'a-bout'), *adv.* [*ME. thereabout*, *therabout*, *tharabout*; < *there* + *about*.] **1†.** About that; concerning that or it.  
Er that I go  
What wol ye dinc: I wol go *therabout*.  
*Chaucer*, *Summoner's Tale*, l. 129.

And they entered in, and found not the body. . . . And it came to pass, as they were much perplexed *thereabout*, behold, two men stood by them in shining garments.  
*Luke* xxiv. 4.

**2.** Near that place; in that neighborhood.  
He frayed, as he ferde, at freke that he met,  
If thay hade herde any karp of a knygt grene,  
In any grounde *tharabout*, of the grene chapel.  
*Sir Gawayne and the Green Knight* (E. E. T. S.), l. 703.

**3.** Near that number, quantity, degree, or time: as, a dozen or *thereabout*; two gallons or *thereabout*. In this and the last sense also *thereabouts*.  
There is a lake of fresh water three myles in compass, in the midst an Isle containing an acre or *thereabout*.  
*Quoted in Capt. John Smith's Works*, l. 106.

**thereabouts** (THär'a-bouts'), *adv.* [*thereabout* + *adv. gen. -s*.] Same as *thereabout*, 2 and 3.  
Some weeke or *thereabouts*.  
*Heywood*, *Fair Maid of the West* (Works, ed. 1874, II. 275).  
She could see the interior of the summer-house. . . .

*Hawthorne*, *Seven Gables*, xvi.

**thereafter** (THär-äf'tēr), *adv.* [*ME. thereafter*, *tharafter* (= OS. *tharafter* = OFries. *tharafter*, *derefter* = D. *daarachter* = Sw. Dan. *derefter*); < *there* + *after*.] **1†.** After that; after them.  
Wol he have pleynre or teres or I wende?  
I have ynogh, if he *therefter* sende.  
*Chaucer*, *Troilus*, iv. 861.

**2.** After that; afterward.  
And when thou hast thus don, departe for god, and for thy soule all thy tresour, for thou maiste not longe *thereafter* lyven.  
*Martin* (E. E. T. S.), i. 92.  
And all at once all round him rose in fire, . . .  
And presently *thereafter* follow'd calm.  
*Tennyson*, *Coming of Arthur*.

**3.** According to that; after that rule or way; after that sort or fashion; accordingly.  
The fear of the Lord is the beginning of wisdom; a good understanding have all they that do *thereafter*.  
*Book of Common Prayer*, Psalter, Ps. cxi. 10.  
Well perceiving which way the King enclin'd, every one *thereafter* shap'd his reply.  
*Milton*, *Hist. Eng.*, iv. 4†. According.

*Shal*. How a score of ewes now?  
*Sil*. *Thereafter* as they be; a score of good ewes may be worth ten pounds.  
*Shak.*, 2 *Hen. IV.*, iii. 2. 56.  
Tell me, if food were now before thee set,  
Wouldst thou not eat?—*Thereafter* as I like  
The giver, answer'd Jesus.  
*Milton*, *P. R.*, ii. 321.

**thereagain**, *adv.* [*ME. theragayn*, *therazen*, *theronzæn*; < *there* + *again*.] *Thereagainst*.  
Withouten hym we have no myght certeyn,  
If that hym list to stonden *theragayn*.  
*Chaucer*, *Friar's Tale*, l. 190.

**thereagainst** (THär'a-genst'), *adv.* [*ME. theragaynes*; < *there* + *against*.] Against it; in opposition to it.  
God teacheth us how fearful a thing it is to wound our conscience and do anything *thereagainst*.  
*J. Bradford*, *Letters* (Parker Soc., 1853), II. 125.  
Its ends are passed through the side pieces of the frame and tightened *thereagainst* by nuts.  
*C. T. Davis*, *Bricks and Tiles*, p. 229.

**thereamong** (THär'a-mung'), *adv.* [*ME. theramong*; < *there* + *among*.] Among them.  
Spread the slow smile thro' all her company.  
Three knights were *theramong*; and they too smiled.  
*Tennyson*, *Pelleas and Ettarre*.

**thereanent** (THär'a-nent'), *adv.* [*there* + *anent*.] Concerning that; regarding or respecting that matter. [Scotch.]  
**thereast** (THär-az'), *conj.* [*ME. thereas*, *theras*; < *there* + *as*.] Where.  
And *there* as I haue doone A-mys,  
Mercy, Ihesu, I wylle Amende.  
*Political Poems*, etc. (ed. Furnivall), p. 188.  
Whanne he was come *ther* as she was,  
Myrabell came.  
*Generydes* (E. E. T. S.), l. 796.

And the coast shall be for the remnant of the house of Judah, they shall tread thereupon. Zeph. ii. 7.

2. In consequence of that; by reason of that.

Here is also frequently growing a certain tall plant, whose stalks being all once couched with a red rind, is *thereupon* termed the red weed. Capt. John Smith, Works, II. 113.

3. Immediately after that; without delay; in sequence, but not necessarily in consequence.

The Hostages are delivered up to K. Edward, who brought them into England; and *thereupon* King John is honourably conducted to Calais.

Baker, Chronicles, p. 123.

He *thereupon* . . . without more addresses him adrift. R. Choute, Addresses, p. 406.

**Thereva** (ther'e-vä), *n.* [NL. (Latreille, 1796), irreg. < Gr. *θηρ*, hunt.] The typical genus of the *Therididae*, containing medium-sized slender dark-colored flies. About 20 species are known in North America.

**Therididae** (thê-rev'i-dê), *n. pl.* [NL. (Westwood, 1840), < *Therera* + *-idae*.] A family of predaceous flies resembling the *Asilidae*, but having the labium fleshy instead of horny. Their larvae live in earth and decaying wood, and are either carnivorous or herbivorous. The adult flies feed mainly upon other dipters, for which they lie in wait upon leaves and bushes. About 200 species are known. They are sometimes called *leaf-nosed flies*.

**therewhile** (thar-hwîl'), *adv.* [ME. *ther-while*, *ther-whyle*; < *there* + *while*.] 1. Meanwhile; the while; presently.

*Ther-while* entred in thre maydenes of right grete bewte, wher-of tweyne were neces vn-to Agrauidain. Merlin (E. E. T. S.), iii. 607.

2. For that time.

So have I doon in erthe, allas *ther-whyle*! That certes . . . he wol my gost exyle. Chaucer, A. B. C., l. 54.

**therewhiles** (thar-hwîlz'), *adv.* [ME. *ther-whiles*; as *ther-while* + *adv. gen. -es*.] During the time; while.

*Therwhiles* that thilke thinges ben idoone, they ne myhte nat ben undoon. Chaucer, Boethius, v. prose 6.

**therewith** (thar-wîth'), *adv.* [ME. *therewith* (= Sw. *dervid* = Dan. *derved*); as *there* + *with*.] 1. With that.

He gaue zow fyue wittes For to worshopen hym *ther-with*. Piers Plowman (C), ii. 16.

I have learned, in whatever state I am, *therewith* to be content. Phil. iv. 11.

2. Upon that; thereupon.

"I take the privilege, Mistress Ruth, of saluting you." . . . And *therewith* I bussed her well. R. D. Blackmore, Lorna Doone, l.

**therewithal** (thar-wîth-äl'), *adv.* [Formerly also *therewithall*; < *there* + *withal*.] 1. With that; therewith.

Knowing his voice, although not heard long sîn, She sudden was revived *therewithal*. Spencer, F. Q., VI. xi 44.

2. At the same time.

I bewayle mine own unworthynesse, and *therewithal* do set before mine eyes the lost time of my youth mispent. Gascoigne, Steele Glas (ed. Arber), Ep. Ded., p. 42. Well, give her that ring, and *therewithal* This letter. Shak., T. G. of V., iv. 4. 90.

3. In addition to that; besides; also.

He was somewhat red of Face, and broad Breasted; short of Body, and *therewithal* fat. Baker, Chronicles, p. 60. Strong thou art and goodly *therewithal*. Tennyson, Gareth and Lynette.

**therft**, *a.* See *tharf*<sup>2</sup>.

**therfrot**, **therfromt**, *adv.* Middle English forms of *therefro*, *therefrom*.

**thergaint**, *adv.* A Middle English form of *theregain*.

**theriac** (thê'ri-ak), *a. and n.* [I. *a.* < L. *theriacus*, < Gr. *θηριακος*, of or pertaining to wild beasts, < *θηριον*, a wild beast, a beast, animal, a poisonous animal, esp. a serpent, dim. (in form) of *θηρ*, a wild beast. II. *n.* < ME. *\*theriake*, *triake*, < OF. *theriaque*, F. *theriaque* = Pr. *triacca* = Sp. *triacca*, *triacca* = Pg. *theriaca* = It. *triacca*, < L. *theriaca*, ML. also *teriaca*, *triacca*, *tyriaca*, < Gr. *θηριακή* (sc. *ἀντίδοτος*), an antidote against the (poisonous) bites of wild beasts, esp. serpents (neut. pl. *θηριακά*, sc. *φάρμακα*, drugs so used), fem. of *θηριακός*, of or pertaining to wild beasts: see I. The same word, derived through OF. and ME., appears as *treacle*, q. v.] I. *a.* Same as *theriacal*.

II. *n.* A composition regarded as efficacious against the bites of poisonous animals; particularly, *theriaca Andromachi*, or Venice treacle, which is a compound of sixty to seventy or more drugs, prepared, pulverized, and reduced by the agency of honey to an electuary.

*Vyntariake* is also now to make.

What goodde dooth it? His wyne, aysel (vinegar), or grape, Or rynde of his scions yf that me take, The bite of every beast me shall escape.

Palladius, Husbandrie (E. E. T. S.), p. 100.

**theriaca** (thê'ri'-a-kä), *n.* Same as *theriac*.

**theriacal** (thê'ri'-a-käl), *a.* [ < *theriac* + *-al*.] Pertaining to *theriac*; medicinal.

The virtuous (bezoar) is taken from the beast that feedeth upon the mountains, where there are *theriacal* herbs. Bacon, Nat. Hist., § 493.

**therial** (thê'ri-äl), *a.* [ < *theri(ac)* + *-al*.] Same as *theriac*.

**therianthropic** (thê'ri-an-throp'ik), *a.* [ < Gr. *θηριον*, a wild beast, + *ἀνθρωπος*, man, + *-ic*.] Characterized by imagination or worship of superhuman beings represented as combining the forms of men and beasts.

Purified magical religions, in which animistic ideas still play a prominent part, but which have grown up to a *therianthropic* polytheism. Encyc. Brit., XX. 367.

**Theridiidae** (thê'ri-dî'-i-dê), *n. pl.* [NL., < *Theridium* + *-idae*.] A family of reticularian spiders, typified by the genus *Theridium*. Most of them spin webs consisting of irregularly intersecting threads. Many species are known, and 19 genera are represented in Europe alone.

**Theridium** (thê'ri-dî'-um), *n.* [NL. (Walekenaer, 1805), < Gr. *θηρίδιον*, a little animal.] A genus of spiders, typical of the family *Theridiidae*.

**Therina** (thê'ri-nä), *n.* [NL. (Hübner, 1816, as *Therinia*), < Gr. *θηρ*, a wild beast.] A genus of geometrid moths, of the subfamily *Ennominae*, having the wings broad and slightly angular and the male antennae plumose. The few species are ochreous or whitish in color. *T. feridiaria* is common throughout the northern United States and Canada, and occurs as far south as Georgia, where its larva feeds on the snowdrop-tree. In the north it feeds on spruce.

*Therina feridiaria*, natural size.

**theriodont** (thê'ri-ō-dont), *a. and n.* [Also *therodont*; < Gr. *θηριον*, a wild beast, + *ὄδων* (*ōdōn*) = E. *tooth*.] I. *a.* Having teeth like a mammal's, as a fossil reptile; specifically, of or pertaining to the order *Theriodontia*.

II. *n.* A member of the *Theriodontia*. **Theriodontia** (thê'ri-ō-don'shi-ä), *n. pl.* [NL.: see *theriodont*.] An order of extinct *Reptilia*, so called from the resemblance of the dentition in some respects to that of mammals. There was in some forms a large laniform canine tooth on each side of each jaw, separating defensible incisors from the molar teeth. The head somewhat resembled a turtle's; the vertebrae were amplexical, the limbs ambulatory with well-developed pectoral and pelvic arches; the humerus had a supracondylar foramen. Many genera have been described from the Permian and Triassic of Africa, as *Diaprodon*, *Cynodraco*, *Tyrinichus*, and *Galesaurus*. The original application of the term has been modified by subsequent discoveries; it has become an inexact synonym of *Theromorpha*, and has been used instead of *Pelycosauria*. Also *Theriodonta* and *Therodontia*. See cut under *Diaprodon*.

**theriomancy** (thê'ri-ō-man-si), *n.* [ < Gr. *θηριον*, a wild beast, + *μαντεία*, divination.] Divination by observation of beasts.

**Theriomorpha** (thê'ri-ō-môr'fä), *n. pl.* [NL., neut. pl. of *theriomorphus*: see *theriomorphous*.] In Owen's system of classification, one of three suborders of *Batrachia*, contrasted with *Ophiomorpha* and *Ichthyomorpha*. See *Theromorpha*. Also *Therimorpha*.

**theriomorphic** (thê'ri-ō-môr'fik), *a.* [ < Gr. *θηριον*, a wild beast, + *μορφή*, form.] Having the form of a wild beast. Encyc. Brit., XVII. 150. [Rare.]

**theriomorphous** (thê'ri-ō-môr'fus), *a.* [ < NL. *theriomorphus*, < Gr. *θηρίομορφος*, having the form of a beast, < *θηριον*, a wild beast, + *μορφή*, form.] 1. Beast-like; resembling an ordinary quadruped or mammal: as, the *theriomorphous* reptiles of the Permian period.—2. Specifically, of or pertaining to the *Theriomorpha*.

**theriopod** (thê'ri-ō-pod), *a. and n.* Same as *theropod*.

**theriotomy** (thê'ri-ot'ō-mi), *n.* [ < Gr. *θηριον*, a wild beast, + *-τομία*, < *τέμνειν*, *ταμειν*, cut.] The dissection of beasts; the anatomy of other animals than man; zootomy.

**therlt**, *v.* A Middle English form of *thirl*<sup>1</sup>.

**therm**<sup>1</sup>, *n.* See *tharm*.

**therm**<sup>2</sup> (thêrm), *n.* [In its old use, usually in plural *thermes*, < OF. (and F.) *thermes* = Sp. *termas* = Pg. *termas* = It. *terme*, pl., < L. *thermæ*, pl., < Gr. *θερμαι*, hot baths, pl. of *θερμη*, heat, < *θερμός*, warm (= L. *formus*, warm), < *θερεν*, make hot or dry, burn.] 1. A hot bath; by extension, any bath or pool.

O clear *Therms*,

If so your Waves be cold, what is it warms, Nay, burns my hart?

Sylvester, tr. of Du Bartas's Weeks, ii., The Trophies.

2. In physics, a thermal unit, the water-gram-degree or (small) calory, the amount of heat required to raise one gram of water at its maximum density through one degree centigrade.

**thermæ** (thêr'mê), *n. pl.* [L., < Gr. *θερμαι*, hot baths, pl. of *θερμη*, heat: see *therm*<sup>2</sup>.] Hot springs or hot baths; particularly, one of the public bathing-establishments of the ancient Greeks and Romans, which were universally patronized, and of which abundant remains survive, the chief of them in Rome. The ancient baths were originally of the simplest character, but with the advance of time became, after the Periclean age, more and more luxurious. Among the Romans their use did not become general until toward the close of the republic, but was a popular passion throughout the empire. In their fully developed form the Roman *thermæ* were of great size and lavish magnificence, including dressing-rooms, reservoirs, basins of hot and cold water, hot-air chambers, courts for exercising, gardens for rest, lecture-rooms, libraries, and every other elaboration of architecture and of luxury. See plan under *bath*<sup>1</sup>.

**thermal** (thêr'mäl), *a.* [= F. *thermal* = Sp. *termal* = Pg. *termal* = It. *termale*, < NL. *\*thermalis*, < Gr. *θερμη*, heat, pl. *θερμαι*, hot baths: see *therm*<sup>2</sup>.] 1. Of or pertaining to heat.—2. Of or pertaining to *therma*.

Next in splendour to the amphitheatres of the Romans were their great *thermal* establishments; in size they were perhaps even more remarkable, and their erection must certainly have been more costly.

J. Fergusson, Hist. Arch., I. 331.

**Thermal alarm**, a name applied to a variety of signals or alarms for indicating a rise in temperature, as a *hot-bearing alarm*, a *temperature alarm*, or a *thermo-electric alarm* (see *thermo-electric*).—**Thermal analysis**, the analysis of the radiation from any source, as the sun or an electric light, with a view to determining the relative intensity of the luminous and non-luminous rays or the distribution of heat in different parts of the spectrum.

**Thermal capacity, chemistry, equilibrium.** See the nouns.—**Thermal equator**, the line along which the greatest heat occurs on the earth's surface. It travels northward and southward through the year with the motion of the sun, but, on account of the influence of the larger land-masses in the northern hemisphere, it never moves more than a short distance into the southern hemisphere except over Australia.—**Thermal springs, thermal waters**, hot springs. See *spring*, 7.—**Thermal unit**. See *unit*.

**thermally** (thêr'mäl-i), *adv.* In a thermal manner; with reference to heat.

**therm-ammeter** (thêr-mam'e-têr), *n.* [ < Gr. *θερμη*, heat, + E. *ammeter*.] An instrument for measuring the strength of an electric current (in amperes) by means of the heat which it generates.

**thermantidote** (thêr-man'ti-dôt), *n.* [ < Gr. *θερμη*, heat, + *ἀντίδοτος*, antidote: see *antidote*.] An apparatus used in India for cooling the air. It consists of a revolving wheel fitted to a window, and usually inclosed in wet tatties, through which the air is forced.

Low and heavy punkahs swing overhead; a sweet breathing of wet khaskhas grass comes out of the *thermantidote*.

G. A. Mackay, Sir Ali Baba, p. 112. (Yule and Burnell.)

**thermatology** (thêr-mä-tol'ō-jî), *n.* [ < Gr. *θερμη*, heat, + *-λογία*, < *λέγειν*, speak: see *-ology*.] In med., the science of the treatment of disease by heat, and specifically by thermal mineral waters; balneology.

**Thermesia** (thêr-mê'si-ä), *n.* [NL. (Hübner, 1816), < Gr. *θερμη*, heat: see *therm*.] A genus of noctuid moths, typical of the family *Thermesiidae*, comprising a number of slender geometrid-form species, mostly from tropical regions.

**Thermesiidae** (thêr-mê-si'-i-dê), *n. pl.* [NL. (Guenée, 1852), < *Thermesia* + *-idae*.] A large family of noctuid moths of the pseudodeltoid group, distinguished mainly by their non-angular wings. About 40 genera besides *Thermesia* have been placed in this family, which is represented in all parts of the globe except Europe.

**thermograph** (thêr-met'rō-gräf), *n.* Same as *thermometrograph*.

**thermic** (thêr'mik), *a.* [= F. *thermique*, < Gr. *θερμη*, heat: see *therm*<sup>2</sup>.] Of or relating to heat; thermal: as, *thermic* conditions.—**Thermic anomaly**. See *anomaly*.—**Thermic balance**. Same as *bolometer*.—**Thermic fever**, sunstroke.

**thermically** (thêr'mi-käl-i), *adv.* In relation to or as affected by heat; in a thermic manner. [Rare.]

thermally

**thermally** (*thér'mô-lî*), *adv.* [*Gr. θερμῶς, heat, + E. -ly.*] In or by heat; by the action of heat. — *Thermally* is used in the sense of *thermally* in the following examples: — *Thermally* the heat of the sun is the cause of the growth of plants. — *Thermally* the heat of the sun is the cause of the growth of plants.

**thermo battery** (*thér'mô-bat-er-ee*), *n.* [*Gr. θερμότης, heat, + E. -battery.*] A thermopile.

**thermocautery** (*thér'mô-kâ'tér-i*), *n.* [*Gr. θερμότης, heat, + E. -cautery.*] A form of actual cautery in which the heat is produced by blowing a stream of gas through a platinum or other metal tube, the point of contact.

**thermochemical** (*thér'mô-kem'îs-trî*), *a.* [*Gr. θερμότης, heat, + E. -chemical.*] Of or pertaining to the chemical phenomena as connected with the absorption or evolution of heat.

**thermochemist** (*thér'mô-kem'îst*), *n.* [*Gr. θερμότης, heat, + E. -chemist.*] One who is versed in the laws and phenomena of thermochemistry. — *Amos*, XIII, 165.

**thermochemistry** (*thér'mô-kem'îs-trî*), *n.* [*Gr. θερμότης, heat, + E. -chemistry.*] That branch of chemistry which includes all the various phenomena existing between chemical action and heat.

**thermo-chrose** (*thér'mô-krôs*), *n.* Same as

**thermo-chrosy** (*thér'mô-krôs-ee*), *n.* [*Gr. θερμότης, heat, + E. -chrosy.*] The property possessed by certain substances of being decomposed, like light, of rays of different refrangibilities, varying in the amount of heat evolved through the decomposition. — *Thermo-chrosy* is the decomposition of a substance into two or more parts, the heat evolved being proportional to the amount of substance decomposed. — *Thermo-chrosy* is the decomposition of a substance into two or more parts, the heat evolved being proportional to the amount of substance decomposed.

**thermo couple** (*thér'mô-kup-ple*), *n.* [*Gr. θερμότης, heat, + E. -couple.*] A thermoelectric couple. See *thermo-electricity*. *Philos. Mag.*, 5th ser., XXIX, 141.

**thermo-current** (*thér'mô-kur'ent*), *n.* [*Gr. θερμότης, heat, + E. -current.*] The current, as electricity, set up by heating a compound circuit consisting of two or more different metals.

**thermod** (*thér'mô*), *adj.* [*Gr. θερμότης, heat, + E. -d.*] Pertaining to heat. — *Thermod* is used in the following examples: — *Thermod* is the property of a substance of being decomposed, like light, of rays of different refrangibilities, varying in the amount of heat evolved through the decomposition.

**thermodynamic** (*thér'mô-di-nam'îk-s*), *a.* [*Gr. θερμότης, heat, + E. -dynamic.*] Pertaining to the laws of heat and the forces which it produces.

**thermodynamic function** (*thér'mô-di-nam'îk-s*), *n.* [*Gr. θερμότης, heat, + E. -dynamic.*] A function which is a measure of the heat and the forces which it produces.

**thermodynamical** (*thér'mô-di-nam'îk-s*), *a.* [*Gr. θερμότης, heat, + E. -dynamical.*] Pertaining to the laws of heat and the forces which it produces.

**thermodynamically** (*thér'mô-di-nam'îk-s*), *adv.* [*Gr. θερμότης, heat, + E. -dynamically.*] In or by heat and the forces which it produces.

**thermodynamist** (*thér'mô-di-nam'îk-s*), *n.* [*Gr. θερμότης, heat, + E. -dynamist.*] One who is versed in the laws of heat and the forces which it produces.

**thermodynamometer** (*thér'mô-di-nam'îk-s*), *n.* [*Gr. θερμότης, heat, + E. -dynamometer.*] An instrument for measuring the heat and the forces which it produces.

**thermodynamics** (*thér'mô-di-nam'îks*), *n.* [*Pl. θερμodynamίς, heat, + E. -dynamics.*] The science which treats of the laws of heat and the forces which it produces. — *Thermodynamics* is the science which treats of the laws of heat and the forces which it produces.

**Laws of thermodynamics** (*thér'mô-di-nam'îks*), *n.* [*Pl. θερμodynamίς, heat, + E. -dynamics.*] The laws which govern the action of heat and the forces which it produces. — *Laws of thermodynamics* are the laws which govern the action of heat and the forces which it produces.

**The principle of the conservation of energy when applied to heat** (*thér'mô-di-nam'îks*), *n.* [*Pl. θερμodynamίς, heat, + E. -dynamics.*] The principle which states that the amount of heat and the forces which it produces is constant. — *The principle of the conservation of energy when applied to heat* is the principle which states that the amount of heat and the forces which it produces is constant.

**thermo-electric** (*thér'mô-ê-lek'trîk*), *a.* [*Gr. θερμότης, heat, + E. -electric.*] Pertaining to thermo-electricity; as, *thermo-electric currents*. — **Thermo-electric alarm**, an electrical apparatus designed to indicate the rise of temperature beyond a certain desired point, as, for instance, to show when the bearings of shaftings are overheated, or when a room is too warm from overheating or in danger from fire. — **Thermo-electric couple**, See *thermo-electricity*. — **Thermo-electric force**, the electromotive force produced by a thermo-electric couple, or thermopile. — **Thermo-electric height**. See the quotation.

**thermo-electrically** (*thér'mô-ê-lek'trîk-s*), *adv.* [*Gr. θερμότης, heat, + E. -electrically.*] In accordance with the laws of thermo-electricity. — *Thermo-electrically* is used in the following examples: — *Thermo-electrically* the heat of the sun is the cause of the growth of plants.

**thermo-electric multiplier**, the combination of a thermopile and a galvanometer as a set of apparatus for the measurement of differences of temperature of radiant heat, etc. — **Thermo-electric series**. See *thermo-electricity*.

**thermo-electricity** (*thér'mô-ê-lek'trîs'î-tî*), *n.* [*Gr. θερμότης, heat, + E. -electricity.*] The electric current produced in a circuit of two or more dissimilar metals, or in a circuit of one metal different parts of which are in dissimilar physical states, when one of the points of union is heated or cooled relatively to the remainder of the circuit; also, the branch of electrical science which treats of electric currents so produced. If, for example, a bar of bismuth and one of antimony are soldered together and the point of union is heated while the other extremities are connected by a wire, it is found that an electric current passes from bismuth to antimony, and through the wire from antimony to bismuth. Such a pair of metal bars is called a *thermo-electric couple* or *pair*, and it is found that the thermo-electromotive force, as it is called, is, for a circuit composed of the same pair of metals, proportional to the difference of temperature between the hot and the cold junction. It is found, further, that it differs for different metals; and the list of the metals, arranged in order according to the direction of the current generated, is called the *thermo-electric series* (analogous to the electromotive series in voltaic electricity); for example, bismuth, lead, zinc, copper, iron, antimony. If more than one couple are employed, the whole electromotive force is the sum of the separate forces for the successive junctions. A number of couples of the same two metals joined together form a *thermo-electric battery*, or *thermo-electric pile*, and the use of a set of thermopiles in a circuit is called *thermo-electricity*. When connected with a delicate galvanometer, the thermopile can be used for measuring small differences of temperature, as especially small differences in radiant heat; for this purpose one end of the thermopile is generally coated with lampblack so as to absorb the heat incident upon it, and a cone of polished brass may be added to collect more heat. Thermo-electric couples give a comparatively low electromotive force, which has, however, great constancy if the two sets of junctions are kept at a uniform temperature. What is called the *Peltier phenomenon* or *effect* is the rise or fall of temperature at the junction of two different metals due to the passage of an electric current from one metal to the other across the junction. This thermal effect is distinct from the rise of temperature due to the electrical resistance of the metals, and changes sign when the direction of the current across the junction is changed.

**thermo-graph** (*thér'mô-gráf*), *n.* [*Gr. θερμότης, heat, + E. -graph.*] An automatic self-registering thermometer. A variety of forms have been used, involving different principles and methods. (a) In the photographic method mercurial thermometers are used in the following manner: near the top of the mercury in the stem an air-bubble separates the column; by the action of a system of lenses the light from a lamp passes through the air-bubble, and throws the image of the bubble on the surface of a revolving cylinder upon which is wrapped a sheet of sensitized paper; no other light except the ray passing through the bubble enters the dark chamber containing the cylinder, and a photographic registration is therefore made of the oscillations of the mercury-column. (b) In the metallic thermograph the actuating instrument is a metallic thermometer whose indications are made to yield any desired degree of sensitivity by a lever or levers which give motion to a recording pen. To an iron frame (see the cut) are fastened the thermometer-strips, the clock, the adjustments of the recording lever, and the perforated protecting case. The clock rotates a metallic disk once a week. A paper chart is fastened to the disk and rotates with it. The chart is divided into fourteen equal spaces, the dark spaces indicating night-time. These spaces are subdivided to indicate hours. The recording lever traces with an ink pen a line upon the paper chart, according as the metallic thermometer bends as affected by the heat or cold. These spaces are subdivided to indicate hours. The recording lever traces with an ink pen a line upon the paper chart, according as the metallic thermometer bends as affected by the heat or cold. Thermo-electric couples give a comparatively low electromotive force, which has, however, great constancy if the two sets of junctions are kept at a uniform temperature. What is called the *Peltier phenomenon* or *effect* is the rise or fall of temperature at the junction of two different metals due to the passage of an electric current from one metal to the other across the junction. This thermal effect is distinct from the rise of temperature due to the electrical resistance of the metals, and changes sign when the direction of the current across the junction is changed.

thermometer is composed of two strips of metal of different expansibilities. The curve thus traced over the concentric lines of the paper chart which indicate degrees

enables the temperature at any time during the week and the rate of variation to be accurately determined. (c) In the electric contact method a mercurial thermometer having a large bulb and an enlarged stem has the upper end of the tube left open, and a fine platinum wire is made to descend in the tube by clockwork at regular intervals. When the wire comes in contact with the top of the mercury, an electric circuit is closed, and the distance is registered which the platinum wire has descended in order to touch the mercury surface. This method is used in the instruments of Hough and Secchi. (d) In the manometer thermograph the actuating instrument is an air or gas thermometer. The vessel containing air is connected by a fine tube with a registering apparatus, of which various forms have been devised. Changes of temperature produce changes of pressure in the enclosed gas, and these changes of pressure are the subject of measurement and registration. The scale of the thermogram is evaluated in degrees either by a theoretical formula or by actual comparisons. The instruments of Schreiber and Sprung belong to this class. (e) A still further form, not belonging strictly to any of the preceding classes, is illustrated by the Richard thermograph. Its thermometer is a Bourdon tube filled with alcohol, to which is attached a lever carrying the registering pen. With a rise of temperature the differential expansion produces a change of shape of the tube, accompanied by a corresponding change in position of the lever and registering pen. A high degree of sensitiveness and consequent accuracy is attained by this instrument.

An instrument by which the temperatures (see *temperature* and *thermometry*) of bodies are ascertained, founded on the common property belonging to all bodies, with very few exceptions, of expanding with heat, the rate or quantity of expansion being supposed to be proportional to the degree of heat applied, and hence indicating that degree. The expanding substance may be a liquid, as mercury or alcohol; a gas, as in the air-thermometer (which see); or a solid, as in the metallic thermometer (see below). The ordinary thermometer consists of a slender glass tube with a small bore, containing in general mercury or alcohol; this expands or contracts by variations in the temperature of the atmosphere, or on the instrument being brought into contact with any other body, or being immersed in a liquid or gas which is to be examined, and the

state of the atmosphere, the body, liquid, or gas, with regard to heat, is indicated by a scale either applied to the tube or engraved on its exterior surface. The thermometer was invented by Galileo at some date prior to 1611, and was developed by his pupils through the first thirty years of the seventeenth century. In 1641 the Florentine philosophers were using a thermometer consisting of a bulb filled with alcohol, with sealed stem, and graduated on the stem according to an arbitrary scale, of which the divisions were, approximately, fiftieths of the volume of the bulb. Sagredo adopted a scale of 360 divisions, like the graduation of a circle, and fixed the application of the word *degree* to the thermometric spaces. No means of comparing observations made with thermometers containing different fluids and of different manufacture were possible until Fahrenheit adopted a graduation between two fixed temperatures. For the zero of his scale Fahrenheit adopted the lowest temperature observed by him in the winter of 1709, and for his upper fixed point he took the temperature of the body, and marked it 96°. By this system of numeration the temperature of melting ice became 32°, and the boiling-point of water 212°. This is the scale of the *Fahrenheit thermometer* commonly used by English-speaking peoples and in Holland. De l'Isle, about 1730, first used the melting-point of ice and the boiling-point of water as the fixed points of the thermometric scale, and they gradually came to be universally accepted. In Réaumur's thermometer (formerly largely used in Germany and Russia, but now being superseded) the space between the freezing-point and the boiling-point of water is divided into 80 equal parts, the zero being at freezing. In the *centigrade thermometer*, used widely throughout Europe, and very extensively in scientific investigations everywhere, the space between the freezing-point and the boiling-point of water is divided into 100 equal parts or degrees, the freezing-point being zero and the boiling-point 100°. The absolute zero of temperature is the logical beginning of a thermometric scale, but since thermometric temperatures are primarily relative, the zero-point is arbitrary, and the Fahrenheit, Réaumur, and centigrade thermometers present the different systems of numeration that have come into use. The following formulae give the conversion of these scales: Let *F*, *R*, and *C* represent any temperature as given by the three scales respectively, then  $F = R \times \frac{9}{5} + 32 = C \times \frac{9}{5} + 32$ . The standard mercurial thermometer consists of a slender tube with capillary bore hermetically sealed at the top, and terminating at its lower end in a bulb filled with mercury. The melting-point of ice and the boiling-point of water at standard pressure are determined on the tube, and the intermediate space is subdivided into equal parts. The graduations are extended above and below the fiducial points, and finally the tube is calibrated, and outstanding errors of the graduation are determined. Ordinary thermometers covering any desired small range of temperature are graduated by comparison with a standard. For extreme degrees of cold, thermometers filled with spirit of wine must be employed, as no degree of cold known is capable of freezing that liquid, whereas mercury freezes at about 39° below zero on the Fahrenheit scale. On the other hand, spirit of wine is not adapted to high temperatures, as it is soon converted into vapor, whereas mercury does not boil till its temperature is raised to 660° F. Mercury thermometers designed for measuring temperatures up to 400° C. (752° F.) are made by filling the stem and an upper bulb above the stem with nitrogen. The mercury expands against the increasing pressure of the nitrogen, and its boiling-point is raised thereby. Temperatures higher than this limit are usually obtained with air- or steam-thermometers and other forms of pyrometer (which see). The air- or gas-thermometer consists of a quantity of pure dry air or gas contained in a reservoir such that its change of volume or of pressure with varying temperatures may be properly observed. Two forms have been used—(1) the *constant-pressure thermometer*, in which the gas is maintained at constant pressure and its varying volume measured; (2) the *constant-volume thermometer*, in which the increase of pressure under constant volume is measured. This is the ordinary form in which the instrument is used. For accuracy it is decidedly superior to the mercury thermometer, and has been adopted as the ultimate standard to which all other thermometers are referred. In the *metallic thermometer*, as generally constructed, temperature is measured by the change in form of composite metal bars, due to their differential expansion (hence more properly called *bimetallic thermometer*). One of the early forms was that of Bréguet, which consists of a fine spiral bar made of platinum, gold, and silver. One end of the spiral is fixed, the other end being connected with a simple mechanical device to convert the curving or torsion of the bar under changes of temperature into the movement of an index over a dial having a scale marked in a circle upon it. The same principle, with variations in the mechanical application, is now much used in the construction of thermographs. For indicating very slight variations of temperature a thermo-electric junction or the bolometer is employed.

The thermometer discovers all the small unperceivable variations in the coldness of the air.

**Aspiration thermometer**, one in which the temperature of the air is obtained by drawing air in with a ventilating-fan through a tube, and causing it to flow rapidly over a thermometer, or over wet- and dry-bulb thermometers, placed therein. This method, first described by Kell in 1837, has been followed and developed in the instrument of Assmann.—**Attached thermometer**, one fastened to the tube of a barometer for indicating the temperature of its mercury.—**Axilla thermometer**. See *axilla*.—**Bi-metal thermometer**, a thermometer composed of a bar of two metals or alloys, having different rates of expansion, brazed together and sometimes bent into the form of a spiral. The compound bar is fastened rigidly at one end, the other end being connected with a simple mechanical device to convert the curving or torsion of the bar under changes of temperature into the

movement of an index over a dial having a scale marked upon it.—**Celsius thermometer**, a thermometer introduced by Celsius in 1736 and used to a limited extent, in which the zero of the scale was placed at the temperature of boiling water and 100 at the temperature of melting ice, plus (+) and minus (−) degrees in atmospheric temperatures being thus avoided. This was a centigrade scale, but not that of the modern centigrade thermometer, which was introduced by Linnaeus.—**Centigrade thermometer**. See *def. 1.*—**Chromatic thermometer**, an arrangement of glass plates, devised by Sir David Brewster, exhibiting the difference between their temperature and that of an object with which they are brought in contact by the different hues of the polarized light produced in the plates.—**Chromo thermometer**, an instrument used to raise the temperature of petroleum at the rate of 20° in fifteen minutes: used for purposes of testing.—**Clinical thermometer**, a small maximum self-registering mercurial thermometer used in obtaining the temperature of the body. In its usual form the range of scale is 25° F., or less, and graduation is carried to one fifth of a degree. A very sensitive clinical instrument, called the *half-minute thermometer*, has a bulb of small diameter and an extremely fine bore, in which the mercury is rendered visible by a lens-fronted stem.—**Conjugate thermometer**. Same as *differential thermometer*.—**Deep-sea thermometer**, a registering thermometer used to ascertain the temperature of the sea at any depth. The instrument consists of the thermometer proper set in a metallic frame. The form of thermometer now used is that of Negretti and Zambra. It consists of a mercury thermometer whose stem, of wide bore, terminates in a small pyriform sac. The stem is contracted and contorted just above the bulb, and when the instrument is inverted, the mercury-column breaks at this point, and flows down into the tube, which is graduated in the inverted position. An overflow-cell prevents mercury from the bulb from entering the stem if there is a rise of temperature. To protect it from pressure, the thermometer is hermetically sealed in a strong glass tube, the part of which surrounding the bulb contains a quantity of mercury secured by a ring of india-rubber cement. By means of mechanism in its frame, the thermometer is made to turn over at any desired depth, and the temperature at the instant of inversion remains recorded in the tube until the instrument is read and reset. For small depths, the instrument is reversed by a weight which is sent down the sounding-line. For great depths, the reversal is effected by means of the revolution of a small propeller, which is set in motion by the water so soon as the thermometer is drawn upward.—**Dewar's air-thermometer**, a form of air-thermometer used for measuring very high temperatures—the thermometric substance, the air, being contained in a porcelain bulb capable of resisting the heat of a furnace.—**Differential thermometer**, an instrument for measuring very small differences of temperature. The earliest form, invented and named by Sir John Leslie, consists of a U-shaped tube, each end of which terminates in a bulb. The bend of the tube contains a colored liquid; the upper parts of the tube and the bulbs are filled with confined air. When one of the bulbs is at a higher temperature than the other, the liquid in the adjacent stem is driven down by the higher pressure, and rises in the opposite branch. The difference in height is proportional to the difference in temperature of the two bulbs. The instrument is now used only as a thermoscope.—**Earth-thermometer**, one designed for ascertaining the temperature of the ground at different depths. Three types have been employed—(a) a thermometer of large bulb and very long stem, so that, although buried many feet in the ground, the top of the liquid column extends above the surface (temperatures at depths of twenty feet have been obtained by this); (b) an ordinary thermometer inclosed in a wooden tube and other non-conducting packings, which can be sunk to any desired depth, the temperature of the thermometer being assumed not to change during the short time required to draw it up and make the reading; (c) (1) thermoelectric junctions; (2) the electrical-resistance method.—**Electric thermometer**. (a) An apparatus for measuring small differences of temperature, based on the action of a thermopile. See *thermo-electricity*. (b) A thermometer whose action is based on the variation of electrical resistance produced by changes of temperature in a metallic conductor. The difference in the resistance between a current passing through a conductor of known and one of unknown temperature gives the difference of temperature between the two. Also called *differential-resistance thermometer*. The most delicate form in which the principle is applied is the bolometer.—**Fahrenheit thermometer**. See *def. 1.*—**Kinnersley's thermometer**, an apparatus sometimes used to illustrate the sudden expansion of air through which a discharge of high-potential electricity has taken place. It consists of two connected tubes partially filled with water; the larger one contains above the water-surface two knobs, and when the spark is formed between them the water is forced up to a higher level in the smaller tube.—**Maximum thermometer**, one that registers the maximum temperature to which it is exposed. Three types have come into use in connection with the mercurial thermometer. (a) The Rutherford maximum has a light movable steel index at the top of the mercurial column. The tube is placed horizontal, and as the temperature rises the mercury pushes the index before it. When the temperature falls, the index is left in situ to mark the position of the maximum. (b) In Phillips's maximum, a small bubble of air makes a break in the upper part of the mercurial column. When the temperature begins to fall, the detached portion of the column is left behind to register the highest temperature. (c) The Negretti maximum has the bore of the tube partly closed by a constriction just above the bulb. In rising temperatures mercury is forced from the bulb past the constriction, but when the temperature falls the mercury cannot readily return to the bulb, and the top of the mercurial column indicates the maximum temperature. In order to reset the thermometer to the current air-temperature, the mercury is forced back into the bulb by whirling the instrument on a swing-pin. This form of maximum is used at the stations of the United States Weather Bureau.—**Mercury thermometer**. See *def. 1.*—**Metallic thermometer**. A telephone transmitter in which a red-hot wire forming part of the primary circuit of an induction-coil has its resistance changed by the sound-vibrations, thus inducing currents in the secondary which are sent to line.

**thermotensile** (thér-mō-tén'sil), *a.* [*< Gr. θερμ., heat, + E. tensile.*] Relating to tensile force as affected by changes of temperature. Elaborate thermotensile experiments on iron and steel, especially with reference to boiler-iron, have been made, and their results tabulated, this being a matter of great practical importance.

**thermotic** (thér-mot'ik), *a.* [*< Gr. θερμ., heat, + -otic.*] Of or relating to heat; resulting from or dependent on heat.

In the spectrum of a flint-glass prism the apex of the *thermotic curve*—that is to say, the place of greatest heat-effect—is situated . . . outside the apparent spectrum in the ultra-red region. *Lommel, Light* (trans.), p. 201.

**thermotical** (thér-mot'ik-al), *a.* [*< thermotic + -al.*] Same as *thermotic*. *Whewell, Hist. Induct. Sciences*, x. 1, § 4.

**thermotics** (thér-mot'iks), *n.* [*Pl. of thermotic (see -ics).*] The science of heat.

In the History of the Sciences, I have named it [the Science of Heat] *Thermotics*, which appears to me to agree better with the analogy of the names of other corresponding sciences, Acoustics and Optics.

*Whewell, Philos. Induct. Sciences*, I. lxxii.

**thermotropic** (thér-mō-trop'ik), *a.* [*< Gr. θερμ., heat, + τροπικός, < τρέπειν, turn: see tropic.*] In *bot.*, exhibiting or characterized by thermotropism.

Curvatures dependent upon temperature are called *thermotropic*. *Goodale, Physiol. Bot.*, p. 394.

**thermotropism** (thér-mō-t'rop'izm), *n.* [*< thermotrop'ic + -ism.*] In *bot.*, the phenomenon of curvature produced in a growing plant-organ by changes of temperature. Organs which curve toward the source of heat are called *positively thermotropic*, and those which curve away from the source of heat, *negatively thermotropic*.

**thermotype** (thér'mō-tīp), *n.* [*< Gr. θερμ., heat, + τύπος, impression: see type.*] A picture-impression, as of a slice of wood, obtained by first wetting the object with dilute acid, as sulphuric or hydrochloric, then printing it, and afterward developing the impression by heat.

**thermotypy** (thér'mō-tī-pi), *n.* [*As thermotype + -y.*] The act or process of producing a thermotype.

**thernet**, *n.* [*ME., also tarne, < Icel. therna = Sw. tärna = Dan. terne = OHG. thiarna, diorna, MHG. dierne, dirne, G. dirne, a girl.*] A girl; a wench.

As sengle knave and sengle tarne,  
Whan they synne togedyr gerne.

*MS. Harl. 1701, f. 49. (Halliwell.)*

**therodont** (thér-rō-dont), *a. and n.* Same as *therodont*.

**Therodontia** (thér-rō-don'shi-ä), *n. pl.* [*NL.*] Same as *Theriodontia*.

**theroid** (thér'roid), *a.* [*< Gr. θήρ (θήρ-), a wild beast, + εἶδος, form.*] Having animal propensities or characteristics.

The animal mind of the *theroid* idiot is accompanied by appropriate animal peculiarities of body.

*Nineteenth Century*, Sept., 1886, p. 353.

**therologic** (thér-rō-loj'ik), *a.* [*< therolog-y + -ic.*] Pertaining to therology.

**therological** (thér-rō-loj'ik-al), *a.* [*< therologic + -al.*] Same as *therologic*.

**therologist** (thér-rol'ō-jist), *n.* [*< therolog-y + -ist.*] A student of the *Mammalia*; a mammalogist. *The Academy*, Aug. 25, 1877.

**therology** (thér-rol'ō-jī), *n.* [*< Gr. θήρ (θήρ-), a wild beast, + λογία, < λέγειν, speak: see -ology.*] The science of mammals; mammalogy or mastology; substituted lately on the ground that *mammalogy* is a hybrid word.

**theromorph** (thér-rō-mōrf), *n.* One of the *Theromorpha*.

**Theromorpha** (thér-rō-mōrfä), *n. pl.* [*NL., < Gr. θήρ (θήρ-), a wild beast, + μορφή, form.*] An order of fossil reptiles, of the Permian period, so called from certain resemblances they present to mammals. The quadrate bone is fixed; the ribs are two-headed; the precoracoid is present, and the coracoid is reduced in size, with free extremity; the vertebrae are amphicelous, and the pubic bones are entirely anterior to the ischia; and there is no obturator foramen. Some of the *Theromorpha* were made known by Owen under the name *Theriodontia*. These remains were from Cape Colony, but the *Theromorpha* have mostly been studied by Cope from remains found in the Permian of Texas. The order is divided by Cope into *Anomodontia* and *Pelycosauria*. See these words. Also, rarely, *Theromora*.

**theromorpha** (thér-rō-mōrfä), *n.* [*NL., < Gr. θήρ (θήρ-), a wild beast, + μορφή, form.*] In

*human anat.*, an abnormality in structure resembling the norm in lower animals.

**theromorphical** (thér-rō-mōrf'ik), *a.* [*< Theromorpha + -ic.*] Theromorphous.

**theromorphical** (thér-rō-mōrf'ik), *a.* [*< theromorpha + -ic.*] Abnormally resembling in anatomical structure the lower animals.

**theromorphous** (thér-rō-mōrf'us), *a.* [*< Theromorpha + -ous.*] Pertaining to the *Theromorpha*, or having their characters.

**theropod** (thér-rō-pod), *a. and n.* [*< Gr. θήρ (θήρ-), a wild beast, + ποῖς (ποδ-) = E. foot.*]

**I. a.** Having feet like those of (mammalian) beasts, as a dinosaur; of or pertaining to the *Theropoda*.

**II. n.** A carnivorous dinosaur of the order *Theropoda*.

Also *theriopod*, and (erroneously) *therapod*.

**Theropoda** (thér-rōp'ō-dä), *n. pl.* [*NL.: see theropod.*] An order of extinct carnivorous dinosaurs, having digitigrade feet with prehensile claws, very small fore limbs, hollow limb-bones, cavernous vertebrae, premaxillary teeth, and united pubes. They were of large or gigantic size and predaceous habits, and in the structure of the feet resembled quadrupeds rather than birds (see *Ornithopoda*), whence the name. There are several families, as *Megalosauridae*, *Zaukelodontidae*, *Amphisauridae*, and *Labrosauridae*. Also, incorrectly, *Therapoda*.

**theropodous** (thér-rōp'ō-dus), *a.* Same as *theropod*. *Geol. Jour.*, XLV. i. 44.

**theristical** (thér-sit'ik-al), *a.* [*< Thersites (L. Thersites, < Gr. Θέρσις) + -ic-al.*] Resembling or characteristic of Thersites, a scurrilous character in Homer's *Iliad*; hence, grossly abusive; scurrilous; foul-mouthed.

There is a pelting kind of *theristical* satire, as black as the ink 'tis wrote with. *Sterne, Tristram Shandy*, ix. 14.

**therst**, *v.* A Middle English form of *durst*. *Oxford Univ.*, l. 681. *Halliwell*.

**thesaurer**, *n.* [*< ML. thesaurarius, treasurer, < L. thesaurus, pertaining to treasure, < thesaurus, treasure: see thesaurus and treasure, and cf. treasurer.*] A treasurer.

To my loving friend Sir Thomas Boleyn Knight, *The* *thesaurer* of the King's Graces most honorable Household, and Sir Henry Guldeford, Knight Comptroller of the same. *Abp. Warham, in Ellis's Hist. Letters*, 3d ser., I. 367.

**thesaurus** (thé-sä'rus), *n.* [*< L. thesaurus, OL. thesaurus, thesaurum, < Gr. θησαυρός, a store laid up, treasure, a treasure-house, storehouse, chest: see treasure, the old form of the word, derived through OF. and ME.*] A treasury; a store; especially, *thesaurus verborum*, or simply *thesaurus*, a treasury of words; a lexicon.

In a complete *thesaurus* of any language, the etymology of every word should exhibit both its philology and its linguistics, its domestic history and its foreign relations. *G. P. Marsh, Lects. on Eng. Lang.*, iii.

**these** (THĕz), *a. and pron.* Plural of *this*.

**Theseion, Theseum** (thé-sē'on, -um), *n.* [*NL., < Gr. Θησεῖον, Θησεῖον, < Θησεύς, Theseus.*] A temple or sanctuary of the Athenian hero-king Theseus, especially a temple built in Athens, about 460 B. C., to receive the bones of Theseus, then brought home from Seyros; at the present time, specifically, a beautiful hexastyle peripteral Doric temple of Pentelie marble, dating

The so-called Theseion, at Athens, from the southwest.

from the second half of the fifth century B. C., still standing in Athens at the foot of the Acropolis and Areopagus. Its interior arrangements and its sculptured decoration have suffered much, but it is notwithstanding the most perfect surviving example of a Greek temple, and exhibits all the refinements of Doric architecture at its culmination. This temple is now identified with practical certainty as that of Hephaestus (Vulcan); it was certainly not the temple of Theseus. See also cut under *opisthodromus*.

**thesicle** (thé'si-kl), *n.* [*Dim. of thesis.*] A little or subordinate thesis; a proposition. [*Rare.*] *Imp. Dict.*

**Thesieæ** (thé-si'ē-ē), *n. pl.* [*NL. (Bentham and Hooker, 1880), < Thesium + -eæ.*] A tribe of apetalous plants, of the order *Santalaceæ*, the sandalwood family. It is characterized by its small nut-like fruit, and perianth-tube prolonged above the inferior ovary and without a conspicuous disk. It includes 5 genera of herbs and low undershrubs, of which *Thesium* is the type; the others are mainly natives of South America or South Africa.

**thesis** (thé'sis), *n.*; *pl. theses* (-sēz). [= *F. thèse* = *Sp. tesis* = *Pg. these* = *It. tesi* = *G. these*, *these*, < *L. thesis*, < *Gr. θέσις*, a proposition, a statement, a thing laid down, thesis in rhetoric, thesis in prosody (from the setting down of the foot in beating time); cf. *θερός*, placed, < *τιθέναι* (√ *θε*), put, set: see *do*. Cf. *theme*, from the same *Gr. verb.*] 1. The formulation in advance of a proposition to be proved; a position; a proposition which one advances and offers to maintain by argument against objections.

Antitheta are *Theses* argued pro et contra [for and against]. *Bacon, Advancement of Learning*, ii.

In all the foreign universities and convents there are upon certain days philosophical *theses* maintained against every adventitious disputant. *Goldsmith, Vicar*, xx.

Hence—2. An essay or dissertation upon a specific or definite theme, as an essay presented by a candidate for a diploma or degree, as for that of doctor.

Then comes the struggle for degrees,  
With all the oldest and ablest critics;  
The public *theses* and disputation.

*Longfellow, Golden Legend*, vi.

3. A theme; a subject propounded for a school or college exercise; the exercise itself.—4. (a) A premise assumed and not proved, although not self-evident; either a postulate or a definition. (b) The consequent of a hypothetical proposition. [*Rare.*]—5. In *musical rhythms*, a heavy accent, such as in beating time is marked by a down-beat. See *rhythm*.—6. In *pros.*: (a) Originally, and in more correct recent usage, that part of a foot which receives the ictus, or metrical stress. (b) In prevalent modern usage, the metrically unaccented part of a foot. See *arsis*, 1.—7. In *anc. rhet.*, a general question, not limited to special persons and circumstances: opposed to a *hypothesis*, or question which is so limited.—8. In *rhet.*, the part of a sentence preceding and correlated to the antithesis. [*Rare.*]

The style of Junius is a sort of metre, the law of which is a balance of *thesis* and antithesis.

*Colebridge, Table-Talk*, II. 212.

= *Syn.* 1. Topic, Point, etc. See *subject*.

**Thesium** (thé-si'um), *n.* [*NL. (Linnaeus, 1737), L. name of T. Linophyllum, so called, according to Athenæus, because Theseus crowned Ariadne with it; < Gr. Θήσεον, neut. of Θήσεος, belonging to Theseus, < Θησεύς, Theseus.*] A genus of plants, type of the tribe *Thesieæ* in the order *Santalaceæ*. It is characterized by linear or scale-like leaves, and bisexual flowers with small ovate or oblong anthers and a bifurcated, often flexuous or zigzag placenta. There are over 100 species, widely distributed through the Old World, chiefly in the temperate parts, and with 2 species in Brazil. They are herbs, often with a hard or shrubby base, and frequently parasitic by the root. The leaves are small and alternate. The scentless flowers are borne in a spike or a simple or compound raceme. *T. Linophyllum*, a small white-flowered plant of English pastures, is called *bastard toadflax*.

**Thesmophoria** (thes-mō-fō'ri-ä), *n. pl.* [*< Gr. θησμοφωρία (pl.), < θεσμοφωρος, law-giving, < θεσμός, law (< τιθέναι, lay down: see thesis), + φωρος, < φέρειν = E. bear.*] An ancient Greek festival with mysteries, celebrated by married women in honor of Demeter (Ceres) as the "mother of beautiful offspring." Though not confined to Attica, it was especially observed at Athens and Eleusis.

In the *Thesmophoria*, as well as the pigs' flesh mysterious sacred objects were in use, made of the dough of wheat, and in the shape of forms of snakes and men.

*Harrison and Verrall, Ancient Athens*, p. xxxv.

**Thesmophorian** (thes-mō-fō'ri-an), *a.* [*< Thesmophoria + -an.*] Of or pertaining to the *Thesmophoria*.

**Thesmophoric** (thes-mō-fō'rik), *a.* [*< Thesmophoria + -ic.*] Same as *Thesmophorian*. *Encyc. Brit.*, XVII. 127.

**thesmothete** (thes'mō-thēt), *n.* [*< F. thesmothète, < Gr. θεσμοθέτης, a lawgiver, < θεσμός, law, + θέτης, one who lays down, < τιθέναι, put, set: see thesis.*] A lawgiver; a legislator; one of the six inferior archons at Athens.

**thesocyte** (thé'sō-sit), *n.* One of certain reserve cells which have been described in several sponges. *Encyc. Brit.*, XXII. 420.

took part in character, with boisterous mirth and music, and bearing attributes of the god; sometimes a political, commercial, social, or benevolent association or gild (*gild*); specifically, the mythological band of nymphs, maenads, satyrs, etc., forming the personal cortège of Dionysus, and often represented in sculpture and painting. See *Bacchus*.

**Thibaudia** (thi-bā'di-ä), *n.* [NL. (Pavon, 1818), named after a French botanist, *Thibaud de Chanvallon*, who traveled in the West Indies in 1751.] 1. A genus of gamopetalous plants, type of the tribe *Thibaudieae* in the order *Vacciniaceae*. It is characterized by racemose flowers with small bracts, a short calyx-tube, with five-toothed border, and ten elongated anthers, far surpassed by a membranous extension into straight narrow tubes which open lengthwise by chinks. The 2 species, *T. floribunda* and *T. Pichinchensis*, are natives of the Andes, the United States of Colombia, and Peru. They are shrubs, sometimes with high-climbing stems, bearing alternate evergreen entire leaves with very oblique veins, and numerous pedicelled scarlet flowers in axillary crowded racemes, sometimes tipped with green or yellow. These and also a few species of related genera are known in cultivation as *thibaudia*. 2. [*l. c.*] A plant of this genus.

**Thibaudieae** (thi-bā-di'-ë), *n. pl.* [NL. (Benth and Hooker, 1876), < *Thibaudia* + -ae.] A tribe of gamopetalous plants, of the order *Vacciniaceae*. It is characterized by rather large and usually thick and fleshy or coriaceous flowers with short filaments which are commonly contiguous or connate. It includes 17 genera, of which *Thibaudia* is the type: principally mountain shrubs, many of them natives of the Andes.

**thibet**, **Thibetan**, etc. See *tibet*, etc.

**thible** (thib'l), *n.* [Also *thibel*, *thivrel*, *theeril*, *theivil*, *theedle*; dial. variants of *dibble*.] 1. A dibble. *Halliwel*. [Prov. Eng.]—2. A stick used for stirring broth, porridge, etc.; a pot-stick. [Prov. Eng. or Scotch.]

**thinnyish** (thin'ish), *a.* [*< thin<sup>1</sup> + -ish<sup>1</sup>*.] Somewhat thin.

**Thinocoridae** (thin-ô-kor'i-do), *n. pl.* [NL., *< Thinocorus + -idae*.] A family of limicoline and somewhat charadriomorphous birds of South America, represented by the genera *Thinocorus* and *Attagis*. Their nearest relatives are the sheathbills, with which they have been combined in the family *Chionidiidae*. The palatal structure is peculiar in the broadly rounded vomer, the form and connections of which recall the egithognathous palate; there are no basipterygoids; the nasals are schizorhinal; superorbital fossae are present; the carotids are two in number; and the ambiens, femorocaudal, semitendinosus, and their accessories are present. In general outward appearance these birds resemble quails or partridges, and they were formerly considered to be gallinaceous rather than limicoline. They nest on the ground, and lay colored eggs. There are two or three species of each of the genera, of southern parts of the continent, extending into the tropics only in elevated regions. The birds have been singularly called *tringoid grouse*.

**thinocorine** (thi-nok'ô-rin), *a.* Characteristic of or pertaining to the *Thinocoridae*. *Stand. Nat. Hist.*, II. 92.

**Thinocorus** (thi-nok'ô-rus), *n.* [NL. Ir. *tart*, thirst, drought, etc. From the L. source are ult. E. *torrent*, *torrid*, *terra*, *terrene*, *terrestrial*, *interl*, etc.] 1. A feeling of dryness in the mouth and throat: the uncomfortable sensations arising from the want of fluid nutriment; the uneasiness or suffering occasioned by want of drink; vehement desire for drink. The sensations of thirst are chiefly referred to the thorax and fauces, but the condition is really one affecting the entire body. The excessive pains of thirst compared with those of hunger are due to the fact that the deprivation of liquids is a condition with which all the tissues sympathize. Every solid and every fluid of the body contains water, and hence abstraction or diminution of the watery constituents is followed by a general depression of the whole system. Thirst is a common symptom of febrile and other diseases. Death from thirst, as of persons in a desert, appears to be invariably preceded by acute mania.

Than he commanded him to Presoun, and alle his Treasure aboute him; and so he dyed for Hungre and Thirst. *Mandeville, Travels*, p. 230.

Raymounde tho lepte vp his coursere vpon,  
To the fantain and wel of thurst gan to go.

*Rom. of Parleyay* (E. E. F. S.), l. 765.

Among sensations of Organic Life, I may cite *Thirst* as remarkable for the urgency of its pressure upon the will. *A. Bain, Emotions and Will*, p. 318.

2. Figuratively, an ardent desire for anything; a craving.

Over all the countrie she did raunge  
To seeke young men to quench her flaming thirst.

*Spenser, F. Q.*, III. vii. 50.

Yet do their beating breasts demand the strife,  
And thirst of glory quells the iove of life.

*Addison, The Campaign*.

To experience uncomfortable sensations for want of drink; have desire to drink; be dry.

If thine enemy hunger, feed him; if he thirst, give him drink. *Rom.* xii. 20.

2. To have a vehement desire; crave.

My soul thirsteth for God. *Ps.* xlii. 2.

Although the beauties, riches, honours, sciences, virtues, and perfections of all men living were in the present possession of one, yet somewhat beyond and above all this there would still be sought and earnestly thirsted for. *Hooker, Eccles. Polity*, i. 11.

He thirsted for all liberal knowledge. *Milton, Hist. Eng.*, v.

II. *trans.* To have a thirst for, literally or figuratively; desire ardently; crave: now usually followed by an infinitive as the object.

The eternal God must be prayed to, . . . who also grant them once earnestly to thirst his true doctrine, contained in the sweet and pure fountains of his scriptures. *Tyndale, Ans. to Sir T. More*, etc. (Parker Soc., 1850), p. 283.

That unhappy king, my master, whom  
I so much thirst to see. *Shak., W. T.*, iv. 4. 524.

He seeks his Keeper's Flesh, and thirsts his Blood.

*Prior, Solomon*, i.

**thirster** (thérstér), *n.* [*thirst* + -er<sup>1</sup>.] One who or that which thirsts.

Having seriously pleaded the case with thy heart, and reverently pleaded the case with God, thou hast pleaded thyself from . . . a lover of the world to a thirster after God. *Baxter, Saints' Rest*, iv. 13.

**thirstily** (thérstí-li), *adv.* In a thirsty manner.

From such Fountain he draws, diligently, thirstily. *Carlyle, Sartor Resartus*, ii. 3.

**thirstiness** (thérstí-nes), *n.* The state of being thirsty; thirst. *Bailey*, 1727.

**thirstle** (thér'sl), *n.* A dialectal form of *throstle*.

**thirstless** (thérst'les), *a.* [*thirst* + -less.] Having no thirst.

Thus as it falls out among men of thirstless minds in their fortunes. *Bp. Reynolds, On the Passions*, p. 302. (*Latham*.)

**thirstlew**, *a.* [ME. *thurstlew*; < *thirst* + *lew* as in *drunklew*.] Thirsty. *Lydgate, Minor Poems*, p. 75.

**thirsty** (thérstí), *a.* [Early mod. E. and dial. also *thirsty*; < ME. *thursti*, *thresti*, *thristi*, < AS. *thurstig*, *thyrstig* = OFries. *dorstig*, *torstig* = D. *dorstig* = MLG. *dorstich*, LG. *dorstig* = OHG. *durstig*, MHG. *durstec*, G. *durstig* = Sw. Dan. *törstig* (cf. Icel. *thyrstir*), thirsty; as *thirst* + -y<sup>1</sup>.] 1. Feeling thirst; suffering for want of drink.

As cold waters to a thirsty soul, so is good news from a far country. *Prov.* xxv. 25.

What streams the verdant succory supply,  
And how the thirsty plant drinks rivers dry.

*Addison, tr. of Virgil's Georgics*, iv.

2. Dry; parched; arid.

The parched ground shall become a pool, and the thirsty land springs of water. *Isa.* xxxv. 7.

The word "desert" is used, in the West, to describe alike lands in which the principle of life, if it ever existed, is totally extinct, and those other lands which are merely thirsty. *The Century*, XXXVIII. 298.

3. Vehemently desirous; craving: with *after*, *for*, etc.

To be thirsty after tottering honour. *Shak., Pericles*, iii. 2. 40.

4. Sharp; eager; active.

We've been thirsty  
In our pursuit. *Ford, Fancies*, i. 1.

5. Causing thirst. [Rare.]

Our natures do pursue,  
Like rats that ravin down their proper bane,  
A thirsty evil; and when we drink we die. *Shak., M. for M.*, i. 2. 134.

**Thirsty thorn.** See *thorn*<sup>1</sup>.

**thirteen** (thér'tén'), *a.* and *n.* [Also dial. *threteen*; < ME. *thrittene*, *threttene*, *threottene*, < AS. *threotýne* = OFries. *threttene* = D. *dertien* = MLG. *druttein*, LG. *dartein* = OHG. *drizeñ*, MHG. *drizehen*, *drizen*, G. *dreizehn* = Icel. *threitan* = Sw. *tretton* = Dan. *tretten* = Goth. *\*threis-taihun* = L. *tredecim* (> It. *tredecì* = Pg. *treze* = Sp. *trece* = F. *treize*) = Gr. *τρεῖςκαὶδέκα* = Skt. *trayāśca*, thirteen; as *three* + *ten*.] I. *a.* Being three more than ten; consisting of one more than twelve: a cardinal numeral.

II. *n.* 1. The number which consists of the sum of twelve and one, or of ten and three. — 2. A symbol representing thirteen units, as 13, XIII, or xiii. — 3. A silver shilling worth 13 pence, current in Ireland during the early part of the nineteenth century.

F. A. M. is doubtless chronologically correct as to the shilling in Ireland having been worth thirteen pence previous to 1825–6, but colloquially it continued to be called a *thirteen* to a considerably later period — so late as 1835 to my knowledge. *N. and Q.*, 7th ser., I. 77.

**thirteener** (thér'tén'ér), *n.* [*thirteen* + -er<sup>1</sup>.] 1. Same as *thirteen*, 3. [Colloq.]

For it was a shillin' he gave me, glory be to God. No, I never heard it called a *thirteener* before, but mother has. Quoted in *Mayhew's London Labour and London Poor*, I. 484.

2. The thirteenth one of any number of things; specifically, in *whist*, the last card of a suit left in the hands of a player after the other twelve have been played.

**thirteen-lined** (thér'tén'lind), *a.* Noting the leopard spermophile, or Hood's marmot, *Spermophilus tridecemlineatus*, a very common striped and spotted ground-squirrel of North America. The allusion is to the number of stripes (representing the thirteen original States) in the flag of the United States, suggested by the markings of the animal. See cut under *Spermophilus*.

**thirteenth** (thér'tenth'), *a.* and *n.* [Altered to suit the form of *thirteen*; < ME. *threttethe*, also (after Icel.) *threttende*, < AS. *threótéotha* = OFries. *thredtinda* = D. *derdiende* = OHG. *drit-tezēdo*, MHG. *dritzehende*, *drizehende*, G. *dreizehente* = Icel. *threitanði* = Sw. *trettonde* = Dan. *trettede* = Goth. *\*thridjateihunda*; as *thirteen* + -th<sup>2</sup>.] I. *a.* 1. Next after the twelfth: an ordinal numeral. — 2. Constituting any one of thirteen equal parts into which anything is divided. — *Thirteenth cranial nerve*, the chorda tympani regarded as distinct from the seventh or facial nerve. *Sapolini*.

II. *n.* 1. One of thirteen equal parts into which anything is divided. — 2. In *early Eng.*

*law*, a thirtieth part of the rents of the year, or of movables, or both, granted or levied by way of tax. — 3. In *music*, the interval, whether melodic or harmonic, between any tone and a tone one octave and six degrees distant from it; also, a tone distant by such an interval from a given tone; a compound sixth.

**thirtieth** (thér'ti-eth), *a.* and *n.* [Altered to suit the mod. form *thirty*; < ME. *thrittithe*, *thrittthe*, *thrittage*, < AS. *thritigotha*, etc.; as *thirty* + -eth<sup>2</sup>.] I. *a.* 1. Next after the twenty-ninth: an ordinal numeral. — 2. Constituting any one of thirty equal parts into which anything is divided.

II. *n.* 1. Any one of thirty equal parts into which anything is divided. — 2. In *early Eng. law*, a thirtieth of the rents of the year, or of movables, or both, granted or levied by way of tax.

**thirty** (thér'ti), *a.* and *n.* [Early mod. E. and dial. also *threttly*; < ME. *thirty*, *thrittly*, *thrittly*, *threttly*, *thrittly*, < AS. *thritig*, *thrittig* = OS. *thritig* = OFries. *thritich*, *thritich* = D. *dertig* = MLG. *dortich*, LG. *dortig*, *dörtig* = OHG. *drizug*, MHG. *drizec*, G. *dreissig* = Icel. *thritjau* (cf. also *thritugr*, *thrit-tögr*) = Sw. *trettio* = Dan. *tredive* = Goth. *threis tigjus*; cf. See *tyrant*. — *Thirty years' war*, a series of European wars lasting from 1618 to 1648. They were carried on at first by the Protestants of Bohemia and various Protestant German states against the Catholic League headed by Austria. Afterward Sweden and later France joined the former side, and Spain became allied with the latter.

II. *n.* 1. The number which consists of three times ten. — 2. A symbol representing thirty units, as 30, XXX, or xxx.

**thirtyfold** (thér'ti-föld), *a.* Thirty times as much or as many. *Mat.* xiii. 8.

**Thirty-nine Articles.** See *article*.

**thirty-one** (thér'ti-wun'), *n.* A game resembling vingt-un, but with a longer reckoning.

He is discarded for a gamester at all games but *one and thirty*. *Earle, Microcosm*. (*Nares*.)

**thirty-second** (thér'ti-sek'ond), *a.* Second in order after the thirtieth.

**thirty-second-note** (thér'ti-sek'ond-nōt), *n.* In musical notation, a note equivalent in time-value to one half of a sixteenth-note; a demisemiquaver. *Thirty-second-note rest*. See *rest*, 1, 8 (b).

**thirtytwo-mo** (thér'ti-tō'mō), *n.* [An E. reading of *32mo*, which stands for XXXII<sup>mo</sup>, a way of writing L. (*in*) *tricesimo secundo*, 'in thirty-second.' So 16mo, 12mo, are read according to the E. numbers.] A leaf from a sheet of paper folded for a book regularly in thirty-two equal parts. Commonly written *32mo*. When the size of the sheet is not specified, the leaf is supposed to be a medium *32mo* of the size 3 by 4½ inches. A book made up of such leaves is called a *32mo*.

very old Scottish order which has often been renewed and remodeled, and is still in existence. The devices of the order are, Andrew's cross, saltire, and a thistle-flower with leaves; these enter into the different badges, the armor, etc., etc. The motto is "Nemo me impune lacessit." The ribbon is green. — **Pasture-thistle**, a low stout species, *Cirsium palustre*, with from one to three very large, heads of fairly white, sweet-scented heads, found in the Atlantic United States. **Saffron-thistle**, the flower of which is saffron-colored, so named as blooming about September 1st. — **St. Barnaby's thistle**, the yellow star-thistle, *Leontodon altissimus*, so named as blooming about St. Barnaby's day. — **Scotch thistle**, a kind of thistle regarded as the national emblem of Scotland, but the precise species to which the name properly belongs is not settled. Most authorities consider it to be the cotton-thistle, *Oxyphanta arvensis*, though this is not native in Scotland; others, the milk-thistle, *Silybum (Carduus) Marianum*; while some, with greater probability, refer it to the common *Cirsium lanceolatus*. The thistle intended when the emblem came into use is uncertain, owing to the fact that the figures on old coins and in paintings were not meant to be botanically exact. See cuts above and under *Onopordon*. — **Spear-thistle**, the common thistle, *Cirsium lanceolatum*, so called from its lance-shaped leaves. — **Stemless thistle**, a European thistle, *Cirsium acule*, having a tuft of prickly spreading leaves and a few larkspur purple heads, scarcely rising above the ground. Also *duroii* thistle and locally *pod thistle*. — **Swamp-thistle**, a tall species, *Cirsium montanum*, with single or few deep-purple heads on the branches, found in damp soil in the eastern United States. — **Swine-thistle**. Same as *saw-thistle*. — **Syrian thistle**, *Cirsium (Xanthoxis) syriacum*, of the Mediterranean region. — It is a plant from 1 to 3 feet high, with milky veined leaves, the heads, one to three, on short axillary branches, each head embraced by a rigid pinnatifid spiny pointed bract. **Tall thistle**, a common species of the United States east of the Mississippi, *Cirsium altissimum*, a branching plant sometimes 10 feet high, the leaves covered with close white wool beneath, the flowers light-purple. — **Virgin Mary's thistle**. It is characterized by equal petals, stamens without appendages, and a sessile emarginate pod with laterally compressed winged or keeled valves, and two or more seeds in each cell. There are about 30 species, natives chiefly of northern regions, both temperate and arctic. They are usually smooth annuals, sometimes perennials, with a rosette of radical leaves, the stem-leaves with an auricled clasping base, and the racemed flowers either white, pink, or pale-purple. vertebra which bears functional ribs; entering into the formation of the thorax, specifically noting such vertebrae (all vertebrae being dorsal in one sense). (e) Pertaining to the head and thorax of some animals; cephalothoracic: as, *thoracic* limbs or appendages; the *thoracic* girdle (that is, the pectoral arch, or shoulder-girdle, of a vertebrate); pectoral in position, as the ventral fins of some fishes. (f) Pertaining to the front and sides of the thorax or to the breast; pectoral: as, the mammary glands of man are *thoracic*. (g) Done or effected by means of the thorax: as, *thoracic* respiration. (h) Affecting the thorax or its organs: as, *thoracic* diseases, symptoms, or remedies.

2. Having a thorax (of this or that kind); belonging to the *Thoracica*: as, the *thoracic* cirripeds.—3. Having the ventral fins thoracic in position; belonging to the *Thoracici*: as, a *thoracic* fish.—**Thoracic angles**, the corners of the thorax, or of the prothorax in insects with wing-covers. **Thoracic aorta**, that section of the aorta which traverses the cavity of the thorax. It extends from the origin of the vessel to its passage through the aortic orifice of the diaphragm, where it becomes the abdominal aorta. The term is also restricted to the straight or descending part of the aorta (excluding the arch). In this sense the thoracic aorta begins where the arch ends, about opposite the fifth thoracic vertebra. The branches of the thoracic aorta are the pericardial, bronchial (the nutrient vessels of the lungs), esophageal, postmediastinal, and the usually ten pairs of intercostals. See cuts under *diaphragm* and *thorax*. **Thoracic artery**, one of several branches given off by the axillary artery in the second and third sections of its course, and distributed chiefly to the pectoral muscles and adjacent soft tissues. Four such vessels are named in man as the *superior*, *acromial*, *long*, and *axillary*. They are also called *suprathoracic*, *acromioclavicular* or *thoracoclavicular*, *longithoracic*, and *axillothoracic*.—**Thoracic axis**, the common trunk of the acromioclavicular and superior thoracic arteries, when these are given off together.—**Thoracic duct**. See *duct*, and cut under *diaphragm*.—**Thoracic ganglia**. See *ganglion*.—**Thoracic girdle**, the pectoral girdle, or scapular arch. See cuts under *epileura*, *anosternum*, and *sternum*.—**Thoracic grooving**, the longitudinal depressions along the sternum on either side in rachitic or pigeon-breasted children.—**Thoracic index**, the ratio between the antero-posterior and transverse diameters of the thorax.—**Thoracic limbs**, the fore limbs of a vertebrate; the arms of a man, fore legs of a quadruped, wings of a bird, pectoral fins of a fish; the appendages of the scapular arch, or shoulder-girdle; in invertebrates, the appendages proper to the thorax, generally the ambulatory and chelate, as distinguished from abdominal appendages, mouth-parts, etc. See cut under *Araneida*.—**Thoracic nerves**. (a) *Anterior thoracic*, two branches, the external and internal, arising from the outer and inner cords of the brachial plexus and distributed to the pectoral muscles. (b) *Posterior thoracic*, a branch from the upper two or three nerves of the brachial plexus, passing on the side of the chest to be distributed to the serratus magnus. Also called *long thoracic*, and *external respiratory nerve of Bell*.—**Thoracic parietes**, the walls of the chest; especially, the movable front and sides of the chest, whose bony basis is the ribs and sternum.—**Thoracic region**. (a) The extent or superficies of the thorax as a part of the body; some part of the thoracic walls, with reference to groups of muscles which lie upon them: as, the anterior or lateral *thoracic region*. (b) Especially, one of the several parts

an order, consisting of the ordinary sessile and pedunculated cirripeds, or barnacles and acorn-shells, in which the abdomen is rudimentary and there are six thoracic segments with as many pairs of cirrose limbs. See *Cirripedia*, *Lepas*, *Balanus*.

**thoracicabdominal**, **thoracicacromial**, *a.* Same as *thoracicabdominal*, *thoracacromial*.

**Thoracici** (thō-ras'i-sī), *n. pl.* [NL., *pl.* of \**thoracicus*: see *thoracic*.] In *ichth.*, the third one of four Linnean orders of fishes (the others being *Apodes*, *Jugulares*, *Abdominales*), characterized by the thoracic position of the ventral fins, which are placed beneath the pectorals. By Cuvier and others the term has been recognized with various limitations, but it is no longer used in classifying fishes, though the adjective *thoracic* remains as a descriptive term in its original sense.

**thoracico-acromialis** (thō-ras'i-kō-a-kro-mi-ā'lis), *n.*; *pl.* *thoracico-acromialis* (-lēz). [NL., < \**thoracicus*, *thoracic*, + *acromialis*, *acromial*.] The acromioclavicular artery, a branch of the axillary, given off just above the pectoralis minor, and dividing into three sets of branches.

**thoracicohumeral** (thō-ras'i-kō-hū-me-ral), *a.* [NL., < \**thoracicus*, *thoracic*, + *humeralis*, *humeral*.] Pertaining to the thorax and the humerus, or to the chest and the upper arm.

**thoracicohumeralis** (thō-ras'i-kō-hū-me-rā'lis), *n.*; *pl.* *thoracicohumeralis* (-lēz). [NL.: see *thoracicohumeral*.] An artery, a branch of the thoracic-acromialis, which descends upon the arm with the cephalic vein in the interval between the great pectoral and deltoid muscles.

**thoraciform** (thō-ras'i-fōrm), *a.* [L. *thorax* (*thorac-*), the thorax, + *forma*, *form*.] In *entom.*, noting the mesonotum when it is very large and forms the main part of the upper surface of the thorax, as in *Diptera* and most *Hymenoptera*.

**thoracipod** (thō-ras'i-pod), *a.* and *n.* [L. *thorax* (*thorac-*), the thorax, + Gr. *ποῦς* (*pod-*) = *E. foot*.] I. *a.* Having thoracic limbs differentiated as ambulatory legs, as a crab or lobster; belonging to the *Thoracipoda*; malacostracous.

II. *n.* A member of the *Thoracipoda*; a crustacean which walks on specialized thoracic limbs (pereopods); a malacostracous.

**Thoracipoda** (thō-ra-sip'ō-dā), *n. pl.* [NL.: see *thoracipod*.] In some systems, a subclass or superorder of *Crustacea* corresponding to *Malacostraca*; the higher series of crustaceans, contrasted with the entomostracans or *Gnathopoda*. The name refers to the fact that the seven anterior or cephalic segments being specialized for sensation and nutrition, the next or thoracic segments distinctively subserve locomotion. The name is proposed as a substitute for *Malacostraca*. *Encyc. Brit.*, VI. 655.

**thoracipodous** (thō-ra-sip'ō-dus), *a.* [L. *thoracipod* + *-ous*.] Same as *thoracipod*.

**thoracispinal** (thō-ras-i-spī-nal), *a.* [L. *thorax* (*thorac-*), the thorax, + *spina*, *spine*: see *spinal*.] Of or pertaining to the thoracic section of the spinal column: as, a *thoracispinal* nerve. *Concs. Brit.*, 1887.

**thoracodidymus** (thō-rā-kō-dīd'i-mus), *n.*; *pl.* *thoracodidymi* (-mī). [NL., < Gr. *θώραξ* (*thorax*), the thorax, + *διδυμος*, *double*.] In *teratol.*, a double monster the two bodies of which are joined at the thorax.

**thoracogastrodidymus** (thō-rā-kō-gas-trō-dīd'i-mus), *n.*; *pl.* *thoracogastrodidymi* (-mī). [NL., < Gr. *θώραξ* (*thorax*), the thorax, + *γαστήρ*, *stomach*, + *διδυμος*, *double*.] In *teratol.*, a double monster with united thoraxes and abdomen.

**thoracometer** (thō-ra-kom'e-tēr), *n.* [L. *θώραξ* (*thorax*), the thorax, + *μέτρον*, *measure*.] An instrument for measuring the range of respiratory movement of any point in the thorax.

**thoracopagus** (thō-ra-kop'a-gus), *n.*; *pl.* *thoracopagi* (-jī). [NL., < Gr. *θώραξ* (*thorax*), the thorax, + *παῖς*, *that which is firmly set*.] In *teratol.*, a double monster with more or less fusion of the thoraxes.

**thoracoplasty** (thō-rā-kō-plas-tī), *n.* [L. *θώραξ* (*thorax*), the thorax, + *πλάσσειν*, *put in a certain form*.] Removal of a section of one or more ribs for the cure of a fistula of the chest-wall following empyema.

**Thoracostraca** (thō-ra-kos'trā-kā), *n. pl.* [NL., < Gr. *θώραξ* (*thorax*), the thorax, + *στρακόν*, *a shell*.] In some systems, a division of malacostracous crustaceans, including the podophthalmous or stalk-eyed crustaceans, as crabs, shrimps, prawns, and lobsters: nearly conterminous with *Podophthalma*.

**thoracostracous** (thō-ra-kos'trā-kus), *a.* Pertaining to the *Thoracostraca*.

**thoracotheca** (thō-rā-kō-thē-kā), *n.*; *pl.* *thoracothecae* (-sē). [NL., < Gr. *θώραξ* (*thorax*), the thorax, + *θήκη*, *a case*.] In *entom.*, the trunk-case of a pupa, or that part of the integument which covers the thorax. Also *cytotheca*.

**thoracotomy** (thō-ra-kot'ō-mī), *n.* [L. *θώραξ* (*thorax*), the thorax, + *τομή*, *cut*, *incision*.] In *surg.*, the operation of free incision through the thoracic walls. Compare *thoracenteresis*.

**thorah**, *n.* See *torah*.

**thoral** (thō'ral), *a.* [Prop. *toral*, < L. *torus*, ML. erroneously *thorus*, a cushion, couch, bed: see *torus*.] Of or pertaining to the marriage-bed; nuptial; specifically, in *palmistry*, noting the line or mark of Venus on the hand.

**thorax** (thō'raks), *n.*; *pl.* *thoraces* (thō-rā'sēz). [L. *thorax* (*thorac-*), < Gr. *θώραξ* (*thorax*), a breastplate, also the part of the body covered by the breastplate, the thorax.] 1. In *anat.* and *zool.*, a part of the trunk between the head or neck and the abdomen or tail, in any way distinguished, as by containing the heart and lungs, by being inclosed with large ribs, or by bearing certain limbs not borne elsewhere. The name is applied both to the walls and to the cavity of this part of the body, but not to the contents of the cavity, and properly not to the thoracic appendages. In all vertebrates the thorax represents several of the segments or somites of the body succeeding the cervical and succeeded by the abdominal or pelvic segments. It is generally defined by the elongation of several ribs and the connection of some or most of these with a breast-bone, the thoracic skeleton thus forming a bony cage or frame which contains and defends the principal organs of circulation and respiration. In invertebrates, however, the thorax is defined upon other considerations. (a) In man and all mammals the thorax is sharply marked off from the rest of the trunk by the lack of developed cervical and lumbar ribs, and its cavity is completely shut off from that of the abdomen by the diaphragm. The human thorax is of conical figure, somewhat like the frustum of a cone, narrowed above, broad below, of greater width than depth, and in cross-section somewhat cardiform or heart-shaped, from the intrusion of the backbone. Its truncated apex presents to the neck; its concave base is formed by the diaphragm. The cavity is divided into a pair of large pleural cavities, right and left, for the lungs, and a third submedian pericardial cavity for the heart. Where the opposite pleural cavities do not quite meet and fit, both before and behind, is an interpleural space, the anterior and posterior mediastinal cavity, or premediastinum and post-mediastinum. Besides the heart and lungs and their respective serous sacs (pericardium and pleura), the thorax contains many other structures, as the thoracic duct and thoracic aorta, many branches of the latter, etc. The thorax of other mammals differs from that of man chiefly in size, shape, degree of movability, etc., but not in actual structure or office. (b) In birds the thorax is relatively very capacious and expansive. The sternum is of enormous size; long ribs frequently extend into the sacral region, and others, shorter, into the cervical region, so that the thorax encroaches in both directions. Its cavity is not shut off from that of the abdomen by any diaphragm. The ribs have a movable joint between their vertebral and sternal parts, contributing to the expansibility of the chest. Most of the abdominal as well as proper thoracic viscera are actually inclosed by the thoracic walls. See cut under *epileura*. (c) In those reptiles and batrachians which have breast-bones a thorax is distinguished much as it is in higher vertebrates. In serpents, which have no sternum, and whose ribs extend from head to tail, there is no distinction between thorax and abdomen; and the case is similar with turtles. In a few reptiles the thorax develops wing-like parachutes serving for a kind of flight. (d) In fishes a thorax, or a thoracicabdominal region, is usually well marked by long ribs from a postanal solid and fleshy part of the body, but there is no distinction of thoracic and abdominal cavities. The thorax may bear the pectoral fins, or these and the ventrals, or neither.

2. In *entom.*, that part of the body which is situated between the head and the abdomen, and in adult insects alone bears the wings and legs, when there are any. In the typical or hexapod insects the thorax is almost always a well-marked region, distinguished from the head in front and from the abdomen behind by bearing the only locomotory appendages which these insects possess in the adult state—namely, one or two pairs of wings and three pairs of legs. The thorax typically consists of three segments or somites of the body, one to each pair of legs, respectively named, from before backward, the *prothorax*, the *mesothorax*, and the *metathorax*, or sometimes the *prethorax*, *medithorax*, and

Cross-section of Human Chest viewed from above, showing heart, lungs, and great vessels in place. Each lung is invested with pleura and the heart with pericardium; the dark borders around the lungs and heart are cavities of pleura and of pericardium; the interval between pleural cavities of opposite sides is the mediastinum; the anterior mediastinum is entirely black; the middle is occupied by the heart, the posterior by the esophagus, etc.

RL, right lung; LL, left lung; RP and LP, two pulmonary veins; PA, pulmonary artery branching to each lung; Ao, ascending part of arch of aorta; Ao, descending aorta (intervening arch of aorta cut away); the line from Ao rests upon heart; SC, superior vena cava; IV, inferior vena cava; Br, right and left bronchi, cut end of each presenting; E, esophagus collapsed; DV, body of a thoracic or dorsal vertebra.

Thoracic Regions, bounded by thick black lines.

1, 1, right and left humeral; 2, 2, right and left subclavian; 3, 3, right and left mammary; 4, 4, right and left axillary; 5, 5, right and left subaxillary or lateral; 6, 6, right and left scapular; 7, 7, right and left interscapular; 8, 8, right and left superior dorsal or subscapular. The viscera of the thorax are indicated by dotted lines: a, diaphragm; b, heart; c, lungs; d, liver; e, kidneys; f, stomach.

into which the surface of the human thorax is divided or mapped out by certain imaginary lines, which to some extent denote the situation of the contained viscera, and thus serve for medical and surgical purposes. These regions, unlike some of the corresponding abdominal regions, are all in pairs (right and left), in one nomenclature known as the *humeral*, *subclavian*, *mammary*, *axillary*, *scapular*, *interscapular*, and *subscapular*.—**Thoracic region of the spine**, that portion of the spine which is composed of thoracic vertebrae. Also called *dorsal region*.

**Thoracic shield**, one of the three plates covering the thoracic rings in insect larvae.—**Thoracic vertebra**, any vertebra which bears a developed rib entering into the formation of a thorax. Also called *dorsal vertebra*.—**Thoracic viscera**, the viscera contained within the cavity of the thorax—namely, the heart, lungs, thymus, a section of the esophagus, thoracic duct, thoracic aorta, caval veins, and other large vessels.—**Transverse thoracic furrow**, in many *Diptera*, "a suture crossing the mesothorax and ending on each side a little before the base of the wing: its presence or absence, and form, are important characters in classification" (*Osten Sacken*).

II. *n.* 1. A thoracic structure; especially, a thoracic artery or nerve, or a rib-bearing dorsal vertebra.—2. A thoracic fish.

**Thoracica** (thō-ras'i-kā), *n. pl.* [NL., neut. *pl.* of \**thoracicus*: see *thoracic*.] The principal group of the *Cirripedia*, by some recognized as

a thorny shrubs or trees, [Rare.]

**thorn**<sup>1</sup> *thorn*, *v. t.* [*thorn*<sup>1</sup>, *n.*] 1. To prick or pierce with or as with a thorn. [Rare.]

I am the only rose of all the stock that never *thorned* him.

Tennyson, Harold, I. 1.

2. To fasten with a thorn.

Sometimes the Plane, sometimes the Vine they shear,  
Choosing their fairest tresses here and there;  
And with their sundry locks, *thorn'd* each to other,  
Their tender limbs they hide from Cynthia's Brother.  
*Sylvestre*, tr. of Du Bartas's Weeks, II., The Handy-Crafts.

**thorn**<sup>2</sup> *thorn*, *v. t.* [Origin obscure.] Supplied *v. t.*

Ye'll eat and drink, my merry men a',  
An' see ye be weell *thorn*.

*Sir Patrick Spens* (Child's Ballads, III. 330).

**thorn**<sup>3</sup>, *v. t.* [*thorn*<sup>2</sup>, *a.*] To be supplied (*t*).

When they had eaten and well drunken,

And a' had *thorn'd* me;

The bride's father he took the cup,

For to serve out the wine.

*Sweet Willie and Fair Mairie* (Child's Ballads, II. 335).

**thorn-apple** (*thörn'ap'l*), *n.* 1. A plant of the genus *Datura*, chiefly *D. Stramonium*. The name refers to the large spiny capsule. See *stramonium*.—2. A fruit of some species of *Crataegus* or *thorn-tree*; a haw; also, the tree itself.

**thornback** (*thörn'bak*), *n.* [*thorn*<sup>1</sup> + *back*, *l.*]

*thornbak*, *thornbak*, [*thörn*<sup>1</sup> + *back*, *l.*]

1. A kind of ray or skate, *Raja clavata*,

common on the British coasts, distinguished by the short and strong spines which are scattered over the back and tail. It grows about 2 feet long, and is very voracious, feeding on small flounders, herrings, sand-eels, crabs, lobsters, etc. Many are taken every year, and the flesh is considered to be excellent. The female is in Scotland called *maiden-skate*.

The spreading ray, the *thornback* thin and flat.

*J. Dennis* (Arber's Eng. Garner, I. 166).

2. The common British spider-crab, *Maia squinado*. Sometimes called *king-crab*. See *cut under Maia*.

**thornback-ray** (*thörn'bak-rä*), *n.* Same as *thornback*, 1.

**thornbill** (*thörn'bil*), *n.* A humming-bird of the genus *Rhamphocoryn*: a book-name. These notable hummers are large (averaging over four inches long), with broad forked tail, the gorget pendent like a beard, and specially short sharp bill (whence both the generic and vernacular names). Six species are described, one of the best-known being *R. heteropogon*. They range from the Colombian States through Ecuador, Peru, and Bolivia. The genus has three synonyms: *Chalcostigma*, *Lampopogon*, and *Eupogon*.

**thorn-bird** (*thörn'bêrd*), *n.* A South American dendrocolapine bird, originally *Furnarius anumbi* (Vieillot, after Azara), now *Anumbius acuticaudatus* (and rarely *Sphenopygia anumbi*).

Thornback (*Raja clavata*).

The wood is hard and close-grained, and is used as the hawthorn, useful for turnery and even for wood-engraving. Several acacias and various other plants receive the name. See *hawthorn*, and specific articles below.

The rose also had hawthorn freshness.  
That cometh out of the *thorne* wude.

*Orlando* (Vernon, I. 444 (Morris and Skeat, I. 183)).

All about the *thorn* will blow  
In tufts of rosy-tinted snow.

*Penman* (Two Voices).

4. In *wood*, some sharp process, horn, or spine. See *prick*, 4.—5. In *caten*, one of certain geometrical figures; an English book name. The little thorn is *Epina adenaria*; the early thorn is *Sorbus diocoria*.—6. In *huck-making*, a small pointed projection used to decorate the cord-net, etc. Compare *spine*, 5.—7. The Anglo-Saxon letter *þ*, equivalent to *th*; also, the corresponding character in Icelandic.

The English letter *thorn* *þ* survived and continued in use as late as the 14th century, when it was transformed to *y*.  
*Encyc. Brit.*, XVIII. 160.

A thorn in the flesh or side, a source of constant annoyance.

There was given to me a *thorn* (or stake, R. V., margin) in the flesh, the messenger of Satan to buffet me, lest I should be exalted above measure. 2 Cor. xii. 7.

**Buffalo-thorn**, *Acacia latifolia*, of India, a low tree with an umbrella-like top when old, and bearing long pinnules. **Christ's thorn**. See *Christ-thorn*, *Palm-tree*, and *red-bell tree*. In Germany the holly is said to be the Christ's thorn. **Cockspur-thorn**, the American *Crataegus coccinea*, also called *Newcastle thorn*. It reaches the height of 30 feet, is of a table-like growth, and has dark shining leaves, and thorns 4 inches long. It is planted for ornament in Europe, being perhaps the best American species for the purpose, as it is also for hedging. **Egyptian thorn**, *Acacia Arabica* (*A. vera*), one of the gum-bearing trees. **Elephant-thorn**, *Acacia tomentosa*.

**Evergreen thorn**, the pyracanth, *Crataegus Pyracantha*, of southern Europe. It is a favorite in culture for its luxuriant evergreen foliage and abundant orange-scarlet fruit. Being of a spreading and trailing habit, it is in England often trained upon walls. **Glastonbury thorn**, a variety of *Lawsonia Crataegus Pyracantha* var. *pyracantha*, which puts forth leaves and flowers about Christmas. This variety is said to have originated at Glastonbury Abbey, England, and it was believed that the original tree was the staff with which Joseph of Arimathea aided his steps on his wanderings from the Holy Land to Glastonbury, where, according to tradition, he became the founder of the celebrated abbey. **Jerusalem thorn**. See *Parkinsonia*.—**Jews' thorn**. Same as *Christ's thorn.—**Karoo thorn**, the *Acacia drepanolobium*, of southern Africa, *Acacia drepanolobium*, a tree with very sharp spines from 1 inch to 3 inches long. **Lily thorn**, a plant of the West Indian rubaceous genus *Catesbaea*, particularly *C. spinosa* with large yellow nodding flowers, and *C. parviflora* with small white flowers. These plants are spiny in the axils of the leaves. **Newcastle thorn**. See *Cockspur-thorn*, above.—**Parsley-leaved thorn**, the parsley-haw, *Crataegus apiculata*.—**Pyracanth thorn**, *Crataegus Pyracantha*.—**Pear-thorn**. Same as *pyracanth thorn*.—**Sallow-thorn**. See *Hippophae*.*

**Scarlet fruited thorn**, the scarlet fruited haw, *Crataegus coccinea*, a small tree common northward in North America, with finely cut-toothed leaves and small scarlet, barely edible haws. **Scorpion-thorn**, *scorpion's thorn*.

**September thorn**. See *Sep-*

**thorn-broom** (thörn'bröm), *n.* The furze, *Ulex Europæus*.

**thorn-bush** (thörn'büşh), *n.* A shrub that produces thorns.

The lantern is the moon; I, the man in the moon; this thorn-bush, my thorn-bush. *Shak., M. N. D., v. 1. 263.*

**thorn-devil** (thörn'dev'l), *n.* A certain spiny lizard, *Moloch horridus*.

Thorn devil *M. horridus*.

**thorned** (thörn'd), *a.* [*< thorn¹ + -ed².*] Bearing thorns; thorny.

Silvery-green with thorned vegetation, sprawling lobes of the prickly pear. *The Atlantic, LXV. 267.*

**thornen** (thörn'nen), *a.* [*< ME. thornen, thernen, < AS. thyrnen (= OFries. thornen = OHG. durnin), of thorn, < thorn, thorn: see thorn¹ and -en².*] Made of thorns.

**thorn-headed** (thörn'hed'ed), *a.* Acanthocephalous: as, the thorn-headed worms (the members of the order *Acanthocephala*). See cut under *Acanthocephala*.

**thornhog** (thörn'hog), *n.* [*ME., < thorn¹ + hog¹.*] A hedgehog. *Apocrite of Iucyl, p. 66.*

**thorn-hopper** (thörn'hop'er), *n.* A tree-hopper, *Thelia crategi*, which lives on the thorn and other rosaceous trees.

**thorn-house** (thörn'hous), *n.* A salt-evaporating house in which the brine is caused to trickle down over piles of brush or thorns, in order to give greater exposure for evaporation.

**thornless** (thörn'les), *a.* [*< thorn¹ + -less.*] Free from thorns.

Youth's gay prime and thornless paths.  
*Coleridge, Sonnet to Bowles.*

Thy great  
Forefathers of the thornless garden, there  
Shadowing the snow-limb'd Eve.  
*Tennyson, Maud, xviii. 3.*

**thorn-oyster** (thörn'oïs'tër), *n.* A thorny bivalve of the family *Spondylidae*. See cut under *Spondylus*.

**thornstone** (thörn'stön), *n.* In the manufacture of salt, a concretion of carbonates of lime, magnesia, manganese, and iron, and some chlorides, which accumulates in the thorns of a thorn-house.

**thorn-swine** (thörn'swîn), *n.* A porcupine.  
**thorn-tail** (thörn'täl), *n.* [*< thorn¹ + tail¹.*] A humming-bird of the genus *Gouldia*, having long sharp tail-feathers (whence the genus is also called *Prymnacantha*). The one with the most spine-like rectrices is *G. popelairiei*, 4½ inches long, the male of a shining grass-green color, varied in some places with red, steel-blue, black, and white. It inhabits the United States of Colombia, Ecuador, and Peru.

**thorn-tailed** (thörn'täld), *a.* In *herpet.*, having spinose scales on the tail: specific in the phrase *thorn-tailed agamas*. See *Uromastix*.

**thorny** (thörn'ni), *a.* [*< ME. thorny = D. doornig = MHG. dornic, G. dornig; as thorn¹ + -y¹.*] The AS. form is *thornih* = (*i. dornicht*). 1. Abounding in or covered with thorns; producing thorns; prickly; spiny.

The steep and thorny way to heaven.  
*Shak., Hamlet, i. 3. 48.*

And the thorny balls, each three in one,  
The chestnuts throw on our path.  
*Browning, By the Fireside.*

2. Characteristic of or resembling a thorn; sharp; irritating; painful.

The sharp thorny points  
Of my alleged reasons drive this forward.  
*Shak., Hen. VIII, ii. 4. 224.*

A sharp thorny-toothed satirical rascal.  
*B. Jonson, Poetaster, iv. 1.*

3. In *zool.*, spinous; prickly; echinate.—**Thorny lobster**, the spiny lobster. See cut under *Palinurus*.—**Thorny oyster**. Same as *thorn-oyster*. = *Syn. 1.* Spinose, spinous, briery, sharp.

**thorogummite** (thö-rö-gum'it), *n.* [*< thorium + gummite.*] A mineral occurring in massive forms of a dull yellowish-brown color, and containing silica and the oxides of uranium, thorium, and the metals of the cerium and yttrium groups. It is somewhat related to gummite, but is distinguished by containing thorium. It occurs with gadolinite and other rare minerals in Llano county, Texas.

**thorough** (thur'ö), *prep. and adv.* [Early mod. E. also *thorow*; often written briefly *thoro*: *< ME. thoroug, thorou, thorug, thoruh, thorn, thow, thorz, thorugh, thurug, thurah, thourh, thorough, thourh, thourh, thourh, thour, < AS. thurh, rarely and chiefly in comp. thyrh, thorch, ONorth. therh = OS. thurh, thuru = OFries. thrach, trach, Fries. troch, also dor = MD. deur, door, D. door = MHG. durch, dor = OHG. duruh, dhoruh, durih, MHG. durch, dur, G. durch = Goth. thairh, thorough, through; orig., as the AS. (ONorth.) and Goth. forms indicate, with radical *e* (AS. *therh*, *> theorch*, *> thurh*); prob. orig. neut. acc. ('going through') of the adj. appearing in OHG. *derh*, 'pierced,' whence also ult. AS. dim. *thyrel* ('thyrel') (= OHG. *durhil, durhil, etc.*), pierced, as a noun, *thyrel*, a hole (see *thirl¹*, *n.*), and Goth. *thairko*, a hole (see *thirl¹*, and cf. *thurrock*); perhaps ult. connected with AS. *thringan*, etc., press, crowd (press through); see *thring*, *throng¹*. Hence, by transposition, *through¹*, the common modern form, differentiated from *thorough* as *prep. and adv.* For the form *thorough*, *< AS. thurh, cf. borough¹, < AS. burh, and furrow, < AS. furh.*] 1. *prep.* Through. on his policy of *Thorough*.  
*J. R. Green, Short Hist. Eng., p. 509.*

**thorough-bass** (thur'ö-bäs), *n.* 1. In *music*, a figured bass, or basso continuo—that is, a bass voice-part written out in full throughout an entire piece, and accompanied by numerals which

indicate stenographically the successive chords of the harmony.—2. A system of stenographic marks, especially numerals, thus used with a bass for the purpose of indicating the harmony.—3. The science or art of harmonic composition in general: so called because of the prevalence of such stenographic systems: a loose usage. The ordinary system of thorough-bass, that of numerals, appears first in a publication of Richard Dering in 1597, and its earliest systematic presentation was by Viadana in 1612. In this system numerals are used to indicate the intervals between each tone of the given bass and the constituent tones of the chord to which it belongs so far as is necessary for clearness. If the bass tone is the root of a triad, no numeral is used, unless, perhaps, in an opening chord, to mark the desired position of the soprano, or where a previous chord might occasion ambiguity. The first inversion of a triad is indicated either

by 7; or simply by 6; the second inversion by 6. A seventh-chord is marked by 7; its first inversion by 7; or by 6; its second inversion by 6; or by 5; and its third inversion by 5; or simply 4. A chord of the ninth is marked 9, etc. A suspension is indicated by a numeral corresponding to its interval from the bass, followed usually by a careful noting of the interval of the resolution. In two successive chords having tones in common that are held over from one to the other in the same voices, the numerals required to indicate them in the first chord are given, and are followed in the second by dashes to mark their continuance. Every chromatic deviation from the original tonality is indicated. If the deviation occurs in a tone a third above the bass, a ♯, ♭, or ♮ is generally used alone; but if it affects a tone already indicated by a numeral, the accidental required is prefixed to the numeral, except that, in place of a ♯ thus prefixed, it is customary to use a dash drawn through the numeral itself (as 8 or 4). A passage that is to be performed without chords—that is, in unison or in octaves—is marked *tasto solo*, or *t. s.* It is practically possible to indicate in these ways every element in the most complicated harmonic writing, so that an entire accompaniment may be presented on a single staff. The interpretation of such a score requires a thorough knowledge of the principles of part-writing. In consequence of the wide-spread use of this system, the first inversion of a triad is often colloquially called a *six-chord*, the second inversion a *six-four chord*, etc.

**thorough-bolt** (thur'o-bölt), *n.* In *mech.*, a bolt that passes through a hole and is secured in place by a nut screwed upon its projecting end: distinguished from a *tap-bolt*.

The act or the product of thinking.** Psychologically considered, thought has two elements—one a series of phenomena of consciousness during an interval of time in which there is no noticeable interruption of the current of association by outward reactions (peripheral sensations and muscular efforts); the other a more or less definite acquisition to the stock of mental possessions, namely, a notion, which may repeatedly present itself and be recognized as identical. The former of these elements is the act of thinking as it appears to consciousness; the latter is the lasting effect produced upon the mind, likewise considered from the point of view of consciousness. (a) In the most concrete sense, a single step in a process of thinking; a notion; a reflection.

"They are never alone," said I, "that are accompanied with noble thoughts."  
*Sir P. Sidney, Arcadia*, i.

Truth shall nurse her,  
Holy and heavenly thoughts still counsel her.  
*Shak., Hen. VIII.*, v. 5. 30.

Some to Conceit alone their taste confine,  
And glittering thoughts struck out at every line.  
*Pope, Essay on Criticism*, l. 290.

To me the meanest flower that blows can give  
Thoughts that do often lie too deep for tears.  
*Wordsworth, Ode, Immortality.*

(b) The condition or state of a person during such mental action.

Horn sat upon the grunde,  
In *thugte* he was ibunde.  
*King Horn* (E. E. T. S.), p. 32.

Sir Bedivere . . . paced beside the mere,  
Counting the dewy pebbles, fix'd in *thought*.  
*Tennyson, Morte d'Arthur.*

(c) A synonym of *cognition* in the common threefold division of modes of consciousness: from the fact that *thought*, as above described, embraces every cognitive process except sensation, which is a mode of consciousness more allied to volition than to other kinds of cognition.

Feeling, *thought*, and action are to a certain extent opposed or mutually exclusive states of mind.  
*J. Sully, Outlines of Psychol.*, p. 657.

(d) The objective element of the intellectual product.

*Thought* always proceeds from the less to the more determinate, and, in doing so, it cannot determine any object positively without determining it negatively, or determine it negatively without determining it positively.

*E. Caird, Philos. of Kant*, p. 313.

*Thought* is, in every case, the cognition of an object, which really, actually, existentially out of *thought*, is ideally, intellectually, intelligibly within it; and just because within in the latter sense, is it known as actually without in the former. *Mind*, No. 35, July, 1884.

(e) A judgment or mental proposition, in which form the concept always appears.

*Thought* proper, as distinguished from other facts of consciousness, may be adequately described as the act of knowing or judging things by means of concepts.

*Dean Mansel, Prolegomena to Logic*, p. 22.

(f) An argument, inference, or process of reasoning, by which process the concept is always produced.

Without entering upon the speculations of the Nominalists and the Realists, we must admit that, in the process of ratiocination, properly called *thought*, the mind acts only by words. *G. P. Marsh, Lects. on Eng. Lang.*, i.

(g) A concept, considered as something which, under the influence of experience and mental action, has a development of its own, more or less independent of individual caprices, and that (1) in the life of an individual, and (2) in history; as, the gradual development of Greek *thought*.

(h) The subjective element of intellectual activity; thinking.

By the word *thought* I understand all that which so takes place in us that we of ourselves are immediately conscious of it. *Descartes, Prin. of Philos.* (tr. by Veitch), i. § 9.

(i) The understanding; intellect.

 small bird said to be attendant on the croc-  
 odile, < *τροχος*, a running, < *τροχεω*, run (see  
*trochil*, *trochus*, etc.). The notion that *thrall*  
 is connected with *thrill*, as if meaning orig.  
 'thrilled'—i. e. 'one whose ears have been  
 thrilled or drilled in token of servitude'—is  
 ridiculous in theory and erroneous in fact.  
 The AS. *thræl*, thrall, cannot be derived from  
*thyrchan*, *thyrchan*, thirl (see *thirl*<sup>1</sup>, *thrill*<sup>1</sup>), and if  
 it were so derived, it could not mean 'thrilled,'  
 or 'a thrilled man.' **I. n.** 1. A slave; a serf;  
 a bondman; a captive.

And se thi sone that in seruage

For mannis soule was made a *thralle*.

*Hymns to Virgin*, etc. (E. E. T. S.), p. 1.

In a dungeon deepe huge numbers lay  
 Of caytive wretched *thralls*, that wayled night and day.

*Spenser, F. Q.*, I. v. 45.

The actual slave, the *thrall*, the *thow*, is found every-  
 where (in early Britain). The class is formed and recruited  
 in two ways. The captive taken in war accepts slavery as  
 a lighter doom than death; the freeman who is guilty of  
 certain crimes is degraded to the state of slavery by sen-  
 tence of law. In either case the servile condition of the  
 parent is inherited by his children.

*E. A. Freeman, Encyc. Brit.*, VIII. 274.

The *thrall* in person may be free in soul.

*Tennyson, Gareth and Lynette*.

**2.** One who is a slave to some desire, appe-  
 tite, spell, or other influence; one who is in  
 moral bondage.

Hi ne byeth [they are not] *threlles* ne to gold, ne to zeluer,  
 ne to hare caroyne [their flesh], ne to the guodes of fortune.

*Ayenbite of Inweyt* (E. E. T. S.), p. 86.

The slaves of drink and *thralls* of sleep.

*Shak., Macbeth*, III. 6. 13.

**3.** Thralldom, literal or figurative; bondage;  
 slavery; subjection.

of *thrasher* (appar. simulating *thrasher*<sup>1</sup>, *thresh-*

*er*<sup>1</sup>); see *thrasher*.] A kind of thristle or thrush;  
specifically, in the United States, a thrush-  
like bird of the genus *Harporhynchus*, of which  
there are numerous species, related to the  
mocking-bird, and less nearly to the birds com-  
monly called thrushes. The best-known, and the  
only one found in the greater part of the United States,  
is *H. rufus*, the brown thrush or brown thrasher, also

Brown Thrasher (*Harporhynchus rufus*).

called *sandy mocking-bird* from its color and shape and  
power of mimicry, in which latter respect it approaches  
the true mocker, *Mimus polyglottus*. Its proper song,  
heard only from the male and in the breeding-season, is  
loud, rich, skiffily modulated, and well sustained. This  
bird is very common in shrubbery and undergrowth, es-  
pecially southward. It is bright rufous above, nearly  
uniform; below whitish shaded with pale flaxen-brown or  
cinnamon, and heavily marked with chains of dark-brown  
streaks, the throat immaculate, with a necklace of oval  
spots. The length is about 11 inches, the extent only 13 or  
14, as the tail is long and the wings are short. It builds  
in a bush, occasionally on the ground, a bulky nest of  
twigs, leaves, bark-strips, and rootlets, and lays from four  
to six eggs, whitish or greenish, profusely speckled with  
brown, about an inch long and 1 inch broad. A similar  
but darker-colored thrasher is *H. longirostris* of Texas.  
In New Mexico, Arizona, and California there are several  
others, showing great variation in the length and curva-  
ture of the bill, and quite different in color from the com-  
mon thrasher. Such are the curve-billed, *H. curvirostris*;  
the bow-billed, *H. c. palmeri*; the Arizona, *H. bendirei*;  
the St. Lucas, *H. cinereus* of Lower California; the Cali-

Head of California Thrasher (*Harporhynchus rufus*),  
two thirds natural size.

fornia, *H. redivivus*; the Yuma, *H. lecontei*; and the cris-  
sal, *H. crissalis*—all found over the Mexican border.

It is characterized by flowers with a minute six-cleft cup-shaped perianth, awl-shaped filaments, introrse anthers, and a one-celled ovary. It includes 9 species, natives chiefly of the West Indies. They are low or medium-sized palms, with solitary or clustered thornless trunks, marked below with annular scars, and above clad with a very regular network of fibers remaining from the sheathing petioles. They bear terminal roundish leaves with many two-cleft induplicate segments, an erect ligule, and smooth slender petiole. The flowers are bisexual, and borne on long spadices with numerous spathes, and slender panicle branchlets. The small thin-shelled pea-shaped fruit contains a single roundish seed furrowed with sinuate channels. The species are known in general as *thatch-palms* in Jamaica. Two species occur in Florida: *T. parviflora*, the taller, usually a small and very slender tree, becomes stemless in the pine-barrens in the variety *Garberi*; the other, *T. argentea*, the broom-palm of the Isthmus of Panama, is sometimes known in conservatories as *chip-hat palm*, owing both names to the uses of its leaves. See also *silk-top* and *silver-top palmetto*, under *palmetto*.

*thrumwort* (*thrum*<sup>8</sup>), *n.* [*< thrum*<sup>1</sup> + *wort*<sup>1</sup>.] 1. The plant love-lies-bleeding, *Amarantus caudatus*, from its thrum-like flower-spike.—2. Same as *star-fruit*.—Great *thrumwort*, the water-plantain, *Alisma Plantago*. [Prov. Eng.]

*thruugt*. Past participle of *thring*.

*thrush*<sup>1</sup> (*thrush*), *n.* [*< ME. thrushe*, *thrusche*, *thryshe*, *< AS. thrysc*, *thrysc*, *thrysc* = OHG. *drosc*, *drosc*, a thrush: see further under *throstle*.] 1. A bird of the family *Turdidæ*, and especially of the genus *Turdus* in a broad sense;

Song-thrush (*Turdus musicus*).

specifically, the *throstle*, *song-thrush*, or *mavis* of Europe, *Turdus musicus*. There are more than a hundred species, nearly all of which have book-names in which *thrush* enters as a qualified term, and the common species of Great Britain and of the United States all have vernacular designations, in which *thrush* does or does not enter. No thrushes in any sense are common to the two countries named. In the former the dark-colored thrushes are called *blackbirds* and *ouzels*. Several true thrushes are figured under *blackbird*, 1, *fieldfare*, *hermit-thrush*, *mistle-thrush*, *ouzel*, *robin*, 2, *veery*, and *wood-thrush*.

2. Some bird not of the thrush family, mistaken for a thrush or compared to a thrush: with a qualifying epithet. Some are shrikes; others are starlings, warblers, etc. See the phrases following, among which few of the names of other than true thrushes are in other than historical use.—*African thrush*, an African starling, *Amydrus* (formerly *Turdus* or *Sturnus*) *morio*, mostly black and orange-chestnut, from 10 to 11 inches long.—*Alice's thrush*, the gray-cheeked thrush: named

Red-winged Thrush (*Turdus rufitorques*).

by Baird in 1858 after Miss Alice Kennicott of Illinois.—*Ant thrush*. See *ant-thrush*.—*Ash-rumped thrush*, *Lalage trit*, a campopline bird of the Malay countries, etc., a great stumbling-block of the early ornithologists.

—*Audubon's thrush*, a variety of the hermit-thrush.—

—*Babbling thrush*. See *babbler*, 2, *Tinididae*, *Brachypodina*, and *Liotrichina*.—*Black-and-scarlet thrush*, *Pericocotus speciosus*, a campopline bird of glossy-black and flaming-red colors, 8 inches long, inhabiting India and China.—

—*Black-cheeked thrush*, *Philepitta jala*, of Madagascar.—

—*Black-crowned thrush*, an Australian thickhead, *Pachycephala pectoralis*.—

—*Black-faced thrush*, a timelike bird of China and Burma, *Prionostictus chinensis*.—

—*Brown Indian thrush*, *Crateropus canorus*.—

—*Brown thrush*, the thrasher, *Harporhynchus rufus*.—

—*Chinese thrush*, *Trochilopterus canorum*.—

—*Dominican thrush*, *Sturnia sturnina*, an Asiatic starling of wide range.—

—*Doubtful thrush*. See *Seiura*.—

—*Dwarf thrush*. See *Seiura*.—

—*Fly-catching thrush*. (a) Any member of the genus *Myniodes*; a solitary. (b) See *Seiura*.—

—*Fox-colored thrush*, the common thrasher of the United States, *Catherpes*, 1731.—

—*Frivolt thrush*, probably *Pomatorhinus temporalis*, of Australia.—

—*Fruit-thrush*, a bulbul.—

—*Gilded thrush*, a West African glossy starling, *Lamprocorptus purpureus* (or *auratus*).—

—*Gingil thrush*, *Acridotheres ginginianus*, a sturnoid bird of northern and central India; a mina, very near *A. tristis*.—

—*Glossy thrush*, one of the glossy starlings of Africa, *Lamprocorptus* (*Uraeops*) *caudatus*.—

—*Golden-crowned thrush*. See *oven-bird*, 1.—

—*Gray-cheeked thrush*, *Turdus allica*, a common thrush of North America, very near the olive-backed, but lacking the tawny suffusion of the sides of the head.—

—*Gray thrush*, *Crateropus griseus*, of southern India.—

—*Ground thrush*. See *ground-thrush*.—

—*Gutteral thrush*, *Pachycephala gutturalis*.—

—*Harmonic thrush*, *Coluricincla harmonica*, of Australia, 9½ inches long, of a gray, brown, and white coloration, originally described as *Turdus harmonicus*.—

—*Hermit thrush*. See *hermit-thrush*.—

—*Long-billed thrush*. See *Tatara* (with cut).—

—*Long-legged thrush*. See *long-legged*.—

—*Madagascar thrush*, a sturnoid bird, *Hartlaubia madagascariensis*, confined to Madagascar.—

—*Malabar thrush*, *Ptilopus* (usually *Pastor* or *Temenuchus) malabaricus*, a stalling of the Indian peninsula.—

—*Rose-colored thrush*. Same as *rose-starling* (which see, under *starling*).—

—*Rufous-winged thrush*, *Certhia podice*, of Africa.—

—*Russet-backed thrush*, *Turdus ustulatus* of Nuttall, a variety of the olive-backed thrush, or scarcely specifically different, of Oregon.—

—*Shining thrush*, *Lamprocorptus splendidus*, a West African glossy starling.—

—*Short-winged thrush*, *Sphenura brachyptera*, of Australia.—

—*Songster-thrush*. See *shrike*, 2, 2.—

—*Song-thrush*, the *throstle* or *mavis*. See *song-thrush*, and cut above.—

—*Sordid thrush*, *Artamus sordidus*, a swallow-shrike of Australia.—

—*Spectacle-thrush*, *Garrulax or Ictanastes perspicillatus*, of southern China and Siam.—

—*Swainson's thrush*, the oliveback, usually called *Turdus swainsoni*.—

—*Tawny thrush*. See *tawny*.—

—*Thick-billed thrush*. See *Turdus*.—

—*Varied thrush*, the Oregon robin, *Hesperocichla nevada*. This is of about the same size and somewhat the system of coloration of the common American robin, but

Varied Thrush (*Hesperocichla nevada*).

the under parts are mostly orange-brown instead of chestnut, with a heavy black pectoral band; there is an orange-brown postocular stripe, and the wings are much variegated with this color. The bird is common along the Pacific coast region from Alaska to Mexico, and stragglers have been observed in other parts of the United States, even on the Atlantic coast. The nest is built in bushes, of twigs, grasses, mosses, and lichens; the eggs are pale greenish-blue speckled with dark-brown, and 1.10 × 0.80 inch in size.—

—*Variegated thrush*, a Brazilian cactus-wren, *Campalorhynchus variatus*.—

—*Volatile thrush*. See *Sisura*.—

*thrush-tit* (*thrush*<sup>12</sup>), *n.* A book-name of those turdoid oscine birds of the Himalayan region,

Thrush tit (*Cochon's tit*).

China, and Java which belong to a genus named *Cochon* by Hodgson in 1836 (changed to *Proserpinia* by him in 1844, and renamed *Xanthogenys* by Cabanis in 1850). These birds are neither thrushes nor tits, and are scattered widely through the ornithological system by various taxonomists. The 3 species are very beautiful. *C. viridis* and *C. purpurea* (each 11 inches long) inhabit parts of the Himalayas and China; *C. azurea* (9 inches) inhabits Java. Their coloration is indicated with some accuracy in their respective specific names.

*thrush*<sup>1</sup> (*thrush*), *v.*; pret. and pp. *thrush*, ppr. *thrushing*. [*< ME. thrusten*, but usually *thresten*, *thristen*, *< Icel. thrysta*, *thrust*, *press*, *force*, *compel*; ult. connected with *threat*, q. v.] I. *trans.*

gler is *phānsigār*, < *phānsi*, a noose.] 1. A member of a confraternity of professional assassins and robbers formerly infesting India, chiefly in the central and northern provinces. The thugs roamed about the country in bands of from 10 to 100, usually in the disguise of peddlers or pilgrims, gaining the confidence of other travelers, whom they strangled, when a favorable opportunity presented itself, with a handkerchief, an unwound turban, or a noosed cord. The shedding of blood was seldom resorted to. The motive of the thugs was not so much lust of plunder as a certain religious fanaticism. The bodies of their victims were hidden in graves dug with a consecrated pickaxe, and of their spoil one third was devoted to the goddess Kālī, whom they worshiped. About 1830-35 the British government took vigorous measures for their suppression, and thuggeri, as an organized system, is now extinct. Hence—2. A cutthroat; a ruffian; a rough.

During our civil war the regiments which were composed of plug-uglies, thugs, and midnight rounders, with noses laid over to one side as evidence of their prowess in bar-room mills and paving-stone riots, were generally cringing cowards in battle. *The Century*, XXXVI, 249.

**thuggee** (thug'ē), *n.* [Hind. *thugi*, *thugi*, thug-gism, < *thug*, *thug*, thug; see *thug*.] The system of mysterious assassination carried on by the thugs; the profession and practices of the thugs.

Some jackals brought to light the bones of a little child; and the deep grave from which they dug them bore marks of the mystic pickaxe of Thuggee.

*J. W. Palmer*, *The New and the Old*, p. 336.

**Thule** (thū'le), *n.* [*L. Thule*, *Thyle*, < Gr. *Θούλη*, *Θύλη* (see def.).] The name given by Pytheas of Marseilles to a region or island north of Great Britain, the position of which has been for more than two thousand years the subject of investigation and a matter of controversy. Of the voyage of Pytheas, who was probably nearly contemporaneous with Alexander the Great, nothing is known with certainty, since none of his writings have been preserved. It is, on the whole, most probable that he followed the east coast of Great Britain (of whose size he got a very much exaggerated idea), and that he obtained information in regard to the groups of islands lying still further north—namely, the Orkneys and Shetland—which he embraced under the general name of *Thule*. From what he is believed to have said in regard to the length of the day in Thule at the summer solstice, it is evident that, as he is known to have been a skilled astronomer, he thought that this land was situated on or near the arctic circle. The Romans frequently added to Thule the designation of *Ultima* (the Furthest Thule), and, from classic times down to the present day, *Thule*, besides remaining a subject for voluminous controversy among geographical critics, has been in constant use by poets and others as designating some unknown, far-distant, northern, or purely mythical region, or even some goal, not necessarily geographical, sought to be attained. This use of *Thule* and *Ultima Thule* runs through the literature of all the cultivated languages of Europe.

Where the Northern Ocean, in vast whirls,  
Boils round the naked melancholy isles  
Of furthest Thule. *Thomson*, *Autumn*.

This ultimate dim Thule. *Poe*, *Dream-Land*.

**thulite** (thū'lit), *n.* [*Thule* + *-ite*.] In mineral, a rare variety of zoisite, of a peach-blossom color, found in the granite districts of Norway.

**thulium** (thū'li-um), *n.* A supposed element found in the mineral gadolinite. Its properties have not been ascertained, and its existence is doubtful.

**thulwar** (thul'wār), *n.* Same as *tulwar*.

**thumt**, *v. t.* [Appar. a var. of *thump*, or else an error for *thumt*.] To beat. [Rare.]

For he's such a churl waxen now of late that he be  
Neuer so little angry he thums me out of all cry.  
*The Taming of a Shrew* (facsimile of 1st quarto ed., 1594).

**thumb<sup>1</sup>** (thum), *n.* [Early mod. The shortest and thickest finger of the human hand; the pollex; the first digit of the hand, on the radial side, next to the index or forefinger. The perfected thumb is the chief characteristic of the human hand as distinguished from that of all other animals. This perfection is seen in the free movements of the member, and its ready applicability to any one of the other digits or to them all together. The extent to which it stands away from the rest indicates the great power and accuracy with which the hand may be used in grasping, as a prehensile organ, as in holding a pen or a knife. Such freedom and versatility are accom-

plished by the peculiar construction of the joint at the base of that metacarpal which supports the thumb. This articulation with the carpal bone called the trapezium is by means of reciprocally saddle-shaped articular surfaces, having the ease and extent of movement of a ball-and-socket or universal joint, though by a different mechanism. It is the only instance of such an articulation in the human body. The metacarpal bone of the thumb also differs from the rest in its mode of ossification, having, like the phalanges, a proximal and not a distal epiphysis—that is, the gristly cap that ossifies separately from the rest of the bone is on the end of the bone next to the wrist. The thumb is also peculiar in having but two joints or phalanges, the other digits having three apices. The thumb is likewise moved by more muscles than those which actuate any other digit. They are a long deep flexor, and three separate long extensors (one for each phalanx and for the metacarpal bone), these four muscles coming to the thumb from high up in the forearm; and also several short muscles confined to the hand, the short flexor, the abductor, the adductor, and the opponens—altogether eight muscles in long and short sets of four each. The short muscles form the thenar eminence, or fleshy ball of the thumb.

Speke closes all thyng, as *thombe* in fiste.

*Book of Precedence* (E. E. T. S., extra ser.), i. 110.

2. The inner, radial, or first digit of the fore paw of any animal. When there are five digits, the first of these always corresponds to the human thumb; otherwise not.—3. The movable radial digit of a bird's manus or pinion, which bears the packet of feathers called the alula or bastard wing, and which is usually movable apart from the rest of the bones. By some it is supposed to correspond to the human thumb. It is more probably the homologue of the index or forefinger. See *cut under pinion*.

4. The thumb of the foot; the hallux; the inner digit of the foot, called the *great toe* in man. In quadrumanous or four-handed animals, as monkeys, opossums, and some others, it functions as a thumb, stands apart from the other digits, and so converts the hind foot into a grasping member, or "hand." Its condition in man is quite exceptional in comparison with those animals to which he is nearest allied zoologically.

5. The hind toe of a bird (except a three-toed woodpecker); the hallux; when there are two hind toes, the inner one of these (except in trogons). It is functionally a thumb, opposing other digits, and fitting the foot for grasping or perching. It is often absent or very small and functionless. Its length, low insertion, and entire freedom of movement are highly characteristic of the passerine series of birds, and varying conditions of its principal flexor tendon give rise to *monopodinus* and correlated terms.—Ball of the thumb. See def. 1. His fingers are all thumbs. See *finger*.

**Thumb** for the thumb. See *horn*. Rule of thumb. To bite the thumb at. See *bite*. To fash one's thumb. See *fash*.—Under one's thumb, under one's power or influence; quite subservient.

She . . . is obliged to be silent! I have her under my thumb. *Richardson*, *Sir Charles Grandison*, III. xxviii.

**thumb<sup>1</sup>** (thum), *v. t.* [*thumb<sup>1</sup>*, *n.*] 1. To handle or perform awkwardly; as, to *thumb* over a tune. *Imp. Dict.*—2. To soil or wear out with much handling; hence, to use, read, or turn over the pages of (as a book).

Shall I thumb Holy Books, confin'd  
With Abigails, forsaken?

*Prior*, *The Female Phaeton*.

Horace and Virgil must be *thumbed* by a boy, as well before he goes to an apprenticeship as to the university. *Steele*, *Tatler*, No. 173.

3. To turn (one's glass) over the thumb; an old custom when persons were drinking together, intending to show that the glass had been emptied so that the small drop remaining would lie on the thumb-nail without running off. Compare *supercalculum*.—To thumb the hat. See *hat*.

**thumb<sup>2</sup>** (thum), *n.* [Prob. a veterinary corruption of *thum<sup>2</sup>*.] Palpitation of the heart in domestic animals, as the horse, the result of functional or organic disease. See *palpitation*.

**thumb-band** (thum'band), *n.* A twist of anything as thick as the thumb.

**thumb-bird** (thum'bērd), *n.* The miller's-thumb, a bird; so called from its tiny size.

**thumb-blue** (thum'blō), *n.* Indigo in the form of small balls or lumps, used by washerwomen to give a clear or pure tint to linen, etc.

**thumb-cleat** (thum'klēt), *n.* *Naut.*, a cleat resembling a thumb, for preventing the topsail reef-earings from slipping, and for other purposes.

**thumb-cock** (thum'kok), *n.* A small cock with a thumb-piece, or small cross-handle, adapting it to be turned by the thumb and finger.

**thumbed** (thumd), *a.* [*thumb<sup>1</sup>* + *-ed*.] 1. Having thumbs, as distinguished from other digits.—2. Marked with thumb-marks: as, a *thumbed* book.

**thumbikin** (thum'i-kin), *n.* Same as *thumbkin*. [Scotch.]

The boot and the *thumbikins* could not extort confessions. *Bancroft*, *Hist. U. S.*, II. 410.

**thumbkin** (thum'kin), *n.* [Also *thumbkin*, *thumbikin*; < *thumb<sup>1</sup>* + dim. *-kin*.] A thumb-screw,

or set of thumb-screws; the torture by this instrument. See *cut under thumb-screw*. [Scotch.]

Bloody rope, and swift bullet, and trenchant swords, and pain of boots and *thumbkins*.

*Scott*, *Heart of Mid-Lothian*, x.

**thumb-latch** (thum'lach), *n.* A kind of door-latch in which a lever passing through the door raises the latch. The lever is made to play from the outside by pressing upon the broadened end of it, generally with the thumb. See *cut under latch*.

**thumbless** (thum'les), *a.* [*thumb<sup>1</sup>* + *-less*.] 1. Having no thumbs: as, the thumbless and *thumbless* spider-monkeys. See *Ateles*, *Brachyteles*, and *cut under spider-monkey*.—2. Having no hallux, or hind toe, as a bird.—3. Clumsy; awkward; unskilful.

When to a house I come and see

The genius wasteful more than free;

The servants *thumbless*, yet to eat

With lawless tooth the flour of wheat.

*Herriek*, *Leprosie in Houses*.

**thumb-mark** (thum'mark), *n.* A mark left by the impression of the thumb, as on the leaves of a book; hence, any mark resembling this.

**thumb-nut** (thum'nūt), *n.* A nut for a bolt or screw having wings which give a purchase to the thumb in turning it.

**thumb-pad** (thum'pad), *n.* A pad-like formation over the inner metacarpal bone of some batrachians.

**thumb-piece** (thum'pēs), *n.* 1. A plate-shaped appendage to the handle of a vessel, meant to receive the thumb of the hand that grasps it, and afford a good hold.—2. The disk or button by pressing which a spring is opened. This, in ornamental furniture, snuff-boxes, etc., is often very richly adorned, or made of precious material, as gold, or is sometimes a precious stone mounted in gold.

3. In *needle-manuf.*, a piece of stout leather used to protect the hand in pressing the needle-blanks against a grindstone to form the points.—4. On any piece of mechanism, a projection which is intended to be worked by the thumb.

**thumb-position** (thum'pō-zish'on), *n.* In *violoncello-playing*, a shift in which the thumb of the left hand is used as a temporary nut.

**thumb-pot** (thum'pot), *n.* A very small pot used by florists for starting slips or seedlings.

**thumb-ring** (thum'ring), *n.* 1. A ring designed to be worn upon the thumb: often a seal-ring, and in that case probably worn only occasionally, as when occupied in business.

When I was about thy years . . . I could have crept into any alderman's *thumb-ring*.

*Shak.*, 1 Hen. IV., ii. 4. 365.

Though you presume Satan a subtle thing,

And may have heard he's worn in a *thumb-ring*.

*B. Jonson*, *Devil is an Ass*, Prol.

One that is good only in Riches, and wears nothing rich about him, but the Gout, or a *thumb-ring* with his Grand-sirs Sheep-mark or Grannams butter-print on't, to seal Baggs, Acquittances, and Counterpanes.

*Brome*, *Northern Lass*, ii. 1.

I believe, when he is dead, you will wear him in *thumb-rings*, as the Turks did Scanderbeg.

*Dryden*, *Epistle to the Whigs*.

2. A ring fastened to the guard of a dagger or sword to receive the thumb. Double thumb-rings are sometimes made for fixing the dagger on a staff, or at the end of a lance, to resist cavalry.

**thumb-screw** (thum'skrō), *n.* 1. A screw having a broad head, or a plate projecting from the head, so that it may be turned easily by the finger and thumb.—2.

An instrument of torture by which one or both thumbs were compressed so as to inflict great agony without danger to life. It consisted of a frame with three uprights or bars, between which the thumbs were passed; a piece sliding on the bars was forced down upon the thumbs by turning a screw.

Thumb-screw.

**thumb-stall** (thum'stāl), *n.* 1. A utensil for pushing a needle by the action of the thumb, consisting of a plate or boss with small depressions like those of a thimble. Compare *patm*, 4.—2. A case or sheath of leather or other substance to be worn on the thumb by a gunner for protection when he closes the vent while the gun is being sponged after firing.—4. A cot worn on the thumb by anglers to prevent blistering from the friction of the line while checking the too swift revolution of the reel.—5. Same as *pounce*, 1.

**thumb-tack** (thum'tak), *n.* A tack with a large flat head, designed to be thrust in by the pressure of the thumb or a finger.

Be yourself, great sir,  
The thunderbolt of war  
Massinger, *Bartholomew*.

Who can omit the Graechi, who declare  
The Scipios' worth, those thunderbolts of war?  
Dryden, *Æneid*, vi. 1159.

5. A dreadful threat, denunciation, censure, or the like, proceeding from some high authority; a fulmination.

He severely threatens such with the thunderbolt of excommunication.  
Hakewell.

A greater wreck, a deeper fall,  
A shock to one — a thunderbolt to all.  
Byron, *Mazeppa*, i.

6. *pl.* The white campion (*Lychnis vespertina*), the corn-poppy (*Papaver Rhæas*), or the bladder-campion (*Silene Cucubalus*) — the last so named from the slight report made by exploding the inflated calyx. *Britten and Holland*. [Prov. Eng.]

**thunderbolt** (thun'dér-bôlt), *v. t.* [*< thunderbolt, n.*] To strike with or as with lightning.

This was done so in an instant that the very act did overrun Philoclea's sorrow, sorrow not being able so quickly to thunderbolt her heart through her senses.  
Sir P. Sidney, *Arcadia*, iii.

**thunderbolt-beetle** (thun'dér-bôlt-bê'tl), *n.* A longicorn beetle, *Arhopalus fulminans*, which burrows in the sap-wood of the oak and chestnut: so called from the zigzag gray lines, likened to thunderbolts, which cross the dark elytra.

**thunder-bounce** (thun'dér-bouns), *n.* A sudden noise like thunder. [Rare.]

When blustering Boreas toseth up the deep,  
And thumps a thunder-bounce.  
Ford, *Lover's Melancholy*, i. 1.

**thunderburst** (thun'dér-bêrst), *n.* A burst of thunder. *Imp. Dict.*

**thunder-carriage** (thun'dér-kar'āj), *n.* A name given to the conventional representation in early Scandinavian art of a car or chariot in which the god Thor is supposed to ride from place to place. *Worsaae*, *Danish Art*, p. 168.

**thunderclap** (thun'dér-klap), *n.* [*< ME. thunder-clap; < thunder + clap*]. A clap or burst of thunder; a sudden report of a discharge of atmospheric electricity; a thunder-peal.

Noble arms,  
You ribs for mighty minds, you iron houses,  
Made to defy the thunder-claps of fortune,  
Rust and consuming time must now dwell with ye!  
Fletcher, *Loyal Subject*, i. 3.

**thunder-cloud** (thun'dér-kloud), *n.* A cloud that produces lightning and thunder. Such clouds are of the cumulus or strato-cumulus type, generally appearing in dense, dark, towering masses, with a cirro-stratus overflow. In hilly regions thunder-clouds have been observed entirely within a limit of 1,500 feet above the earth, but in general the base of the cloud is from 3,000 to 4,000 feet high, and its vertical thickness from 2,000 to 12,000 feet.

These Tornadoes commonly come against the Wind that is then blowing, as our *Thunder-clouds* are often observed to do in England.  
Dampier, *Voyages*, I. 79.

**thunder-crack** (thun'dér-krak), *n.* A clap of thunder.

Nor is he mov'd with all the thunder-cracks  
Of tyrants' threats.  
Daniel, *To the Countess of Cumberland*, st. 5.

**thunder-dart** (thun'dér-därt), *n.* A thunderbolt. *Spenser*, *Visions of Bellay*, l. 53.

**thunder-darter** (thun'dér-där'tér), *n.* He who darts the thunder; Jove.

O thou great *thunder-darter* of Olympus, forget that thou art Jove, the king of gods. *Shak.*, *T. and C.*, ii. 3. 11.

**thunder-dint** (thun'dér-dint), *n.* [*ME.*, also *thunderdent*; *< thunder + dint*]. A thunder-clap.

How Caphaneus the proude  
With *thunder-dynt* was slayn, that criede loude.  
Chaucer, *Troilus*, v. 1505.

**thunder-dirt** (thun'dér-dêrt), *n.* The gelatinous volva of *Heodictyon*, especially *I. cibarium*, a gasteromycetous fungus, which is or was formerly eaten by the aborigines of New Zealand. See *Heodictyon*.

**thunder-drop** (thun'dér-drop), *n.* One of the large, heavy, thinly scattered drops of rain which prelude a thunder-shower.

Her slow full words sank thro' the silence drear,  
As *thunder-drops* fall on a sleeping sea.  
Tennyson, *Fair Women*.

**thunderer** (thun'dér-êr), *n.* [*< thunder + -er*]. One who thunders; specifically, with the definite article, Jupiter (called *Jupiter Tonans*).

The faults of kings are by the Thunderer,  
As oft as they offend, to be reveng'd.  
Beau. and Fl., *Thierry and Theodoret*, i. 2.

When now the *thund'r'er* on the sea-beat coast  
Had fix'd great Hector and his conqu'ring host.  
Pope, *Iliad*, xiii. 1.

**thunder-fish** (thun'dér-fish), *n.* 1. The electric catfish of the Nile, *Malapterurus electricus*, which is capable of giving shocks like the electric eel and electric ray. Also known by its Arabian name *rausch*. See *cut* under *Malapterurus*. — 2. A European cyprinoid, *Misgurnus fossilis*; apparently so called as forced out of the mud, in which it habitually burrows, by a thunder-shower. See *misgurn*.

**thunder-fit** (thun'dér-fit), *n.* A shock or noise resembling thunder. [Rare.]

The ice did split with a *thunder-fit*;  
The helmsman steer'd us through!  
Coleridge, *Ancient Mariner*, i.

**thunder-flower** (thun'dér-flou'ér), *n.* A name of the stitchwort (*Stellaria Holostea*), of the corn-poppy (*Papaver Rhæas*), and of the white campion (*Lychnis vespertina*). *Britten and Holland*. [Prov. Eng.]

**thunder-fly** (thun'dér-flî), *n.* A thrips; any member of the *Thripidae*. See *cut* under *Thrips*.

The tiny *thunder-flies* which we often find during the summer in countless multitudes.  
Adams, *Man. Nat. Hist.*, p. 213.

**thunder-gust** (thun'dér-gust), *n.* A thunder-storm. [Rare.]

Until the *thundergust* o'erpass.  
Lovell, *On Planting a Tree at Inverara*.

**thunder-hammer** (thun'dér-ham'êr), *n.* See *thunderbolt*, 3 (a).

**thunder-head** (thun'dér-bed), *n.* One of the round compact swelling cumulus clouds which frequently develop into thunder-clouds. The thunder-head is seen at first, perhaps, on the horizon, of a brilliant whiteness; then, slowly rising, and darkening until only a silver edge is left of its brightness, it becomes a towering mass of black thunder-cloud. [Originally New Eng.]

On either hand a sullen rear of woes,  
Whose garnered lightnings none could guess,  
Filing its *thunder-heads*, and muttering "Cease!"  
Lovell, *Under the Old Elm*, vii. 2.

**thunder-headed** (thun'dér-hêd'ed), *a.* Pertaining to a thunder-head; like a thunder-head: as, *thunder-headed clouds*.

**thunder-house** (thun'dér-hous), *n.* A small model of a house with electric conductors so arranged as to show, when a discharge is passed through them, how a building may be injured by lightning.

**thundering** (thun'dér-ing), *n.* [Verbal *n.* of *thunder, v.*] The report of a discharge of lightning; thunder.

Intreat the Lord . . . that there be no more mighty  
*thunderings* and hail. *Ex. ix. 28.*

**thundering** (thun'dér-ing), *p. a.* 1. Producing or characterized by a loud rumbling or rattling noise, as that of thunder or artillery; loud. — 2. Unusual; extraordinary; great; tremendous: used as an intensive. [Colloq.]

He goes a *thundering* pace, that you would not think it possible to overtake him. *Rev. T. Adams*, *Works*, II. 420.

I was drawing a *thundering* fish out of the water, so very large that it made my rod crack again.  
Tom Brown, *Works*, I. 219.

Haint they cut a *thunderin'* swarth?  
Lovell, *Biglow Papers*, 1st ser., i.

**The Thundering Legion.** See *legion*.

**thunderingly** (thun'dér-ing-li), *adv.* 1. In a thundering manner; with loud noise. — 2. Unusually; extraordinarily; tremendously: as, a *thunderingly* big egg. [Colloq.]

**thunderless** (thun'dér-les), *a.* [*< thunder + -less*]. Unattended by thunder or loud noise.

*Thunderless* lightnings striking under sea.  
Tennyson, *To the Queen*.

When on nights  
Of summer-time the harmless blaze  
Of *thunderless* heat-lightning plays.  
Whittier, *Lines on a Fly-Leaf*.

**thunderlight**, *n.* [*ME. thunderlight; < thunder + light*]. Lightning.

The way of *thunderlight* that is wont to smyten heye  
towres.  
Chaucer, *Boethius*, l. meter 4.

**thunderous** (thun'dér-us), *a.* [Formerly also *thundrous; < thunder + -ous*]. 1. Thunder-producing; betokening thunder; awful.

At Heaven's door  
Look in, and see each blissful Deity,  
How he before the *thunderous* throne doth lie.  
Milton, *Vac. Ex.*, l. 36.

2. Thundering; loud and deep-sounding; making a noise like thunder.

The solid roar  
Of *thunderous* waterfalls and torrents hoarse.  
Keats, *Hyperion*, ii.

**thunderously** (thun'dér-us-li), *adv.* In a thunderous manner; with thunder or a noise like thunder.

Now and then chariots rolled by *thunderously*.  
L. Wallace, *Ben-Hur*, p. 212.

**thunder-peal** (thun'dér-pêl), *n.* A peal or clap of thunder.

All the past of Time reveals  
A bridal dawn of *thunder-peals*,  
Wherever Thought hath wedded Fact.  
Tennyson, *Love Thou Thy Land*.

**thunder-pick** (thun'dér-pik), *n.* A belemnite. [Prov. Eng.]

**thunder-plant** (thun'dér-plant), *n.* The house-leek, *Sempervivum tectorum*.

**thunder-pump** (thun'dér-pump), *n.* A short violent downpour of rain in connection with a thunder-storm. [Rare.]

The rains are extremely frequent, and, instead of falling in what seem like *thunder-pumps*, they are prolonged, and fall continuously as drizzling rain.

J. C. Brown, *Reboisement in France*, p. 35.

**thunder-pump** (thun'dér-pump), *n.* [*< thunder + pump* for *thump*]. (1. *thunder-pumper* and *pump-thunder*.) Same as *pump-thunder*.

**thunder-pumper** (thun'dér-pum'pêr), *n.* [See *thunder-pump*]. 1. The American bittern; same as *pump-thunder*. — 2. The croaker or sheeps-head, *Haplochromis grunniens*. [Local, U. S., in both senses.]

**thunder-rod** (thun'dér-rod), *n.* Same as *lightning-rod*.

**thunder-shoot** (thun'dér-shôt), *v. t.* To strike or destroy by a thunderbolt or lightning.

His [the atheist's] death commonly is most miserable. — Either burnt, as Diogenes; or eaten up with lice, as Pherecydes; or devoured by dogs, as Lucian; or *thunder-shot* and turned to ashes, as Olympus.

Fuller, *Holy and Profane State*, V. vi. 9.

**thunder-shower** (thun'dér-shou'êr), *n.* A shower accompanied by thunder and lightning.

**thundersmith** (thun'dér-smith), *n.* A forger of thunder or of thunderbolts; figuratively, a coiner of loud, pretentious words. [Rare.]

That terrible *thundersmith* of terms.  
G. Harvey, *Four Letters*.

**thunder-snake** (thun'dér-snāk), *n.* 1. See *snake*. — 2. The little worm-snake, *Carpophis* (formerly *Celuta*) *amæna*, common in the United States; apparently so called because forced out of its hole by a heavy shower.

**thunder-stone** (thun'dér-stôn), *n.* 1. Same as *thunderbolt*, 1, 2.

Gui. Fear no more the lightning-flash.  
Arv. Nor the all-dreaded *thunder-stone*.  
Shak., *Cymbeline*, iv. 2. 271.

Envy, let pines of Ida rest alone,  
For they will grow spite of *thy thunder-stone*.  
Marston, *Satires*, iv. 164.

2. Same as *thunderbolt*, 3 (a) and (c).

Each tube [of Stone] had a small cavity in its Center, from which its parts were projected in form of rays to the circumference, after the manner of the Stones vulgarly call'd *Thunder-stones*.

Maunderell, *Aleppo to Jerusalem*, p. 52.

[Obsolete or provincial in both senses.]

**thunder-storm** (thun'dér-stôrm), *n.* A storm accompanied by lightning and thunder, occurring when the atmosphere is in a state of unstable equilibrium, and has a high relative humidity. Thunder-storms have been conveniently classified into *heat thunder-storms* and *cyclonic thunder-storms*. The former is the type preeminently characteristic of the equatorial regions, where lightning and thunder occur on their grandest and most violent scale. Here the thunder-storm has little or no progressive motion, and its entire history may be followed in the overturning process by which an abnormally hot, humid, unstable condition of the atmosphere becomes stable. In summer similar heat thunder-storms arise locally in temperate latitudes, especially in hilly or mountainous countries. Thunder-storms of the second class are associated with areas of low pressure, and are found most frequently on their southern border, in the quadrant where an unstable atmospheric condition tends to prevail. These thunder-storms have a progressive motion eastward, but their velocity may be quite different from that of the general cyclonic movement with which they are associated. The different isobaric types known as *secondaries* and *V-shaped depressions* give rise to thunder-storms having distinct features, and those accompanying the latter have been specifically designated *line thunder-storms*. In general, the diurnal and annual periods and other characteristics of cyclonic thunder-storms exhibit a wide diversity in different regions, and thereby illustrate the intimate dependence of these storms on the differing cyclonic conditions which characterize different climates. Thus, in Iceland thunder-storms occur only in winter, so that the usual annual periodicity is there reversed.

**thunderstrike** (thun'dér-strîk), *v. t.*; pret. *thunderstruck*, pp. *thunderstruck* or *thunderstricken*, ppr. *thunderstriking*. [*< thunder + strike*; a back-formation from *thunderstruck*]. 1. To strike, blast, or injure by or as by lightning; strike with or as with a thunderbolt. [Rare.]

The armaments which *thunderstrike* the walls  
Of rock-built cities, bidding nations quake.  
Byron, *Childe Harold*, iv. 131.

2. To astonish or strike dumb, as with something terrible: usually in the past participle.

**thussockt**, *n.* Same as *tussock*.  
**thuswise** (thus'wiz), *adv.* [*thus* + *wise*].  
 In this manner; thus. [*Rare*.]

It is surely better to acquire pieces of historical information *thuswise* than never to acquire them at all.  
*Nineteenth Century*, XX, 113.

**Thuya** (thū'yū), *n.* [NL. (Tournefort, 1700), < Gr. *thua*, *thū*, an African tree with sweet-smelling wood, supposed to be a kind of juniper or arbor-vitæ.] A genus of conifers (the arbor-vitæ), of the tribe *Cupressaceæ* and subtribe *Thuyopsidinae*. It is distinguished from *Cupressus*, the cypress, by its smaller, less indurated cones, and usually compound leafy branches. The 4 species are natives of North America and eastern Asia. They are evergreen trees and shrubs with a very characteristic habit, having the flat leaf-like branchlets almost wholly covered by small appressed imbricated leaves, some of which are awl-shaped and slightly spreading; others, on different branchlets, are blunt, scale-like, and adnate. The small ovoid or oblong cone rarely exceeds half an inch in length, and is usually composed of from three to five pairs of coriaceous scales, dry and spreading when ripe, the lowest and uppermost empty, the others bearing two or three seeds each. The typical species, *T. occidentalis*, the arbor-vitæ, or white cedar, of

Branch with Cones of American Arbor-vitæ *Thuya occidentalis*.  
 a, the male flower, b, scale of cone, showing the two seeds; c, a seed, ventral view.

the northern United States, forms extensive cedar-swamps from Minnesota to central New York and New Brunswick, and occurs on rocky banks and along the mountains to North Carolina. It is usually a small tree, but is sometimes from 50 to 70 feet high. It is cultivated for lawns and hedges, and yields a valuable light-brown wood, a very aromatic oil, and a tincture used as an emmenagogue. *T. gigantea*, the canoe-cedar, or red cedar, of the West, found chiefly from Alaska to Oregon, is a large tree often from 100 to 135 feet high and 12 feet in diameter. One is said to have measured 22 feet in diameter and 325 in height. The trunk rises often for 100 feet as a columnar shaft free from branches. The trunks were hollowed out by the Indians into canoes. The dull reddish-brown wood—which is light, soft, compact, easily worked, and, as in the other species, slow to decay—is greatly valued for cabinet-work, interior finish, cooperage, etc. The bark yields a fiber which is made into hats, mats, and baskets. In cultivation it is often known by the names of *T. plicata* and *T. Lobbi*, and in Europe as *Libocedrus decurrens*, by an early exchange with the true *Libocedrus*, the incense-cedar of California. The other commonly cultivated species, *T. (Biota) orientalis*, the Chinese arbor-vitæ, native of eastern Asia, is parent of numerous varieties remarkably different in habit, with bright-green, golden, silvery, or variegated spray, closer and more vertical than in the tree of the Atlantic coast, or drooping, elongated, and slightly cylindrical in the variety *pendula*, the weeping arbor-vitæ. Several other species formerly classed here are now separated, as the genera *Thuyopsis* and *Chamaecyparis*. Compare also *Retinospora*.

**thuyite** (thū'yit), *n.* [*Thuya* + *-ite*]. A fossil plant supposed to belong or be closely related to *Thuya*. Several plants from the Wealden and Jurassic have been described under *Thuyites* as a generic name, in regard to all or most of which there is considerable uncertainty.

**Thuyopsidinae** (thū-yop-si-dī'nē), *n. pl.* [NL. (Engler, 1887), < *Thuyopsis* (-id-) + *-inae*.] A subtribe of conifers, of the tribe *Cupressineæ*, typified by the genus *Thuyopsis*, and comprising also *Libocedrus* and *Thuya*.

**Thuyopsis** (thū-yop'sis), *n.* [NL. (Siebold and Zuccarini, 1842), < *Thuya* + Gr. *opsis*, resemblance.] A genus of conifers, of the tribe *Cupressineæ*, type of the subtribe *Thuyopsidinae*. It is characterized by its narrowly two-winged seeds, four or five under each of four to eight fertile scales of the globose cone. The only species, *T. dolabrata*, is a native of Japan, there known as *akeki*, and planted to shade avenues. It is a tall conical evergreen from 50 to 90 feet high. Its pendulous whorled primary branches bear very numer-

ous two-ranked branchlets wholly covered by opposite leaves imbricated in four ranks, the marginal ranks larger, acute, and slightly spreading, the others appressed, glandular, and shining. It is cultivated in dwarf varieties as a shrub for lawns, under the name of *hatched-leaved arbor-vitæ*.

**thwack** (thwak), *v. t.* [Also dial. *twack*; a var. of *whack*, prob. due in part to confusion with the equiv. *thack*², and in part to a phonetic interchange, *wh* to *thw*-, which occurs in the other direction in *white*², var. of *thwite*, in *whittle*, var. of *thwittle*, in *whart*, var. of *thwart*¹, etc.] 1. To strike with something flat or hard; beat; bang; whack.

He shall not stay,  
 We'll *thwack* him hence with staffs.

Shak., W. T., i. 2. 37.

Take all my cushions down, and *thwack* them soundly,  
 After my feast of millers.

Middleton (and another), Mayor of Queenborough, v. 1.

2†. To ram down; pack.

The letters he addressed me from time to time, to the number of six hundred, *thwack* with loue and kindness.  
*Stanhurst*, Descrip. of Ireland (Holinshed's Chron., i. 42).

**thwack** (thwak), *n.* [*thwack*, *v.*] A sharp blow with something flat or hard; a whack; a bang.

But Talgol first with hardy *thwack*

Twice bruised his head, and twice his back.

S. Butler, Hudibras, i. ii. 795.

Noble captain, lend me a reasonable *thwack*, for the love of God, with that cane of yours over these poor shoulders.  
*Swift*, Tale of a Tub, xi.

=Syn. See *thump*.

**thwacker** (thwak'ér), *n.* [*thwack* + *-er*¹.] One who or that which thwacks; specifically, a wooden tool used for beating half-dried pantiles into shape. The tiles are then trimmed with a thwacking-knife.

**thwacking** (thwak'ing), *a.* Thumping; tremendous; great. [*Colloq.*]

Sec. Ser. A bonfire, sir?

Sir Ol. A *thwacking* one, I charge you.

Middleton, Chaste Maid, v. 3.

**thwacking-frame** (thwak'ing-frām), *n.* In tile-making, a table with a curved top, on which a half-dried pantile is bent to form by means of blows with a thwacker. *E. H. Knight*.

**thwacking-knife** (thwak'ing-nif), *n.* A knife for trimming pantiles on the thwacking-frame.

**thwaite**¹ (thwāt), *n.* [Also dial. *twait*; < ME. *\*thwaite* (> AF. *twaitte*, < Icel. *thveit*, *f.*, *thveiti*, *n.*, a piece or parcel of land, a paddock (common in local names), also a unit of weight, and a small coin, = Norw. *teit*, *tvet*, *twet*, *twed*, a piece of ground (common in local names), lit. a piece, from the verb seen in AS. *thwitan*, ME. *thwiten*, cut, chop: see *thwite*.] A piece of ground reclaimed and converted to tillage. *Thwaite* chiefly occurs as the second element in local names, especially in the lake district of the north of England, as in *Bassenthwaite*, *Crossthwaite*, and *Stonethwaite*.

**thwaite**² (thwāt), *n.* Same as *thwaite*¹.

**thwangt**, *n.* A Middle English form of *thong*.  
**thwarlet**, *a.* [ME., perhaps connected with *twirl* (D. *dearlen*); otherwise possibly an error for *thwart*, cross: see *thwart*¹, *a.*] Twisted (?); intricate (?): found only in the following passage.

As the dok lasted,

Sythen thrawn wyth a thwong a *thwarle* knot alofte,

Ther mony bellez ful bryst of brende gode rungen.

Sir Gawayne and the Green Knight (E. E. T. S.), i. 194.

**thwart**¹ (thwärt), *adv.* and *prep.* [*< ME. thwert* (as in *over thwert*, *thwert over*, a *thwert*, a *thirt*, *athwart*), < Icel. *thvert*, across (*un-thvert*, across, *athwart*), = Sw. *tvärt*, rudely, = Dan. *tvært*, adv., across, *athwart* (cf. MD. *dwers*, *dwersch*, *dwars*, D. *dwars* = G. *zwerch*, across); prop. neut. acc. (with the neut. suffix -i usual in Scand.) of the adj., Icel. *thverr*, cross, transverse, = Sw. *tvär* = Dan. *tvær* = AS. *thweorh* (*thweor*-), transverse, perverse, = MD. *\*dwer*, *\*dwar*, *dwars*, *dwersch*, *dwars*, D. *dwars*, adj., = OHG. *dwerah*, *twerh*, MHG. *twersch*, *dwerch*, also *querch*, G. *zwerch* in comp., also without the final guttural, OHG. *twær*, MHG. *twær*, *quer*, G. *quer* = LG. *quer* (> E. *quer*¹), cross, transverse, = Goth. *thwairhs*, angry (not found in lit. sense 'cross'; cf. E. *cross*¹, 'transverse', also 'angry'); perhaps connected with L. *torquere*, twist: see *tort*¹. Connection with AS. *thurh*, Goth. *thairh*, etc., through, is improbable: see *thorough*, *through*¹. Cf. *athwart*.] I. *adv.* From side to side; across; crosswise; transversely; athwart.

Yet, whether *thwart* or flatly it did lyte,

The tempred steele did not into his braynepen byte.

Spenser, F. Q., VI. vi. 30.

The bait was guarded with at least two hundred men, and thirty lying under a great tree (that lay *thwart* as a barricado). Quoted in *Capt. John Smith's Works*, i. 215.

II. *prep.* 1. Across; athwart.

And laying *thwart* her horse,  
 In loathly wise like to a carrion corse,  
 She bore him fast away.

Spenser, F. Q., III. vii. 43.

Cornelius May and one other going ashore with some goods late in a faire evening, such a sudden gust did arise that drue them *thwart* the River.

Quoted in *Capt. John Smith's Works*, II. 93.

2. Opposite to; over against.

The first of April we weighed anchor in the Downs, and, *thwart* Dover, we found our men in ketches ready to come aboard.

Sir H. Middleton, Voyage, p. 2.

**thwart**¹ (thwärt), *a.* [*< ME. thwert*, < *thwert*, *adv.*; or < Icel. *thvert*, neut. adj., after the *adv.*: see *thwart*¹, *adv.*] The proper mod. form of the adj. would be *\*thwar* (< early ME. *thweor*, < AS. *thweor*-, the reduced form in inflection of *thweorh*) or *\*thwarow*, < AS. *thweorh*.] 1. Lying or extending across or crosswise; cross; transverse.

Those streetes that be *thwart* are faire and large.

Hakluyt's Voyages, II. 234.

The slant lightning, whose *thwart* flame, driven down,  
 Kindles the gummy bark of fir or pine.

Milton, P. L., x. 1075.

2†. Antithetical.

It is observable that Solomon's proverbial says are so many select aphorisms, containing, for the most part, a pair of cross and *thwart* sentences, handled rather by collocation than relation, whose conjunction is disjunctive.

Rev. T. Adams, Works, i. 216.

3. Perverse; contrary; cross-grained.

His herte tho wurth *thwert*. *Genesis* and *Exodus*, i. 3099.

If she must teem,

Create her child of spleen, that it may live

And be a *thwart* disnutured torment to her!

Shak., Lear, i. 4. 305.

Now he would make that love prevail in the world and become its law; the world, still *thwart* and untoward, foils his purpose, and he dies. *E. Dowden*, Shelley, II. 130.

**thwart**¹ (thwärt), *n.* [*< thwart*¹, *v.*] Opposition; defiance.

A certain discourteous person, who calleth himself the devil, even now, and in *thwart* of your fair inclinations, keepeth and detaineth your irradiant frame in hostile thraldom.

Miss Burney, Cecilia, ii. 3.

**thwart**¹ (thwärt), *v.* [*< ME. thwerten*; < *thwart*¹, *adv.*] I. *trans.* 1. To pass over or across; cross.

Pericles

Is now again *thwarting* the wayward seas.

Shak., Pericles, iv. 4. 10.

Swift as a shooting star

In autumn *thwarts* the night.

Milton, P. L., iv. 557.

In this passage we frequently chang'd our barge, by reason of the bridges *thwarting* our course.

Evelyn, Diary, Oct. 5, 1641.

2†. To put crosswise, or one across another.

All knights-templars make such Saltire Cross with their *thwarted* legs upon their monuments.

Fuller, Ch. Hist., III. iii. 11.

3†. To put in the way; oppose.

'Gainst which the noble sonne of Telamon

Oppos'd himselfe, and *thwarting* his huge shield,

Them battell bad. *Spenser*, Virgil's *Gnat*, i. 514.

4. To cross, as a purpose; contravene; frustrate; baffle.

Third Out. Have you long sojourned there?

Val. Some sixteen months; and longer might have stay'd,

If crooked fortune had not *thwarted* me.

Shak., T. G. of V., iv. i. 22.

The proposals of the one never *thwarted* the inclinations of the other.

South, Sermons.

O *thwart* me not, sir Soph, at ev'ry turn,

Nor carp at ev'ry flaw you may discern.

Cowper, Conversation, i. 91.

"It is no part of the duty of a Christian Prince," added the Abbess, "to *thwart* the wishes of a pious soul."

Scott, Quentin Durward, xxxv.

No injudicious interference from any quarter ever *thwarted* my plans for her [a pupil's] improvement.

Charlotte Brontë, Jane Eyre, xii.

=Syn. 4. Foil, Baffle, etc. See *frustrate*.

II. *intrans.* 1. To go crosswise or obliquely. *Thomson*.—2. To be in opposition; be contrary or perverse; hence, to quarrel; contend.

*Thwart* not thou with thy fellow.

Babes Book (E. E. T. S.), p. 75.

[Rare in both senses.]

**thwart**² (thwärt), *n.* [Also dial. *thought*; prob. a var. of *thoft*¹ (as, reversely, *thoft*² is a var. of *thought*¹), a rower's seat, mixed with *thwart*¹, as if lit. a 'crosspiece': see *thoft*¹, *thoft-fellow*.] A seat across a boat on which the oarsman sits. A thwart is usually a special fixture, but a board may be used for the purpose. Some thwarts are contrived to slide backward and forward with the movements of the oarsman, as in light sculls or shells used for rowing exercise or for racing.

Take care of your dress in the mud—one foot on the *thwarts*—sit in the middle—that's it.

Whyte Melville, White Rose, II. vii.

thymiaterion

**thymiaterion** (thim'ī-a-tē'ri-on, n.; pl. *thymiateria* (-ā)). [*Gr.* *thymiaterion*, a censer, *<* *thymān*, burn as incense, *<* *thūa*, a sacrifice, *<* *theuō*, sacrifice.] A censer, especially one of ancient Greek or Roman times. *Thymiateria* were used in the temple of Diana at Ephesus.

**thymic** (thí'mík), *a.* Of or pertaining to the thymus gland: as, the *thymic* vein. — **Thymic asthma**. Same as *laryngismus stridulus*.  
**thymol** (tí'mól), *n.* [*< thyme + -ol.*] The phenol of cymene,  $C_{10}H_{14}O$ , a stearoptene obtained from oil of thyme by distillation. It is a crystalline solid having a powerful odor and a very acid and caustic taste, but its solution sufficiently diluted has the smell of thyme and an agreeable cooling taste. It is slightly soluble in water, readily soluble in alcohol. It is powerfully antiseptic in its properties, and is used in medicine as a dressing for unhealthy wounds or sores.

**Thymus**<sup>1</sup> (thí'mus), *n.* [NL. (Rivinus, 1690). *< L. thymum*, *< Gr. θυμω, θυμός*, thyme: see *thyme*.] A genus of labiate plants, belonging to the tribe *Satureiceae* and subtribe *Menthondeae*; the thyme. It is characterized by axillary or spiked few-flowered verticillasters, a distinctly two-lipped, ten- to thirteen-nerved calyx closed within by hairs, and a slightly two-lipped corolla with four perfect stamens. There are about 40, or as some class them 100 species, nearly all natives of the Mediterranean region, a few in the Canary Islands and Abyssinia, and one or two widely dispersed over the temperate and northern parts of Europe and Asia. They are small shrubby plants, with entire leaves small and nearly alike throughout, or in the spike changed into bracts, the flowers in separate axillary whorls or in loose or compact terminal spikes. The species are known in general as *thyme*. See also *mastic herb*, and cut under *stamen*.

**thymus**<sup>2</sup> (thí'mus), *n.* [NL. *< Gr. θυμός, m.*, a warty excrescence, a glandular substance, the sweetbread: so called because likened to a bunch of thyme, *< θυμω, θυμός*, thyme: see *thyme*.] 1. In *anat.*, a fetal structure, vestigial in the adult, one of the so-called ductless glands, of no known function, situated inside the thorax, behind the breast-bone, near the root of the neck. The thymus of veal and lamb is called *sweetbread*, and more fully *throat* or *neck-sweetbread*, to distinguish it from the pancreas or stomach-sweetbread.  
 2. In *pathol.*, same as *acrothymion*.

**thymy** (tí'mi), *a.* [*< thyme + -y*.] 1. Abounding with thyme; fragrant with thyme.  
 Love paced the thymy plots of Paradise.  
*Tennyson, Love and Death.*

2. Resembling thyme; of, pertaining to, or characteristic of thyme: as, a *thymy* smell.

**Thynnidae** (thin'i-dē), *n. pl.* [NL. (Erichson, 1842), *< Thynnus + -idae*.] 1. In *entom.*, a curious family of hymenopterous insects, occurring in South America and Australasia, and allied to the *Scotiidae*. The female is wingless, and resembles a large ant or some of the wingless *Proctotrupidae*, while the male is usually much larger, fully winged, and very active. The last abdominal joint is furnished with chitinous projections, as in some *Chrysididae*. More than 50 species are known.

2†. In *ichth.*, a family of scombroid fishes; the tunnies. See *Thynnus*, 2.

**Thynnus** (thin'us), *n.* [NL., *< L. thynnus, thynnus*, *< Gr. θύνω*, a tunny: so called from its quick, glancing motions, *< θύνω, θύνω*, dart along. Cf. *tunny*.] 1. In *entom.*, a remarkable genus of hymenopterous insects, typical of the family *Thynnidae*. The species are Australian. *Fabricius*, 1775.—2†. In *ichth.*, a genus of scombroid fishes, so named by Cuvier in 1817; the tunnies. Being preoccupied in entomology, the name was changed by Cuvier in 1829 to *Oreymus*. See cut under *albacore*.

**Thyone** (thí'ō-nē), *n.* [NL. (Oken, 1815).] 1. The typical genus of *Thyonidae*.—2. A genus of crustaceans.

**Thyonidae** (thí-on'i-dē), *n. pl.* [NL., *< Thyone + -idae*.] A family of pedate holothurians, typified by the genus *Thyone*, having suckers scattered over the surface of the body. They are sometimes called *sea-cacti*.

**thyroid** (thí-rē-oid), *a. and n.* Same as *thyroid*.  
**thyreopalatinus** (thí-rē-ō-pal-a-tí'us), *n.*; *pl. thyreopalatini* (-ni). [NL., as *thyreo(id) + palatine*.] Same as *palatopharyngeus*.

**thyropharyngeus** (thí'rē-ō-far-in-jē'us), *n.*; *pl. thyropharyngei* (-i). [NL., as *thyreo(id) + pharynx*.] Same as *constrictor pharyngis inferior* (which see, under *constrictor*).

**Thyreus** (thí-rē-us), *n.* [NL., *< Gr. θυρεός*, a large oblong shield.] A genus of hawk-moths, of the family *Sphingidae*. *T. abboti* is the Abbot's sphinx, a dull-chocolate or grayish-brown moth with brown and sulphur-yellow hind wings. Its larva feeds upon the grape-vine, and has two marked colorational forms, one green and one brown. The caudal tubercle is polished black with a yellow annulus, and the venter is yellow with pink spots between the prolegs. See cut under *sphinx*.

**Thyridopteryx** (thir-i-dop'te-riks), *n.* [NL. (Stephens, 1835), *< Gr. θυρίς (θυρεός)*, dim. of *θύρα*, a door, + *πτερυγία*, a wing.] A genus of moths, of the family *Psychidae*. The common bagworm of the United States is the larva of *T. ephemera-formis*. The female is wingless; the male abdomen is robust, and extends for some distance behind the hind wings; and the male antennae are broadly pectinate almost to the

tips. The genus is also represented in Australia. See *Psychidae*, and cut under *bagworm*.

**thyro-aryepiglotticus** (thí'rō-ar-i-ep-i-glōt'í-kus), *n.* [NL., as *thyro(id) + ary(oid) + epiglottis*.] Same as *thyro-arytenoid muscle* (which see, under *thyro-arytenoid*).

**thyro-arytenoid** (thí'rō-ar-i-tē'no'id), *a.* [*< thyro(id) + arytenoid*.] Of or pertaining to the thyroid and arytenoid cartilages.—**Thyro-arytenoid folds or ligaments**, the vocal cords. (a) *Inferior*, a strong elastic band passing on either side from the angle of the thyroid cartilage to the anterior angle of the base of the arytenoid cartilage. It is covered with thin mucous membrane, and forms the true vocal cord. (b) *Superior*, a delicate fibrous band of elastic tissue on either side, passing from the angle of the thyroid cartilage to the anterior surface of the arytenoid cartilage. It is covered with mucous membrane, and forms the so-called false vocal cord.—**Thyro-arytenoid muscle**, a broad, flat muscle on either side of the larynx, passing from the angle of the ala of the thyroid cartilage and the cricothyroid membrane, to be inserted into the base and anterior surface of the arytenoid cartilage. It is divisible into an inferior or inner portion, adjacent and parallel to the vocal cord, and a superior and outer portion. This muscle, innervated by the inferior laryngeal nerve, relaxes the vocal cord.

**thyro-arytenoideus** (thí-rō-ar'i-tē-noi'dē-us), *n.* [NL.: see *thyro-arytenoid*.] The thyro-arytenoid muscle.—**Thyro-arytenoideus superior**. Same as *arytenoideus*.

**thyro-epiglottic** (thí-rō-ep-i-glōt'ík), *a.* [*< thyro(id) + epiglottis + -ic*.] Pertaining to the thyroid cartilage and the epiglottis.—**Thyro-epiglottic ligament**, the long and narrow ligament connecting the epiglottis with the angle of the thyroid cartilage, just below the median notch of the latter.

**thyro-epiglottidean** (thí-rō-ep'i-glo-tid'ē-an), *a.* [*< thyro(id) + epiglottis (-id-) + -e-an*.] Pertaining to the thyroid cartilage and the epiglottis.—**Thyro-epiglottidean muscle**, a delicate fasciculus arising from the inner surface of the thyroid cartilage, just external to the origin of the thyro-arytenoid muscle, spreading out on the outer surface of the sacculus laryngis, some fibers extending to the aryteno-epiglottidean fold, others to the margin of the epiglottis. It is innervated by the inferior laryngeal. Also called *depressor epiglottidis*.

**thyro-epiglottideus** (thí-rō-ep'i-glo-tid'ē-us), *n.*; *pl. thyro-epiglottidei* (-i). [NL.: see *thyro-epiglottidean*.] The thyro-epiglottidean muscle (which see, under *thyro-epiglottidean*).

**thyroglossideus** (thí'rō-glo-tid'ē-us), *n.*; *pl. thyroglossidei* (-i). Same as *thyro-epiglottideus*.

**thyrohyal** (thí-rō-hi'al), *n.* [*< thyro(id) + hy(oid) + -al*.] In *zool. and anat.*, a bone developed in the third postoral visceral arch of the embryo of higher vertebrates, corresponding to the first branchial arch of fishes and amphibians. (a) In man and other mammals, the greater cornu of the hyoid bone. See first cut under *skull*. (b) In a bird, sometimes, one of the long horns of the hyoid bone, which curl up behind the skull, and in some woodpeckers even up over the top of the skull to the eye or nostril, consisting each of two pieces properly named *ceratobranchial* and *epibranchial*. The ceratobranchials and epibranchials together are badly called the *thyrohyals*, and in still more popular language the "greater cornua" or "horns" of the hyoid bone.

**thyrohyoid** (thí-rō-hi'oid), *a. and n.* [*< thyro(id) + hyoid*.] 1. *a.* In *anat.*, of or pertaining to the hyoid bone and the thyroid cartilage.—**Thyrohyoid arch**, the third postoral visceral arch.—**Thyrohyoid ligament**, a round elastic ligament passing from the superior cornu of the thyroid cartilage to the extremity of the great cornu of the hyoid bone. Also called *lateral thyrohyoid ligament*, in distinction from the *thyrohyoid membrane*. See cut under *larynx*.—**Thyrohyoid membrane**. See *membrane*, and cut under *larynx*.—**Thyrohyoid muscle**, a muscle extending from the oblique ridge on the outer side of the thyroid cartilage to the great cornu of the hyoid bone: innervated from the hypoglossal. See cut under *muscle*.—**Thyrohyoid space**, the depressed space between the thyroid cartilage and the hyoid bone in front.

II. *n.* A small muscle of man and some other animals, apparently a continuation of the sternothyroid, arising from the thyroid cartilage of the larynx and inserted into the hyoid bone. Its action approximates the parts between which it extends. See cut under *muscle* 1.

**thyroid** (thí'roid), *a. and n.* [Also, and prop., *thyreoid*; *< Gr. θυρεοειδής*, shield-shaped (*θύρεος θυρεοειδής*, the thyroid cartilage), *< θυρεός*, a large oblong shield (*< θύρα*, door), + *ειδός*, form, shape.] 1. *a.* Shield-shaped. Specifically—(a) In *anat.*, noting the largest and principal one of the several cartilages of the larynx, and several associated parts; also, noting the obturator foramen and obturator membrane. (b) In *zool.*, noting shield-shaped color-markings, or birds having a thyroid marking: as, the *thyroid* woodpecker, *Sphyrapicus thyroideus*.—**Cornua of the thyroid cartilage**. See *cornu*.—**Isthmus of the thyroid gland**. See *isthmus*.—**Oblique line of the thyroid cartilage**. See *oblique*.—**Pyramid of the thyroid gland**. See *pyramid*.—**Thyroid artery**, either of two arteries distributed to the region of the thyroid cartilage and thyroid body. (a) *Superior*, a branch of the external carotid, distributed to the sternothyroid, sternohyoid, and omohyoid muscles and the thyroid body, and giving off the hyoid, sternomastoid, laryngeal, and cricothyroid branches. (b) *Inferior*, a branch

of the thyroid axis, passing beneath the great cervical vessels to be distributed to the lower part of the thyroid body, to the scalenus anticus, longus colli, inferior constrictor, and the infrahyoid muscles, and giving off the ascending cervical, inferior laryngeal, tracheal, and esophageal branches.—**Thyroid axis**. See *axis*.—**Thyroid body**, the so-called thyroid gland. See below.—**Thyroid cartilage**, the largest cartilage of the larynx, situated between the hyoid bone and the cricoid cartilage, and composed of two lateral halves, or ala, continuous in front, where they form the projection known as *Adam's apple*. It articulates with the epiglottis and the cricoid and other laryngeal cartilages, and affords attachment to the vocal cords. See cut under *larynx*.—**Thyroid dislocation**, in *surg.*, dislocation of the head of the thigh-bone or femur into the thyroid or obturator foramen.—**Thyroid foramen**. See *foramen*.—**Thyroid ganglion**. See *ganglion*.—**Thyroid gland**, a large and very vascular body, consisting chiefly of a congeries of blood-vessels, but not provided with a duct or known to furnish any secretion, saddled upon the larynx and upper part of the trachea. Its functions, if it have any, are unknown; it takes no part in respiration, though associated with the windpipe, and is apparently a vestigial organ, or the remains of some undetermined functional homologue of the lowest vertebrates. It is the seat of the disease known as *bronchocele* or *goiter*, becoming sometimes enormously enlarged.—**Thyroid vein**. See *vein*.

II. *n.* 1. The thyroid cartilage.—2. The thyroid gland.—3. A thyroid artery, vein, or nerve.

**thyroidal** (thí'roi-dəl), *a.* [*< thyroid + -al*.] Same as *thyroid*.

**thyroidal** (thí'roi-dē-al), *a.* [*< thyroid + -e-al*.] Same as *thyroid*.

**thyroidean** (thí'roi-dē-an), *a.* Same as *thyroid*.  
**thyroidectomy** (thí'roi-dek'tō-mi), *n.* [*< thyroid + Gr. ἐκτομή*, a cutting out.] Excision of a part or the whole of the thyroid gland or of the thyroid cartilage.

**thyrotomy** (thí-rot'ō-mi), *n.* [*< thyro(id) + Gr. -τομία, < τέμνω, τέμνω*, cut.] In *surg.*, division of the thyroid cartilage.

**thyrsē** (thērs), *n.* [= *F. thyrsē*, *< L. thyrsus*, *< Gr. θύρσος*, a stalk, stem: see *thyrsus*.] 1. Same as *thyrsus*, 1.

Wild I am now with heat;  
 O Bacchus! cool thy raies!  
 Or frantick I shall eat  
 Thy thyrsē, and bite the bayes.  
*Herriek, To Live Merrily, and To Trust to God.*

2. In *bot.*, a contracted or ovate panicle, being a mixed or compound form of inflorescence in which the primary ramification is centripetal and the secondary or ultimate is centrifugal. The inflorescence of the horse-chestnut and that of lilac are typical examples. Also *thyrsus* and *cymobotryse*. See cut under *Æsculus*.

3. A small earthenware vessel, of a form resembling that of a pine-cone, especially such a vessel of ancient make.

From their resemblance to pine cones they have been called *thyrses*, and are supposed to have been used for holding mercury.

R. M. Smith, S. K. Handbook, Persian Art, p. 12.

**thyrsē-flower** (thērs'flou'ēr), *n.* A plant of the acanthaceous genus *Thysanacanthus*.

**thyrsi**, *n.* Plural of *thyrsus*.

**thyrsiform** (thēr'si-fōrm), *a.* [*< L. thyrsus, a thyrsus, + forma, form*.] In *bot.*, resembling or having the form of a thyrsē.

**thyrsoid** (thēr'soid), *a.* [*< Gr. θύρσος*, a stalk, stem, + *ειδός*, form.] In *bot.*, having somewhat the form of a thyrsē. Also *cymobotryose*.

**thyrsoidal** (thēr'soi-dəl), *a.* [*< thyrsoid + -al*.] Same as *thyrsoid*.

**thyrsus** (thēr'sus), *n.*; *pl. thyrsi* (-si). [*< L. thyrsus*, *< Gr. θύρσος*, a stalk or stem, the Dionysiac wand.] 1. One of the most common attributes or emblems of Dionysus (Bacchus) and his thiasus and votaries. It was a staff tipped with an ornament like a pine-cone and sometimes wrapped round with ivy and vine-branches, and appears in various modifications in ancient representations. The bacchantes carried thyrsi in their hands when they celebrated their orgies. Also *thyrsē*.  
 2. Same as *thyrsē*, 2.

**Thysanocarpus** (this'ā-nō-kar'pus), *n.* [NL. (W. J. Hooker, 1833), so called from the pods which hang like tassels; *< Gr. θύσσανος*, a tassel, + *καρπός*, fruit.] A genus of cruciferous plants, of the tribe *Isatideae*. It is characterized by a small one-seeded winged silicle, often with a perforated margin, by accumbent cotyledons, and stamens without appendages. There are about 6 species, natives of California and

Thyrsus. From a relief seen with at Louvre in the Museum of Fine Arts, Boston.

tarsus, the inner one of the proximal row of tarsal bones on the tibial side of the tarsus, in especial relation with the tibia, as is the astragalus, which is by some supposed to be the tibiale, while others consider that the astragalus, besides representing the tibiale, includes also the bone called *intermedium*. See cuts under *Ichthyosauria*, *Plesiosaurus*, and *tarsus*.

**tibialis** (tib-i-ā'lis), *n.*; pl. *tibiales* (-lēz). [NL. (se. *musculus*): see *tibial*.] One of several muscles of the crus, or lower leg, and foot, in relation with the tibia. **Tibialis anticus**, a fusiform muscle arising chiefly from the external surface of the shaft of the tibia, and inserted mostly into the internal cuneiform. Also called *anterior tibial muscle* and *hippius*. See cut under *muscle*. **Tibialis posticus**, a muscle arising chiefly from the posterior surface of the tibia and the inner surface of the fibula, and inserted chiefly into the internal cuneiform and scaphoid. Also called *navicularis* and *posterior tibial muscle*. See cut under *muscle*. **Tibialis secundus**, an occasional muscle of man, passing from the back of the tibia to the ligament of the ankle-joint.

**tibicen** (ti-bi'sen), *n.* [L., < *tibia*, a flute, + *cantare*, sing: see *tibia* and *chant*.] In *anc. music*, a flute-player.

**tibicinate** (ti-bis'i-nāt), *v. i.*; pret. and pp. *tibicinatus*, ppr. *tibicinatus*. [LL. *tibicinatus*, pp. of *tibicare*, play on the flute, < L. *tibicen* (*tibicin*), a flute-player: see *tibicen*.] To play on a flute. [Rare.]

**tibiofascialis** (tib'i-ō-fas-i-ā'lis), *n.*; pl. *tibiofasciales* (-lēz). [NL., < *tibia* + *fascia*, fascia.] A small occasional muscle of man, upon the lower part of the tibia.

**tibiofemoral** (tib'i-ō-fem-ō-rāl), *a.* [ < *tibia* + *femur* (-femor-) + *-al*.] Common to the tibia and the femur; femorotibial.—**Tibiofemoral index**, the ratio of the length of the tibia to that of the femur.

**tibiofibular** (tib'i-ō-fib-ū-lār), *a.* [ < *tibia* + *fibula* + *-ar*.] Of or pertaining to the tibia and the fibula: as, the *tibiofibular* articulations. Also *tibioperoneal*.

**tibiometatarsal** (tib'i-ō-met-a-tār'sal), *a.* [ < *tibia* + *metatarsus* + *-al*.] In *ornith.*, of or pertaining to the tibia and the metatarsus: as, the ankle-joint of a bird is apparently *tibiometatarsal*, but in reality *mediotarsal*.

**tibioperoneal** (tib'i-ō-per-ō-nē'al), *a.* [ < *tibia* + *peroneum* + *-al*.] Same as *tibiofibular*.

**tibiotarsal** (tib'i-ō-tār'sal), *a.* [ < *tibia* + *tarsus* + *-al*.] 1. In *zool.* and *anat.*, of or pertaining to the tibia and the tarsus: as, *tibiotarsal* ligaments.—2. In *entom.*, pertaining or common to the tibia and the tarsus of an insect's leg: as, a *tibiotarsal* brush of hairs. Also *tarsotibial*.

**Tibiotarsal articulation**, the ankle-joint of any mammal: opposed to *mediotarsal* or *tarsotarsal* articulation.—**Tibiotarsal ligaments**, ligaments running from the tibia to the astragalus; an anterior and a posterior are distinguished in man.

**tibiotarsus** (tib'i-ō-tār'sus), *n.*; pl. *tibiotarsi* (-sī). [NL., < *tibia* + *tarsus*.] In *ornith.*, the tibia, which in a bird consists of a tibia proper with an epiphysis at its distal end, constituted by the proximal portion of the tarsus, in adult life forming the so-called condyles of the tibia.

An upper tarsal bone, or series of tarsal bones, fuses with the lower end of the tibia, making this leg-bone really a *tibiotarsus*; and similarly, a lower bone or set of tarsal bones fuses with the upper end of the metatarsus, making this bone a *tarsometatarsus*.

**Tibouchina** (tib-ō-kin'-ē), *n.* [NL. (Aublet, 1775), from the name in Guiana.] A genus of polypetalous plants, type of the tribe *Tibouchineae* in the order *Melastomaceae*. It is characterized by flowers with a hirsute or chaffy calyx; five obovate petals, usually unequal and retuse; ten stamens, equal or nearly so, and with slender equal arcuate anthers opening by a small pore; and a five-celled ovary, wholly or mostly superior, with the summit hairy or bristly. There are 174 species, natives of tropical America, especially of Brazil. They are shrubs, or rarely herbs, sometimes climbers, and commonly rough-hairy. They usually bear large, coriaceous, entire, and three- to seven-nerved leaves, and conspicuous violet or purple flowers borne in much-branched, repeatedly three-forked panicles. Many species known as *spider-flowers* (which see) are cultivated for their handsome flowers, often under the former generic names *Pleuroma* and *Lasiandra*. *T. sarmentosa* is the Peruvian glory-bush.

**Tibouchineae** (tib-ō-kin'-ē), *n. pl.* [NL. (Cogniaux, 1888), < *Tibouchina* + *-eae*.] A tribe of plants, of the order *Melastomaceae*, including 20 genera, of which *Tibouchina* is the type.

**tic**<sup>1</sup> (tik), *n.* [Formerly *tick* (see *tick*<sup>5</sup>); < F. *tic* (OF. also *tiq*, *tiquet*), a twitching, a disease of horses; esp. in the phrase *tic douloureux*, 'painful twitching', facial neuralgia; cf. *tic*, a vicious habit, = It. *ticchio*, a ridiculous habit, whim, caprice; origin uncertain.] A habitual spasmodic contraction of certain muscles, especially of the face; twitching; vellication; especially applied to *tic-douloureux*, or facial neuralgia. See *tic-douloureux*.

**tic**<sup>2</sup>, **tic-bird** (tik, tik'bērd), *n.* [Appar. imitative. Cf. *Tocuss*, *tock*, *tok*.] An African beetle-eater or ox-pecker; an ox-bird. See cuts under *Buphaga* and *Tector*.

**tical** (tik'al or tī'kal), *n.* [Also *teecal*, *tecul*; < British Burmese *tikal*, a word of obscure origin, the true Burmese word being *kyat*, and the Siamese word *bat*.] A weight now used in Burma and Siam, and formerly in many other places in the Indies, equal to about 230 grains troy; also, a current silver coin of Siam, worth 2s. 1d. (about 50 United States cents).

**tic-douloureux** (tik'dō-lō-rē'), *n.* [F.: *tic*, a twitching; *douloureux*, painful: see *tic*<sup>1</sup> and *dolorous*.] A severe form of facial neuralgia; prosopalgia. It is characterized by a sudden attack of very acute pain, attended with convulsive twitchings of the muscles of the face, and continuing from a few minutes to several hours. Often called simply *tic*.

**ticet**<sup>†</sup> (tis), *v. i.* [ < ME. *tisen*, *tyesen*, < OF. *tiser*, entice: see *entice*, of which E. *tic* is in part an aphetic form.] To entice; seduce.

Fro thens-forth she *tyesed* euer Merlin to come speke with hir.  
Merlin (E. E. T. S.), iii. 418.

What strong enchantments *tic* my yielding soul!

Marlowe, Tamburlaine, I, i. 11.

To place a dot on, over, or against; mark with or as with a tick or dot: as, to *tick* one's *i's* in writing; to set a dot against, as in checking off the items in a list or catalogue; check by writing down a small mark: generally with *off*.

When I had got all my responsibilities down upon my list, I compared each with the bill and *tick*ed it off.

Dickens.

3. To note or mark by or as by the regular clicking of a watch or clock.

I do not suppose that the ancient clocks *tick*ed or noticed the seconds.

Tollet, Note on Shakspear's Winter's Tale. (Latham.)

**tick**<sup>1</sup> (tik), *n.* [Also dial. *tig*; < ME. *tek* = MD. *tick*, D. *tik* = LG. *tikk*, a touch, pat, tick (cf. It. *tecca*, a small spot, < Teut.); from the verb.] 1. A slight touch or tap; a pat. [Obsolete or dialectal.]

Play out your play lustily; for indeed *ticks* and dalliances are nothing in earnest.

Sir P. Sidney (Arber's Eng. Garner, I, 309).

Lord, if the peevish infant fights, and flies  
With unpared weapons at his mother's eyes,  
Her frowns (half-mixed with smiles) may chance to show  
An angry love-tick on his arm or so.

Quarles, Emblems, III. vi. 42.

2. A slight sharp sound, as that made by a light tap upon some hard object; also, a recurring click or beat, as of a watch or clock.—3. The game known in the United Kingdom as *tig*, and in the United States as *tag*. See *tag*<sup>2</sup>.

At Hood-winke, Barley-breake, at *Tick*, or Prison-hase.

Rev. S. Ward, Sermons, p. 34.

**Magnetic tick**. See *magnetic*.

**tick**<sup>2</sup> (tik), *n.* [ < ME. *tike*, *tyke*, *teke*, < AS. \**tica* or \**tica* (found once as *ticia*, appar. an error for \**tica*, i. e. \**tica*, or for \**tica*) = MD. *teke*, *teecke*, D. *teekt* = MLG. *teke* = MHG. *zeche*, G. *zecke* (cf. F. *tique* = It. *zecca*, < Teut.), a tick. Cf. Armenian *tiz*, tick.] 1. One of many different kinds of mites or acarines which are external parasites of various animals, including man. (a) A mite of the family *Ixodidae*, and especially of the genus *Ixodes*; a wood-tick; a dog-tick; a cattle-tick. There are many species, found in the woods and fields, capable of independent existence, but liable to fasten upon dogs, cattle, etc., forming temporary parasites. They bury the head in the skin of the host, and hang there sucking the blood until they swell up enormously, lose their hold, and drop off. They are annoying, but not poisonous or especially dangerous. The cattle-tick is *Ixodes bovis*; the seed-tick is the young form of the same species; the dog-tick is *I. ricinus*. See *Ixodes*, and cut under *Acarida*. (b) A mite of the spurious family *Leptidae*; a harvest-tick, -mite, or -bug. See *harvest-tick* (with cut).

Hence—2. With a qualifying term, a member of the dipterous family *Hippoboscidae*. Those of the genus *Ornithomyia* are bird-ticks; the sheep-tick is *Melophagus ovinus* (see cut under *sheep-tick*); the horse-tick is *Hippobosca equina*. The bat-ticks belong to the related dipterous family *Nycteribidae*.

3. The tick-bean.—Persian tick. See *Persian* and *Argas*.

and without expectoration; racking; hacking.  
[Colloq.]—9. Scarce; not easily obtained or  
obtainable, because held firmly or tied up in  
some way: applied to money; hence, straitened  
for want of money: as, a tight money-market.  
[Commercial slang.]

A few curt sentences . . . told how matters stood in  
the City;—money was tight; . . . but of that financial  
sensitiveness that shrinks timidly from all enterprise af-  
ter a period of crash and bankruptcy Calcutt could make  
nothing.  
*Lever*, Brambleighs of Bishop's Folly, I. xxi.

I've known the City now for more than ten years, Mr.  
Crosbie, and I never knew money to be so tight as it is at  
this moment.  
*Trollope*, Last Chronicle of Barset, xlii.

10. Under the influence of strong drink; in-  
toxicated; tipsy; "full." [Slang.]

No, sir, not a bit tipsy; . . . not even what Mr. Cutbill  
calls tight. *Lever*, Brambleighs of Bishop's Folly, I. xxiv.

How she cried out half her sight,  
When you staggered by next night,  
Twice as dirty as a serpent, and a hundred times as tight.  
*W. Carleton*, Johnny Rich.

11. Noting the condition of the cutting edge  
of a saw as condensed by hammering. Also  
*small*.—In a tight box. See *box*.—Tight cooper.  
See *cooper*.—Tight rope, a tensely stretched rope on  
which an acrobat performs dexterous feats at a greater or  
less height from the ground.

A damned uneven floor, . . . where a gentleman may

Tigridia (tī-grid'i-ā), n. [NL. (Ker, 1805), so  
called from the spotted flowers; *<* L. *tigris*, a  
tiger; see *tiger*.] A genus of monocotyledonous  
plants, of the order *Iridæ* and tribe *Morææ*.  
It is characterized by flowers with free-spreading  
segments, the three inner ones much smaller, obtuse,  
and undulate, and two-parted style-branches with awl-shaped  
lobes. The species are natives of Mexico, Central Amer-  
ica, Peru, and Chili. They are bulbous plants with a few  
narrow or plicate leaves and one or two terminal spathes,  
prized for their few singular but evanescent flowers. See  
*tiger flower*.

tigrine (tī'grin), a. [*<* L. *tigrinus*, *<* *tigris*, a tiger;  
see *tiger*.] Like a tiger in coloration: noting  
various striped or spotted animals, often trans-  
lating the specific technical word *tigrinus* or  
*tigrina*. Also *tigerine*.

Tigris (tī'gris), n. [NL., *<* L. *tigris*, a tiger;

called after one *Tilbury*, a London coachmaker,  
at the beginning of the 19th century.] A gig  
or two-wheeled carriage without a top or cover.

The Regent drives in the Park every day in a *tilbury*,  
with his groom sitting by his side.

*Greville*, Memoirs, June 7, 1818.

tildt, v. t. See *teld*, *tilt*.

tilde (tīl'de), n. [Sp. *tilde* (= OF. *tile*, *tiltre*),  
an accent, mark, tittle, a more vernacular form  
of *título*, a title; see *tilde*, *tille*.] A diacritic  
mark (˜) placed over the letter *n* in Spanish to  
indicate that it is sounded as a palatal *n*, or  
very nearly like *n* followed by *y*, as in *señor*,  
pronounced *sayñor'*, *cañon*, pronounced *kā-  
nyon'*, and hence in English written *canyon*.  
This sound is represented in Portuguese by *nh*, in Italian  
and French by *gn*. The mark ˜, also written as a straight  
dash, like the macron, ˉ, was originally a small *n*, *n̄*,  
representing *nn*, as in *anno* for *annu*, from Latin *annus*.  
The mark was much used for *n* or *m* in medieval manu-  
scripts, and hence in early printed books, being put above  
the preceding letter to save space: thus, *mānētū* for  
*monumentum*. The tilde is also used in the Roman nota-  
tion of Oriental and other languages; thus, *ñ* for the  
Sanskrit palatal nasal. It is sometimes used by analogy  
over *t* to indicate *t* followed by *y* (Spanish and French *ty*,  
Portuguese *th*, Italian *gh*).

Tilden Act. See *act*.

tile<sup>1</sup> (tīl), n. [Formerly also *tyle*; *<* ME. *tile*,

usually in the pl. *tegulae*, tiles, roof-tiles, a  
tiled roof, *<* *tegere*, cover, roof; see *thatch*.] 1.  
A thin slab or plate of baked clay, used for cov-  
ering the roofs of buildings, paving floors, lin-  
ing furnaces and ovens, constructing drains,  
etc., and variously compounded and shaped ac-  
cording to the use in view. In ancient times roof-  
ing-tiles cut from marble were often used upon important  
buildings, carved in the form of those in pottery. The  
best qualities of brick-earth are used for making tiles, and  
the process is similar to that of brickmaking. Roofing-  
tiles are chiefly of two sorts, *plain tiles* and *pantiles*, the  
former being flat, the latter curved, both being laid so as  
to overlap and carry off any rain they receive. See *cut*  
under *pantile*.

And from on high,

Where Masons mount the Ladder, Fragments fly;  
Mortar and crumbled Lime in Show'rs descend,

Brunswick and the Assiniboine to Georgia and Texas, and often reaches 4 feet in diameter and 60 or sometimes 130 feet in height. Its wood, known as *whitewood*, or sometimes, from a faint reddish tinge, as *red basswood*, is much used for soft woodwork, and especially as a source of paper-pulp, and of packing-material for furniture. The other American species, *T. pubescens* and *T. heterophylla*, are principally southern, and produce a globose fruit. The latter species, known as *bee tree*, *white basswood*, or *wahoo*, is much admired for the beauty of its leaves, whitened and silvery underneath. Its young branches are fed to cattle in winter.

**Tiliaceæ** (til-i-ā'sē-ē), *n. pl.* [NL. (Jussieu, 1789), fem. pl. of LL. *tiliaceus*, of linden-wood, pertaining to the linden, < *tilia*, the linden-tree: see *Tilia*.] An order of polypetalous plants, the linden family, of the cohort *Malvales*. It is distinguished from the other orders, *Malvaceæ* and *Sterculiaceæ*, by the two-celled anthers, and usually free stamens with pendulous ovules. There are about 470 species, belonging to 51 genera, classed in 7 tribes, of which *Bracteolonia*, *Grewia*, *Tilia*, *Apocia*, *Prockia*, *Slonania*, and *Elaeocarpus* are the types. Their leaves are usually alternate, undivided, and furnished with twin stipules. They bear axillary or terminal flowers, often in small cymes, which are sometimes disposed in ample corymbs or panicles. The order is numerous in the tropics, where they are often weedy herbs, or are shrubs or trees with handsome, usually white or pink flowers. A few genera are timber-trees of north or south temperate regions. They have a mucilaginous wholesome juice, and yield a remarkably tough fiber, used to make fishing-nets, bags, mats, etc. Some produce edible berries, as *Aristotelia*, *Grewia*, and *Elaeocarpus*. Some are used for dyeing or tanning; and the fruits of several are employed as astringents. See cuts under *jute* and *Tilia*.

**tiliaceous** (til-i-ā'shius), *a.* Belonging to the order *Tiliaceæ*.

**Tiliææ** (ti-lī'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1862), < *Tilia* + *-ææ*.] A tribe of plants, of the order *Tiliaceæ*. It is characterized by flowers with distinct sepals, and colored petals inserted closely around the stamens. It includes 14 genera, among which the chief are *Tilia* (the type), *Sparmannia*, *Corchorus*, and *Muntingia*.

**tilier<sup>1</sup>**, *n.* A Middle English form of *tiler<sup>1</sup>*.

**tiling** (tī'ling), *n.* [Verbal *n.* of *tile<sup>1</sup>*, *v.*] 1. The operation of covering or roofing with tiles. —2. An assemblage of tiles, as on a roof; tiles collectively or in general.

They went upon the housetop, and let him down through the *tiling* with his couch into the midst before Jesus. Luke v. 19.

**Tillandsia** (ti-land'zi-ä), *n.* [NL. (Linnæus, 1727), named after Tillands, a Swedish botanist.] 1. A genus of plants, of the order *Bromeliaceæ*, the pineapple family, type of the tribe *Tillandsiæ*. It is characterized by flowers with free petals and stamens, and by numerous linear seeds produced at the base into a long stalk appendaged with threads resembling pappus. There are about 220 species, natives of tropical and subtropical America. They are polymorphous plants, usually epiphytic, sometimes growing on rocks, but rarely in the soil. They bear narrow entire leaves, and are

pendent stems, clothing the branches of trees, and forming a dense, tangled mass of southern forests, extending far westward and north to the humid swamps of Virginia. This species bears two-ranked, bowl-shaped recurved leaves and short solitary green flowers, and is variously known as *Platystachya latifolia*, etc. (See *black moss* and *long moss*.) It is used for decoration in the natural state, and is gathered in large quantities for upholsterers, for whose use it is steeped in water or buried in earth till the outer part is rotted off, leaving a coarse, tough fiber used for stuffing mattresses. The leaves of *T. utriculata*, a native of southern Florida and the West Indies, are dilated at the base into large cavities, often containing a pint of clear water, eagerly sought by wayfarers. Several species are occasionally cultivated as greenhouse epiphytes.

2. [*l. c.*] A plant of this genus.

The long hairy *tillandsia*, like an old man's beard, three or four feet long, hung down from the topmost branches.

*W. W. Greener, The Gun, p. 221.*

6. A mechanical device for fishing through an opening in the ice. A simple tilt is a lath or narrow board with a hole bored through one end, through which a round stick is run, both ends of the board resting on the sides of the hole in the ice. The line is attached to the short end of the lath, and when a fish is hooked his weight tips up the larger end, thus indicating that he is caught. An improved tilt consists of an upright with an arm over which the line passes down into the water. When a fish bites, the line is cast off, and the arm falls and automatically hoists a little flag on the upright as a signal. There are many other modifications of the same device. Also called *tilter*, *tilt-up*, and *tip-up*.

7. A pier, built of brush and stone, on which fishermen unload and dress their fish. [*Newfoundland.*]—**Full tilt**, at full speed and with direct thrust; without wavering; direct and with full force; as, to run *full tilt* against something.

3. A forger who uses a tilt-hammer.—4. In *fishing*, same as *tilt<sup>1</sup>, 6.*

**tilth** (tilth), *n.* [*< ME. tilthe, < AS. tilth, tilling, crop, < tilian, till: see tilt<sup>1</sup>.*] 1. The act of tilling; plowing, sowing, and the round of agricultural operations; tillage; cultivation.

One high steeple, where the Arabians after they have ended their *tilth* lay up their instruments of husbandry, none daring to steal his neighbours' tools, in reuerence of a Saint of theirs, there buried.

*Purchas, Pilgrimage, p. 615.*

Far and wide stretches a landscape rich with *tilth* and husbandry, boon Nature paying back to men tenfold for all their easy toil. *J. A. Symonds, Italy and Greece, p. 200.*

2. The state of being tilled, or prepared for a crop; as, land is in good *tilth* when it is manured, plowed, broken, and mellowed for receiving the seed.—3. That which is tilled; tillage; ground.

Botte Treuthe schal techen ow his teeme for to dryue,  
Bothe to sownen and to setten and sauen his *tilthe*.

*Pierre Plowman (A), vii. 123.*

Strew silently the fruitful seed,  
As softly o'er the *tilth* ye tread.

*Beaut, Song of the Sower.*

#### 4. Crop; produce.

Sent the sonne to saue a cursed mannes *tilth*.

*Pierre Plowman (B), XIX. 430.*

5. The degree or depth of soil turned by the plow or spade in cultivation; that available soil on the earth's surface into which the roots of crops strike.

The *tilth*, or depth of the ploughing, rarely exceeded six inches, and oftener was less. *N. S. Shaler, Kentucky, p. 55.*

**tilt-hammer** (tilt'ham'ér), *n.* In *mech.*, a power machine-tool for hammering, forging, etc. It is a development from the trip-hammer, and, though for large work it has been superseded by the steam-hammer, and for light work by drop-presses and drop-hammers, it is still used in shovel-making and other light forging. It

Tilt-hammer.

consists essentially of a lever of the first or third order, and is operated by a cam-wheel or eccentric, the hammer being placed at the end of the longer arm of the lever. One type, known as the *cushioned hammer*, is fitted with rubber cushions to prevent jarring and noise. See *trip-hammer*.

**tilting-fillet** (til'ting-fil'et), *n.* See *fillet*.

**tilting-gauntlet** (til'ting-gänt'let), *n.* A variety of gauntlet which could be secured firmly with a hook, so that the hand could not be opened nor the lance struck from its grasp. Compare *main-de-fer*.

**tilting-helmet** (til'ting-hel'met), *n.* A heavy helmet used for the just from the time when

Tilting helmet, 16th century.

this sport was no longer pursued in the arms of war. In the fifteenth century these helmets were so large that the head could move freely within them, their whole weight coming upon the gorgerin.

The *lumière*, or slit for vision, was in such a position that when the knight had couched his lance and stooped forward for the course he could see the helmet of his adversary, but when seated in the saddle he could not see before him, but only upward; the air-opening of this helmet was on the right side, as the

blow of the lance came on the left. In the sixteenth century the helmets were still heavier.

**tilting-lance** (til'ting-läns), *n.* A lance used in the just or tilt which often differed from the war-lance, especially in the head (see *coronal, n., 2*). It was also furnished more generally than the war-lance with the roundel, and with the bur to secure the grasp of the hand, and was frequently decorated with painting and gilding. Some tilting-lances have been preserved which from their extreme lightness are evidently hollow, and representations in manuscripts show some of so great a diameter that they must have been built up as with staves; but these perhaps were used only for the quintain and similar sports. Compare *rest<sup>1</sup>, n., 6 (a), couch<sup>1</sup>, n. t., 8, charge, 19*. See *cuts* under *morrie* and *quintain*.

**tilting-shield** (til'ting-shëld), *n.* See *shield*.

**tilting-spear** (til'ting-spër), *n.* 1. Same as *tilting-lance*.—2. In *her.*, the representation of a tilting-lance used as a bearing, the shaft being much shortened, and the coronal, bur, vamplate, etc., exaggerated in size.

**tilting-target** (til'ting-tär'get), *n.* The shield of the fifteenth century, used especially at

justs, rounded convexly from side to side and concavely from top to bottom, so that the thrust of the lance would glance off sidewise. These targets were often of great breadth proportionally and curved into nearly a semicircle; they were sometimes covered with thin plates of horn, secured to wood, the surface of that material being especially calculated to cause the coronal to glance.

**tilt-mill** (tilt'mil), *n.* 1.

The machinery by which tilt-hammers are worked.—2. The building in which a tilt-hammer is operated.

**til-tree** (til'tré), *n.* [*< L. tilia: see teil.*] The linden, chiefly *Tilia Europæa*.—Canary Island *til-tree*, *Ocotea (Oreodaphne) foetens*, noted for its ill-smelling wood. Also *tile, tile-tree*.

**tilt-up** (tilt'up), *n.* 1. In *fishing*, same as *tilt<sup>1</sup>, 6*.—2. In *ornith.*, a fiddler or teetertail. See *cut* under *Tringoides*.

**tilture** (til'tür), *n.* [Irreg. *< tilt<sup>1</sup> + -ture*, appar. in imitation of *culture*.] Husbandry; cultivation; *tilth*.

Good *tilth* brings seeds,

*tilt ture* weeds.

*Tusser, Husbandry, March's Abstract.*

**tilt-yard** (tilt'yärd), *n.* A place for tilting, differing from the lists in being permanent. The outer court of a castle was often used as the tilt-yard.

When Solymán overthrew King Lewis of Hungarie, he carried away three Images of cunning worke in Brasse, representing Hercules with his Club, Apollo with his Harpe, Diana with her Bow and Quiver, and placed them in the *tiltyard* at Constantinople.

*Purchas, Pilgrimage, p. 294.*

Squiring to *tilt-yards*, play-houses, pageants, and all such public places. *B. Jonson, Cynthia's Revels, Palinode.*

**tilwood** (til'wüd), *n.* [*< til- (as in til-tree) + wood<sup>1</sup>.*] The timber of the Canary Island *til-tree*. See *til-tree*.

**tilyet, tilyert.** Middle English forms of *tilt<sup>1</sup>, tiller<sup>1</sup>.*

**timal** (ti'mäl), *n.* The blue titmouse, *Parus caeruleus*. Also *timal*.

**Timalia, Timalidä** (ti-mä'li-ä, ti-mäl'ü-dë). See *Timalia, Timalidä*.

**timariot** (ti-mä'ri-ot), *n.* [*< Turk. timär, < Pers. timär, care, attendance on the sick, etc., also a military fief in the former feudal system of Turkey.*] One of a body of Turkish feudal militia.

His *Timariots*, which hold land in Fee, to maintaine so many horse men in his seruice.

*Purchas, Pilgrimage, p. 291.*

**timbal** (tim'bäl), *n.* [Also *timbu<sup>1</sup>, tymbal*; < F. *timbale* = Sp. *timbal* = Pg. *timbal, timbale*, < It. *timballo*, var. of *taballo* (= Sp. *atabal* = Pg. *atabal, atabale*, < Ar. *tabl*, with art. *at-tabl*, a drum, timbal. Cf. *atabal*.] A kettledrum.

**timbale** (täi-bal'), *n.* [F.] In *cookery*, a confection of pastry with various fillings: so called from the French name of the mold it takes its shape from.

**timber<sup>1</sup>** (tim'bér), *n.* and *a.* [Also dial. *timmer*; < ME. *timber, tymbre, tymbre*, < AS. *timber*, stuff or material to build with, = OS. *timbar* = OFries. *timber*, a building, = D. *timmer*, a room, = MLG. *timber, timmer* = OHG. *zimbar, MHG. zimbar*, wood to build with, timber-work, structure, dwelling, room, G. *zimmer*, room, chamber (*zimmerholz*, timber, *zimmermann*, carpenter), = Icel. *timbr* = Sw. *timmer* = Dan. *tömmér* = Goth. *\*timrs* (in the deriv. *timrjan*, build, *timrja*, builder), timber; orig. material (of wood) to build with; akin to L. *domus* = Gr. *δῶμος* = Skt. *dama* = Obulg. *domū*, house (lit. a building of wood); from the verb seen in Gr. *δῆμιν*, build: see *dome<sup>1</sup>*.] **I. n. 1.** Wood suitable for building houses or ships, or for use in carpentry, joinery, etc.; trees cut down and squared or capable of being squared and cut into beams, rafters, planks, boards, etc.

Of this pyece off *tymbre* made the Iewes the crosse of oure lord.

*Holy Rood (E. E. T. S.), p. 155.*

Ye've taken the *timber* out of my ain wood,

And burnt my ain dear jewel!

*Lady Marjorie (Child's Ballads, II. 341).*

2. Growing trees, yielding wood suitable for constructive uses; trees generally; woods. See *timber-tree*.

The old ash, the oak, and other *timber* shewed no signs of winter.

*Gray, Letters, I. 247.*

3. In *British law*, the kind of tree which a tenant for life may not cut; in general, oak, ash, and elm of the age of twenty years and upward, unless so old as not to have a reasonable quantity of useful wood in them, the limit being, according to some authorities, enough to make a good post. Local customs include also (a) some other trees, such as beech or hornbeam, and (b) trees of less or greater age or tested by girth instead of age.

4. Stuff; material.

They are the fittest *timber* to make great politics of.

*Bacon, Goodness (ed. 1887).*

5. A single piece of wood, either suitable for use in some construction or already in such use; a beam, either by itself or forming a member of any structure: as, the *timbers* of a house or of a bridge.—6. *Naut.*, one of the curving pieces of wood branching upward from the keel of a vessel, forming the ribs.—7. The wooden part of something, as the beam or handle of a spear.

He bowed on his horse necke, and the *tymbr* of the speres fly in peeces.

*Martin (E. E. T. S.), iii. 541.*

8. The stocks. [Rare.]

The squire . . . gives me over to the beadle, who claps me here in the *timber*.

*D. Jerrold, Men of Character, Christopher Snub, I.*

timber. That piece of cedar,  
That fine well timbered gallant.  
[*De Jure, Volpone*, IV, 2.

2. Made of or furnished with timber or timbers:  
as, a well-timbered house; well-timbered land.  
About a hundred yards from the Port on the Bay by the  
sea there is a low timbered house, where the Governor  
abides all the day time. *Dampier, Voyages*, II, i. 172.

3†. Made like timber; massive, as heavy tim-  
ber.  
His timbered bones all broken rudely rumbled.  
[*Spenser, F. Q.*, V, ii. 50.

From toppe to toe yee might her see,  
Timbered and tall as cedar tree.  
[*Puttenham, Partheniades*, vii.

timbered<sup>2</sup>, timbred (tim'bêrd), *a.* [*< timber<sup>3</sup>*  
+ *-ed<sup>2</sup>*.] In *her.*, ensigned by a helmet or other  
head-piece set upon it: said of the escutcheon.  
timberer (tim'bêr-er), *n.* Same as *timberman*.  
timber-frame (tim'bêr-frâm), *n.* Same as *gang-  
saw*. [*L. H. Knight*.]

timber-grouse (tim'bêr-grouz), *n.* Any grouse  
of wood-loving habits, as the ruffed grouse, the  
pine-grouse, or the spruce-partridge. [*U. S.*]

timber-head (tim'bêr-hed), *n.* *Naut.*, the top  
end of a timber, rising above the deck, and  
serving for belaying ropes, etc.: otherwise  
called *keel-head*.  
timber-hitch (tim'bêr-hich), *n.* *Naut.*, the end  
of a rope taken round a spar, led under and  
over the standing part, and passed two or three  
turns round its own part, making a jamming  
eye. See *hitch*.  
timbering (tim'bêr-ing), *n.* Timber-work; tim-  
bers collectively: as, the timbering of a mine.  
timber-line (tim'bêr-lin), *n.* The elevation  
above the sea-level at which timber ceases to  
grow. It differs in different climates.  
timberling (tim'bêr-ling), *n.* [*< timber<sup>1</sup>* +  
*-ling<sup>1</sup>*.] A small timber-tree. [*Local*.]

timber-lode (tim'bêr-lôd), *n.* In *law*, formerly,  
a service by which tenants were to carry tim-  
ber felled from the woods to the lord's house.  
timberman (tim'bêr-man), *n.*; pl. *timbermen*  
(-men). 1. In *mining*, one who attends to pre-  
paring and setting the timbering used for sup-  
porting the levels and shafts in a mine, or for  
any other purpose connected with the under-  
ground work.

The timberman who sets up the props has usually no  
special tool except his axe, which weighs from 4½ to 5½  
pounds; on one side of the head there is a cutting edge  
which is not quite parallel to the handle, and on the other  
side a poll which is used for driving up props.  
[*Callon, Lectures on Mining* (tr. by Le Neve Foster and  
[Galloway], I, 231.

2. In *entom.*, a European longicorn beetle, *Acan-  
thocinus* or *Aspionus adilis*.

timber-merchant (tim'bêr-mêr'chant), *n.* A  
dealer in timber.  
timber-scribe (tim'bêr-skrib), *n.* A metal tool  
or pointed instrument for marking timber; a  
race-knife.  
timber-sow† (tim'bêr-sou), *n.* A sow-bug or  
wood-louse. See *Oniscus*. [*Bacon*.]

timber-tree (tim'bêr-trê), *n.* A tree suitable  
for timber. Many timber-trees of great value are af-  
forded by the *Coniferae*, as various kinds of pine, spruce, fir,  
cypress, cedar, the redwood, etc. Still more numerous, and  
distributed through many families, are the dicotyledonous  
timber-trees, including numerous oaks, eucalypts, ashes,  
elms, teak, mahogany, greenheart, chestnut, walnut, tulip,  
etc. Among monocotyledons, the palms afford some tim-  
ber, but almost no other family, unless the bamboo-wood  
can be so called.

timber-wolf (tim'bêr-wôlf), *n.* The ordinary  
large gray or brindled wolf of western parts of  
North America, *Canis lupus occidentalis*. Though  
by no means confined to wooded regions, this wolf is so  
named in antithesis to *prairie-wolf* (the coyote). [*Western*  
U. S.]

timber-work (tim'bêr-wêrk), *n.* Work formed  
of timbers.  
timber-worm (tim'bêr-wêrm), *n.* 1†. A wood-  
worm or timber-sow; a sow-bug.

What, o what is it  
That makes yee, like vile timber-worms, to wear  
The poasts sustaining you?  
[*Davies, Sir T. Overbury*, p. 16. (*Davies*).]

2. The larva of any insect injurious to timber.  
See *timber-beetle*.  
timber-yard (tim'bêr-yârd), *n.* A yard or place  
where timber is deposited or sold; a wood- or  
timber-yard.  
timbesteret, *n.* See *tumbester*.  
timbournet (tim-bô-rên'), *n.* [Also *timburine*;  
cf. *tambourine*, *timbre<sup>2</sup>*.] A tambourine. [*B. Jon-  
son*, *Sad Shepherd*, i. 2.

timbre†, *n.* An old spelling of *timber<sup>1</sup>*, *timber<sup>2</sup>*,  
*timbre<sup>3</sup>*.  
timbre†, *n.* [*< ME. timbre*, *< OF. timbre*, *tym-  
bre*, a drum, *< L. tympanum*, a drum: see *tym-*

pan, tympanum. Cf. *timbrêl* and *timbre<sup>3</sup>*.] A  
tambourine; a timbrel.

The *timbres* up ful sotilly  
They caste. [*Rom. of the Rose*, l. 772.

timbre†, *r. i.* To play the timbrel.  
Blowing off bugles and bemes aloft,  
Trympling of tabers and tymbring soft.  
[*Roband, Mss. Lausd.* 388, l. 381. (*Hallwells*).]

timbre<sup>3</sup> (tim'bêr or tai'br), *n.* [*< F. timbre*,  
timbre, a drum: see *timbre<sup>2</sup>*.] In *acoustics*, that  
characteristic quality of sounds produced from  
some particular source, as from an instrument  
or a voice, by which they are distinguished from  
sounds from other sources, as from other instru-  
ments or other voices; quality; tone-color. As an  
essential characteristic of all sounds, timbre is coordinate  
with pitch and force. It is physically dependent on the  
form of the vibrations by which the sound is produced—  
a simple vibration producing a simple and comparatively  
characterless sound, and a complex vibration producing a  
sound of decided individuality. Complex vibrations are  
due to the conjunction at once of two or more simple vi-  
brations, so that complex tones are really composed of two  
or more partial tones or harmonics. Not only do instru-  
ments and voices have a peculiar timbre by which they  
may be recognized, but their timbre may be varied consid-  
erably by varying the method of sound-production.

timbred (tim'bêrd), *a.* See *timbered*.  
timbrêl (tim'brel), *n.* [A dim. of *ME. timbre*  
(see *timbre<sup>2</sup>*), prob. suggested by *Sp. tamboril*  
(= *It. tamburello*), dim. of *tambor*, etc., a tam-  
bor: see *tambor*. Cf. *timbourine*, *timburine*, for  
*tambourine*.] Same as *tambourine*. See also  
*tabor<sup>1</sup>*.

And Miriam . . . took a timbrêl in her hand; and all the  
women went out after her with timbrêls and with dances.  
[*Ex. xv. 20.*

timbrêl (tim'brel), *v. t.*; pret. and pp. *timbrêled*,  
*timbrêlled*, ppr. *timbrêling*, *timbrêlling*. [*< tim-  
brêl*, *n.*] To sing to the sound of the timbrêl.  
[Rare.]

In vain with timbrêl'd anthems dark  
The sable-stoled sorcerers bear his worship ark.  
[*Milton, Nativity*, l. 219.

timbrology (tim-brol'ô-jî), *n.* [*< F. timbre*,  
postage-stamp, + *-ology*.] The science or study  
of postage-stamps. [*Encyc. Diet.*

timbul, *n.* Same as *timbal*.  
timburinet, *n.* Same as *timbourine*.  
time<sup>1</sup> (tim), *n.* [Early mod. E. also *tyme*; *<*  
*ME. time*, *tyme*, *< AS. tîma*, time, season, = *Icel.*  
*tîmi*, time, season, = *Norw. time*, time, an hour,  
= *Sw. timme*, an hour, = *Dan. time*, an hour, a  
lesson; with formative suffix *-ma*, from the *√ ti*  
seen in *tide*: see *tidel*, and cf. *till<sup>1</sup>*.] Not con-  
nected with *L. tempus*, time: see *tense<sup>1</sup>*.] 1. The  
system of those relations which any event has  
to any other as past, present, or future. This  
relationship is realistically conceived as a sort of self-sus-  
taining entity, or object of contemplation. It may be con-  
ceived as a stream flowing through the field of the present  
and is often so described: as, the stream of time; the  
course of time, etc. This notion, however, is a confused  
one. According to Leibnitz, time is the confused appre-  
hension of a system of relations; but, looking at the mat-  
ter too much from the mathematical point of view, he  
failed to notice that time is not a general idea, but is con-  
tracted to the individual system of relations of the events  
that actually do happen. According to Kant, time (like  
space) is the form of an intuition; this apprehension of it  
corrected Leibnitz's oversight, but at the same time lost  
the truth contained in Leibnitz's view. Time is personi-  
fied as an old man, bald-headed but having a forelock, and  
carrying a scythe and an hour-glass.

Be wyse, ready, and well aduysed,  
For tyme tryeth thy troth.  
[*Babees Book* (E. E. T. S.), p. 84.

By a rule as plain as the plain bald of father Time  
himself. [*Shak., C. of E.*, ii. 2. 71.

We found this Whale-fishing a costly conclusion: we saw  
many and spent much time in chasing them, but could  
not kill any. [*Capt. John Smith, True Travels*, II, 175.

Time is duration set out by measures.  
[*Locke, Human Understanding*, II, xiv. 17.

Absolute, true, and mathematical Time is conceived by  
Newton as flowing at a constant rate, unaffected by the  
speed or slowness of the motions of material things. It  
is also called Duration.  
[*Clerk Maxwell, Matter and Motion*, art. xvii.

2. A part of time considered as distinct from  
other parts: a period; a space of time: as, a  
short time; a long time; too little time was al-  
lowed; hence, season; particular period: as,  
summer-time; springtime.

Then aftur with-inne a shorte tyme.  
[*Political Poems*, etc. (ed. Furnivall), p. 84.

About questions therefore concerning days and times  
our manner is not to stand at bay with the Church of God  
demanding wherefore the memory of Paul should be rather  
kept than the memory of Daniel.  
[*Hooker, Eccles. Polity*, v. 71.

An illustrious scholar once told me that, in the first lec-  
ture he ever delivered, he spoke but half his allotted time,  
and felt as if he had told all he knew.  
[*O. W. Holmes, Professor*, i.

3. A part of time considered as distinct from other parts, whether past, present, or future, and particularly as characterized by the occurrence of some event or series of events; especially, the period in which some notable person, or the person under consideration, lived or was active; age; epoch: as, the *time* of the flood, of Abraham, or of Moses: often in the plural: as, the *times* of the Pharaohs.

Also he saith for certayn that in his *time* he had a frend that was auncient & old, which recounted for trowth that in his dayes he hadd seen many tymes such thynghes.

Rom. of Partenay.

To hold, as 'twere, the mirror up to nature; to show . . . the very age and body of the *time* his form and pressure.

Shak., Hamlet, iii. 2. 27.

The same *times* that are most renowned for arms are likewise most admired for learning.

Bacon, Advancement of Learning, i. 16.

Was it [the Christian religion] not then remarkable in its first *times* for justice, sincerity, contempt of riches, and a kind of generous honesty?

Stillington, Sermons, I. iii.

From 1813 to 1815 . . . the island was under English rule, and the *time* of English rule was looked on as a *time* of freedom, compared with French rule before or with Austrian rule both before and after.

E. A. Freeman, Venice, p. 206.

4. Appointed, allotted, or customary period of years, months, days, hours, etc. Specifically—(a) Allotted span; the present life as distinct from the life to come, or from eternity; existence in this world; the duration of a being.

Make use of *time* as thou valuest eternity. Fuller.

(b) The space of time needed or occupied in the completion of some course; the interval that elapses between the beginning and the end of something: as, the *time* between New York and Queenstown is now about six days; the race finished at noon: *time*, three hours and seven minutes. (c) The period of gestation; also, the natural termination of that period.

Now Elisabeth's full *time* came that she should be delivered; and she brought forth a son. Luke i. 57.

(d) The period of an apprenticeship, or of some similarly definite engagement: as, the boy served his *time* with A. B.; to be out of one's *time* (that is, to cease being an apprentice, to be a journeyman). [Colloq.]

The apprentice might wear his cap in his master's presence during the last year of his *time*.

J. Ashton, Social Life in Reign of Queen Anne, I. 82.

(e) A term of imprisonment: as, to do *time* in the penitentiary. [Colloq.]

5. Available or disposable part or period of duration; leisure; sufficiency or convenience of time; hence, opportunity: as, to give one *time* to finish his remark; to have no *time* for such things; to ask for *time*.

Daniel . . . desired of the king that he would give him *time*.

Ihan. ii. 16.

I like this place,

And willingly would waste my *time* in it.

Shak., As you Like it, ii. 4. 95.

Shun. Why, he's of years, though he have little beard.

P. sen. His beard has *time* to grow.

B. Jonson, Staple of News, ii. 1.

Sir Oliver S. Moses shall give me farther instructions as we go together.

Sir Peter. You will not have much *time*, for your nephew lives hard by.

Sheridan, School for Scandal, iii. 1.

6. A suitable or appropriate point or part of time; fitting season: as, a *time* for everything; a *time* to weep and a *time* to laugh.

Now is *time*, zif it lyke zou, for to telle zou of the Marches and Iles, and diverse Bestes, and of diverse folk beyond these Marches.

Mandeville, Travels, p. 142.

Signior, this is no *time* for you to flatter,

Or me to fool in. Fletcher, Double Marriage, i. 2.

7. Particular or definite point of time; precise hour or moment: as, the *time* of day; what is the *time*? choose your own *time*.

Att that *time* owt of the prese thei were,

To rest them self a season to endure,

Ther echo to other told his aventur.

Generides (E. E. T. S.), I. 2595.

Well, he is gone; he knoweth his fare by this *time*.

Latimer, 4th Sermon bef. Edw. VI., 1549.

God, who at sundry *times* and in divers manners spake in time past unto the fathers by the prophets, hath in these last days spoken unto us by his Son. Heb. i. 1.

Good sister, when you see your own *time*, will you return home?

Beau. and Fl., Woman-Hater, ii. 1.

I shall cut your Throat some *time* or other. Petulant, about that Business.

Congreve, Way of the World, i. 9.

8. An appointed, fixed, or inevitable point or moment of time; especially, the hour of one's departure or death.

His *time* was come; he ran his race.

Swift, Death of Dr. Swift.

9. A mode of occupying time; also, what occurs in a particular time.

I'm thinking (and it almost makes me mad)

How sweet a *time* those heathen ladies had. . . .

Cupid was chief of all the deities.

And love was all the fashion in the skies.

Dryden, Epil. to Amphitryon, or the Two Sosias.

10. The state of things at a particular point of time; prevailing state of circumstances: generally in the plural: as, hard *times*.

Good men, by their government and example, make happy *times*, in every degree and state.

Ascham, The Scholemaster, p. 133.

They [the Jews] can satisfy themselves unto *times*, and to whatsoever may advance their profit.

Sandys, Traavailes, p. 114.

The *times* are dull with us. The assemblies are in their recess.

Washington, quoted in Bancroft's Hist. Const., I. 453.

11. All time to come; the future. [Rare.]

That brought you forth this boy, to keep your name Living to *time*.

Shak., Cor., v. 3. 127.

12. Reckoning, or method of reckoning, the lapse or course of time: with a qualifying word: as, standard *time*; mean *time*; solar or sidereal *time*.—13. Recurrent instance or occasion: as, many a *time* has he stood there; hence, a repeated item or sum; a single addition or involution in reckoning; repetition: as, four *times* four (four repetitions of four).

The good wifj taught hir dougtr

Shak., M. of V., i. 3. 107.

14. Tune; measure.

I have prepar'd

Choice music near her cabinet, and compos'd

Some few lines, set unto a solemn *time*,

In the praise of imprisonment.

Fletcher (and another), False One, i. 2.

I must fit all these *times*, or there's no music.

Middleton, Chaste Maid, ii. 3.

15. In music: (a) Same as *rhythm*: as, duple *time*; triple *time*; common *time*. (b) Same as *duration*, especially in metrical relations: as, to hold a tone its full *time*. (c) Same as *tempo*: as, to sing a song in quick *time*. (d) The general movement of a form of composition or of a particular piece, involving its rhythm, its general metrical structure, and its characteristic tempo.—16. In pros., relative duration of utterance as measuring metrical composition; a unit of rhythmic measurement, or a group or succession of such units, applicable to or expressed in language. In modern or accental poetry the relative time of utterance of successive syllables is not recognized metrically. Every syllable may be considered as quantitatively common or indifferent in time, the only difference taken into account being that of stress or accent (ictus), and the number of syllables alone introducing the idea of measurement. In ancient prosody a unit of time is assumed (varying in actual duration according to the tempo), called the *primary* or *least* (minimum) *time* (*χρόνος πρῶτος, ελάχιστος*), also *semeion* or *moræ*, or, specifically, a *time*. A *time* composed of two, three, etc., primary times (*semeia*) is called a *disemic*, *trisemic*, etc., *time*. Such times collectively are *compound times*, as opposed to the primary time as a *simple time*. As expressed in language, a simple or compound time is a *syllable*, a simple time being regularly represented by a short syllable, a compound time by a (disemic, trisemic, etc.) long, usually disemic. A *time* which can be measured in terms of the unit is a *rational time*; one which cannot be so measured, an *irrational time*. A compound time in a poetic text may correspond to several simple times in the accompanying music or orchesis, and vice versa. Similarly a simple or compound time in the rhythm may be unrepresented by a syllable or syllables in the text, and is then called an *empty time*, or *pause*. Times combine into *pedal semeia* (thesis and arsis), feet, and cola, all of which are called *pedal times*. These are measured in terms of the primary time, but not periods, etc.

17. In *phren.*, one of the perceptive faculties. Its alleged organ is situated on either side of eventuality. This gives the power of judging of time, and of intervals in general, supposed to be essential to music and versification. See *phrenology*.

18. One of the three dramatic unities formerly considered essential in the classical drama. The unity of time consisted in keeping the period embraced in the action of the piece within the limit of twenty-four hours. See *unity*.

19. In *fencing*, a division of a movement. Thus, the lunge may be analyzed into three times—(1) straightening the sword arm; (2) carrying the sword-point forward by advancing the right foot; (3) returning foot and hand to the correct position on guard.—*Absolute time*. See *absolute*.—*Against time*. See *against*.—*A good time*. (a) A favorable time or opportunity. (b) A pleasant or enjoyable period or experience: also *a fine time*: often used ironically. [Colloq.]—*A high time*. See *high*.—*Apparent time*, the measure of the day by the apparent position of the sun: it has had different varieties, but as now spoken of by astronomers it is determined by apparent noon, or the instant of passage of the center of the sun over the meridian.—*Astronomical time*, mean solar time reckoned from noon through the twenty-four hours.—*At the same time*. See *same*.—*At times*, at distinct intervals of duration.

The Spirit of the Lord began to move him at *times*.

Judges xiii. 25.

Before *time*, formerly; aforesaid. See *beforetime*.

If he haue not be maire *byfore time*, then he to come withoute any cloke, in his skarlet gounne.

English Gids (E. E. T. S.), p. 415.

Behind the times, behind *time*. See *behind*.—*Civil time*, mean time adapted to civil uses, and distinguished into years, months, days, etc.—*Close time*. See *close-time*.—*Cockshut time*. See *cockshut*.—*Common time*. (a) *Milit.*, the ordinary time taken in marching, distinguished from *quick time*, which is faster by about twenty steps a minute. (b) *In music*. See *common*.—*Compound time*. See *compound measure*, under *compound*.—*Equation of time*. See *equation*.—*Equinoctial time*, the mean longitude of the sun according to Delambre's tables, converted into time at the rate of 360° to the tropical year. This system was invented by Sir John F. W. Herschel.

—*From time to time*, occasionally.—*Greenwich time*, time as reckoned from the instant of the passage of the sun's center over the meridian of Greenwich near London, England, hence usually called the *first meridian*. Greenwich time is the time most widely used by mariners in computing latitude and longitude.—*Hard times*, a period of diminished production, falling prices, hesitation or unwillingness to engage in new business enterprises, and declining faith in the prosperity and soundness of old ones.

Our greatest benefactors . . . must now turn beggars like myself; and so, *times* are very hard, sir.

Farquhar, Love and a Bottle, i. 1.

High *time*, full *time*, a limit of time which is not to be exceeded.

It is *high time* to wake out of sleep. Rom. xiii. 11.

In good *time*. (a) At the right moment; in good season; hence, fortunately; happily; luckily.

In good *time*, here comes the noble duke.

Shak., Rich. III., ii. 1. 45.

Lear. I gave you all—

Reg. And in good *time* you gave it.

Shak., Lear, ii. 4. 253.

My distresses are so many that I can't afford to part with my spirits; but I shall be rich and splenetic, all in good *time*.

Sheridan, School for Scandal, iv. 1.

(b) Well and good; just so; very well.

"There," saith he, "even at this day are shewed the ruins of those three tabernacles built according to Peter's desire." In very good *time*, no doubt!

Fuller, Pisgah Sight, II. vi. 27. (Davies.)

In the nick of *time*. See *nick*, 2.—In *time*. (a) In good season; at the right moment; sufficiently early; before it is too late.

Good king, look to 't in *time*;

She'll hamper thee. Shak., 2 Hen. VI., i. 3. 147.

(b) In the course of things; by degrees; eventually.

In the *time* the rod

Becomes more mock'd than fear'd.

Shak., M. for M., i. 3. 26.

Local *time*, time at any place as determined by the passage of the mean sun (or first point of Aries for sidereal time) over the meridian of that place. Owing to the adoption of Greenwich mean time by British railways, of Paris time by French railways, of some central time in certain other countries, and of standard time by the railways of the United States and Canada, and their general adoption in business centers, local time is now seldom kept in those countries.—*Mean time*. See *mean*.—*Merry time*. See *merry*.—*Nautical time*. Same as *astronomical time*, except that the date of the day agrees with the civil or ordinary time for the morning hours, while with astronomical time the date is in the afternoon hours the same as in civil time.—*Old time*, or *old times*, time gone by; a date or period long passed.

Is there any thing whereof it may be said, See, this is new? it hath been already of *old time*, which was before us.

Ecc. i. 10.

Out of *time*, or out of due *time*, unseasonably.

The Ninevites rebuked not Jonah that he lacked discretion, or that he spake out of *time*.

Latimer, Sermon bef. Edw. VI., 1550.

One born out of due *time*.

1 Cor. xv. 8.

Physiological, psychophysical, quadruple, quintuple, relative *time*. See the adjectives.—*Railway time*, the standard of time reckoning adopted by railways in making up their time-tables.—*Retardation of mean solar time*. See *retardation*.—*Sextuple time*. See *sextuple*.—*Sidereal time*. See *sidereal*.—*Solar time*. Same as *apparent time*.—*Standard time*, a uniform system of time reckoning adopted in 1883 by the principal railways of the United States and Canada, and since then by most of the large cities and towns of both countries. By this system the continent is divided into four sections, each extending over 15 degrees of longitude (15 degrees of longitude making a difference in time of exactly one hour), the time prevailing in each section being that of its central meridian—that is, the time of the 75th meridian (called *eastern time*) prevails in the first section; the time of the 90th meridian (called *central time*) prevails in the next section; the time of the 105th meridian (called *mountain time*) prevails in the third section; and the time of the 120th meridian (called *Pacific time*) prevails in the fourth and most westerly section. In this way it is noon at the same moment in all places in the eastern section (that is, from 7½ degrees east of the 75th meridian to 7½ degrees west of it), while in the central section it is 11 o'clock, in the mountain section 10 o'clock, and in the Pacific section 9 o'clock. The nearer a place is to its central meridian the smaller is the discrepancy between its *standard* and its *local time*.—*Term time*. See *term*, 6 (b).—*That time*, then.

Gaffray that *time*, enbrasing shild and targe,

By malice and wreth his spere faste he shoke,

His course spored, no fentise on hym toke.

Rom. of Partenay (E. E. T. S.), I. 4212.

The fullness of *time*. See *fullness*.—*The last times*. See *last*.—*The time compass*. See *compass*.—*Time about*, alternately.—*Time enough*, in season; early enough.

**timely** (tīm'li), *adv.* [*< ME. timeliche; < timely, a.*] 1. Early; soon.

He did command me to call *timely* on him.

*Shak., Macbeth, ii. 3. 51.*

2. In good time; opportunely.

These, when their black crimes they went about,  
First *timely* charmed their useless conscience out.

*Dryden, Astraea Redux, i. 190.*

You have rebuk'd me *timely*, and most friendly.

*Brome, Jovial Crew, ii.*

The next Imposture may not be so *timely* detected.

*Congreve, Way of the World, v. 6.*

3†. Leisurely.

**timely-parted** (tīm'li-pär'ted), *a.* Having died a natural death. [*Rare.*]

Of late I seen a *timely-parted* ghost,

Of ashly semblance, meagre, pale, and bloodless; . . .

But see, his face is black and full of blood, . . .

It cannot be but he was murder'd here.

*Shak., 2 Hen. VI., iii. 2. 161.*

**timenog**, *n.* Same as *timenoguy*.

**timenoguy** (ti-men'ō-gī), *n.* [Also *timenog*; origin obscure. The form *timenoguy* appar. simulates *guy*.] *Naut.*, a rope stretched from one place to another to prevent gear from getting foul; especially, a rope made fast to the stock of the waist-anchor, to keep the tacks and sheets from fouling on the stock.

**timeous, timeously.** See *timous, timously.*

**timepiece** (tīm'pēs), *n.* Any machine or apparatus by which the progress of time is recorded, as a clepsydra or a time-candle; in ordinary use, a watch or clock.

**time-pleaser** (tīm'plē'zēr), *n.* One who complies with the prevailing opinions of the time, whatever they may be.

Scandal'd the suppliants for the people, call'd them

*Time-pleasers*, flatterers, foes to nobleness.

*Shak., Cor., iii. 1. 45.*

**timer** (tīm'ēr), *n.* 1. One who keeps or measures and records time; a timekeeper.

To make a record in this country requires the presence of three *timers* or measurers, and two of these must agree, or the intermediate one of the three be taken as the correct one.

*The Century, XL. 205.*

2. A form of stop-watch for recording or indicating short intervals of time. It shows not actual time, but only relative time, as the time between the beginning and the end of a race, of a trial of speed, etc.

**timerroust, timersomet,** *a.* See *timorous, timorsome.*

**time-sense** (tīm'sens), *n.* The sense or perception of time and time-relations.

All psychophysic experiments, especially those requiring comparison and those upon the *time-sense* and the like, involve memory.

*W. H. Burnham, Amer. Jour. Psychol., II. 603.*

**time-server** (tīm'sēr'ver), *n.* One who acts conformably to times and seasons; now generally applied to one who meanly and for selfish ends adapts his opinions and manners to the times; one who panders to the ruling power.

No government has ever been, or ever can be, wherein *time-servers* and blockheads will not be uppermost.

*Dryden, Third Miscellany, Ded.*

=Syn. See definitions of *temporizer* and *trimmer*.

**time-serving** (tīm'sēr'ving), *n.* An acting conformably to times and seasons; now, usually, an obsequious compliance with the humors of men in power, which implies a surrender of one's independence, and sometimes of one's integrity.

By impudence and *time-serving* let them climb up to advancement in despite of virtue.

*Burton, Anat. of Mel., p. 375.*

Trimming and *time-serving* . . . are but two words for the same thing.

*South.*

**time-serving** (tīm'sēr'ving), *a.* Characterized by an obsequious or too ready compliance with the times, and especially with the will or humors of those in authority; obsequious; truckling.

**time-servingness** (tīm'sēr'ving-nes), *n.* The state or character of being time-serving. *Roger North.*

**time-sight** (tīm'sīt), *n.* *Naut.*, an observation of the altitude of any heavenly body for the purpose of deducing the time and consequently the longitude.

**time-signal** (tīm'sig'nal), *n.* A signal operated from an observatory to indicate the time of day to persons at distant points.

**time-signature** (tīm'sig'nā-tūr), *n.* In *musical notation*, same as *rhythmical signature* (which see, under *rhythmical*).

**time-table** (tīm'tā'bl), *n.* 1. A tabular statement or scheme, showing the time when certain things are to take place or be attended: as, a school *time-table*, showing the hours for study

in each class, etc.—2. Specifically—(a) A printed table showing the times at which trains on a line of railway arrive at and depart from the various stations. (b) A collection of such tables for the railway passenger traffic of an entire country, or of a district of country of greater or less extent. Also called *railway- or railroad-guide*. [*Eng.*]—3. In *musical notation*, a table of notes arranged so as to show their relative duration or time-value. Such tables were especially used in connection with the complicated metrical experiments of the early mensural music of the middle ages; but the modern system of notes is frequently exhibited in tabular form. See *note* 1, 13.—**Time-table chart**, a chart used for determining the times at which trains reach the various stations on a line of railway. The distances of the stations are laid down to scale, and, at right angles to this, divisions of time for 24 hours. Thus, if a train is to leave A at 10 A. M. and reach B at 6 P. M., a line drawn from 10 at A to 6 at B will cut the cross lines so as to show the times at intermediate stations.

**time-thrust** (tīm'thrust), *n.* [*Tr. F. coup de temps.*] In *fencing*, a thrust made while the opponent draws his breath just before moving his hand to attack, or while his blade is beginning to stir. This is a very delicate thrust, and must be executed with the nicest judgment, neither too soon nor too late, but just "in time." In the time-thrust the foot is generally moved forward in a lunge; in the stop-thrust (which see)—made after the opponent has begun to lunge—the foot is usually at rest.

**time-value** (tīm'val'ū), *n.* In *musical notation*, the relative duration indicated by a note. See *note* 1, *rhythm*, and *meter* 2.

**time-work** (tīm'wērk), *n.* Labor paid for by the day or the hour, in opposition to *piece-work*, or labor paid for by the amount produced.

**timid** (tīm'id), *a.* [*< F. timide = Sp. tímido = Pg. It. timido, < L. timidus, full of fear, fearful, timid, < timere, fear.*] Fearful; easily alarmed; timorous; shy.

Poor is the triumph o'er the *timid* hare.

*Thomson, Autumn, l. 401.*

A *timid* creature, lax of knee and hip,

Whom small disturbance whitens round the lip.

*O. W. Holmes, The Moral Bully.*

**timidity** (ti-mid'i-ti), *n.* [*< F. timidité = It. timidity, < L. timiditas (-t), fearfulness, timidity, < timidus, fearful, timid: see timid.*] The character of being timid, or easily frightened or daunted; cowardice; fearfulness; timorousness; shyness.

This proceedeth from nothing else but extreme folly and *timidity* of heart. *Holland, tr. of Plutarch, p. 234.*

"Vigilius," wrote Margaret to Philip, "is so much afraid of being cut to pieces that his *timidity* has become incredible."

*Motley, Dutch Republic, I. 574.*

=Syn. See *bashfulness*.

**timidly** (tīm'id-li), *adv.* In a timid or apprehensive manner; without boldness.

**timidness** (tīm'id-nes), *n.* The state or quality of being timid; timidity.

**timidous†** (tīm'i-dus), *a.* [*< L. timidus, timid: see timid.*] Timid.

His lordship knew him to be a mere lawyer, and a *timidous* man. *Roger North, Lord Guilford, II. 31. (Davies.)*

**timing** (tīm'ing), *n.* [Verbal *n.* of *time* 1, *v.*] In the design and construction of machinery, the proper adjustment of the parts of any machine so that its operations will follow in a given order to produce a given result, as in the movement of the needle, shuttle, and feed of a sewing-machine in consecutive order.

**timish†** (tīm'ish), *a.* [*< time* 1 + *-ish* 1.] Modish; fashionable.

A *timish* gentleman accoutered with sword and peruke, hearing the noise this man caused in the town, had a great desire to discourse with him.

*Life of Lodowick Muggleton, 1676 (Harl. Misc., I. 612).*

*(Davies.)*

**timist** (tīm'ist), *n.* [*< time* 1 + *-ist* 1.] 1. In *music*, a performer considered with reference to his power to observe rhythmical and metrical relations. Thus, a violinist may have an accurate sense of intonation, and yet be a poor *timist*. Also *timeist*.

Neither the one [singer] nor the other are, by any means, perfect *timists*. *Goldsmith, Visit to Vauxhall.*

She [the quail] was a perfect *timeist*.

*C. Reade, Never too Late, Ixiv.*

The bystanders joined in the song, an interminable recitative, as usual in the minor key; and as Orientals are admirable *timists*, it sounded like one voice.

*R. F. Eurlon, El-Medinah, p. 449.*

2†. One who conforms to the times; a time-server.

A *timist* . . . hath no more of a conscience than feare, and his religion is not his but the prince's. He reverenceth a courtiers servants servant.

*Sir T. Overbury, Characters, a Timist.*

**timmen** (tīm'en), *n.* [A var. of (or error for?) *tammin, tamin.*] Same as *tamin*, 1.

The inward man struggled and plunged amidst the toils of broadcloth and *timmen*.

*Miss Ferrier, Inheritance, Ixxiii.*

**timmer.** A dialectal form of *timber* 1, *timber* 2.

**timocracy** (ti-mok'rā-si), *n.* [= *F. timocratie, < Gr. τιμοκρατία*, a state in which honors are distributed according to a rating of property; also, fancifully, in Plato, a state in which the love of honor is the ruling principle; *< τιμή*, honor, worth, dignity, office, + *κρατεῖν*, govern.] A form of government in which a certain amount of property is requisite as a qualification for office. The word has also been used for a government in which the ruling class, composed of the noblest and most honorable citizens, struggle for preeminence among themselves.

An innovation of great extent and importance was the so-called *timocracy*, according to which a certain amount of means was a necessary qualification for a share in the offices of state. *Von Ranke, Univ. Hist. (trans.), p. 142.*

**timocratic** (tim-ō-kra'tik), *a.* [*< Gr. τιμοκρατικός*, pertaining to or favoring timocracy, *< τιμοκρατία*, timocracy: see *timocracy*.] Of or pertaining to timocracy.

**timon†** (tīm'on), *n.* [*< ME. temon, < OF. timon, temon, F. timon, a pole, staff, the handle of a rudder, the rudder, = Pr. timo = Sp. timon = Pg. timão = It. timone, < L. temo(n-), a beam, pole.*] The helm or rudder of a boat.

Tourneyng with such ye violence yt with the jumpe and stroke of ye falle of ye galye to the rok the sterne, called the *temon*, sterre and flew from the hokes.

*Sir R. Gyllyforde, Pylgrymage, p. 76.*

**timoneer†** (tīm-mō-nēr'), *n.* [*< F. timonier = Sp. timonero = Pg. timoneiro, temoneiro = It. timoniere, < ML. timonarius, \*temonarius, a steersman, < L. temo(n-), a beam, pole, > F. timon, etc., helm, rudder: see timon.*] *Naut.*, a helmsman; also, one on the lookout who gives steering-orders to the helmsman.

While o'er the foam the ship impetuous flies,

The helm th' attentive *timoneer* applies.

*Falconer, Shipwreck, ii.*

**Timonist** (tīm'mon-ist), *n.* [*Timon* (see *def.*), *< L. Timon, < Gr. Τιμων, + -ist.*] A misanthrope; literally, one like Timon of Athens, the hero of Shakspeare's play of the same name.

I did it to retire me from the world,

And turn my muse into a *Timonist*.

*Dekker, Satiromastix.*

**Timonize** (tīm'mon-iz), *v. i.;* and pret. and pp. *Timonized*, ppr. *Timonizing*. [*< Timon* (see *Timonist*) + *-ize*.] To play the misanthrope.

I should be tempted to *Timonize*, and clap a satyr upon our whole species. *Gentleman Instructed, p. 306. (Davies.)*

**Timor deer.** See *deer*.

**timorosity†** (tim-ō-ros'i-ti), *n.* [Early mod. E. *tymerositie*; *< ML. \*timorositia (-t-), < timorosus, fearful: see timorous.*] Timorousness.

*Timorositie* is as well when a man feareth suche thinges as be nat to be feared, as also when he feareth thinges to be feared more than nedeth.

*Sir T. Elyot, The Governour, iii. 8.*

**timoroso** (tim-ō-rō'sō), *a.* [*It.: see timorous.*] In *music*, *timid*; hesitating: noting passages to be so rendered.

**timorous** (tīm'ō-rus), *a.* [Early mod. E. also *timorous*; *< ME. \*timorous, < OF. \*timorous = Sp. Pg. temeroso = It. timoroso, < ML. timorosus, fearful, < L. timor, fear, < timere, fear: see timid.*] 1. Fearful; timid; shy; shrinking.

They were wont to be very *timorous* and fearful upon the sea, nor to venture upon it but only in the summer time.

*Sir T. More, Utopia (tr. by Robinson), i.*

Like a *timorous* thief, most fain would steal

What law does vouch mine own.

*Shak., All's Well, ii. 5. 86.*

2. Betokening or proceeding from lack of boldness or courage; characterized by fear; weakly hesitant: as, *timorous* doubts.

Rod. Here is her father's house; I'll call aloud.

Iago. Do, with like *timorous* accent and dire yell

As when . . . the fire

Is spied in populous cities. *Shak., Othello, i. 1. 75.*

Against all *timorous* counsels he [Lincoln] had the courage to seize the moment.

*Emerson, Emancipation Proclamation.*

**timorously** (tīm'ō-rus-li), *adv.* In a timorous manner; fearfully; timidly; without boldness or confidence.

**timorousness** (tīm'ō-rus-nes), *n.* The state of being timorous; timidity; want of courage.

*Timorousness* is called caution, rashness is called quickness of spirit, covetousness is frugality.

*Jer. Taylor, Works (ed. 1835), I. 846.*

**timorsome** (tīm'or-sum), *a.* [Also *timoursum, timersome, timersome*; an accom. form of *timorous*, as if *< L. timor, fear* (see *timorous*), + *-some*.] Easily frightened; timid. *Scott, Pirate, xviii. [Scotch.]*

**tinchel, tinchill** (tin'chel, tin'chil), *n.* [*Gael. Ir. timchioll*, circuit, compass; as *adv. and prep., around, about.*] In Scotland, a circle of sportsmen who, by surrounding a

great space and gradually closing in, bring a number of deer together.

We'll quell the savage mountaineer,  
As their *Tinchel* crows the game!

Scott, *L. of the L.*, vi. 17.

**tinclad** (tin'klad), *n.* [A humorous name, after *ironclad*: < *tin* + *clad*.] In the civil war in the United States, a gunboat protected by very light plating of metal, used on the western rivers. [Colloq.]

He [Eads] converted . . . seven transports into what were called *tinclads*, or musket-proof gunboats.  
*Sci. Amer.*, N. S., LVI. 263.

**tingkt** (tingkt), *v. t.* [*L. tinctus*, pp. of *tingere*, dye, tinge: see *tinge*. Cf. *taint*, *v.*] To tinge or tint, as with color; hence, figuratively, to imbue. [Obsolete or archaic.]

I will but . . . *tingt* you the tip,  
The very tip o' your nose.

B. Jonson, *Fortunate Isles*.

Some bencher, *tincted* with humanity.

B. Jonson, *Every Man out of his Humour*, Ded.

**tinct** (tingkt), *a.* [*L. tinctus*, pp.: see the verb.] Tinged.

The blew in black, the greene in gray is *tinct*.

Spenser, *Shep. Cal.*, November.

**tingkt** (tingkt), *n.* [*L. tinctus*, dyeing, < *tingere*, pp. *tinctus*, dye: see *tinge*, *v.*, *tinge*. Cf. *taint*, *v.*, doublets of *tinct*.] 1. Tint; tinge; coloring; hue. [Obsolete or poetical.]

All the devices blazon'd on the shield  
In their own *tinct*.

Tennyson, *Lancelot and Elaine*.

2. A tincture; an essence; specifically, the grand elixir of the alchemists.

Plutus himself,

That knows the *tinct* and multiplying medicine.

Shak., *All's Well*, v. 3. 102.

How much unlike art thou Mark Antony!

Yet, coming from him, that great medicine hath  
With his *tinct* gilded thee. Shak., *A. and C.*, i. 5. 37.

**tingction** (tingk'shon), *n.* [*L.* as if *tinctio(n)*, < *tingere*, dye: see *tinge*.] A preparation for dyeing; coloring matter in a state for use; that which imparts color. [Recent.]

It also colors somewhat under the same application of the *tingction*.  
*Amer. Nat.*, Feb., 1883, p. 117.

**tinctorial** (tingk-tō'ri-al), *a.* [*F. tinctorial*, < *L. tinctorius*, < (*LL.*) *tinctor*, a dyer, < *tingere*, pp. *tinctus*, dye: see *tinge*. Cf. *taintor*.] Pertaining or relating to color or dyeing; producing or imparting color.

Alizarin, the chief *tinctorial* principle of madder.

*Encyc. Brit.*, IV. 687.

Alumina cannot be called a *tinctorial* or colour-giving matter. W. Crookes, *Dyeing and Calico-Printing*, p. 142.

**tincturation** (tingk-tū-rā'shon), *n.* [*< tincture + -ation*.] The preparation of a tincture; the treatment of a substance by solution in a menstruum, especially alcohol or ether. [Rare.]

Odorous substances yield their odours to spirit by *tincturation*—that is, by putting the fragrant material into the spirit, and allowing it to remain there for a period till the alcohol has extracted all the scent. *Ure, Dict.*, III. 537.

**tincture** (tingk'tūr), *n.* [= *F. teinture* = *Sp. Pg. It. tintura*, < *L. tintura*, a dyeing, < *tingere*, pp. *tinctus*, dye: see *tinge*. Cf. *tainture*, an older form.] 1. The color with which anything is imbued or impregnated; natural or distinctive coloring; tint; hue; shade of color.

For, deep dy'd in his mighty precious Blood,  
It keeps the pow'r and *tincture* of the food.

J. Beaumont, *Psyche*, iii. 32.

The faded rose each spring receives  
A fresh red *tincture* on her leaves.

Carew, *To A. L.*

Clouds of all *tincture*, rocks and sapphire sky,  
Confused, commingled, mutually inflamed.

Wordsworth, *Excursion*, ii.

2. In *her.*, one of the metals, colors, or furs used in heraldic achievements. The metals are or (gold) and argent (silver); the colors, gules (red), azure (blue), sable (black), vert (green), purpure (purple), san-

Heraldic Tinctures.

guine or murrey (blood-red), and tenné or tenney (tawny, orange); and the furs, ermine, ermines, erminois, pean, vair, counter-vair, potent, and counter-potent. (See these words, and also *furs*, 7.) Of the colors, the first three are the most common, and the last two are very exceptional.

Sable is considered by some writers as partaking of the nature both of metal and of color. In modern usage (from the sixteenth century), in representations in black and white, as by engraving, argent is indicated by a plain surface, and the other tinctures by conventional arrangements of lines, etc., as in the cut. A law of heraldry seldom violated provides that the tincture of a bearing must be a metal if the field is a color, and vice versa. See *false heraldry*, under *false*.

The first English examples of seals with lines in the engraving to indicate the *tinctures* are said to be on some of those attached to the death warrant of Charles I., 1648-9. *Trans. Hist. Soc. Lancashire and Cheshire*, N. S., V. 52.

3. Something exhibiting or imparting a tint or shade of color; colored or coloring matter; pigment. [Obsolete or rare.]

These waters wash from the rocks such glistening *tinctures* that the ground in some places seemeth as gilded.  
*Capt. John Smith, Works*, I. 115.

4. Infused or derived quality or tone; distinctive character as due to some intermixture or influence; imparted tendency or inclination: used of both material and immaterial things; in *alchemy*, etc., a supposed spiritual principle or immaterial substance whose character or quality may be infused into material things, then said to be *tinctured*: as, *tincture* of the "Red Lion."

From what particular mineral they [natural baths] receive *tincture*, as sulphur, vitriol, steel, or the like.

Bacon, *Advancement of Learning*, ii.

The *tincture* I early receiv'd from generous and worthy parents, and the education they gave me, disposing . . . me to the love of letters.

Evelyn, *To the Countess of Sunderland*.

Lastly, to walk with God doth increase the love of God in the soul, which is the heavenly *tincture*, and inclineth it to look upward.

Baxter, *Divine Life*, ii. 6.

5. A shade or modicum of a quality or of the distinctive quality of something; a coloring or flavoring; a tinge; a taste; a spice; a smack: as, a *tincture* of garlic in a dish.

A *tincture* of malice in our natures makes us fond of furnishing every bright idea with its reverse.

Swift, *Tale of a Tub*, viii.

6. A fluid containing the essential principles or elements of some substance diffused through it by solution; specifically, in *med.*, a solution of a vegetable, an animal, or sometimes a mineral substance, in a menstruum of alcohol, sulphuric ether, or spirit of ammonia, prepared by maceration, digestion, or (now most commonly) percolation. Tinctures are also often prepared, especially on the continent of Europe, by the addition of alcohol to the expressed juices of plants. According to the menstruum, tinctures are distinguished as *alcoholic*, *etheral*, and *ammoniated tinctures*; and when wine is used they are called *medicated wines*. Compound tinctures are those in which two or more ingredients are submitted to the action of the solvent. Simple tinctures are such as contain the essential principles of but one substance in solution.

B. Jonson, *Fortunate Isles*.

**Bestucheff's nervous tincture**, an ethereal solution of iron chloride, formerly much used in gout and in states of nervous depression. Also called *golden tincture* and *Klaproth's tincture*.—**Bitter tincture**, a composition of gentian, centaury, bitter orange-peel, orange-berries, and zedoary-root, extracted in alcohol.—**Fleming's tincture**, a strong tincture of aconite.—**Greenough's tincture**, a tooth-wash containing alum, bitter almond, logwood, orris-root, horse-radish, oxalate of potash, cassia-berries, and cochineal, extracted in alcohol.—**Hatfield's tincture**, a tincture of guaiac and soap.—**Huxham's tincture**, compound tincture of cinchona.—**Mother tincture**, in homeopathic pharmacy, the strong tincture from which the dilutions are made.—**Red tincture**. Same as *great elixir* (which see, under *elixir*, 1).—**Rymer's cardiac tincture**, tincture of rhubarb and aloes, containing in addition camphor, capsicum, cardamom, and sulphuric acid.—**Stomachic tincture**. (a) Compound tincture of cardamom. (b) Bitter tincture.—**Volatile tincture of bark**, a tincture containing cinchona and aromatic spirit of ammonia.—**Warburg's tincture**, an alcoholic preparation formed of a large number of ingredients, among which are quinine, aloes, rhubarb, gentian, myrrh, and camphor. It is used as a substitute for quinine in malarial fever and other disorders.—**White tincture**. Same as *lesser elixir* (which see, under *elixir*, 1).—**Whytt's tincture**, a compound tincture containing cinchona, gentian, and orange-peel.

**tincture** (tingk'tūr), *v. t.*; pret. and pp. *tinctured*, ppr. *tincturing*. [*< tincture, n.*] 1. To imbue with color; impart a shade of color to; tinge; tint; stain.

The rest of the Isles are replenished with such like; very rocky, and much *tinctured* stone like Mineral.

Quoted in *Capt. John Smith's Works*, I. 106.

A little black paint will *tincture* and spoil twenty gay colours.

Hawthorne, *Seven Gables*, xvii.

2. To give a peculiar taste, flavor, or character to; imbue; impregnate; season.

Early were our minds *tinctured* with a distinguishing sense of good and evil: early were the seeds of a divine love, and holy fear of offending, sown in our hearts.

Bp. Atterbury, *Sermons*, I. xviii.

His manners . . . are *tinctured* with some strange inconsistencies.

Goldsmith, *Citizen of the World*, xxvi.

3. To taint; corrupt. [Rare.]

And what can be the Meaning of such a Representation, unless it be to *Tincture* the Audience, to extinguish Shame, and make Lewdness a Diversion?

Jeremy Collier, *Short View* (ed. 1698), p. 5.

**tincture-press** (tingk'tūr-pres), *n.* A press for extracting by compression the active principles of plants, etc. E. H. Knight.

**tind** (tind), *v. t.* and *i.* [(a) Also dial. *teend*, with loss of the final consonant *teend*; *teen*; prop. *tend*, < ME. *tenden*, *teenden*, < AS. *tendan*, in comp. on *tendan*, = Icel. *\*tenda* (in later form *tendra*) = Sw. *tända* = Dan. *tænde* = Goth. *tandjan*, kindle; (b) in another form, prop. *tind*, < ME. *\*tinden*, < AS. *\*tyndan* = OHG. *zunden*, MHG. *zünden*, set on fire (also OHG. *zunden*, MHG. *zunden*, burn, glow); (c) cf. See *spark*, 1. When *tinder* was in general use instead of matches, it consisted commonly of charred linen, which was ignited in a metallic box.

Your conjuring, cozening, and your dozen of trades  
Could not relieve your corps with so much linen  
Would make you *tinder*. B. Jonson, *Alchemist*, i. 1.

I'll go strike a *tinder*, and frame a letter presently.

Dekker and Webster, *Northward Ho*, iii. 2.

**German tinder**. Same as *amadou*.—Spanish *tinder*, a substance supposed to have been prepared from the pubescence of the flower-heads, leaves, and stems of a species of globe-thistle, *Echinops strigosus*, found in Spain.

**tinder-box** (tin'dér-boks), *n.* 1. A box in which *tinder* is kept ready for use, usually fitted with flint and steel, the steel being often secured to a lifting cover so that the flint, when struck against it, sends sparks upon the *tinder* within.

As wakefull Students, in the Winters night,  
Against the steel glaucing with stony knocks,  
Strike sodain sparks into their *Tinder-box*.

Sylvestre, tr. of Du Bartas's *Weeks*, l. 2.

It has been reserved for this century to substitute the lucifer-match for the *tinder-box*.

Quarterly Rev., CXLVI. 197.

2. By extension, something easily inflammable: as, the house was nothing but a *tinder-box*. [Colloq.]

delicate forms which often attract attention by the enormous numbers in which they collect upon the leaves of trees and shrubs, as well as by their strange structure. The wing covers are very thin, almost transparent, and filled with gauze-like meshes, and, with the sides of the thorax, project widely. Over the head a hood-like process, also full of meshes, often projects: in some forms more simple processes are present, and are modified in different ways. They are all vegetable-feeders, and often damage forest- and shade-trees. The eggs are usually laid along the veins of leaves, and are disguised by a brownish evaduation. There are 2 subfamilies, *Piesminæ* and *Tingitidæ*, with about 55 genera and 110 species, of most parts of the world. *Corythuca* is a genus of striking aspect, best represented in the United States.

A *tinkard* leaveth his bag a-sweating at the ale-house, which they termethir boweing in, and in the meane season goeth abroad a begging.

*Fraterlute of Vocabondes* (1575). (Nares.)

**Tinker's-root** (ting'kärz-röt), *n.* See *Tinker's-weed*.

**tinker** (ting'kär), *n.* [*< ME. tinkere*, lit. one who makes a tinkling sound (namely in mending metallic vessels); < *tink*<sup>1</sup> + -er<sup>1</sup>. Cf. equiv. *tinkler* and *tinkard*; cf. also *W. tincerrd*, a tinker.] 1. A mender of household utensils of tin, brass, copper, and iron; one who goes from place to place with tools and appliances for mending kettles, pans, etc. Tinkers have usually been regarded as the lowest order of craftsmen, and their occupation has been often pursued, especially by gipsies, as a mere cover for vagabondage.

How sweet the bells ring now the nuns are dead,  
That sound at other times like *tinkers'* pans!

*Marlowe*, Jew of Malta, iv. 1.

Another itinerant, who seems to some degree to have rivalled the lower classes of the jugglers, was the *tinker*; and accordingly he is included with them and the minstrels in the act against vagrants established by the authority of Queen Elizabeth.

*Strutt*, Sports and Pastimes, p. 326.

2. The act of mending, especially metal-work; the doing of the work of a tinker.—3. A botcher; a bungler; an unskilful or clumsy worker; one who makes bungling attempts at making or mending something; also, a "jack of all trades," not necessarily unskilful.—4. An awkward or unskilful effort to do something; a tinkering attempt; a botch; a bungle.

They must speak their mind about it [anything which seems to be going wrong], . . . and spend their time and money in having a *tinker* at it.

*T. Hughes*, Tom Brown at Rugby, i. 1.

**tinker** (ting'kär), *v.* [*< tinker, n.*] I. *trans.* 1. To repair or put to rights, as a piece of metal-work.—2. To repair or put into shape rudely, temporarily, or as an unskilled workman: used in allusion to the imperfect and makeshift character of ordinary work in metals: often with *up*, to patch up.

The Victorian Act has been already *tinkered* several times, and is not likely to last long in its present form.

*Sir C. W. Dilke*, Probs. of Greater Britain, vi. 6.

II. *intrans.* 1. To do the work of a tinker upon metal or the like.—2. To work generally in an experimental or botchy way; occupy one's self with a thing carelessly or in a meddlesome way: as, to *tinker* with the tariff.

I will step round at once and offer my services, before other folks begin to *tinker* with him.

*R. B. Kimball*, Was he Successful? ii. 7.

**tinkerly** (ting'kär-li), *a.* [*< tinker + -ly*]. Pertaining to or characteristic of a tinker; like a tinker, or a tinker's work.

Fie! whipping-post, *tinkerly* stuff!

*Shirley*, Love Tricks, ii. 1.

**tinkershire** (ting'kär-shēr), *n.* The common murre or guillemot, *Lomvia troile*. Also *tinkershue*. [Local, Eng.]

**Tinker's-weed** (ting'kärz-wēd), *n.* The fever-root, *Triosteum perfoliatum*: so named from a Dr. Tinker of New England. It has purgative and emetic properties. Also, erroneously, *Tinkard's-root*.

**tinkle**<sup>1</sup> (ting'kl), *v.*: pret. and pp. *tinkled*, ppr. *tinkling*. [*< ME. \*tinklen, tinklen*: freq. of *tink*<sup>1</sup>. Cf. *tingle*.] I. *intrans.* 1. To make or give forth a succession of little clinking sounds; clink or tink repeatedly or continuously.

Though I speak with the tongues of men and of angels, and have not charity, I am become as sounding brass, or a tinkling cymbal.

1 Cor. xiii. 1.

The water *tinkles* like a distant guitar.

*Lovell*, Study Windows, p. 49.

2. To tingle.

And his ears *tinkled*, and his colour fled.

*Dryden*, Theodore and Honoria, l. 94.

II. *trans.* 1. To cause to clink or tink; jingle; ring.

The Sexton or Bell-Man goeth about the Streets with a small Bell in his Hand, which he *tinketh*.

*J. Ray*, Select Remains, p. 207.

2. To affect by tinkling sounds; lead or draw by ringing or jingling.

The very kirk evanished, whose small bell *tinkled* the joyous school-boy to worship on sunny Sabbaths.

*Notcs Ambrosianæ*, Feb., 1832.

3†. To cause to ring or resound.

With clamorous howling

Three place shee *tinkled* *Struthurst*, *Eneid*, iii.

**tinkle**<sup>1</sup> (ting'kl), *n.* [*< tinkle*<sup>1</sup>, *v.*] A succession of small tinkling or clinking sounds; a soft jingling noise.

The *tinkle* of the thirsty rill. *M. Arnold*, Bacchanalia.

With a ripple of leaves and a *tinkle* of stream

The full world rolls in a rhythm of praise.

*W. E. Henley*, Midsummer Days and Nights.

**tinkle**<sup>2†</sup> (ting'kl), *v. i.* To tinker.

Who *tinkles* then, or personates Tom Tinker?

*B. Jonson*, New Inn, i. 1.

**tinnient** (tin'i-ent), *a.* [*< L. tinnien* (t's, ppr. of *tinnire*, ring: see *tingl*, *tink*).] Emitting a clear ringing or tinkling sound. *Imp. Dict.*

**tinning** (tin'ing), *n.* [Verbal *n.* of *tin*, *v.*] 1. The art or process of coating metallic surfaces with tin, of making or repairing tinware, or of packing substances in tin cans for preservation.

The protection of copper from rusting by tinning was known as early as the time of Pliny; a similar treatment of sheet-iron was first mentioned by Agricola.

As you see, sir, I work at *tinning*. I put new bottoms into old tin tea-pots, and such like.

*Mayhew*, London Labour and London Poor, I. 302.

2. The layer or coat of tin thus applied.—3†. Tinware.

If your butter, when it is melted, tastes of brass, it is your master's fault, who will not allow you a silver saucepan; besides, . . . new *tinning* is very chargeable.

*Swift*, Advice to Servants (Cook).

Nor is there any Motion or the least *tintamar* of Trou- ble in any Part of the Country, which is rare in France.

Howell, Letters, I. i. 19.

**tint-block** (tint'blok), *n.* In printing, a surface of wood or metal prepared for printing typographically the background or ground-tint of a page or an illustration in two or more colors. A ruled tint has faint and close parallel white lines on its surface. A crossed tint has lines crossing one another. A tint with high lights has bits or patches of white cut out in the places where glints of white are needed to give effect to the engraving. Tinted printing-surfaces are often made by engraving by hand or by a ruling-machine. The appearance of flat surfaces of cloth, smooth wood, marble, or grained leather is often produced by pressing the material selected upon a heated plate of soft metal.

**tint-drawing** (tint'dra'ing), *n.* The drawing of objects or surfaces in water-color or a wash of uniform tint, or of varying shades of the same tint, as the subject may require.

**tinter** (tin'tér), *n.* [*< tint + -er*.] 1. A person who tints, or an instrument for tinting.— 2. A slide of plain colored glass, as pink or blue, used with the magic lantern to give moonlight or sunrise effects, or the like, to pictures from plain or uncolored slides.

**tinternell**, *n.* [Cf. OF. *tinton*, a kind of dance, the burden of a song, the ting of a bell, *< tinter*, ring: see *ting*.] A certain old dance. *Halliwel.*

**tintiness** (tin'ti-nes), *n.* The state or condition of being tiny.

What painters call *tintiness* when they observe that the brilliancy of local tints severally affects their harmony and the tertiaries are weak. *Athenæum*, No. 3073, p. 377.

**tinting** (tin'ting), *n.* [Verbal *n.* of *tint*, *v.*] In line-engraving, the method or act of producing an even and uniform shading by cutting a series of parallel lines on the plate or block.

**tinnabula**, *n.* Plural of *tinnabulum*.

**tinnabulant** (tin-ti-nab'ü-lant), *a.* [*< L. tinnabulum*, a bell (*< tinnabulum*), + *-ant*.] Same as *tinnabular*. [Rare.]

Frappant and *tinnabulant* appendages (knockers and bells). *H. Smith, Rejected Addresses*, x.

**tinnabular** (tin-ti-nab'ü-lär), *a.* [*< L. tinnabulum*, a bell, + *-ar*.] Of or relating to bells or their sound.

**tinnabulary** (tin-ti-nab'ü-lä-ri), *a.* Same as *tinnabular*. *Bulwer, Pelham*, xxv. [Rare.]

**tinnabulation** (tin-ti-nab'ü-lä'shon), *n.* [*< L. tinnabulum*, a bell, + *-ation*.] The ringing of a bell or of bells; a sound like that of ringing bells.

The *tinnabulation* that so musically wells

From the bells, . . .

From the jingling and the tinkling of the bells.

*Poe, The Bells.*

**tinnabulous** (tin-ti-nab'ü-lus), *a.* [*< L. tinnabulum*, a bell, + *-ous*.] Given to or characterized by the ringing of a bell, or the making of bell-like sounds.

I, and many others who suffered much from his [the college porter's] *tinnabulous* propensities, . . . have forgiven him. *De Quincey, Opium Eater*, p. 84.

**tinnabulum** (tin-ti-nab'ü-lum), *n.*; pl. *tinnabula* (-lā). [*< L. tinnabulum*, a bell (cf. ML. *tinnuum*, OF. *tantan*, a cow-bell), *< tinnare*, ring, clink, jangle, redupl. of *tinnre*, *tinnre*, ring, tinkle: see *tinnient*, *ting*.] 1. A bell; specifically, a girelot: especially applied to such an object of antique Roman origin.— 2. A rattle formed of small bells or small plates of metal.

**Tinnidæ** (tin-tin'î-dē), *n. pl.* [NL., *< Tinnus* + *-idæ*.] A family of heterotrichous (formerly supposed to be peritrichous) ciliate infusorians, typified by the genus *Tinnus*. These animals are free-swimming or sedentary, and mostly inhabit a lorica, or indurated sheath, to the bottom or side of which the ovate or pyriform body is attached by a retractile pedicle or filament from the posterior end of the body. The mouth is eccentric, terminal or nearly so, with circular peristome fringed with large ciliate cilia. The general cuticular surface is more or less completely clothed with fine vibratile cilia. Genera besides the type are *Tinnidinium*, *Vasicola*, and *Strombidinopsis*. Usually written *Tinnidæ*.

**Tinnus** (tin-tin'us), *n.* [NL. (Schränk, 1803), *< L. tinnare*, ring: see *tinnabulum*.] The typical genus of *Tinnidæ*, containing free loricate forms adherent by a retractile pedicle. These animals are all marine, and under the microscope display great agility. There are many species, such as *T. inquilinus*.

**tintless** (tint'les), *a.* [*< tint + -less*.] Having no tint; colorless. *Charlotte Brontë, Villette*, xii.

**tintometer** (tin-tom'e-ter), *n.* [*< tint + Gr. μέτρον*, measure.] An instrument or apparatus for determining tints or shades of color by comparison with standard tints or shades. Lovibond's, one of the more recent and improved instruments, consists of a combination of standard colored glasses so

arranged that all side light is cut off. The tint to be determined is compared with the different tints obtained by these combinations until one is found which it matches.

**tint-tool** (tint'töl), *n.* In wood-engraving, an implement used to cut parallel lines on a block, so as to produce a tint. It has a handle like that of the burin, but the blade is thinner at the back, and deeper, and the point-angle is much more acute. See cut under *graver*.

**tinty** (tin'ti), *a.* [*< tint + -y*.] Exhibiting discordant diversity or contrast of tints; inharmoniously tinted or colored, as a painting. *Athenæum*, Feb. 4, 1888, p. 153.

**tintype** (tin'tip), *n.* A photographic positive taken on a thin plate of japanned iron; a ferrotype.

**tinware** (tin'wār), *n.* Wares of tin; articles, especially vessels for holding liquids, made of tin-plate.

**tin-witts** (tin'wits), *n. pl.* Dressed tin ore containing so much pyrites, arsenic, or other deleterious ingredients that it must be roasted or calcined in a reverberatory furnace, or in a specially contrived calciner, before being passed through the processes of jiggling, tossing, dilluing, etc. [Cornwall, Eng.]

**tin-works** (tin'wérks), *n. sing. and pl.* Works or an establishment for the mining or manufacture of tin, or for the making of tinware.

**tin-worm** (tin'wérn), *n.* A small red worm, round, and having many legs, much like a hog-louse. *Bailey*, 1731.

**tiny** (tí'ni or tin'í), *a.* [Also *teeny* (common in childish use); formerly also *tinny*, *tyny*; early mod. E. and late ME. also *time*, *tyne*; origin uncertain; if the early forms *time*, *tyne* are intended for *tiny*, with which, at any rate, they have merged, the formation is prob. *< time*<sup>2</sup>, var. *teen*<sup>1</sup>, trouble, sorrow, + *-y*, the orig. sense of *tiny* being then 'fretful, peevish'; cf. *peevish*, *teatish*, *tettish*, *a.*, and *pet*, *n.*, also applied esp. to children, and so coming, like *tiny*, to imply smallness of size, an implication derived also in the case of *tiny* from the adj. *little* usually preceding.] Very diminutive; minute; wee. It is frequently used with *little* as an intensification of its force: as, a *little tiny* boy; a *tiny little* piece of something.

*Sec. Pas. Haylle, lytlylle tyne mop! rewarder of mede! . . . Haylle, lytlylle mylk sop! haylle, David sede!*

*Towneley Mysteries*, p. 96.

When that I was and a *little tiny* boy,

With hey, ho, the wind and the rain.

*Shak., T. N.*, v. 1. 398 (fol. 1623).

All that heard a *little tiny* page,

By his ladyes coach as he ran.

*Little Musgrave and Lady Barnard* (Child's Ballads, II. 17).

But Annie from her baby's forehead clipt

A *tiny* curl, and gave it. *Tennyson, Enoch Arden*.

**Tiny perches**, the classrooms.

**-tion**. [ME. *-tion*, *-cion*, *-cioun*, *-cium*, *< OF. -tion*, *-cion*, *-ciun*, also *-con*, *-son*, *-sun*, F. *-tion*, *-con* = Sp. *-cion* = Pg. *-cão* = It. *-zione* = D. *-tie* = G. *-tion*, *< L. -tio(n)*, a suffix of abstract nouns (many used as concrete), as in *dic-tio(n)*, saying, *< dic-ere*, say, *accusa-tio(n)*, accusation, *< accusa-re*, accuse, *moni-tio(n)*, warning, *< mone-re*, warn, *audi-tio(n)*, hearing, *< audi-re*, hear (see the corresponding E. words).] A suffix occurring in many abstract (and concrete) nouns of Latin origin. It appears, according to the Latin original, either without a preceding vowel, as in *dictio*, *action*, *reception*, etc., or with a preceding vowel, as in *accusatio*, *monitio*, *audition*, etc., the vowel being often, however, radical, as in *station*, *completion*, *ambition*, *motion*, *ablation*, *revolution*, etc. Preceded by *-a-*, the suffix has become a common English formative (see *-ation*). The suffix *-tion* after a radical *s* in the Latin stem appears as *-sion*, as in *mission*, *passion*, etc. In words derived through the Old French it also appears as *-son*, as in *benison*, *malison*, *menison*, *venison*, etc.

**-tious**. [ME. *-tious*, *-cious*, etc., *< OF. -cios*, *-cious*, *-cieur*, *-tieur*, F. *-tueux* = Sp. Pg. *-cioso* = It. *-zioso*, *< L. -tiosus*, being the suffix *-osus* (> E. *-ous*, *-ose*) added to stems in *-t*: see *-ous*. The termination also represents in E. the L. adj. termination *-cius*, *-tius*, in *-i-cius*, *-i-tius*, prop. *-ic-ius*, as in *adventitious*, *adventitious*, *adventitious*.] A termination of many adjectives of Latin origin, some associated with nouns in *-tion*, as *ambitious*, *expeditious*, *disputatious*, etc., associated with *ambition*, *expedition*, *disputation*, etc. (see *-atious*, *-itious*). In some cases the termination is of other origin, as in *adventitious*, *facitious*, *itchitious*, etc. See the etymology, and the words mentioned.

**tip** (tip), *n.* [*< ME. tip*, *tip*, *tippe* (not found in AS.) = MD. D. *tip* = LG. *tippe* = MHG. *zipf* = Sw. *tipp* = Dan. *tip*, tip, end, point; also, in dim. form, MD. *tippel*, *tepel*, D. *tepel*, nipple, = MHG. G. *zipfel*, tip, point; MD. *tipken*, tip,

nipple, D. *tijs* = LG. *tijs*, tip, nipple; appar. a derived form, and generally regarded as a dim., of *top*<sup>1</sup> (cf. *tip-top*); but the phonetic relations present a difficulty. Cf. Icel. *typpi*, a tip, *< toppr*, top: see *top*<sup>1</sup>. Prob. two forms, one related to *top*<sup>1</sup>, and the other related to *tap*<sup>1</sup>, are confused. So the verb *tip*<sup>2</sup> is appar. related to *tap*<sup>2</sup>.] 1. The upper extremity or top part of anything that is long and slender, tapering, or thin, especially if more or less pointed or rounded: as, the *tip* of a spire or of a spear; any pointed, tapering, or rounded end or extremity; the outer or exposed termination of anything running to or approximating a point: as, the *tip* of the tongue; the *tips* of the fingers; the *tip* of an arrow (the apex of the arrow-head), of a cigar, or of a pen.

In love, i' faith, to the very *tip* of the nose.

**Tipula** (tip'ū-lā), *n.* [NL. (Linnaeus, 1735), *< L. tipula, tippula*, a water-spider. Cf. *Tiphia*.] A notable genus of crane-flies, typical of the family *Tipulidæ*. It now includes only those species in

which the discoidal cell of the wings is present and emits two veins, the upper always forked, and in which the antennæ are thirteen-jointed. Over 70 species occur in North America. *T. oleracea* of England, the cabbage-gnat or cabbage crane-fly, often does great damage to cabbages, its larvæ gnawing through the roots. This is one of the insects called in Great Britain *daddy-long-legs* or *father-long-legs* (a name given in the United States to certain phalangids).

**Tipularia** (tip'ū-lā'ri-ä), *n.* [NL., *< Tipula* + *-aria*.] 1. A genus of fossil crane-flies, found in the lithographic limestone rocks of Bavaria. *T. teyleri* is the only species. *Weyenburgh, 1869.*

—2. [*(Nuttall, 1818)*]

so named from a resemblance of the flower to a crane-fly: see *Tipula*.] A genus of terrestrial orchids, of the tribe *Epideuræ* and subtribe *Lipariæ*.

It is characterized by flowers with a long slender spur, a lip with the two lateral lobes small and short, a narrow erect column, and four unappendaged and finally slender-stalked pollinia. The 2 species are natives, one of the Himalayas, the other of the United States. They are herbs with large solid bulbs on a short rootstock, producing a solitary ovate leaf and an unbranched elongated scape bearing a loose raceme of small greenish and purple-tinged flowers. *T. discolor* is a rare plant of sandy woods from Vermont and Michigan to Florida: a book-name is *crane-fly orchis*; about

Washington, D. C., it is known as *tallowroot*, from the appearance of the cut bulbs. It resembles the puttyroot in developing its leaf in autumn after flowering, and differs in the smaller size, ovate shape, and purple under surface of the leaf.

**tipularian** (tip'ū-lā'ri-an), *a.* and *n.* [*< Tipula* + *-arian*.] 1. *a.* Pertaining or related to the genus *Tipula*; belonging to the *Tipulidæ*, as a crane-fly; tipulary.

**Tipulidæ** (ti-pū'li-dē), *n. pl.* [NL. (Leach, 1819), *< Tipula* + *-idæ*.] A large and widespread family of nematocerous dipterous insects, the crane-flies of the United States and the daddy-long-legs of England, including the largest of the *Nematocera*. The legs are extremely long and slender, the thorax bears a V-shaped suture, the wings have numerous veins and a perfect discal cell, and the ovipositor is composed of two pairs of long horny pointed valves, for laying eggs in the ground or other firm substances. The larvæ are footless, gray in color, pointed at one end, and move by means of transverse swellings below the body. They live usually in the earth or in decomposing wood, seldom in the water, and rarely on the leaves of trees. When feeding underground on the roots of plants, they occasionally do great damage to cultivated crops. The species of the anomalous genus *Chionea* are wingless and are found on snow. (See *snow-fly*.) The family is divided into nine or more sections. About 300 species, of 52 genera, have been described from North America.

**tip-up** (tip'up), *n.* 1. In *fishing*, same as *tilt*<sup>1</sup>, 6.—2. In *ornith.*, same as *fiddler*, 4. See *teeter-tail*, and cut under *Tringoides*.

**Tironian** (tî-rö'ni-an), *a.* [*< L. Tironianus, of or pertaining to Tiro, < Tiro(n-), Tiro (see def.).*] Of or pertaining to Tiro, the learned freedman, pupil, and amanuensis of Cicero. — **Tironian notes**, the stenographic signs or system of signs used by the ancient Romans. This system, though older than Tiro, and probably Greek in origin, was named after him, apparently as the first extensive practitioner of the art of stenography in Rome. In it parts of the ordinary letters, or modifications of these parts, represent the letters. Several of these modifications answered to one consonant, each of them representing the consonant with a different vowel. In addition to this, words were much abbreviated, and in course of time the total outline of a syllable or word so written often became more or less conventionalized. The number of such signs amounted to five thousand or upward. Although involving long training and a considerable strain on the memory, this system seems to have practically answered all the purposes of modern stenography. It was still in familiar use as late as the ninth century. From these Tironian notes (*notæ Tironianæ*) the shorthand-writers were called *notarii* (*notarii*).

**tironism**, *n.* See *tyronism*.

**tirr** (tîr), *v. t.* [A dial. var. of *tire<sup>1</sup>*, *< ME. tîren, etc.: see tire<sup>2</sup>, tear<sup>1</sup>.*] To tear; uncover; unroof; strip; pare off with a spade, as sward, or soil from the top of a quarry. [Scotch.]

**tisic, tisical, etc.** Obsolete spellings of *phthisic*, etc.

**Tisiphone** (ti-sif'ō-nē), *n.* [L., *< Gr. Τιςφόνη*, Tisiphone, lit. 'avenger of murder,' *< tînev*, repay, requite, + *phōvos*, murder.] 1. In classical myth., one of the Furies, the others being Alecto and Megera. — 2. [NL.] In *zool.*, a generic name of certain insects and reptiles. *Hübner; Fitzinger*.

**Tissa** (tis'ä), *n.* [NL. (Adanson, 1763).] A genus of plants, the sand-spurreys, belonging to the order *Caryophyllaceæ*, and also known as *Buda* (Adanson, 1763), *Spergularia* (Persoon, 1805), and *Lepigonum* (Fries, 1817). The names *Tissa* and *Buda* were both first assigned to the genus in the same book and on the same page; and, as priority is considered to attach to *Tissa*, the name first printed on the page, all the others become synonyms. See *Spergularia*.

**tissickt**, *n.* An obsolete spelling of *phthisic*.

**tisso** (tis'ō), *n.* Same as *tesco*.

**tissue** (tish'ō), *n.* and *a.* [*< ME. tissue, tishew, tisew, tyssew, tyssu, < OF. tissu, a ribbon, fillet, head-band, or belt of woven stuff, < tissu, m., tissue, f., woven, plaited, interlaced, pp. of \*tistre = Pr. teisser = Sp. tejer = Pg. tecer = It. tessere, < L. texere, weave: see text.*] **I.** *n.* 1. A woven or textile fabric; specifically, in former times, a fine stuff, richly colored or ornamented, and often shot with gold or silver threads, a variety of cloth of gold; now, any light gauzy texture, such as is used for veils, or, more indefinitely, any woven fabric of fine quality: a generic word, the specific sense of which in any use is determinable only by its connection or qualification.

The first thousand, that is of Dukes, of Eries, of Marquises and of Amyralls, alle clothed in Clothes of Gold, with *Tysseux* of grene Silk. *Mandeville, Travels, p. 233.*

The upper garment of the stately Queen  
Is rich gold *Tissu*, on a ground of green.

*Sylvester, tr. of Du Bartas's Weeks, II. The Decay.*

His skill in the judgment of rich *tissues* . . . is exceeding.

*J. F. Cooper, Water-Witch, xviii.*

Kronos (Sturn), who then became the supreme god. The Titans in their wars are said to have piled mountains upon mountains to scale heaven, and they are taken as types of lawlessness, gigantic size, and enormous strength.

Hilb, v.  $M = 7.2 \times 10^4$  ton/ft.

'Tis an old tale; Jove strikes the *Titans* down,  
Not when they act about their mountain piling,  
But when another rock would crown the work.

*Browning, Paracelsus, iv.*

- Any one of the immediate descendants of the Titans, as Prometheus and Epimetheus.—
- The sun personified, Titan being at times substituted by the Latin poets for Helios as god of the sun.

And *Titan*, tired in the mid-day heat,  
With burning eye did hotly overlook them.

*Shak., Venus and Adonis, l. 177.*

- The sixth in order of the eight satellites of the planet Saturn, and the largest, appearing as a star of the ninth magnitude. See *Saturn*.—
- A genus of beetles. *Matthews.*

**titan<sup>2</sup>** (tī'tan), *n.* [= *F. titane* = *Sp. Pg. It. titano*, < *NL. titanium*: see *titanium*.] 1. A calcareous earth; titanite.—2. Titanium.

**titanate** (tī'tan-āt), *n.* [*titanic* + *-ate*.] A salt of titanate acid.

**Titanesque** (tī-tā-nesk'), *a.* [*Titan*<sup>1</sup> + *-esque*.] Characteristic or suggestive of the Titans, or of the legends concerning them; of Titanic character or quality.

His extraordinary metaphors, and flashes of *Titanesque* humour.  
*Froude, Carlyle (First Forty Years), xx.*

**Titaness** (tī'tan-es), *n.* [*Titan*<sup>1</sup> + *-ess*.] A female Titan; a woman of surpassing size or power.

So likewise did this *Titaness* aspire

Rule and dominion to herself to gain.

*Spenser, F. Q., VII. vi. 4.*

**Titania** (tī-tā'nī-ä), *n.* [*L. Titania*, poetically applied to Diana (as well as to Latona, Pyrrha, and Circe), fem. of *Titanus*, of the Titans, < *Titan*, Titan: see *Titan*.] 1. The queen of Fairyland, and consort of Oberon.

Oberon. Now, my *Titania*; wake you, my sweet queen.  
*Titania*. My Oberon! what visions have I seen!

*Shak., M. N. D., iv. 1. 80.*

- A genus of lepidopterous insects. *Hübner, 1816.*

**titanian<sup>1</sup>** (tī-tā'nī-an), *a.* [*L. Titanus*, of the Titans, < *Titan*, Titan: see *Titan*.] Same as *titanic<sup>1</sup>*. *Johnson, in Boswell, l. 174.*

**titanian<sup>2</sup>** (tī-tā'nī-an), *a.* [*titanium* + *-an*.] Same as *titanic<sup>2</sup>*.

**titanic<sup>1</sup>** (tī-tan'ik), *a.* [= *F. titanique* = *Sp. Titánico* = *Pg. It. Titánico*, < *L.* as if *\*Titanicus* (for which *Titanicus*), < *Gr. Τίτανικός*, of or pertaining to a Titan or the Titans, < *Τίταν*, Titan: see *Titan*.] Of, pertaining to, or characteristic of the Titans; hence, enormous in size, strength, or degree; gigantic; superhuman; huge; vast.

**titanic<sup>2</sup>** (tī-tan'ik), *a.* [*titanium* + *-ic*.] Of or pertaining to titanium.—**Titanic acid**, *TiO<sub>2</sub>*, titanium dioxide. When prepared artificially it is a white tasteless powder which assumes a yellow color when gently heated. It is fusible in the oxyhydrogen flame. It is insoluble in water, in hydrochloric acid, and in dilute sulphuric acid. It occurs in nature in three forms, as rutile, octahedrite or anatase, and brookite. Also called *titanic acid* or *anhydride*.—**Titanic iron ore**. Same as *ilmenite*.—**Titanic schorl**, a name of rutile.

**titanical** (tī-tan'ī-kal), *a.* [*titanic<sup>1</sup>* + *-al*.] Same as *titanic<sup>1</sup>*. **Titanical stars**, the planets.

**titaniferous** (tī-tā-nif'e-rus), *a.* [*NL. titanium* + *L. ferre*, = *E. bear*<sup>1</sup>, + *-ous*.] Containing titanium: as, *titaniferous iron*.—**Titaniferous cerite**. Same as *tschekkinite*.—**Titaniferous iron ore**, *titaniferous oxide of iron*, *ilmenite*.

**titanite** (tī'tan-īt), *n.* [*titanium* + *-ite*.] An ore of titanium. See *sphene*.

**titanitic** (tī-tā-nit'ik), *a.* [*titanite* + *-ic*.] Same as *titanic<sup>2</sup>*.

**titanium** (tī-tā'ni-um), *n.* [*NL.*, so called in fanciful allusion to the Titans; < *L. Titan*, < *Gr. Τίταν*, Titan: see *Titan*.] Chemical symbol, *Ti*; atomic weight, 48.1. A metal which is not found native, but as artificially prepared is a dark-gray powder having a decided metallic luster, and resembling iron in appearance. It occurs, in the form of the dioxide, in three different crystalline forms—rutile, brookite, and anatase—and is also found quite frequently in combination with the protoxide of iron, mixed with more or less of the peroxide of the same metal. (See *ilmenite*.) Titanium appears to be a pretty widely distributed element, having been found in many minerals and rocks, as well as in clays and soils resulting from their decomposition, but it nowhere occurs in considerable quantity in any one locality; it has also been detected in meteorites and in the sun. Titanium is very remarkable in its power of combining with nitrogen at a high temperature. Certain copper-colored cubical crystals which are not infrequently found in the "bear" of blast-furnaces, and were supposed by Wollaston to be pure titanium, were shown by Wohler to consist of a cyanonitride of that metal. As titanium enters into the composition of so many iron ores, it is natural that it should have been found in many kinds of pig-iron. Its presence in small quantity does not appear to have an injurious effect. A considerable number of patents have

been taken out for supposed improvements in the manufacture of iron and steel in which titanium has played an important part. So-called "titanic steel" was at one time extensively advertised as being of unrivalled excellence; but several chemists of high reputation have declared themselves unable to detect any titanium in it. The chemical relations of titanium are peculiar: in some respects it stands midway between tin and silicon; in other ways it is allied to iron, chromium, and aluminium.

**titanium-green** (tī-tā'ni-um-grēn), *n.* Titanium ferrocyanide, precipitated by potassium ferrocyanide from a solution of titanate chlorid, recommended as an innocuous substitute for Schweinfurt green and other arsenical green pigments. The color, however, is far inferior to that of Schweinfurt green.

**Titanomachy** (tī-tā-nom'a-ki), *n.* [*Gr. Τίτανομαχία*, < *Τίταν*, Titan, + *μαχία*, battle.] The battle or war of the Titans with the gods. *Gladstone, Contemporary Rev., LI. 760.*

**Titanomys** (tī-tan'ō-mis), *n.* [*NL.* (Von Meyer, 1843), < *Gr. Τίταν*, Titan, + *μῦς*, mouse.] A genus of fossil duplicitous rodents, of the family *Lagomidae*, related to the living pikas, but characterized by the single upper and lower premolar, instead of two such teeth.

**Titanotheriidae** (tī-tā'nō-thē-ri'ī-dē), *n. pl.* [*NL.*, < *Titanotherium* + *-idae*.] A family of extinct perissodactyls, based on the genus *Titanotherium*.

**titanotherioid** (tī-tā'nō-thē-ri-oid), *n. and a.* [*titanotherium* + *-oid*.] 1. *n.* A *titanotherium*; or a related mammal. *Nature, XLI. 347.*

II. *a.* Resembling or related to the genus *Titanotherium*.

**Titanotherium** (tī-tā'nō-thē-ri-um), *n.* [*NL.* (Leidy, 1853), < *Gr. Τίταν*, Titan, + *θηρίον*, a wild beast.] 1. A genus of gigantic perissodactyl mammals from the Miocene of North America.—2. [*l. c.*] A member of this genus.

**titan-schorl** (tī-tan-shōrl), *n.* Native oxid of titanium.

**tit-babbler** (tit'bab'lēr), *n.* A hill-tit, *Trichostoma rostratum*, inhabiting the Malay peninsula, Sumatra, and Borneo. It was originally described by Blyth in 1842 as *Trichostoma rostratum*, and

Tit babbler (*Trichostoma rostratum*).

has since been placed in six other genera, with various specific names. It is 5 inches long, with red eyes, bluish feet, and varied brownish coloration. The name extends to other hill-tits which have improperly been placed in *Trichostoma*, the one here named being the only member of this genus in a proper sense.

**titbit** (tit'bit), *n.* [Also *tidbit*; < *tit*, a bit, morsel, + *bit*.] A delicate bit; a sweet morsel.—*Syn.* *Delicacy, Dainty, Tidbit*. See *delicacy*.

**tite<sup>1</sup>** (tit), *adv.* [Also spelled *tight*, and confused with *tight<sup>1</sup>*; also *tith*; < *ME. tite, tyte, tit, tyt*, erroneously *tigt*, also *tid*, < *Ice. tit*, quickly, neut. of *tíðr*, frequent, usual, eager (superl. in the phrase *sem tíðrast*, quickly, immediately). Cf. *tutely*.] Quickly; soon; fast; as, run as *tite* as you can. [Obsolete or prov. Eng. and U. S.]

**tithable** (tī'thā-bl), *a. and n.* [Also *titheable*; < *tithe* + *-able*.] I. *a.* 1. Subject to the payment of tithes, as property; capable of being tithed.

It is not to be expected from the nature of these general commentaries that I should particularly specify what things are *tithable* and what not, the time when, or the manner and proportion in which, tithes are usually due.

*Blackstone, Com., II. iii.*

- Assessable for tithes, or for the payment of any tax to a parish, as a person.

They [Virginians] call all negroes above sixteen years of age *tithable*, be they male or female, and all white men of the same age.

*Beverly, Virginia, iv. ¶ 18.*

II. *a.* A person by or for whom tithes or parish taxes were payable.

Their parishes are accounted large or small, in proportion to the number of *tithables* contained in them, and not according to the extent of land. *Beverly, Virginia, iv. ¶ 33.*

**tithe<sup>1</sup>** (tīth), *a. and n.* [Formerly also *tythe*; < *ME. tith, tythe, tethe*, < *AS. teótha* for *\*teónthā*, < *teón, tién, tylene*, ten: see *ten*, *tenth*.] I. *a.* Tenth.

Every *tithe* soul, 'mongst many thousand.

*Shak., T. and C., ii. 2. 19.*

II. *n.* 1. A tenth; the tenth part of anything; hence, any indefinitely small part.

I have searched . . . man by man, boy by boy; . . . the *tithe* of a hair was never lost in my house before.

*Shak., 1 Hen. IV., iii. 3. 66.*

2. A contribution or tax for some public use, either voluntary or enforced, of one tenth of the quantity or of the value of the subject from or on account of which it is paid; hence, any ratable tax payable in kind or by commutation of its value in money. The levying of tithes in kind on natural productions or the proceeds of industry was generally practised in ancient times, for both civil and ecclesiastical uses; and this is still the prevalent method of taxation for all purposes in Mohammedan countries. It was established and definitely regulated for the support of religion among the Hebrews; and it was revived for the support of the Christian church by a law of Charlemagne about the beginning of the ninth century, after some previous fluctuating use of it. Ecclesiastical tithes were always more or less oppressive and unequal in their incidence, and they have been generally abolished except in Great Britain, where they are still maintained, mainly in the shape of commuted rent-charges upon land. As there recognized, *tithe* is defined as the tenth part of the increase annually arising from the profits of land and stock and the personal industry of the clergy or priesthood, for their support, and other church purposes. Under the ancient Jewish law, tithes of all produce, including flocks and cattle, were to be given to the Levite, and of this tithe or tenth a tenth was to be given to the priests. In modern ecclesiastical usage, tithes are divided into personal, predial, and mixed: *personal*, when accruing from labor, art, trade, and manufacture; *predial*, when issuing directly from the earth, as hay, wood, grain, and fruit; and *mixed*, when accruing from beasts which are fed from the ground. Another division of tithes is into great and small. *Great tithes* consist of all species of corn and grain, hay and wood; *small tithes*, of predial tithes of other kinds, together with mixed and personal tithes. In England great tithes belong to the rector, and are hence called *parsonage* or *rectorial tithes*; and the others are due to the vicar, and are hence called *vicarage tithes*. (See *altarge*, 2.) In England tithes are now often appropriated to laymen, ecclesiastical corporations, etc. Several acts of Parliament have been passed for the commutation of tithes in England and Ireland, the usual form being the conversion of tithes into a rent-charge called the *tithe rent-charge*, payable in money, and chargeable on the land. In regard to tithes in Scotland, see *tend*.

3. A tax assessed by the vestry of a parish.—**Commution of tithes**, in England and Ireland, the conversion of tithes into a rent-charge payable in money, and chargeable on the land. See *Commution of Tithes Act*, under *commutation*.—**Composition of tithes**. Same as *real composition* (b) (which see, under *real*).—**Saladin tithe**, a general tax on movable property and revenues from land levied in France and England in 1188 for the support of the third crusade, organized for the recovery of the Holy Land from the sultan Saladin. See *Ordinance of the Saladin Tithe*, under *ordinance*.—**Titulars of the tithes**. See *titular*.

**tithe<sup>1</sup>** (tīth), *v.*; pret. and pp. *tithed*, ppr. *tithing*. [Formerly also *tythe*; < *ME. tithen, tythen, teihen*, < *AS. teóthian*, *tithe*, < *teótha*, *tithe*, *tenth*: see *tite<sup>1</sup>*, *a.*] I. *trans.* 1. To subject to tithes or the payment of a tithe; impose a tithe or tenth of or upon.

When thou hast made an end of *tithing* all the tithes of thine increase.

*Deut. xxvi. 12.*

- To pay tithes on; give or yield up a tithe of.

Military spoil, and the prey gotten in war, is also *tythable*, for Abraham *tythed* it to Melchizedek.

(commonly called *degrees*), as doctor of divinity (D. D.), of laws (LL. D.), of philosophy (Ph. D.), or of medicine (M. D.).

master of arts (M. A. or A. M.), etc.: (6) *titles of direct address*, prefixed to names in either speech or writing, as Lord, Lady, Sir, Mister (Mr.), Mistress (Mrs.), Miss, Monsieur (M. or Mons.), Madame (Mme.), Doctor (Dr.), Professor (Prof.), Judge, General, etc. Titles of office are subdivided into *royal or imperial titles* (including those distinctively pertaining to members of sovereign families), *ecclesiastical*, *military*, *natal*, etc. *Titles of honor* are such titles belonging to any of the above classes as denote superior rank or station, or special distinction of any kind. 9. Titular or aristocratic rank; titled nobility or dignity. [Rare.]

Tom never fails of paying his obeisance to every man he sees who has *title* or office to make him conspicuous; . . . *Title* is all he knows of honour, and civility of friendship. Steele, Tatler, No. 204.

10. A grade or degree of fineness; especially, the number of carats by which the fineness of gold is expressed.

Caret . . . is only an imaginary weight; the whole mass is divided into twenty-four equal parts, and as many as there are of these that are of pure gold constitute the *title* of the alloy. F. Voss, Babelots and Curios, p. 58.

Jewellers solder with gold of a lower *title* than the article to be soldered. Workshop Receipts, 1st ser., p. 364.

11. A claim; a right; a designated ground of claim; a conferred or acquired warrant; an attributed privilege or franchise.

Therfor a *title* he gan him for to borwe  
Of other sicknesses, lest men of him wende  
That the hote fire of love him brende.

Chaucer, Troilus, l. 488.

Make claim and *title* to the crown of France.

Shak., Hen. V., i. 2. 68.

12. An inherent or established right; a fixed franchise; a just or recognized claim.

Even such an one [an ill prince] hath a *title* to our prayers and thanksgivings. Bp. Atterbury, Sermons, I. viii.

I have the same *title* to write on prudence that I have to write on poetry or holiness.

Emerson, Essays, 1st ser., p. 201.

13. In law: (a) Ownership; as, the *title* was not in the husband, but in his wife; her *title* was subject to encumbrance. (b) The channel through which an owner has acquired his right; the collection of facts from which, by the operation of law, his right arises: as, an abstract of *title* sets forth the chain of instruments, etc., by which the owner became owner. (c) Absolute ownership; the unencumbered fee. In a contract to convey title or to warrant the title, the word is usually understood in this sense, in which it includes the right of property, the right of possession, and actual possession. (d) The instrument which is evidence of a right; a title-deed. *Title* is more appropriately used of real property; ownership of personal, but also to some extent of real property. Among the older commentators on Roman law it was usual to call *title* (*titulus*) the contract or other legal act which was the remote cause of a person's acquiring property (for example, a contract of sale), while the immediate cause (for example, delivery) was called *modus*. In order to have ownership there had to be a perfect *titulus* and *modus*. This doctrine is alien to the Roman jurists, and is now universally repudiated. 14. Hence, a source or evidence of any right or privilege; that which establishes a claim or an attribution: as, Gray's "Elegy" is his chief *title* to fame; his discharge is his *title* of exemption.—15. Eccles.: (a) Originally, a district in the city of Rome with taxable revenue; hence, a district in that city attached to a parish church; a Roman parish church, as distinguished from a basilica or an oratory. The clergy belonging to these churches received the epithet "cardinal," whence the *title cardinal*.

In the Roman Church parish churches or *titules* seem to have been first instituted in the time of Pope Marcellus (304). Cath. Dict., p. 118. (b) A fixed sphere of work and source of income, required as a condition of ordination. Since the Council of Chalcedon, A. D. 451, it has always been the rule to refuse to admit to ordination any one not appointed to officiate in a particular church. Since the eleventh century a *title* in the present sense has been expressly required. The term has gradually changed its connotation from the idea of locality to that of assured support and of a warrant for orders. The Roman Catholic Church requires as *title* for orders nomination to a benefice sufficient for maintenance, sufficient private income, a guarantee of support from some person or persons, or monastic poverty as entitling to maintenance by the order. In the Church of England a cure of souls, chaplaincy, fellowship, or the like is required, or residence as master of arts with sufficient private means. In the American Episcopal Church engagement with some church, parish, or congregation, with some diocesan or recognized general missionary society, as instructor in some incorporated institution, or as chaplain in the national army or navy is requisite for admission to priest's orders.

The candidates . . . must each have a *title* for orders—that is, a sphere of labour under some clergyman, with a proper stipend for his support—before he can be ordained. A. Fonblanque, Jr., How we are Governed, p. 86.

16. Same as *title*<sup>2</sup>. Wyclif, Mat. v.—Abstract of *title*. See abstract.—Bastard *title*. See bastard.—Bonitarian *title*. See bonitarian.—Cloud on a *title*, in law, something that renders a holder's title to land or other property doubtful, as the existence of an adverse in-

strument or claim the validity or justice of which is not yet known or adjudicated; an instrument which apparently and on its face is valid, and impairs a person's title to land, but which can be shown to be invalid by proof of extrinsic facts, although its invalidity has not yet been judicially declared, as a fraudulent mortgage or assessment on the land, or a judgment affecting its ownership, founded on a false affidavit of notice to the defendants.—Color of *title*. See color.—Courtesy *title*. See courtesy, and def. 8.—Declaration of Title Act. See declaration.—EQUITABLE *title*. See equitable estate, under estate.—Extension of *title*. See extension.—Good holding *title*. See marketable title.—Half *title*. See half title.—Lucrative *title*, in Spanish Mexican law, title created by donation, devise, or descent. Platt.—Marketable, onerous, passive *title*. See the adjectives.—Pierced for *title*, specially prepared for the title, as leather for a book-cover is which has had an addition between the bands of one or more squares of colored leather, on which the title is put. This is done only on calf, vellum, or sheep.—Progress of *title*. See progress.—Running *title*. See running.—Side *title*, a title placed on the upper cover of a bound book, as when the back is too narrow to admit a line of letters, or when the book so treated is usually to be exposed on a table.—Title by forfeiture, by prescription, by succession. See forfeiture, etc.—Title of entry. See entry, 10 (a).—Title rôle. See rôle.—Unity of *title*, the title of two or more joint tenants, or tenants in common, or persons alleged so to be, derived or deduced immediately from one and the same source by one and the same act or fact.—Syn. 7. Designation, etc. See name.

**title** (ti'tl), *v. t.*; pret. and pp. *titled*, ppr. *titling*. [= OF. *tituler* = Sp. Pg. *titular* = It. *titolare*, < LL. *titulare*, give a title or name to, < L. *titulus*, a title: see *title*, *n.* Cf. *entitle*, *entitule*, *intitule*.] 1. To call by a title, or by the title of; entitle; name. I understand, by rumours, you've a daughter,  
Which my bold love shall henceforth title cousin.  
Middletown, Chaste Maid, iv. 1.

2. To give a right to be entitled; bestow or confer the title or designation of. To these that sober race of men, whose lives  
Religious *titled* them the sons of God,  
Shall yield up all their virtue, all their fame.  
Milton, P. L., xl. 622.

**titled** (ti'tld), *a.* [*< title + -ed*.] Having or bearing a title, especially one which is constantly used, either with the name or instead of it; specifically, bearing a title of nobility; noble.

**title-deed** (ti'tl-dēd), *n.* 1. A deed by virtue of which, or one of several deeds or of a chain of conveyances by virtue of which, a person claims title. The term is commonly used in the plural of the several earlier muniments of title usually delivered over by a grantor on parting with his property to the grantee. 2. That which confers a right or title of any kind; especially, a distinguishing deed or achievement; a ground of consideration, eminence, or fame.

**title-leaf** (ti'tl-lēf), *n.* The leaf of a book on which the title is printed; a title-page. There was another book at the end of these, in whose *title-leaf* the first of the contents was.  
Court and Times of Charles I., I. 115.

**titleless** (ti'tl-les), *a.* [*< ME. *titelles*; < title + -less*.] 1. Having no title or name. He was a kind of nothing, *titleless*,  
Till he had forged himself a name.  
Shak., Cor., v. 1. 13.

2. Devoid of rightful claim or title; unentitled; lawless. Right so bitwixe a *titelles* tiraunt  
And an outlawe, or a theef erraunt,  
The same I seye, ther is no difference.  
Chaucer, Manciple's Tale, l. 119.

**title-letter** (ti'tl-lēt'ēr), *n.* The types, collectively, selected for titles. Also *title-type*.

**title-page** (ti'tl-pāj), *n.* The preliminary page of a book, or of a written or printed work of any kind, which contains its full title and particulars as to its authorship, publication, etc.

The Younger Brother, or the Fortunate Cheat, had been much a more proper Name. Now when a Poet can't rig out a *Title Page*, 'tis but a bad sign of his holding out to the Epilogue. Jeremy Collier, Short View (ed. 1698), p. 210.

**titler** (ti'tlēr), *n.* [Origin obscure.] A large truncated cone of refined sugar. Simmonds.

**title-sheet** (ti'tl-shēt), *n.* In printing, the first sheet of a book, which usually contains the title, bastard title, and other preliminary matter.

**title-type** (ti'tl-tīp), *n.* Same as *title-letter*.

**titlin**, *n.* Same as *titling*. Florio.

**titling**<sup>1</sup> (ti'tling), *n.* [Formerly or dial. also *titlin*; < Icel. *titlingr*; as *tit*<sup>2</sup> + *-ling*<sup>1</sup>.] 1. Some small bird. Specifically—(a) A titlark or pipit. (b) A tit or titmouse. (c) In Scotland, the hedge-sparrow. 2. A name formerly given in the custom-house to stock-fish. Simmonds.—Cuckoo's *titling*. Same as *cuckoo's sandy* (which see, under *sandy*). (Prov. Eng.) Field-, meadow-, or moor-*titling*, *Anthus pratensis*. (See also *sea-titling*.)

**titling**<sup>2</sup> (ti'tling), *n.* [Verbal *n.* of *title*, *v.*] In bookbinding, impressing, usually in gold-leaf, on

the back of a book the words selected for the title.

**titmal** (tit'mal), *n.* Same as *timal*.  
**titmouse** (tit'mous), *n.*; pl. usually *titmice* (-mis), properly *titmouses* (-mou-sez). [Early mod. E. also *titmose*, also rarely *tittimouse*; < ME. *titmose*, *titemose*, *tytemose*, *titmase*, and later *tittimouse*; < *tit*<sup>2</sup> + ME. *mose*, < AS. *māse*, a name for several kinds of birds: see *coal-mouse*.] A tit; a tomtit; any bird of the family *Paridae*, and especially of the subfamily *Parinæ*. (See the technical names, and cuts under *chickadee* and

Long-tailed Titmouse (*Aceredula caudata*).

*Parus*.) Those of the genus *Parus* which occur in Great Britain, and hence have popular English names, are the greater titmouse, *P. major*; the coal-tit, *P. ater* (of which the British variety is sometimes called *P. britannicus*); the marsh-tit, *P. palustris*; the blue tit, *P. cæruleus*; and the crested tit, *P. (Lophophanes) cristatus*. The long-tailed titmouse is *Aceredula caudata* or *rosea*. The bearded titmouse is *Panurus* (or *Calamophilus) biarmicus* (sometimes put in another family, *Panuridae*). In the United States are a number of titmice, commonly called *chickadees*, with smooth heads and black caps and throats, as *Parus atricapillus*, etc. There are also several crested ones, forming the genus or subgenus *Lophophanes*, as the peto, or tufted titmouse, *L. bicolor*, the black-crested, *L. atrocristatus*, and others. Titmice which build long pendile nests are called in England *bottle-tits*, and by many provincial names, including *poke-pudding*. Those of the United States which have this habit are the bush-tits of the genus *Psittiparus*. (See cut under *bush-tit*.) Others, of Europe and Africa, form the genus *Agithalus*, as *A. pendulinus*, the penduline titmouse. The gold tit, or yellow-headed titmouse, of the southwestern United States, *Auriparus flaviceps*, also builds a very bulky and elaborate nest of twigs stuffed with feathers. Some of the British

**toad-eater** (tōd'ē'tēr), *n.* [*< toad + eater.* As with *leaf-eater*, the simple etymology fails to satisfy some writers, and fictions like that quoted from Brewer are invented to explain the word.] 1. A mountebank's boy who ate, or pretended to eat, toads (supposed to be poisonous), in order to give his master an opportunity to show his skill in expelling poison.

Be the most scorn'd Jack-pudding of the pack,  
And turn toad-eater to some foreign quack.  
*Tom Brown, Satire on an Ignorant Quack (Works, I. 71).*  
[*N. and Q.*, 3d ser., I. 129.]

2. A fawning, obsequious parasite; a mean sycophant; a toady.

*Toad-eater.* . . . It is a metaphor taken from a mountebank's boy's eating toads, in order to show his master's skill in expelling poison; it is built on a supposition . . . that people who are so unhappy as to be in a state of dependence are forced to do the most nauseous things that can be thought on, to please and humour their patrons.  
*Sarah Fielding, Adventures of David Simple (1744).*

I am retired hither like an old summer dwager; only that I have no toad-eater to take the air with me in the back part of my lozenge-coach, and to be scolded.  
*Walpole, Letters, II. 52.*

At the final overthrow of the Moors, the Castilians made them their servants, and their active habits and officious manners greatly pleased the proud and lazy Spaniards, who called them *mi todita* (my factotum). Hence a cringing, officious dependent, who will do all sorts of dirty work for you, is called a *todita* or toad-eater.  
*Brewer, Phrase and Fable.*

**toad-eating** (tōd'ē'ting), *n.* Servile or sycophantic complaisance; sycophancy.

Without the officiousness, the inquisitiveness, the effrontery, the toad-eating, the insensibility to all reproach, he [Boswell] never could have produced so excellent a book.  
*Macaulay, Boswell's Johnson.*

**toad-eating** (tōd'ē'ting), *a.* Pertaining to or characteristic of a toad-eater or sycophant; sycophantic.

**toad-fish** (tōd'fīsh), *n.* 1. A fish of the genus *Batrachus*, especially *B. tæx*; the oyster-fish or sapo, of the Atlantic coast of the United States from Massachusetts to the West Indies. It is a very ugly fish, of ungainly form, with a thick, heavy head and large mouth, naked skin, no lateral line, three dorsal

spines, and when young a series of tufts or cirri on the back and sides; the lips have fleshy appendages; the color is dusky-olive with irregular black markings both on the body and on the fins.

2. A lophioid fish, *Lophius piscatorius*, so called from its uncouth aspect; the fishing-frog, sea-devil, wide-gab, or angler. See cut under *angler*.—3. A swell-fish, as *Tetrodon turgidus*, the common puffer of the Atlantic coast of the United States, 12 inches long. Also called *swell-toad*.—4. The frog-fish or mouse-fish, *Antennarius* (or *Pterophryne*) *histrio*. *D. S. Jordan.*

**toad-flax** (tōd'flaks), *n.* A plant of the genus *Linaria*, primarily *L. vulgaris*, the common toad-flax, a showy but pernicious plant, otherwise known as *ranstead* and *butter-and-eggs*. Other noteworthy species are the ivy-leaved toad-flax or Kenilworth ivy, *L. Cymbalaria*, (see *ivy*), and the three-birds toad-flax, *L. triornithophora*, a European plant cultivated for its large purple long-spurred flowers borne in whorls of three, and suggesting little birds. Several others are desirable in gardens, as the dwarf *L. alpina*, alpine toad-flax, and the tall *L. Dalmatica*, with showy sulphur-yellow flowers; the plant, however, is difficult to eradicate. See *cane-creeper*.

**Bastard toad-flax.** (a) In America, a plant of the genus *Conandra*, of the *Santalaceæ*, which consists of 4 species, 3 North American and 1 European, of low herbs or undershrubs, sometimes parasitic on roots. The common American plant is *C. umbellata*, with leaves like those of toad-flax and white flowers in umbel-like clusters. (b) In England, *Thesium Linophyllum*, which has leaves like those of toad-flax.—*Ivy-leaved toad-flax.* See *Def.*

**toad-spotted** (tōd'spot'ed), *a.* Thickly stained or spotted, like a toad; hence, covered thickly with blemishes or stains of guilt.

A most toad-spotted traitor.  
*Shak., Lear, v. 3. 138.*

**toadstone**<sup>1</sup> (tōd'stōn), *n.* [*< toad + stone*]. Any one of various natural or artificial objects resembling a toad in form or color, or which were believed to have been formed within the body of that animal, and which for many centuries, and over a large part of Europe, were held in high regard, and preserved with the greatest care. The earliest reference to objects of this kind is that of Pliny, who, under the name of "batrachites," described various stones which were said by him to resemble the frog in color, although he does not speak of their being possessed of any special virtues. This is the only reference to the toadstone to be found in classic authors; but much later on the names "crapodinus" and "bufonites" are found in various learned works written in Latin; while the word "crapaudine" appears in French as early as the fourteenth century, and "krotenstein," "cradenstein," and "krötenstein" not much later in German. Albertus Magnus and others also gave the name of "borax" to a stone supposed by them to be found in the head of the toad. This latter was the most common form of belief in regard to the origin of the toadstone, and it was very generally thought that it was endowed with special virtues if the animal could be made to surrender it voluntarily. Toadstones were preserved at the shrines of saints, worn as amulets, or set in rings, or in other ways treasured by their owners as charms, or antidotes to poison, or as having special therapeutic qualities, or simply as natural curiosities. Some of these objects were bits of rock, or of jasper, or of other semi-precious or perhaps really precious stones, toad-like in color or shape; others were fossils of various kinds, such as brachiopods, fragments of crinoids, teeth of fossil fish, etc.; in regard to many of them, however, no reasonable guess can be made as to their real nature. Shakspeare refers to the toadstone in the lines:

Sweet are the uses of adversity,  
Which, like the toad, ugly and venomous,  
Wears yet a precious jewel in his head.  
(As you Like it, ii. 1. 12-14.)

If he would send his eyes, I would undertake  
To carry 'em to the jeweller; they would off  
For pretty toadstones. *Shirley, The Brothers, ii. 1.*

**toadstone**<sup>2</sup> (tōd'stōn), *n.* [An accom. form, simulating *toadstone*<sup>1</sup>, of *G. todtes gestein*, lit. 'dead (i. e. unproductive) rock.' In *geol.*, a volcanic rock varying in texture from a soft crumbly ash to a hard close-grained greenstone, several beds of which occur in the magnesian limestone of the lead-mining district of Derbyshire. The toadstone has the position of an interbedded vein, is irregular in thickness, and traversed by numerous veins and faults. It much resembles the so-called whin-sill of Yorkshire, Durham, and Northumberland. Also called *toadrock*.

**toadstool** (tōd'stōl), *n.* [Early mod. E. also *toadestool*, *toadestool*; *< toad + stool*]. A common name for numerous umbrella-shaped fungi which grow abundantly on decaying vegetable matter. It is usually restricted to the genus *Agaricus*, but also is extended to various allied fungi, and still further, is sometimes applied to almost any fungus that is large enough to attract general attention, such as

*Hydnum*, *Lycoperdon*, *Morchella*, etc. Popularly, the name *toadstool* is applied only to those fungi supposed to be poisonous, as distinguished from *mushrooms*, or edible forms, while as a matter of fact all true toadstools, belonging to the genus *Agaricus* or closely allied genera, are really mushrooms, and may or may not be poisonous. It frequently happens that an edible species is associated with a highly poisonous species, or grows in similar places, and can be distinguished only by a competent authority or by a careful microscopical examination. Also called *toad's-cup*, *toad's-hat*, *toad's-meat*, *trampstool*.

**toady**<sup>1</sup> (tō'di), *a.* [*< toad + -y*]. Ugly and repulsive, like a toad; hateful; beastly. [Rare.]

Vice is of such a toady complexion that she naturally teaches the soul to hate her. *Feltham, Resolves, i. 13.*

**toady**<sup>2</sup> (tō'di), *n.*; pl. *toadies* (-diz). [Said to be shortened from *toad-eater*; but rather an adaptation of *toady*<sup>1</sup>, *a.*, to express the meaning of *toad-eater*. *Toad-eater* would hardly be "shortened" to *toady*.] 1. A sycophant; an interested flatterer; a toad-eater.

Young Bull licked him [young Lord Buckram] in a fight of fifty-five minutes. . . . Boys are not all toadies in the morning of life. *Thackeray, Book of Snobs, v.*

2. A coarse rustic woman. *Scott. (Imp. Dict.)*  
**toady**<sup>2</sup> (tō'di), *v.*; pret. and pp. *toadied*, ppr. *toadying*. [*< toady*<sup>2</sup>, *n.*] *I. trans.* To fawn upon in a servile manner; play the toady or sycophant to.

The tutors toadied him. The fellows in hall paid him great clumsy compliments. *Thackeray, Book of Snobs, v.*

*II. intrans.* To play the sycophant; fawn; cringe.

What magic wand was it whose touch made the toadying servility of the land start up the real demon that it was?  
*W. Phillips, Speeches, p. 135.*

**toadyish** (tō'di-ish), *a.* [*< toady*<sup>2</sup> + *-ish*]. Having the character of a toady; given to toadyism; toad-eating; boot-licking.

**toadyism** (tō'di-izm), *n.* [*< toady*<sup>2</sup> + *-ism*]. The practices of a toady; sycophancy; servile adulation. *Thackeray, Book of Snobs, iii.*

**to-and-fro** (tō'and-frō'), *a. and n.* [*< to and fro*; see under *fro*]. *I. a.* Forward and backward; alternate: as, *to-and-fro* motion.

*II. n.* 1. A movement or motion forward and backward in alternation.

When the mesmerizer Snow  
With his hand's first sweep  
Put the earth to sleep,  
'Twas a time when the heart could show  
All—how was earth to know,  
'Neath the mute hand's to-and-fro!  
*Browning, A Lover's Quarrel.*

Like some wild creature newly-caught, commenced  
A to-and-fro. *Tennyson, Princess, ii.*

2. The bandying of a question backward and forward; a discussion. *Bp. Bale, Vocacyon (Harl. Misc., VI. 459).*

**Toarcian** (tō-ār'si-an), *n.* [Named from *Thouars*, in western France.] In *geol.*, a division of the Lias which lies between the Liassic, or Middle Lias, and the Bajocian, or lowest division of the Jurassic, according to the nomenclature of the French geologists. It is especially well developed in central and southern France, and its subdivisions are characterized chiefly by the presence of certain species of ammonites.

**toast**<sup>1</sup> (tōst), *n.* [Early mod. E. *toste*; *< ME. toost*, *< OF. toste*, *< ML. tosta*, a toast of bread (cf. *OF. tostee* = *Sp. tostada*, a toast), *< L. tosta*, fem. of *tostus*, pp. of *torrere*, parch, toast: see *torrent*.] Bread in slices superficially browned by the fire; a slice of bread so browned.

Go fetch me a quart of sack; put a toast in 't.  
*Shak., M. W. of W., iii. 5. 3.*

**toast**<sup>1</sup> (tōst), *v.* [Early mod. E. also *toste*; *< ME. tosten*, *< OF. toster* = *Sp. tostar* = *Pg. tostar*, toast (*< tostado*, toasted); from the noun.] *I. trans.* 1. To brown by the heat of a fire: as, to toast bread or bacon.

'Tis time I were choked with a piece of toasted cheese.  
*Shak., M. W. of W., v. 5. 147.*

2. To warm thoroughly: as, to toast one's feet. [Colloq.]

Around these fires the more idle of the swarthy fellows squatted, and toasted their bare shins while they spun their wondrous tales. *The Century, XXXVI. 323.*

*II. intrans.* 1. To brown with heat.

There is a whiff of something floating about, suggestive of toasting shingles. *O. W. Holmes, Professor, vii.*

2. To warm one's self thoroughly at a fire.

As we tosted by the fire. *W. Browne, Shepherd's Pipe, i.*

**toast**<sup>2</sup> (tōst), *n.* [A particular use of *toast*<sup>1</sup>, *n.*, of anecdotal origin, according to the story given in the "Tatler" (No. 24, June 4, 1709). See the second quotation.] 1. A person whose health is drunk, or who is named as the person to whom others are requested to drink; especially, a woman who is the reigning belle of the season, or in

**toast-rack** (tōst'rak), *n.* A contrivance for holding dry toast, each slice being held on edge between slender rings or supports of wire, etc.  
**toast-water** (tōst'wā'tēr), *n.* Water in which toasted bread has been steeped, used as a beverage by invalids.

2. The leaves of the tobacco-plant prepared in various forms, to be smoked, chewed, or used as snuff (see *snuff*). Tobacco-leaves are sometimes gathered singly; more commonly the stalks are cut, and suspended on sticks under shelter for drying, which requires several weeks. The leaves are then stripped and sorted, tied in bundles called *hands*, and "bulked" in compact circular heaps to secure a slight fermentation, which develops the properties valued; they are then packed for the manufacturer, who makes them into cigars.

**tobacco-heart** (tō-bak'ō-härt), *n.* A functional disorder of the heart, characterized by a rapid and often irregular pulse, due to excessive use of tobacco.

**tobacco-knife** (tō-bak'ō-nif), *n.* A knife for cutting up plug tobacco. It is generally a guillotine-knife, pivoted at one end, and operated by a lever or handle.

**tobacco-man** (tō-bak'ō-man), *n.* A tobaccoconist. The tobacco-men . . . swore with earnest irreverence to vend nothing but the purest Spanish leaf.

*Doran, Annals of the Stage, I. i.*

**tobacconer** (tō-bak'ō-nēr), *n.* [*< tobacco + -n-er.* The *n* is inserted in this word and *tobacconist*, etc., after the analogy of words from the Latin (*Platonist*, etc.).] One who uses tobacco; a smoker of tobacco. *Sylvester, Tobacco Battered.*

**tobacconing** (tō-bak'ō-ning), *n.* [*< tobacco + -n-ing.* Cf. *It. tabaccare*, take tobacco (Florio, 1611).] The act or practice of taking tobacco. *Sylvester, Tobacco Battered.*

**tobacconing** (tō-bak'ō-ning), *a.* Using or smoking tobacco.

Musketeers, waiting for the major's return, drinking and tobaccoconing as freely as if it (the cathedral) had turned ale-house. *Bp. Hall, Hard Measure.*

**tobacconist** (tō-bak'ō-nist), *n.* [*< tobacco + -n-ist.*] 1. A dealer in tobacco; also, a manufacturer of tobacco.—2t. A smoker of tobacco.

The best Tobacconist  
That ever held a pipe within his fist.  
*Times' Whistle (E. E. T. S.), p. 72.*

What kind of Chimney is't  
Less Sensible than a Tobacconist?  
*Sylvester, Tobacco Battered.*

**tobacconize** (tō-bak'ō-niz), *v. t.*; pret. and pp. *tobacconized*, ppr. *tobacconizing*. [*< tobacco + -n-ize.*] To impregnate or saturate with tobacco, or with the oil or the fumes of tobacco. *The American, VIII. 73.*

**tobacco-pipe** (tō-bak'ō-pip), *n.* 1. A pipe in which tobacco is smoked.

Japanese Tobacco-pipe.

I'd have it present whipping, man or woman, that should but deal with a tobacco-pipe.

*B. Jonson, Every Man in his Humour, iii. 2.*

And in his griezly Gripe  
An over-grown, great, long Tobacco-Pipe.  
*Sylvester, Tobacco Battered.*

2. Same as *Indian-pipe*. *S. Judd, Margaret, i. 16.* [Local, New Eng.]—*Queen's tobacco-pipe*, a jocular designation of a peculiarly shaped kiln belonging to the customs, and situated near the London Docks, in which are piled up damaged tobacco and cigars, and goods (such as tobacco, cigars, and tea) which have been smuggled, till a sufficient quantity has accumulated, when the whole is burned.—*Tobacco-pipe clay*. Same as *pipe-clay*.—*Tobacco-pipe fish*, the pipe-fish.

**tobacco-plant** (tō-bak'ō-plant), *n.* See *tobacco*, 1.

**tobacco-pouch** (tō-bak'ō-pouch), *n.* A pouch or bag for a small quantity of tobacco for smoking or chewing, carried about the person.

**tobacco-press** (tō-bak'ō-pres), *n.* 1. A machine for packing granulated tobacco into bags or boxes for commercial purposes.—2. A press for condensing and compacting plug tobacco in tubs or boxes.—3. A machine for pressing booked and wrapped tobacco-leaves flat, so that they will lie compactly when packed. *E. H. Knight.*

**tobacco-root** (tō-bak'ō-rōt), *n.* See *Lewisia*.

**tobacco-stick** (tō-bak'ō-stik), *n.* In *tobacco-curing*, one of a series of sticks on which tobacco-leaves are hung to dry in curing-houses.

**tobacco-stopper** (tō-bak'ō-stop'er), *n.* A contrivance for pressing down the half-burned tobacco in the bowl of a pipe, to prevent the ashes from being scattered and to improve the draft of the pipe. Tobacco-stoppers are used chiefly by the smokers of pipes with large and deep bowls, such as are common in Germany.

**tobacco-stripper** (tō-bak'ō-strip'er), *n.* A person employed in the process of manufacturing tobacco to remove the midrib of the leaf by stripping or tearing.

**tobacco-tongs** (tō-bak'ō-tōngz), *n. sing.* and *pl.* Iron tongs of light and ornamental design, used by a smoker to take a coal from the hearth to light his pipe. It is a form of lazy-tongs.

**tobacco-wheel** (tō-bak'ō-hwēl), *n.* A machine, resembling the hay-band machine, for twisting dried tobacco-leaves into a rope for convenience of packing. *E. H. Knight.*

**tobacco-worm** (tō-bak'ō-wērm), *n.* The larva of the sphinx-moth *Protoparce carolina*, which feeds on the leaves of the growing tobacco-

ployed by the Indians of Lower Canada to carry loads over the snow, but now used chiefly in the sport of coasting. It is 15 or 16 inches wide, if made of one piece, or wider if two boards are joined together. The sport of tobogganing has been very popular in Canada, and has been introduced to some extent in the United States.

**toboggan** (tō-bog'an), *v. i.* [*< toboggan, n.*] To slide down-hill on a toboggan.

**tobogganer** (tō-bog'an-ēr), *n.* [*< toboggan + -er*'] One who practises sliding on a toboggan.

**tobogganing** (tō-bog'an-ing), *n.* [Verbal *n.* of *toboggan, v.*] The sport or practice of sliding on toboggans.

**tobogganist** (tō-bog'an-ist), *n.* [*< toboggan + -ist.*] A tobogganer. *The Century, XIV. 525.* [Rare.]

**toboggan-shoot** (tō-bog'an-shōt), *n.* Same as *toboggan-slide*.

**toboggan-slide** (tō-bog'an-slīd), *n.* A steep decline down which tobogganers slide. It is divided longitudinally into a number of different courses to prevent collisions, and is generally provided also with steps along the side for the convenience of the tobogganers when returning. See cut under *toboggan*.

**toboggin**, *n.* See *toboggan*.

**to-bread** (tō'bred), *n.* [*< to<sup>1</sup> + bread*'] An extra loaf added by bakers to every dozen, completing a bakers' dozen. Also called *in-bread*. See *bakers' dozen*, under *baker*.

**tobreak**, *v. t.* [*ME. tobreken*, *< AS. tōbrekan* (= *G. zerbrechen*), *< tō-*, apart, + *brecan*, break: see *to-2* and *break*. Cf. *all, adv.*] To break in pieces; destroy.

To-broken ben the statuts hye in heven  
That creat were eternally to dure.

*Chaucer, Scogan, l. 1.*

A certain woman cast a piece of a millstone upon Abimelech's head, and all to brake his scull. *Judges ix. 53.*

**tobrest**, *v.* See *toburst*.

**toburst**, *v.* [*ME. tobresten*, *< AS. toberstan* (= *OS. tobrestan* = *OHG. zerbrestan*, *MHG. zerbreiten*, *G. zerbersten*), burst asunder, *< tō-*, apart, + *berstan*, burst: see *to-2* and *burst*.] *I. trans.* To burst or break in pieces.

Atropos my thred of life to-breste,  
If I be fals. *Chaucer, Troilus, iv. 1546.*

**II. intrans.** To burst apart; break in pieces.

For man may love of possibillite  
A woman so his herte may to-breste,  
And she nought love ageyn, but—if hire leste.  
*Chaucer, Troilus, ii. 608.*

**toby** (tō'bi), *n.* [So called from the familiar personal name *Toby*.] A small jug usually representing in its form a stout old man with a three-cornered hat, the angles of which form spouts for pouring out the liquor contained in the vessel: it is frequently used as a mug.

There was also  
a goodly jug  
of well-browned  
clay, fashioned  
into the form of  
an old gentleman.  
. . . "Put  
Toby this way,  
my dear." This  
Toby was the  
brown jug.  
*Dickens, Barnaby Rudge, iv.*

Toby of English Pottery, 18th century

**tocan**, *n.* Same as *toucan*.

**toccata** (tok-kā'tā), *n.* [*It. toccata*, pp. fem. of *toccare* = *Sp. Pg. tocar* = *F. toucher*, touch: see *touch*.] In music, a work for a keyboard-instrument, like the pianoforte or organ, originally intended to utilize and display varieties of touch: but the term has been extended so as to include many irregular works, similar to the prelude, the fantasia, and the improvisation. Toccatas were first written early in the seventeenth century, and were then flowing and homophonic in structure. In the eighteenth and nineteenth centuries they have usually been intricately contrapuntal, and calculated to tax the highest virtuosity.

It was Bach, however, who raised the *Toccata* far beyond all previous and later writers. *Grove's Dict. Music, IV. 130.*

**toccatella**, **toccatina** (tok-kā-tel'lā, -tē'nā), *n.* [*It., dim. of toccata, q. v.*] In music, a short or simple toccata.

**Toccus** (tok'us), *n.* [NL. (Strickland, 1841), orig. *Tockus* (Lesson, 1831), also *Tocus* (Reichenbach, 1849), *< African tok*: see *tock*'] A genus of hornbills or *Bucerotidae*, having the culmen compressed, and only elevated into a low, sometimes obsolete, crest. It is the largest genus of the family, with about 12 species. The type is *T. erythrorhynchus*, a bird in which the bill is deep-red and the head and neck are gray with a white supercilious stripe. In others the bill is mainly yellow or black. With two exceptions (*T. ingalensis* of Ceylon and *T. griseus* of Malabar), the species are African.

**tocher** (tōch'ēr), *n.* [*< Ir. tochar*, Gael. *tocharadh*, a portion or dowry.] The dowry which

crafty person. *Scott*, *Fortunes of Nigel*, xxxi. [Scotch.]—2. A bugbear or ghost. *Hallwell*, [Prov. Eng.]

**to-do** (tō'dō'), *n.* [*< to do*, like *ado* *< at do* : see *ado*.] *Ado*; bustle; fuss; commotion. [Colloq.]

"What a to-do is here!" would he say; "I can lie in straw with as much satisfaction."

*Evelyn, Diary*, March 22, 1675.

**todrawt**, *v. t.* [ME. *todrauen*, *todragen*, *< AS. \*tōdragan*, *< tō-*, apart, + *dragan*, draw: see *to-2* and *draw*.] To draw asunder; drag violently.

They as in parteye of hir preye to drawen me crying and debating therayens. *Chaucer*, *Boethius*, i. prose 3.

**todriver**, *v. t.* [ME. *todrive*, *< AS. todrifan* (= OFries. *tōdriva* = OHG. *zatrifan*, MHG. *zetrifan*), drive asunder, *< tō-*, apart, + *drifan*, drive: see *to-2* and *drive*.] To drive apart; scatter.

Al his folk with tempest al to-driven.

*Chaucer*, *Good Women*, l. 1280.

**tod's-tail** (todz'tāl), *n.* The club-moss, *Lycomodium clavatum*. [Scotch.]

**tod-stove** (tod'stōv), *n.* [*< tod* + *stovel*.] A stove for burning wood, made of six iron plates fastened together by rods or bolts in the form of a box. Also called *box-store*.

**Todus** (tō'dus), *n.* [NL. (Linnaeus, 1766; earlier in Browne, "Hist. Jamaica" (1756), p. 476, and Gesner, 1555), *< L. todus*, some small bird. Cf. *tody*.] The only genus of *Todidae*, with about six species, all West Indian, as *T. viridis*, the common green tody of Jamaica, called by the old writers *green sparrow*, *green humming-bird*, and *tomtit*. See *Todidae*, and cut under *tody*.

**tody** (tō'di), *n.*; pl. *todies* (-diz). [Cf. F. *todier*, NL. *Todus*; *< L. todus*, some small bird.] 1. A bird of the genus *Todus* or family *Todidae*.—2. One of several birds formerly misplaced in the genus *Todus*. They belong to the family *Tyrannidae* and elsewhere. Thus, the royal or king tody is *Muscivora regia*

Green Tody, *Todus viridis*, about two thirds natural size.  
a, Outline of bill from above, slightly reduced.

("Todus" *regius* of Gmelin, 1788): the Javan tody of Latham is a broadbill, *Eurylaimus javanicus*, of Java, Sumatra, Borneo, the Malay peninsula, etc.; the great-billed tody of Latham is another bird of this family, *Cymborhynchus macrorhynchus*.

**toe** (tō), *n.* [*< ME. to*, *too*, pl. *tos*, *toos*, usually *toon*, *< AS. tō* (pl. *tān*, *tan*), contr. of \**tāhe*, in an early gloss *tāhae* = MD. *teen*, D. *teen* = MLG. *tee* = OHG. *zēhā*, MHG. *zēhe*, G. *zehe* (G. dial. in various forms: Bav. *zechen*, Swabian *zichen*, Swiss *zebe*, *zeb*, Frankish *zeve*, Thuringian *ziwe*, etc.) = Icel. *tā* = Sw. *tā* = Dan. *taa* (Teut. \**taihōn*, \**taihwōn*, \**taiwōn*), toe; connections unknown. Not connected with L. *digitus*, finger, toe, Gr. *δάκτυλος*, finger, toe. The Teut. word is applied exclusively to the digits of the foot.] 1. A digit of the foot, corresponding to a finger of the hand: as, the great toe; the little toe; the hind toe of a bird.

The fairest feete that euer freke [person] kende,  
With ton tidily wrought, & tender of hur skinne.  
*Alisaunder of Macedoine* (E. E. T. S.), l. 194.

Come, and trip it, as you go,  
On the light fantastick toe.

*Milton*, *L'Allegro*, l. 34.

2. A digit of either foot, fore or hind, of a quadruped, especially when there are three or more (a large single toe, or a pair of large toes, inclosed in horn, being commonly called *hoof*). No animal has normally more than five toes; most quadrupeds have five, then four, three, two, and one, in decreasing number of instances. No bird has naturally more than four, though some breeds of poultry are regularly five-toed by perpetuation of an original sport comparable to the sexdigitate polydactylism of man; a few have only three; and the African ostrich alone has two. Five toes is the rule in reptiles and batrachians, a lesser number being exceptional among those which have limbs, as lizards, crocodiles, turtles, frogs, newts, etc. In some lizards, as those which scramble over walls and ceilings, the toes

function as suckers by means of adhesive pads (see *gecko*); batrachians which habitually perch on trees are similarly equipped (see *tree-toad*); in a rare case, toes serve as a sort of parachute (see cut under *flying-frog*). In some mammals, as seals, the toes are united in the common integument of the flippers. Three and sometimes four toes are conjoined in web-footed birds. The joints or phalanges of toes are typically and usually three apiece, but this number is often reduced to two or one in the case of lateral toes, as the human great toe. In birds a remarkable rule prevails, that the joints of the toes, from first to fourth toe, run two, three, four, five; the exceptions to this rule are comparatively few. The toes of most animals end in nails or claws, and are often long and movable enough to serve as organs of prehension, like fingers. See cuts under *bird*, *digitigrade*, *Plantigrade*, *bicolligate*, *plantigrade*, *semi-plantigrade*, and *toepad*.

Lyk asur were his [the cock's] legges and his toon.  
*Chaucer*, *Nun's Priest's Tale*, l. 42.

3. The fore part, end, or tip of the hoof of an ungulate, as the horse.—4. The end of a stocking, shoe, or boot which contains or covers the toes: as, square or round toes; a hole in the toe.—5. A piece of iron welded under the front of a horseshoe, opposite the heels, to prevent slipping. See cut under *shoe*.—6. A projection from the foot-piece of an object to give it a broader bearing and greater stability.

Buttress walls should be placed at intervals, opposite to one another, and strutted apart at their toes by an inverted arch.  
*Encyc. Brit.*, IV. 450.

7. A barb, stud, or projection on a lock-bolt.—8. In *mach.*: (a) The lower end of a vertical shaft, as a mill-spindle, which rests in a step. (b) An arm on the valve-lifting rod of a steam-engine. A cam strikes the toe and operates the valve.

Such toes are known respectively as *steam-toes* and *exhaust-toes*. *E. H. Knight*.—Balls of the toes, fleshy and callous pads or protuberances on the under side of the toes of any foot, and especially such formations at the bases of toes. In digitigrade quadrupeds these balls form the whole sole, as explained under that word. In birds they are technically called *tylari*.—From *top* to *toe*. See *top*.—Great toe, the toe on the inner side of the foot, corresponding to the thumb.—Hammer-toe, an affection in which the second phalanx of one or more of the toes is permanently flexed upon the first.—Hind toe, in *ornith.*, the hallux. When there are two hind toes, as in zygodactyl or yoke-toed birds, the inner one is the hallux, or hind toe proper, excepting in trogons, in which the outer one is the hallux. In the three-toed woodpeckers, where the hallux is wanting, the reversed outer toe takes the name and place of *hind toe*.—Little toe, the outermost and smallest toe on the human foot, and the corresponding digit in some other cases, irrespective of its actual relative size.—Toe-and-heel pedal. See *pedal*.—To tread on one's toes. See *tread*.—To turn up one's toes, to die. [Slang.]

**toe** (tō), *v.*; pret. and pp. *toed*, ppr. *toeing*. [*< toe*, *n.*] I. trans. 1. To touch or reach with the toes.

The rushers [in foot-ball] draw up in line facing each other and *toeing* a line which marks the centre of the field.  
*Tribune Book of Sports*, p. 124.

2. To furnish or provide a toe to or for; mend the toe of: as, to *toe* a stocking.—To *toe* a nail, to drive a nail obliquely. See *toe-nail*, 2.—To *toe* a seam (*naut.*). See *seam*.—To *toe* the mark. See *mark*.—To *toe* the scratch. See *scratch*.

II. intrans. To place or move the toes, as in walking or dancing.—To *toe* in or out, to turn the toes inward or outward in walking.

**toe-biter** (tō'bī'ter), *n.* A tadpole.

**toe-cap** (tō'kăp), *n.* A cap or tip, of leather, morocco, or patent leather, sometimes of metal, covering the toe of a boot or shoe. Also *toe-piece*.

**toed** (tōd), *a.* [*< toe* + *-ed*.] 1. Furnished or provided with a toe or toes: chiefly in composition with a qualifying word: as, long-toed, short-toed, black-toed, five-toed, pigeon-toed.

They all bowed their snaky heads down to their very feet, which were *toed* with scorpions.  
*Howell*, *Parly of Beasts*, p. 39. (Davies.)

2. In *carp.*, noting a brace, strut, or stay when it is secured to a beam, sill, or joist by nails driven obliquely. *E. H. Knight*.

**toe-drop** (tō'drôp), *n.* Inability to raise the foot and toes, from more or less complete paralysis of the muscles concerned. Compare *wrist-drop*.

**tolo** (tō'lo), *n.* [African.] The koodoo, *Strap-sicros kudu*, an African antelope. See cut under *koodoo*.

**tolosa-wood** (tō-lō'sā-wūd), *n.* An Australian shrub or tree, *Pittosporum bicolor*.

**tolsester** (tōl-ses'tēr), *n.* [ME. \**tolsester* (ML. *tolsestrum*), < *toll* + *sester*, *sester* (< L. *sestarius*): see *sester*, *sester*.] A duty paid by tenants of some manors to the lord for liberty to brew and sell ale. *Imp. Dict.*

**tolsey** (tōl'si), *n.* [ < *toll* + *-sey* (for *sec2*?).] A tollbooth; also, a place where merchants usually assembled and commercial courts were held.

The place under it is their *Tolsey* or Exchange, for the meeting of their merchants.

Defoe, *Tour through Great Britain*, III. 239. (Davies.)

**tolt** (tōlt), *n.* [ < ML. *tolta* (OF. *tolte*, etc.), < L. *toltere*, take away: see *toll*.] In old Eng. law, a writ whereby a cause depending in a court-baron was removed into a county court.

**Toltec** (tol'tek), *n.* [Mex.] A member of a race of Mexico which, according to tradition, coming from the north, ruled the country from the seventh to the eleventh century, their power passing later to the Aztecs. The remains of Mexican architecture which have been ascribed to them consist principally of colossal pyramidal structures of adobe bricks—temples and buildings of great size and rude plan corresponding to the needs of a communal state of society. The last, which are elaborately decorated with rude sculpture in high relief, seem to show that the Toltecs were a people of some civilization; and there is reason to believe that they were acquainted with the arts of weaving, pottery, hieroglyphic writing, and perhaps with that of working metals. Their religion is said to have been mild, and their laws just. Their civilization was overlain by that of the Aztecs, who ingrafted on it many bloody religious rites and childish social practices.

**Toltecán** (tol'te-kan), *a.* [ < *Toltec* + *-an*.] Relating to the family of ancient civilized peoples dwelling in Mexico, and in Peru and various parts of South America. *Encyc. Brit.*

**tolter** (tol'tēr), *v. i.* [ < ME. *tolteren*; cf. *totter*.] To struggle; founder. *Halliwel*. [Prov. Eng.]

**tolu** (tō-lū or tō'lu), *n.* [Short for *Tolu balsam* or *balsam of Tolu*, so called as being brought from *Tolu*, now *Santiago de Tolu*, in the United States of Colombia. The origin of *Tolu* in this name is not ascertained.] A balsam obtained from incisions through the bark of *Myroxylon Toluifera*, an evergreen tree 60 or 80 feet high, found in the uplands of the United States of Colombia. It is a semi-fluid substance, becoming at length hard and brittle, of properties like those of the balsam of Peru, but less decided. It is somewhat used in medicine, and much more in perfumery, for burning pastilles. More fully named *balsam of tolu*.

Tolu-tree (*Myroxylon Toluifera*).

**toluene** (tol'ū-ēn), *n.*

[ < *tolu* + *-ene*.] Methyl benzene (C<sub>6</sub>H<sub>5</sub>.CH<sub>3</sub>), a hydrocarbon forming a colorless mobile liquid having the odor of benzene, and of specific gravity 0.883 at 32° F. It is soluble to some extent in alcohol, ether, and fixed and volatile oils, and dissolves iodine, sulphur, and many resins. It is obtained by the dry distillation of tolu and many other resinous bodies, by the action of potash on benzylic alcohol, and by heating toluic acid with lime. Also *toluol*.

**tolugt**, *v. t.* [ME. *toluggen*, *tologgen*; < *to-2* + *lug*.] To pull about.

Ligtliche Lyer lepe away thanne,  
Lorkynge thorw lanes to-lugged of manye.  
Piers Plowman (B), ii. 216.

**toluic** (tō-lū'ik), *a.* [ < *tolu* + *-ic*.] Pertaining to or produced from tolu.—**Toluic acid**, an aromatic monobasic acid (C<sub>6</sub>H<sub>4</sub>.CH<sub>3</sub>.CO<sub>2</sub>H), a homologue of benzoic acid. It has three isomeric modifications.

**toluol** (tol'ū-ol), *n.* [ < *tolu* + *-ol*.] Same as *toluene*.

**tolutation** (tol-ū-tā'shon), *n.* [ < LL. *tolut*, in *tolutum*, on a trot, *tolutarius*, trotting (< *toltere*, lift: see *tolerate*), + *-ation*. Cf. *troil*.] A pacing or ambling. *Sir T. Browne*, *Vulg. Err.*, iv. 6.

**tolu-tree** (tō-lū'trē), *n.* The tree yielding tolu. See *tolu*.

**Tolypeutes** (tol-i-pū'tēz), *n.* [NL. (Illiger, 1811), < Gr. *tolypeutes*, wind off, achieve, < *tolō*, πη, a clue, ball.] A genus of armadillos, of the family *Dasyopodidae*, including the three-banded armadillo or *apar*, *T. trinctus*. Two others are described. See cut under *apar*.

**tolypeutine** (tol-i-pū'tin), *a.* and *n.* [ < *Tolypeutes* + *-ine*.] *I. a.* Relating or belonging to the genus *Tolypeutes*; like an *apar*.

*II. n.* A member of the genus *Tolypeutes*. *Stand. Nat. Hist.*, V. 50.

**tom** (tom), *n.* [ < ME. *Tomme*, *Thomme*, abbr. of *Thomas*, < LL. *Thomas*, < Gr. *Θωμάς*, < Heb. *Thoma*, lit. 'twin.' Cf. *Thomas Didymus*, 'Thomas the twin,' the name of one of the apostles.] *1.* [*cap.* or *l. c.*] A familiar form of the common Christian name *Thomas*. Used, like the name *Jack*, as a generic name for a man or a fellow, implying some degree of slight or contempt: as, a *tom-fool*; *Tom o' Bedlam*.

It happened one time that a *Tom* of Bedlam came up to him, and had a mind to have thrown him from the battlements, saying, "Leap, *Tom*, leap."

Aubrey, *Lives* (Thomas More).

"*Tom Raw*, the Griffin," a name which used to be applied to a subaltern in India for a year and a day after his joining the army.  
*N. and Q.*, 7th ser., X. 172.

*2.* Used, like *jack*, attributively or in composition with the name of an animal, a male: as, a *tom-cat*; hence, as a noun, a male; specifically, a male cat.

*Tom* = "male" is commonly used in the neighbourhood of Liphook, Hampshire, when little animals or birds are spoken of. The word frequently stands by itself, as in the question "Is it only the *tom* which sing?" i. e., only the male nightingales and cuckoos; but it also appears in numerous compounds. I have heard *tom-rat*, *tom-rabbit*, *tom-mouse*, *tom-hedgehog*, *tom-ferret*, *tom-weasel*, *tom-robin*, *tom-thrush*, *tom-lark*, *tom-pigeon*, *tom-turkey*. *Tom-cock* is rarely used in referring to the domestic fowl, but such words as *tom-brahma* and *tom-bantam* are quite common. A sparrow, however, is a *jack-sparrow*, and a dog or larger animal is, I believe, never a *tom*.

*3t.* The knave of trumps at gleek.

*Tom*, the knave, is nine, and tidie, the four of trumps, is four: that is to say, you are to have two apiece of the other two gamsters. *Wit's Interpreter*, p. 365. (Nares.)

*4.* A close-stool. *Halliwel*. [Prov. Eng.]—*5.* A machine formerly used in gold-washing, first in the southern Atlantic States, and later in California, where, however, it was soon superseded by the sluice. It is a trough set in an inclined position, about 20 inches wide at the upper and 30 at the lower end, near which for a short distance the wooden bottom is replaced by one of perforated sheet-iron, the holes being about an inch in diameter. Through these holes the finer gravel and sand with the gold pass into a somewhat wider flat box with riffles, on which the precious metal is caught by the help of the current and the necessary amount of stirring with the shovel. The *tom* is something like the "rocker," except that it is longer, and has no rocking motion. Both are very rough and cheap machinery; and most of the stuff originally worked by their aid has been washed over again, and sometimes a great number of times.—**Bottle Tom**, the bottle-tit, a bird.—**Long tom**. (*a*) *Navit*, a long gun as distinguished from a carronade; a large gun, especially when carried amidships on a swivel-carriage, etc., as distinguished from the smaller guns carried in broadside. (*b*) Same as def. 5, above. (*c*) A kind of large pitcher or water-can in use in England in the early part of the nineteenth century.—**Old Tom**. See *old*.—**Tom and Jerry**, a hot, frothy, highly spiced drink, made of eggs, sugar, rum, cinnamon, cloves, allspice, etc.—**Tom Cox's traverse**. See *traverse*.

**tom-t**, *n.* A Middle English form of *toom*. *Alliterative Poems* (ed. Morris), iii. 135.

Ind. origin: Algonkin *tomehagan*, Mohegan *tumnahegan*, Delaware *tamoihecan*, a tomahawk: explained by Lacombe from the Cree dialect—*atomahuk*, knock him down, *otamahaw*, he is knocked down.] *1.* The war-ax of the Indians of North America. The head was sometimes the horn of a deer put through a piece of wood in the form of a pickax, sometimes a long stone sharpened at both ends, used in the same way. After the

Tomahawk with Stone Head.

advent of white traders iron was brought into use for the heads. The tomahawk is also used as a hatchet. (*Capt. John Smith*.) The blunt side of the head is sometimes formed into a pipe-bowl which communicates with a tubular hollow made in the handle, the whole serving as a tobacco-pipe.

It was and is the custom of the Indians to go through the ceremony of burying the tomahawk when they made peace; when they went to war they dug it up again. Hence the phrases "to bury the tomahawk" and "to dig up the tomahawk" are sometimes used by political speakers and writers with reference to the healing up of past disputes or the breaking out of new ones. *Bartlett*.

Then smote the Indian tomahawk

On crashing door and shattering lock.

Whittier, *Pentucket*.

*2.* In *her.*, a bearing representing a hatchet of some fanciful form, supposed to be an Indian tomahawk.—**To bury the tomahawk**. See the quotation from *Bartlett*, above.

**tomahawk** (tom'a-hāk), *v. t.* [ < *tomahawk*, *n.*] To strike, cut, or kill with a tomahawk.

I have noticed, within eighteen months, the death of an aged person who was tomahawked by the Canadian savages on their last incursion to the banks of the Connecticut River. *Everett*, *Orations*, I. 385.

**tomalley**, **tomally** (to-mal'i), *n.* [Appar. a var. of *tournardin*, with ref. to the color.] The soft yellowish or greenish hepatic substance or so-called liver of the lobster. As used for food it is also called *sauce*. See *green-gland* (under *gland*) and *hepatopancreas*.

**tomalline** (to-mal'in), *n.* Same as *tomalley*.

**toman**, **tomaun** (tō-mān, -mān'), *n.* [Sometimes also *tomand*; = It. *tomano* (Florio), < Pers. *tōmān*, a coin so called, < Mongol *tōmān*, ten thousand.] A current gold coin of Persia, worth 7s. 2½d. English (about \$1.76).

One of the Khan's followers assured me that his chief would lose at least three thousand *tomans* if his income were this brigandage suppressed. *O'Donovan*, *Merv*, xii.

**tomata**, *n.* An obsolete form of *tomato*. *Jefferson*, *Notes on Virginia* (1787), p. 64.

**tomato** (tō-mā'tō or tō-mā'tō), *n.*; pl. *tomatoes* (-tōz). [Formerly also *tomata*; = F. *tomate*, < Sp. Pg. *tomate*, < Mex. *tomatl*, a tomato.] The fruit of a garden vegetable, *Lycopersicon esculentum*, native in tropical South America, now widely cultivated for its esculent fruit in temperate as well as tropical lands; also, the plant itself. The stem is ordinarily weak and reclining, much branched, becoming 4 feet long, but in a French variety—the upright or tree tomato—erect, and sustaining its own fruit. The leaves are interruptedly pinnate, and stain green by contact. It has a small yellow flower, the parts of which are often multiplied in cultivation. The fruit is a berry, normally one- or two-celled and small; under culture, often many-celled and complicated in structure as if by the union of several fruits, large and of a depressed-globose form. A simple pear-shaped form exists; and in one very distinct variety, *L. cerasiforme*, the cherry- or currant-tomato, the fruit is scarcely larger than a large currant, and is borne in long racemes. The color is commonly some tint of red, sometimes yellow, in one variety nearly white. The tomato-fruit is of a soft, pulpy texture and peculiar slightly acid flavor. It is nutritious and wholesome, with laxative and antiscorbutic properties. The tomato was introduced into Europe early in the sixteenth century; but its esculent use in northern countries began much later. In the United States it was known only as a curiosity till about 1830. It is often called *love-apple*, a translation of the French *pomme d'amour*, which is a corruption of the former Italian name *pomo dei Mori*, the plant having reached Italy through Morocco. From this name aphrodisiac properties have been ascribed to it.—**Cannibal's tomato**, a Polynesian shrub, *Solanum anthropogorum*, with dark glossy foliage, and berries of the size, shape, and color of small tomatoes. The fruit is sometimes made into a sauce, and the leaves are used as a vegetable, having been formerly considered a requisite of a cannibal feast.—**Cherry- or currant-tomato**. See *def.*

—**Husk-tomato**. Same as *strawberry tomato*.—**Strawberry tomato**. See *strawberry tomato*.—**Tomato catch-up**. See *catch-up*.—**Tomato-fruit worm**, the larva of *Heliothis armigera*, a common and cosmopolitan noctuid moth. It feeds also upon cotton-bolls, the ears of Indian corn, and many other plants. See cut under *Heliothis*.—**Tomato hawk-moth**, the tomato-sphinx.—**Tree-tomato**. (*a*) See *def.* (*b*) See *Euphorbia*.

**tomato-gall** (tō-mā'tō-gāl), *n.* A gall made upon the twigs of the grape-vine in the United States by the gall-midge *Lasioptera vitis*: so

The Gr. word is entirely different (see *glossa*). From the L. form of the word are derived E. *lingual*, etc., *language*.] 1. The principal organ of the special sense of taste or the gustatory faculty; the lingual apparatus, or *lingua*. It is usually a fleshy and freely movable mass which partly fills the mouth, and has important functions in the acts of talking and eating. Together with the lips, teeth, and cheeks, the tongue serves to articulate, modulate, or qualify sounds produced in the windpipe, and in man is thus an organ of speech; it is equally concerned in the many natural cries of animals, the songs of birds, etc. It is a direct aid in the process of mastication, in directing food between the teeth, and in the act of swallowing or deglutition, by forcing food and drink from the mouth through the fauces into the pharynx. It is concerned in spitting, and in almost every action in which the mouth takes part. The tongue is often a prehensile organ, as for lapping or licking; sometimes a rasp or file, as in the lion and the snail; sometimes a dart or spear, as in woodpeckers, and in chameleons and many other reptiles. The tongue is rarely rudimentary or wanting in vertebrates, as in some birds and the aglossal batrachians. It is forked in serpents. Its structure and mechanism are more elaborate in some of the lower vertebrates, especially in birds and reptiles, than in mammals. In these last the tongue is chiefly a mass of muscle attached to the hyoid bone and lower jaw, and covered with mucous membrane. (a) In man the tongue is placed in the floor of the mouth, between the two branches of the lower jaw. The base or root of the tongue is fixed to the hyoid or tongue-bone; the top, sides, and dorsum are free; a median fold of mucous membrane, the bridle of the tongue, or *frenum linguae*, runs to its tip. Like other median or azygous structures, the tongue consists of two symmetrical halves on the right and left of a middle vertical partition, or *septum linguae*, of fibrous tissue; another sheet of such tissue, the *hyoglossal membrane*, connects the under side of the tongue with the hyoid bone. The intrinsic muscular fibers of the tongue constitute the *lingualis*; the extrinsic muscles (connecting

**tongue-fish** (tung'fish), *n.* A kind of flatfish, *Aphoristia plagiosa*, found from Virginia to Texas and the West Indies. It is abundant in sandy bays. It is dark-brown with six or seven obscure cross-bands, and numerous dark specks on both body and fins. The eyes and color are on the left side, and the size is small. (Compare a like use of *tongue*, *u.*, 6 *m.*)

**tongue-flower** (tung'fou'ēr), *n.* An orchid of the genus *Glossodia*.

**tongue-flowered orchis.** See *Serapias*.

**tongue-grafting** (tung'grāf'ting), *n.* See *grafting*, 1.

**tongue-grass** (tung'grās), *n.* The peppergrass, chiefly *Lepidium sativum*.

**tongue-holder** (tung'hōl'dēr), *n.* A dental instrument serving to prevent the tongue from getting in the way during an operation. One form has a clamp to hold the tongue down, while the sublingual and submaxillary ducts are closed by absorbent pads applied before the compress.

**tongue-hound** (tung'hound), *n.* Either one of the two front hounds of a vehicle, between and to which the tongue or pole is attached. See *cut under hound*.

**tongue-joint** (tung'joint), *n.* In *welding*, a split joint formed by inserting a wedge-shaped piece into a corresponding split piece, and welding the two together.

**tongue-lashing** (tung'lash'ing), *n.* A scolding; wordy abuse or vituperation.

**tongueless** (tung'les), *a.* [Early mod. E. also *tonglesse*; *< tongue + -less.*] 1. Having no tongue; aglossal.—2. Speechless; voiceless; silent.

This murder might have slept in *tonglesse* brasse  
But for our selues.  
*C. Tourneur, Revenger's Tragedy, v. 3.*

3*t.* Unnamed; not spoken of.

One good deed dying *tongueless*  
Slaughters a thousand waiting upon that.  
*Shak., W. T., i. 2. 92.*

**tonguelet** (tung'let), *n.* [*< tongue + -let.*] 1. An animal of the group *Lingulidæ* or *Pentastomidea*; a five-mouths. See *cut under Pentastoma*.—2. In *entom.*, the ligula.—3. A small tongue or tongue-like part or process; something linguiform or ligulate.

**tongue-man** (tung'man), *n.* A speaker; a talkative person.

A boasting, insolent *tongue-man*!  
*B. Jonson, Catiline, iv. 2.*

**tongue-membrane** (tung'mem'brān), *n.* The lingual ribbon of a mollusk. See *cuts under radula and ribbon*.

**tongue-pad** (tung'pad), *n.* A great talker. [*Slang.*]

She who was a celebrated wit at London is, in that dull part of the world, called a *tongue-pad*.  
*Tatler.*

**tongue-shaped** (tung'shāpt), *a.* Formed like a tongue; linguiform; ligulate; strap-shaped; in *bot.*, long and nearly flat, somewhat fleshy, and rounded at the apex: as, a *tongue-shaped* leaf.

**tongue-shell** (tung'shel), *n.* A brachiopod of the family *Lingulidæ*; a lingulid. See *cuts under Lingulidæ*.

**tongue-shot** (tung'shot), *n.* The reach of the tongue; the distance the sound of words uttered by the tongue can be heard; ear-shot. [*Rare.*]

She would stand timidly aloof out of *tongue-shot*.  
*C. Reade, Cloister and Hearth, iii.*

**tongues-mant**, *n.* Same as *tongue-man*.

Then come, sweet Prince, Wales woeth thee by me,  
By me hir sorrie *Tongues man*.  
*Darles, Microcosmos, p. 22.*

**tonguesoret** (tung'sōr), *n.* [*< tongue + sorel.*] Evil tongue; wicked speech; ill speaking. *Udall*, tr. of Apophthegms of Erasmus, i., Socrates, § 55.

**tongue-spatula** (tung'spat'ū-lā), *n.* 1. A tongue-compressor.—2. A tongue-depressor.

**tonguester** (tung'stēr), *n.* [*< tongue + -ster.*] A talkative, loquacious person; a chatterer; a babbler. *Tennyson, Harold, v. 1.* [*Rare.*]

**tongue-test** (tung'test), *n.* A rough method of testing the condition of a battery or the continuity of an electric circuit, by touching the two ends of a break in the circuit with the tongue, and observing the sensation produced.

**tongue-tie** (tung'ti), *n.* Impeded motion of the tongue in consequence of the shortness of the frenum linguae.

**tongue-tie** (tung'ti), *v. t.* To deprive of the power of speech or of distinct articulation.

**tongue-tied** (tung'tid), *a.* 1. Having the tongue tied, by reason of the shortness of the bridle or frenum, to the extent of impeding speech or causing indistinct articulation.—2. Unable to speak out or freely from whatever cause, as embarrassment: as, "*tongue-tied* simplicity," *Shak., M. N. D., v. 1. 104.*

Wronged men are seldom *tongue-tied*.  
*G. Harvey, Four Letters.*

**tongue-tooth** (tung'tōth), *n.* A tooth of the lingual ribbon of a mollusk; a radular tooth. See *cut under radula*. *P. P. Carpenter.*

**tongue-tree** (tung'trē), *n.* The pole of a wagon. *Hallwell.* [*Prov. Eng.*]

**tongue-valiant** (tung'val'yant), *a.* Valiant in speech or words only; brave in words, not in action.

*Tongue-valiant* hero, vaunter of thy might,  
In threats the foremost, but the lag in fight.  
*Dryden, Liad, i. 336.*

**tongue-violet** (tung'vi'ō-let), *n.* See *Schweigeria*.

**tongue-warrior** (tung'wor'i-or), *n.* One who fights only with the tongue; a tongue-valiant hero.

Irritated from time to time by these *tongue-warriors*.  
*Addison, Pretty Disaffection.*

**tongue-work** (tung'wērk), *n.* 1*t.* Work in the tongues; philological labor.

And let this comparison of a labouring man by the way put you in minde (gentle reader) of his labours that hath laboured so much and so long to saue you a labour, which I doubt not but he may as iustly stand vpon in this *tongue work* as in Latin Sir Thomas Eliot. Bishop Cooper, . . . after them Thomas Thomas and John Rider, have done amongst vs. *Florida, It. Dict. (1598), To the Reader, p. [xii.].*

2. Talk; babble. [*Colloq.*]

I've seen it again and again. If a man takes to *tongue-work*, it's all over with him. *George Eliot, Felix Holt, xx.*

**tongue-worm** (tung'wērm), *n.* 1. A tongue-shaped worm; a tonguelet.—2. The so-called "worm" of the tongue of some animals, as dogs; the lytta.

**tonguey, tonguey** (tung'i), *a.* [*< ME. tungy; < tongue + -y.*] Fluent, or voluble in speech; loquacious; garrulous. [*Now colloq.*]

As a grauell steezing vp in the feet of an old man [as the climbing up a sandy way is to the feet of the aged, A. V.], so a *tungy* woman to a quyet man.  
*Wyclif, Ecclus. xxv. 27.*

He jes' ropes in your *tonguey* chaps an' reg'lar ten-inch bores,  
An' lets 'em play at Congress, ef they'll du it with closed doors.  
*Lowell, Biglow Papers, 2d ser., iii.*

**tonguing** (tung'ing), *n.* [Verbal *n.* of *tongue*, *v.*] 1. The act or state of projecting like or as a tongue.

The *tonguing-in* of one series with the other is complete.  
*Quart. Jour. Geol. Soc., XLVI. 251.*

2. In *hort.*, a process intended to promote the rooting of layers. See the quotation.

In *tonguing* the leaves are cut off the portion which has to be brought under ground, and a tongue or slit is then cut from below upwards close beyond a joint, of such length that, when the cut part of the layer is pegged an inch or two (in large woody subjects 3 or 4 inches) below the surface, the elevation of the point of the shoot to an upright position may open the incision, and thus set it free, so that it may be surrounded by earth to induce it to form roots.  
*Encyc. Brit., XII. 235.*

3. In playing on musical wind-instruments, the act, process, or result of modifying or interrupting the tone by means of a stroke of the tongue, so as to produce a marcato or staccato effect. *Tonguing* is termed *single* when but one kind of stroke is used, as if to produce the consonant *t* over and over; *double*, when two strokes are used in alternation, as if to produce *t* and *k* alternately; *triple*, when three strokes are

used; etc. Single tonguing only is applicable in instruments with a reed, like the oboe and the clarinet, and then operates like the "percussion" sometimes introduced into the harmonium, while double and triple tonguing are applicable to the flute, the trumpet, etc.

**tonguy**, *a.* See *tonguey*.

**tonic** (ton'ik), *a.* and *n.* [*< F. tonique = Sp. tónico = P. g. It. tonico, < NL. tonicus, < Gr. τονικός, < τόνος, tone, accent: see tone.*] 1. *a.* 1. Of or relating to tones or musical sounds.

In point of *tonic* power, I presume it [the organ] will be allowed preferable to all others.

W. Mason, Church Music, i.  
2. Specifically, in *music*, of or pertaining to, or founded on, the key-note or tonic.—3. Of or pertaining to tension; increasing tension.

The others [muscles], however, are all slightly contracted, and would severally produce motion were they not balanced or out-balanced by their antagonist muscles. This pervading activity of the muscles is called their *tonic* state.  
*H. Spencer, Prin. of Psychol., § 39.*

4. In *med.*, increasing the strength or tone of the animal system; obviating the effects of weakness or debility, and restoring healthy functions; hence, bracing or invigorating to the mental or the moral nature.

Goethe says that in seasons of cholera one should read no books but such as are *tonic*, and certainly in the season of old age this precaution is as salutary as in seasons of cholera. *M. Arnold, Essays in Criticism, 2d ser., p. 300.*

**Tonic chord**, a chord having the key-note for its root.—**Tonic pedal**, an organ- or pedal-point formed on the key-note.—**Tonic section**, a section or period in the key of the original key-note of a piece, and closing with a tonic cadence.—**Tonic sol-faist**, one who uses or is expert in the tonic sol-fa system.—**Tonic sol-fa notation**, the form of musical notation used in the tonic sol-fa system. Tones are represented by the initial letters of their solmization syllables, *d* standing for *do*, *r* for *re*, *m* for *mi*, *f* for *fa*, *s* for *sol*, *l* for *la*, and *t* for *ti*. Higher and lower octaves are represented by superscript and subscript numerals, as *m*<sup>1</sup> for the higher *mi*, or *s*<sub>1</sub> for the lower *sol*. Time-values are indicated by placing the required letters on a line at proportional distances. The heavy beat or pulse at the beginning of a measure is indicated by a vertical bar, and all other principal pulses by pulse-marks [·]. As these pulses are equal in length, the pulse-marks are placed equidistant from each other, thus (in triple rhythm), | · · · · ·, etc. A tone filling a pulse is indicated by its initial placed in the space belonging to the pulse. The continuance of a tone from one pulse to another is indicated by a dash filling the space of the second pulse. If a pulse is divided, the half-pulse is marked by a · in the middle of the space; quarter-pulses are similarly marked by a ·. The absolute pitch of the key-note is indicated at the outset by its letter-name. Modulations are marked not only by giving the letter-name of the new key-note, but by indicating in each voice-part the syllable-names in both the old and the new keys of the tone on which the transition takes place. Chromatic tones are solmized in the usual way. The tune "America" ("God Save the Queen"), for example, begins thus:

Key F.  
( d : d : r | t : · d : r m : m : f m : · r : d  
s : l : l | s : · l : t d : d : d d : · t : d  
My country! 'tis of thee, Sweet land of lib - er - ty,  
m : m : f r : · r : s s : l : l s : · f : m  
d : l : f | s : · s : s d : l : f s : · s : l )

**Tonic sol-fa system**, the most extensive and important of the modern systems of classifying, explaining, and teaching the facts of music. The system is said to have originated in the efforts of Miss Sarah A. Glover, about 1812, to simplify the process of teaching music to children. Her experiments were taken up about 1850 by the Rev. John Curwen, and gradually developed into a scientific system. The name of the system indicates two of its fundamental characteristics—namely, emphasis on tonality, with its multifarious interrelations of tones, as the controlling factor in all musical construction, and the use of the Guidonian solmization as a guide to study, terminology, and notation. Melody and harmony are studied by constant reference to the ideal major and minor scales; and great use is made of a chart of these scales, with their closest relations, called a *modulator* (which see). Rhythmic and metric facts are similarly referred to ideal formulae. The voice is treated as the chief instrument of musical performance. In order to do away with the arbitrary intricacies of the staff-notation, with its inherent dependence on the keyboard, and to force the mind of the singer to dwell constantly on the tonic qualities of tones, instead of on their supposed distance from each other, a notation has been devised which is now capable of representing all important musical facts. (See *tonic sol-fa notation*.) The remarkable success of the tonic sol-fa movement, particularly in Great Britain, is due, first, to its insistence on the basal truths of musical science to the exclusion of arbitrary traditions, and, second, to the highly systematic method of teaching these truths which its advocates have elaborated. Its importance is demonstrated not only by its immense popular success where it has been properly undertaken, but by its unmistakable influence on the terminology and methods of all scientific musical study. Although originally intended to apply only to vocal music, its principles have been extended to certain branches of instrumental music with success.—**Tonic spasm**, in *med.*, a steady and continuous involuntary muscular contraction enduring for a comparatively long time. It is opposed to *clonic spasm*, in which the muscles contract and relax alternately in very quick succession, producing the appearance of agitation. In tonic spasm, however, there is always a very slow alternate contraction and relaxation. The spasms of tetanus are tonic, those of epilepsy first tonic and then clonic.

superficial lobes of the cerebellum; the cerebellar amygdala. Also *tonsilla* in both senses. — **lingual tonsil**, a small collection of lymphoid tissue at the base of the tongue. — **Pharyngeal tonsil, faucial tonsil, Luschka's tonsil**, a mass of follicular lymphoid glands between the orifices of the right and left Eustachian tubes, at the summit of the pharynx.

**tonsile** (ton'sil), *a.* [*L. tonsilis*, < *tondere*, pp. *tonsus*, shear, clip: see *tonsure*.] Capable of being or fit to be clipped; also, trimmed: as, a *tonsile* hedge. *Hallwell*. [*Prov. Eng.*]

There is not a more *tonsile* and governable plant in Nature: for the cypress may be cut to the very roots, and yet spring afresh. *Evelyn*, *Sylvia*, I. xxiii.

**tonsilla** (ton-sil'ä), *n.*; pl. *tonsillæ* (-ë). Same as *tonsil*.

**tonsillar** (ton'sil-lär), *a.* [= *Sp. tonsilar* = *It. tonsillare*, < *NL. tonsillaris*, < *L. tonsilla*, *tonsil*: see *tonsil*.] Of or pertaining to the tonsils: as, *tonsillar* arteries or follicles; *tonsillar* disease. — **Tonsillar artery**, a branch of the facial artery, distributed to the tonsils and the sides of the tongue near its root. — **Tonsillar nerves**, slender branches of the glossopharyngeal, distributed to the tonsils, soft palate, and pillars of the fauces. — **Tonsillar plexus**. See *plexus*.

**tonsillary** (ton'sil-lä-ri), *a.* [*NL. tonsillaris*: see *tonsillar*.] Same as *tonsillar*. *Quain*, *Med. Dict.*, p. 1647.

**tonsillitic** (ton-sil'it'ik), *a.* [*L. tonsilla* + *-it-ic*.] Of or pertaining to the tonsils: as, *tonsillitic* nerves.

**tonsillitic** (ton-sil'it'ik), *a.* [*tonsillitis* + *-ic*.] Of or pertaining to tonsillitis; affected with inflammation of the tonsils.

**tonsillitis** (ton-sil'it'is), *n.* [*NL. tonsillitis*, < *L. tonsilla*, *tonsils*, + *-itis*.] Inflammation of the tonsils. It is a very common form of sore throat, of varying severity. — **Follicular tonsillitis**, tonsillitis in which there is inflammation and increased secretion of the lining of the crypts or follicles of the tonsils.

**tonsillotomy** (ton-sil'ō-tōm), *n.* [*L. tonsilla*, *tonsil*, + *Gr. -tōmē*, < *tonōō*, *tautōō*, cut.] A surgical instrument for excising more or less of the tonsil.

**tonsillotomy** (ton-sil'ō-tō-mi), *n.* [*L. tonsilla*, *tonsil*, + *Gr. -tōmē*, < *tonōō*, *tautōō*, cut.] In *surg.*, excision of the tonsils.

**tonsor** (ton'sor), *n.* [*L. tonsor*, *tosor*, a clipper, a barber, < *tondere*, pp. *tonsus*, shear, shave.] A barber; one who shaves. *Combe*, *Dr. Syntax's Tours*, ii. 2. [Rare.]

**tonsorial** (ton-sō-ri-äl), *a.* [*L. tonsorius*, of or pertaining to shearing or shaving, < *tonsor*, a shaver: see *tonsor*.] Pertaining to a barber or his functions. [Generally humorous.]

Margaret, taking her seat in the *tonsorial* chair, delivered herself into the hands of the professor [the barber]. *S. Judd*, *Margaret*, ii. 1.

**tonsure** (ton'sūr), *n.* [*ME. tonsure*, < *OF. (and F.) tonsure* = *Pr. Sp. Pg. It. tonsura*, a shearing, clipping, the shaven crown of a priest, < *L. tonsura*, a shearing, clipping, in *ML.* the shaven crown of a priest, < *tondere*, pp. *tonsus*, shear, clip.] 1. The act of clipping the hair, or of shaving the head, or the state of being shorn. — 2. Specifically — (a) In the Roman Catholic and Greek churches, the ceremony of shaving or cutting off the hair of the head, either wholly or partially, performed upon a candidate as a preparatory step to his entering the priesthood or embracing a monastic life; hence, entrance or admittance into the clerical state or a monastic order. In the early church the clergy wore the hair short, but not shaven. The tonsure seems to be as old as the fifth or sixth century. In the Greek Church the hair is wholly shaved off. In the Roman Catholic Church a part only is shaved, so as to form a circle on the crown of the head, and the first tonsure can be given only by a bishop, a mitred abbot, or a cardinal priest.

Of the ecclesiastical *tonsure* there were known to the Anglo-Saxons, in the early period of their Church, two distinctive shapes — the Roman and the Irish; the Roman form was perfectly round; the Irish was made by cutting away the hair from the upper part of the forehead in the figure of a half-moon, with the convex side before.

*Rock*, *Church of our Fathers*, i. 186.

(b) The bare place on the head of a priest or monk, formed by shaving or cutting the hair.

Among some of the monastic orders and friars the tonsure leaves only a circle of hair round the head; the *tonsure* of secular clerks, on the other hand, is small.

*Rom. Cath. Dict.*, p. 798.

**tonsure** (ton'sūr), *v. t.*; pret. and pp. *tonsured*, ppr. *tonsuring*. [*< tonsure, n.*] To shave or clip the hair of the head of; specifically, to give the tonsure to.

Priests must not wear showy garments such as the bishop forbids, and they must have their moustaches and beard shaved, and be *tonsured* once a month.

*The Academy*, Feb. 8, 1890, p. 100.

**tonsured** (ton'sūr), *p. a.* 1. Having received the tonsure; shaven; hence, clerical.

No ecclesiastical privilege had occasioned such dispute, or proved so mischievous, as the immunity of all *tonsured* persons from civil punishment for crimes. *Hallam*.

2. Having a bald spot on the head like a tonsure. [Rare.]

Bowing o'er the brook

A *tonsured* head in middle age becom.

*Tennyson*, *The Brook*.

**tonsure-plate** (ton'sūr-plät), *n.* A round thin plate slightly convex so as to fit the top of the head, used to mark the line of the tonsure according to the Roman rite.

**tontine** (ton-tēn'), *n.* and *a.* [*F. tontine* = *G. tontine*, < *It. tontina*, tontine, a life-insurance office; so called from Lorenzo *Tonti*, a Neapolitan banker, who originated the scheme (about 1653).] 1. *n.* An annuity shared by subscribers to a loan, with the benefit of survivorship, the share of each survivor being increased as the subscribers die, until at last the whole goes to the last survivor, the whole transaction ceasing with his death. By means of tontines many government loans were formerly raised in England. The name is also applied to the number of those receiving the annuity, to their individual share or right, and to the system itself. The tontine principle has also been applied to life-insurance. See *tontine policy*, under *II*.

I hear he pays as many annuities as the Irish *tontine*.

*Sheridan*, *School for Scandal*, i. 1.

**II. a.** Of, pertaining to, constituting, or involving the principle of the tontine: as, *tontine* profits; *tontine* funds; *tontine* insurance.

**Tontine policy**, a policy of insurance in which the policy-holder agrees, in common with the other policy-holders under the same plan, that no dividend, return-premium, or surrender-value shall be received for a term of years called the tontine period, the entire surplus from all sources being allowed to accumulate to the end of that period, and then divided among all who have maintained their insurances in force. This modification of ordinary life-insurance has been adopted, as optional with the insured, for the purpose of countervailing the tendency to burden long-lived and persistent policy-holders with a large amount of premiums in comparison of those whose lives fall in shortly after obtaining insurance. The effect is to reduce the sum payable on deaths after but few years' payment of premiums, and increase the sum payable on deaths occurring after a given number of years.

**tontiner** (ton-tē'nēr), *n.* [*< tontine* + *-er*.] One who shares in a tontine. *R. L. Stevenson* and *L. Osbourne*, *The Wrong Box*, i. [Rare.]

**tonus** (tō'nus), *n.* [*NL.*, < *Gr. τόνος*, tone: see *tone*.] 1. Tonicity.

The maintenance of muscular *tonus*.

*G. J. Romanes*, *Jelly-fish*, etc., p. 208.

2. Tonic spasm. [Rare.]

**tony**<sup>1</sup> (tō'ni), *n.*; pl. *tonies* (-niz). [Prob. a particular use of *Tony*, which is regarded and used as an abbr. of *Anthony*. There may be an allusion to St. *Anthony's* (*Anthony's*) pig: see *tantony*, *tantony pig*.] A simpleton.

In short, a pattern and companion fit

For all the keeping *tonies* of the pit.

*Dryden*, *All for Love*, Prol., l. 15.

**tony**<sup>2</sup> (tō'ni), *a.* [*< tone*<sup>1</sup> + *-y*.] Of a high tone; affecting social elegance; genteel; swell. [*Slang*, U. S.]

Such as himself and his wife, he would say, . . . didn't expect any of her society, but Mrs. Branner ought to be *tony* enough for her. *The Atlantic*, LXVII. 240.

**tony-hoop** (tō'ni-höp), *n.* Same as *tonnihad*. [*Prov. Eng.*]

**too**<sup>1</sup> (tō), *adv.* [Early mod. E. also *to*; < *ME. to*, < *AS. tō*, *too*, = *G. zu*, etc., *too*, more than enough; < *AS. tō*, prep.: see *to*<sup>1</sup>.] 1. Over; more than enough: noting excess, and qualifying an adjective or an adverb.

Farewell, Alinda:

I am *too* full to speak more, and *too* wretched.

*Fletcher*, *Loyal Subject*, iv. 1.

He names this word College too often, and his discourse bears too much on the University. *Bp. Earle*, *Micro-cosmographie*, A Downe-right Scholler. [*Too* in this sense is sometimes erroneously used to qualify a verb.

I'll look within no more:

*Too* trusted to my own wild wants,

*Too* trusted to myself, to intuition.

*Browning*, *Pauline*.]

2. Exceedingly; extremely: an intensive use.

They continually pretend to have some sovereign power over that empire, and yet are *too* happy to be at peace with it. *Brougham*.

3. In addition; also; furthermore; moreover.

Pretty and witty, wild, and yet, *too*, gentle.

*Shak.*, C. of E., iii. l. 110.

What, will these young gentlemen *too* help us to catch this fresh salmon, ha?

*Delker and Webster*, *Northward Ho*, iv. 3.

Never was there a more complete victory, achieved *too* within the space of little more than an hour.

*Prescott*, *Ferd. and Isa.*, ii. 12.

4. Likewise; in like manner; in the same way.

As God clothes himself with light as with a garment, so God clothes and appareth his works with light *too*.

*Donne*, *Sermons*, vi.

Lewis the Fourteenth in his old age became religious: he determined that his subjects should be religious *too*.

*Macaulay*, *Leigh Hunt*.

**Too blame**. See *blame*, *v. t.*, note. — **Too many**. See *many*. — **Too much for one**. See *much*. — **Too thin**. See *thin*. — **Too too**. (a) Quite too; altogether too: noting great excess or intensity, and formerly so much affected as to be regarded as one word, and so often written with a hyphen.

O, that this *too too* solid flesh would melt,

Thaw, and resolve itself into a dew!

*Shak.*, *Hamlet*, i. 2. 129.

O *too-too* happy! had that Fall of thine

Not cancell'd so the Character divine.

*Sylvestre*, tr. of *Du Bartas's Weeks*, i. 6.

Their lous they on the tenter-hooks did racke,  
Rost, boy'd, bak'd, *too too* much white, claret, sacke,  
*John Taylor*, *Pennilesse Pilgrimage*, quoted in *N. and Q.*, [7th ser., X. 498.]

The rigour and extremity of law

Is sometimes *too-too* bitter.

*Ford*, *Perkin Warbeck*, ii. 2.

Hence — (b) As an adjective or an adverb, very good; very well: used absolutely. *Ray*, *English Words* (ed. 1691), p. 76. (c) As an adjective, superlative; extreme; utter; hence, enraptured; gushing: applied to the so-called esthetic school, their principles, etc., in allusion to their exaggerated affectation. See *estheticism*, 2. [Colloq.]

Let the exclusive *too-too* aesthetes tolerate the remark that music and painting do not exist for them, or even for the real masters in their respective arts, but for their power of addressing, influencing, and delighting the masses of mankind. *N. and Q.*, 7th ser., XI. 30.

**too**<sup>2</sup>, *prep.* An obsolete spelling of *to*<sup>1</sup>.

**too**<sup>3</sup>, *n.* An old spelling of *toe*.

**too**<sup>4</sup>, *n.* and *a.* A dialectal spelling of *two*.

**too**<sup>5</sup> (tō), *v. i.* See *teu*<sup>1</sup>.

**tootart** (tō'ärt), *n.* [Native Australian.] A valuable eucalypt of southwestern Australia, *Eucalyptus gomphocephala*. It grows 120 feet high, with a clear trunk of 50 feet. The wood is one of the strongest known, very heavy, very durable under exposure, unweildable, and unusually free from defects. It is used in ship-building for beams, keelsons, stern-posts, and other works below the line of flotation, where great strength is required and weight is not objectionable. It would be available for piles, and many other purposes. Also *tuart* and *teuart*.

**took** (tūk), *Preterit* and obsolete or vulgar past participle of *take*.

**tool**<sup>1</sup> (töl), *n.* [*ME. tool*, *tole*, *tol*, < *AS. töl*, in glosses also spelled *tool*, *töhl* = *Icel. töl*, neut. pl., tools; perhaps a contr. of a Teut. base \**tanila*, < *AS. tawian* = *OHG. zaujan*, *zoujan*, *MHG. zowen*, *G. zauen* = *Goth. tawjan*, prepare: see *taw*<sup>1</sup>.] 1. A mechanical implement; any implement used by a craftsman or laborer at his work; an instrument employed for performing or facilitating mechanical operations by means of percussion, penetration, separation, abrasion, friction, etc., of the substances operated upon, for all of which operations various motions are required to be given either to the tool or to the work. Such machines as the lathe, planer, slotting-machine, and others employed in the manufacture of machinery, are usually called *machine-tools*.

Of alkinnes craftes I controued *toles*,

Of carpentrie, of keruceres, and compassed masouns,

And lerned hem leuel and lyne though I loke dymme.

*Piers Plowman* (B), x. l. 177.

Take thi spades, rake, knyfe, and shovelle,

And evry toole in beres greus defoule.

*Palladius*, *Husbandrie* (E. E. T. S.), p. 31.

Of Angling and the Art thereof I sing,

What kind of *tools* it doth behove to have.

*J. Denny*, *Arber's Eng. Garner*, I. 147.

The hoe and the spade were not the *tools* he [Emerson] was meant to work with. *O. W. Holmes*, *Emerson*, xi.

(a) One of the small pallets or stamps used by the book-binder's finisher to work out the designs on the cover of a book: applied to stamps used by hand. (b) A small round brush used by house-painters for painting moldings at the margins of panels, window-sashes, and narrow fillets.

2. By extension, something used in any occupation or pursuit as tools are used by the mechanic: as, literary *tools* (books, etc.); soldiers' *tools* (weapons, etc.); specifically, a sword or other weapon.

Then the gome in the grene graythied hym swythe

Gedere vp his grymme *tole*, Gawayn to smyte.

*Sir Gawayne and the Green Knight* (E. E. T. S.), i. 2261.

We alle desyren, if it mighte be,

Draw thy *tool*; here comes two of the house of the Montagues.

*Shak.*, R. and J., i. l. 87.

3. One who or that which is made a means to some end; especially, a person so used; a mere instrument to execute the purpose of another; a cat's-paw.

*tute, touter*, prob. < MD. *tuyten*, D. *tuiten*, also *toeten* = MLG. *tuten*, sound a horn, = OHG. *diotan*, MHG. *dozen*, make a loud noise, = Icel. *thjóta*, whistle as the wind, sough, resound, = AS. *theotan*, howl, make a noise, = Sw. *tjuta*, howl, = Dan. *tude*, howl, blow a horn; cf. D. *toet-horen*, a bugle-horn, MHG. *duz*, m., noise, Icel. *thyrtr*, noise, whistling wind, Goth. *thut-huarn*, horn, trumpet; perhaps orig. imitative, as the later forms are regarded.] I. *intrans.*

1. To blow a horn, a whistle, or other wind-instrument; especially, to produce harsh or discordant sounds with a horn, cornet, trumpet, whistle, or the like.

To *tute* in a horn, cornuicene.

*Levins*, Manip. Vocab. (E. E. T. S.), p. 196.

That foute musike which a horne maketh, being *tooted* in. *Chaloner*, tr. of Morie Encomium, H. b. (Nares.)

2. To give out sound, as a wind-instrument when blown: usually a word of disparagement.

O lady, I heard a wee horn *toot*.

And it blew wonder clear.

*Lord Barnaby* (Child's Ballads, II. 309).

You are welcome to my thoughts; and these are, to part with the little *tooting* instrument in your jacket to the first fool you meet with.

*J. F. Cooper*, Last of Mohicans, xii.

3. To make sounds like those of a horn or a steam-whistle; trumpet.

We made a very happy escape from the elephants. They soon got our scent, raised their trunks, *tooted* as no locomotive could *toot*, their ears sticking out straight, and off they went through the trees and tall grass.

*The Century*, XXXIX. 613.

4. Specifically, to call: said of some grouse.

The [pinnated] Grouse in the spring commences about April to *toot*, and can be heard nearly a mile.

*Sportsman's Gazetteer*, p. 124.

5. To whine; cry. *Hallivell*. [Prov. Eng.]

II. *trans.* 1. To sound on a horn, trumpet, pipe, or the like.

Joekie, say, What might he be

That sits in yonder hill,

And *tooteth* out his notes of glee?

*W. Browne*, Shepherd's Pipe, ii.

2. To blow, as an instrument of sound.

The elephant . . . turned and went down the hill, . . . *tooting* his trumpet as though in great fright.

*The Century*, XXXIX. 613.

**toot**<sup>2</sup> (töt), *n.* [*< toot*<sup>2</sup>, *v.*] 1. A sound made by blowing on a wind-instrument; a note as of a horn; a blast.

But I hae nae broo' of charges, since that awfu' morning that a *toot* of a horn, at the Cross of Edinburgh, blew half the faithfu' ministers of Scotland out of their pulpits.

*Scott*, Heart of Mid-Lothian, xxxix.

Go to the farthest end of the room and blow the pipe in gentle *toots*.

*Mayer*, Sound, p. 78.

2. A blow-out; a spree: as, to go on a *toot*.

[Slang. U. S.]

**toot**<sup>3</sup> (töt), *n.* [Origin uncertain; cf. *tout*<sup>1</sup>, *n.*]

1. A lazy, worthless person. [Slang.]

Marsh Yates, the "shifless *toot*," and his beautiful, energetic wife.

*Harper's Mag.*, LXXVII. 501.

2. The devil. *Hallivell*. [Prov. Eng.]

**tooter**<sup>1</sup> (tö'tër), *n.* [Early mod. E. *toter*; < ME. *\*totere*, *totere*; < *toot*<sup>1</sup> + *-er*.] 1. That which projects or stands out.

*Hor.* The world will take her for an unicorn. . . .

*Val.* Examine but this nose.

*So.* I have a *toter*.

*Val.* Which placed with symmetry is like a fountain I' the middle of her face. . . .

*Aur.* A nose of wax! *Shirley*, Duke's Mistress, iv. 1.

2. One who looks or peers; a watchman.

These thingus forsothe seide the Lord to me, Go, and put a *tootere*; and what euer thing he shal see, telle he.

*Wyclif*, Isa. xxi. 6.

**tooter**<sup>2</sup> (tö'tër), *n.* [Early mod. E. also *toter*; < *toot*<sup>2</sup> + *-er*.] 1. One who toots; one who plays upon a pipe, horn, or other wind-instrument.

Hark, hark! these *toters* tell us the king's coming.

*Fletcher and Rowley*, Maid in the Mill, iii. 1.

2. That on which one toots, or on which a sound is produced by blowing.

Here is a boy that loves to . . . coast, skate, fire crackers, blow squash *tooters*.

*O. W. Holmes*, Professor, viii.

A hard (horny, dental, osseous, chitinous, calcareous, or silicious) body or substance, in the mouth, pharynx, gullet, or stomach of an animal, serving primarily for the apprehension, mastication, or trituration of food, and secondarily as a weapon of attack or defense, and for a variety of other purposes, as digging in the ground, climbing, articulation of vocal sounds, etc. In man and mammals generally teeth are confined to the mucous membrane of the premaxillary, supramaxillary, and inframaxillary bones, and true teeth are present throughout the class, with a few exceptions. (See *Edentata*, *Monotremata*.) True teeth existed in Cretaceous birds, as the *Archaeopteryx*, *Hesperornis*, and *Icthyornis*; no recent birds have teeth. (See *dent* under *Icthyornis*.) In reptiles, batrachians, and fishes teeth are the rule; in these classes they may be not only on the maxillary bones of either or both jaws, but also on the palatal bones, pharyngeal bones, vomer, etc. Chelonians are devoid of teeth, their horny beaks answering for biting, as is also the case with birds.

True teeth are usually attached to the bones of the jaws by being socketed in pits or grooves called *alveoli*, this mode of articulation being termed *gomphosis*. In reptiles, etc., the attachment to bone may be more intimate, and may occur in several ways, whence the terms *acrodont*, *holcodont*, *pleurodont*, *theodont*, etc. True teeth in vertebrates are *endoneuric* structures which develop from odontoblasts, and consist chiefly of a substance called *dentin*, to which may be added *cement* and *enamel*; which hard structures, as a rule, are disposed about a *pulp-cavity*, filled with soft *tooth-pulp*, or the nutrient and nervous structures of the tooth. This cavity may close up or remain wide open; in the latter case, teeth grow perennially or for an indefinite period. (See *Gires*, *Rodentia*.) Dentin resembles bone in most respects, and differs especially in the fineness and parallelism of the tubules which radiate from the central cavity. Ivory is a variety of dentin. The hard tissues of teeth are sometimes intricately folded (see *labyrinthodont*, with cut); but individual teeth are seldom compounded (see, however, *Orycteropodidae*). Teeth of monotremes, when present, are horny and not dental. There may be one or several rows of maxillary teeth, which successively come into position, as the molars of the elephant, or are simultaneously in position, as is the rule. In all mammals true teeth are confined to a single row, upon the bones above mentioned; and in none are there more than two sets of teeth. Mammals with only one set of teeth are termed *monophodont*; those with two sets, *diphyodont*. In diphyodont mammals the first or temporary set of teeth are termed *milk-teeth*; these are sometimes shed in the womb; the second set are the permanent teeth. According to their special shapes, or their special seats, teeth of diphyodonts are divided into three sets—*incisors*, *canines*, and *molars*. An incisor of the upper jaw is any tooth situated upon the premaxillary bone; an incisor of the under jaw is any tooth of the mandible which opposes a superior incisor. An upper canine is the single first or most anterior tooth of the supramaxillary bone; an under canine is the tooth which opposes this one, and on closure of the mouth passes in front of it. A molar tooth is one of the back teeth, or grinders. Molars are divided into false molars, premolars, or bicuspids, and true molars; the premolars being those which are preceded by milk-molars, the molars proper being those which have no predecessors. Thus, the permanent dentition of a diphyodont mammal differs from the milk-dentition by the addition of true molars. This classification of the teeth enables us to construct convenient dental formulae. (See *dental formula*, under *dental*.) The incisors are generally simple, single-rooted, nipping or cutting teeth, whence the name (but see *soricid*, with cut). The canine is likewise a simple tooth, but one which in the *Carnivora*, as a dog or cat, is lengthened and even saber-like (the name is taken from its condition in the dog, and retained whether this tooth be actually caniniform or not). The molar, grinding, or crushing teeth usually have more than one root or fang, and more than one cusp or prominence upon the crown; they are hence called *bicuspid*, *tricuspid*, *multicuspid*, etc., as the premolars (bicuspids) and molars (multicuspids) of man; their crowns are variously tuberculous, giving rise to special descriptive terms, as *bunodont*, *symphodont*, *batheodont*, *selodont*, *mastodont*, etc., and also *bi-tri-quadr*, *quinque-tuberculata*, etc. One molar or premolar above and below, in carnivorous quadrupeds, is specially modified with a sharp crest which cuts against its fellow of the other jaw like a scissor-blade; such a tooth is termed *sectorial* or *carnassial*. A tooth (incisor or canine) which projects from the mouth is termed a *tusk* or *tush*, as in the elephant, walrus, narwhal, wild boar and others of the pig family, and the fossil saber-toothed cats (*Machærodontinae*). (See *cut* under *Monodon*, *saber-toothed*, and *tusk*.) A tooth may be peculiarly folded upon itself to serve as a channel for the conveyance of a poisonous fluid, as in the rattlesnake: such a tooth is termed a *fang*. (See *poison-fang*, and *cut* under *Proctatus*.) A tooth is commonly divided into a *crown*, a neck or *gingivum*, embraced by the gum, and a *fang* or *root*—the latter, which may be multiple, being socketed

in the alveolar process of the jaw. Any animal's set of teeth, or the character of that set, constitutes its *dentition*. Decay of the teeth is *caries*, and a decaying tooth is said to be *carious*. The scientific study and description of teeth is *odontology* or *odontography*. In pursuing this subject, see the various words above italicized, and many of the cuts cited under *skull*, as well as those under *Desmodontes*, *maxillary*, *palate*, *Pathodontia*, *scelopodidae*, and *supra-maxillary*.

As black as cole ichon thei were in dede,

*Generyses* (E. E. T. S.), i. 1943.

Nothur at thy mete thy *toth* thou pyke.

*Babes Book* (E. E. T. S.), p. 14.

No vertebrate animal has *teeth* in any part of the alimentary canal save the mouth and pharynx—except a snake (*Rachiodon*), which has a series of what must be termed *teeth*, formed by the projection of the inferior spinous processes of numerous anterior vertebrae into the oesophagus.

*Hatch*, Anat. Vert., p. 1.

2. In *Invertebrata*, one of various hard bodies, presenting great variety of position and structure, which may occur in the alimentary canal from the mouth to the stomach. Such teeth are always ecdoneuric, cuticular, or epithelial structures, as the numerous teeth upon the lingual ribbon of gastropods, as the snail. These are true teeth, of chitinous structure, very numerous, and very regularly arranged in cross-rows each of which usually consists of differently shaped teeth distinguished by name (as *median*, *admedian*, *uncinal*, etc.), and the whole character of which is important in classification. (See *odontophore*, *cut* under *radula* and *ribbon*, and various classificatory terms cited under *radula*.) Various hard tooth-like or jaw-like projections receive the name of *teeth*, as certain chitinous protuberances, called *cardiac* or *gastric teeth*, in the stomach of the lobster, crab, etc.

3. In *zool.*, a projection resembling or likened to a tooth. Specifically—(a) A horny process of the cutting edge of the beak of many birds, as the falcon and shrike. See *cut* under *dentirostral*. (b) A process of the shell in many bivalves, at or near the hinge. Thus, a genus *Anodonta* is so named from the absence of these teeth, conspicuous in related genera. See *cardinal teeth* (under *cardinal*), and *cut* under *bivalve*, *Caprotinidae*, and *Plicatula*. (c) A tooth-like or jaw-like part (sometimes a jaw itself) of various invertebrates. See *cut* under *Clypeastridae* and *lantern of Aristotle* (under *lantern*).

4. In *bot.*, any small pointed marginal lobe, especially of a leaf: in mosses applied to the delicate fringe of processes about the mouth of the capsule, collectively known as the *peristome*. See *peristome*, *Musci*, and *cut* under *cilium* and *Dicranum*.—5. Any projection corresponding to or resembling the tooth of an animal in shape, position, or office; a small, narrow, projecting piece, usually one of a set. (a) One of the projections of a comb, a saw, a file, a harrow, or a rake.

Cheese that would break the *teeth* of a new hand-saw  
I could endure now like an estrich.

*Fletcher* (and another), Love's Pilgrimage, ii. 2.

(b) One of the tines or prongs of a fork. (c) One of the sharp wires of a carding-instrument. (d) One of a series of projections on the edge of a wheel which catch on corresponding parts of a wheel or other body; a cog. See *cut* under *pinion*.

6. *pl.* In a rose-cut diamond, the lower zone of facets. They form a truncated cone-shaped base for the crown.—7. In *venering*, the roughness made by the tooth-planting on the surfaces to be glued together to afford a good hold for the glue.—8. Figuratively, a fang; the sharp or distressing part of anything.

Blow, blow, thou winter wind; . . .

Thy *tooth* is not so keen.

Because thou art not seen.

*Shak.*, As you Like it, ii. 7. 177.

9. *Palate*; *relish*; *taste*, literally or figuratively. Compare a *sweet tooth*, below.

*Chart.* He's an excellent musician himself, you must note that.

*May.* And having met one fit for his own *tooth*, you see, he skips from us.

*Dekker and Webster*, Northward Ho, iv. 4.

These are not dishes for thy dainty *tooth*.

*Dryden*, tr. of Persius's Satires, iii. 229.

It was much the same everywhere—affable greetings, pressing invitations, great courtesy, but nothing, absolutely nothing, for the impatient *tooth* of a correspondent.

*Harper's Mag.*, LXXVIII. 87.

10. *Keep*; *maintenance*. *Hallivell*. [Prov. Eng.]—Addendum of a tooth. See *addendum*, *Admedian teeth*, in *conch*. See *odontodonta*. Armed to the teeth. See *armed*. Artificial teeth, pieces of ivory or porcelain fashioned in the shape of natural teeth, used to replace the latter which have been lost or extracted. When made of porcelain they are further known as *incorruptible*, *mineral*, or *vitrescent teeth*.—A *sweet tooth*, a fondness for sweet food.

I am glad that my Adonis hath a *sweete tooth* in his head.

*Lodge*, Euphues (ed. Athol), p. 508.

**Basiocipital tooth**. See *basiocipital*.—**Bicuspid teeth**. See *bicuspid*. Bulb of a tooth. See *bulb*. By or with the skin of one's teeth. See *skin*.—**Canine teeth**. See *def. 1*, and *enamel*.—**Caniniform tooth**, any tooth, whether a canine or other, that resembles the specialized canine of a carnivore in size and shape: as, lateral incisors *caniniform*; canines not *caniniform*.—**Capsule of teeth**, the membrane of Nasmuth. See *Nasmuth's membrane*, under *membrane*.—**Cardinal teeth**, in *conch*, the hinge-teeth of a bivalve. See *def. 3* (b), *hinge-tooth*, and

**tooth-net** (tôth'net), *n.* A large fishing-net anchored. [Scotch.]

**tooth-ornament** (tôth'ôr-na-ment), *n.* In medieval arch., a molding of the Romanesque and Early Pointed styles, especially frequent in Normandy and in England. It consists of a square four-leaved flower, the center of which projects in a point. It is generally inserted in a hollow molding, with the flowers in close contact with one another, though they are not unfrequently placed at short distance apart, and in rich suits of moldings are often repeated several times. Compare *drop-tooth*, and *nail-headed molding* (under *nail-headed*).

Tooth-ornament—Lancet in Caricature, Engestr.

**tooth-paste** (tôth'pâst), *n.* A dentifrice in the form of paste.

**toothpick** (tôth'pik), *n.* and *a.* [*< tooth + pick*]. Cf. *pick-tooth*. 1. *n.* 1. An implement, as a sharpened quill or a small pointed piece of wood, for cleaning the teeth of substances lodged between them.

In the seventeenth century toothpicks were often of precious material, as gold; and gold and silver toothpicks are toilet articles still sometimes used.

I have all that's requisite  
To the making up of a signior: my spruce ruff,  
My hooded cloak, long stocking, and panned hose,  
My case of toothpicks, and my silver fork  
To convey an olive neatly to my mouth.

Masinger, Great Duke of Florence, iii.

2. A Bowie-knife. [Slang, U. S.]

Things supposed to be required by "honor" will coarsen as they descend among the vulgar: . . . the duel will develop into a street or bar-room fight, with "Arkansas toothpicks" as the weapons. *The Nation*, Dec. 7, 1892, p. 485.

3. An umbelliferous plant, *Ammi Visnaga*, of the Mediterranean region; so named from the use made of the rays of the main umbel, which harden after flowering. Also called *toothpick bishop's-weed*, and *Spanish toothpick*.

II. *a.* Shaped like a toothpick: especially noting boots and shoes having narrow, pointed toes. [Slang.]

**toothpicker** (tôth'pik'ér), *n.* [*< tooth + picker*]. 1. One who or that which picks teeth.

They write of a bird that is the crocodile's *toothpicker*, and feeds on the fragments left in his teeth whiles the serpent lies a-sunning. *Rev. T. Adams, Works*, I. 83.

2. That with which the teeth are picked; a toothpick. [Rare.]

Go to your chamber, and make cleane your teeth with your *tooth-picker*, which should be either of iorie, silver, or gold. *Babees Book* (E. E. T. S.), p. 252.

**tooth-plugger** (tôth'plug'ér), *n.* A dental instrument for filling teeth. See *plugger*.

**tooth-powder** (tôth'pou'dér), *n.* A powder used in cleaning the teeth.

**tooth-pulp** (tôth'pulp), *n.* Connective and other soft tissue filling the pulp-cavity of a tooth. It is in part nervous, and is very sensitive when exposed to the air through caries of the dentin.

**tooth-rake** (tôth'râk), *n.* A toothpick.

Denticulipium, . . . Curedent. A tooth-scraper, or *tooth-rake*. *Nomenclator*, (Nares.)

**tooth-rash** (tôth'râsh), *n.* A cutaneous eruption sometimes occurring during the process of dentition: same as *strophulus*.

**tooth-ribbon** (tôth'rib'on), *n.* The lingual ribbon, or radula, of a mollusk. See *odontophore*, and cuts under *radula* and *ribbon*. *P. P. Carpenter*.

**tooth-sac** (tôth'sak), *n.* Connective tissue in the fetus containing the germ of the teeth.

**tooth-saw** (tôth'sâ), *n.* In dentistry, a fine frame-saw for sawing off a natural tooth in order to set an artificial pivot-tooth, for sawing between teeth which are overcrowded, etc.

**tooth-scraper** (tôth'skrâ'pér), *n.* A toothpick. See the quotation under *tooth-rake*.

**tooth-shell** (tôth'shel), *n.* Any member of the genus *Dentalium*, family *Dentaliidae*, order *Solenogonotha*, or class *Scaphopoda*. The shells are symmetrical, tubular, conical, and generally curved. See the technical terms. Also called *tooth shell*.—False *tooth-shells*, the *Cœcidæ*.

**tooth-soap** (tôth'sôp), *n.* Soap for cleaning the teeth. *Topsell*, Beasts, 1607. (*Hallwell*.)

**toothsome** (tôth'sum), *a.* [*< tooth + -some*]. Palatable; pleasing to the taste; relishing.

Though less *toothsome* to me, they were more wholesome for me. *Fidler*. (*Imp. Dict.*)

**toothsomely** (tôth'sum-li), *adv.* In a toothsome manner.

**toothsomeness** (tôth'sum-nes), *n.* The state or character of being toothsome; pleasantness to the taste.

**toothstick** (tôth'stik), *n.* A toothpick.

In a manuscript volume of the private accounts of Francis Sitwell, of Renishaw, from August 20, 1728, to March 2, 1748, the following entries occur: 1729, Sept. 6. "Disbursed at London [among many other items] a silver *tooth-stick* 8d" . . . *N. and Q.*, 7th ser., VII. 30.

**tooth-violet** (tôth'vi'ô-let), *n.* Same as *coralwort*, 1.

**tooth-winged** (tôth'wingd), *a.* Having, as certain butterflies, the outer margin of the wings dentate or notched: opposed to *simple-winged*: applied to some of the *Nymphalidæ*, as members of the genera *Grapta* and *Vanessa*.

**toothwort** (tôth'wort), *n.* [*< tooth + wort*].

1. A plant, *Lathræa squamaria*, so named from the tooth-like scales on the rootstock and the base of the stem, or according to some from the capsules, which when half-ripe strongly simulate human teeth. Also called *clown's lungwort*.—2. A plant of the genus *Dentaria*: same as *coralwort*, 1.—3. See *Plumbago*, 2.—4. The shepherd's-purse, *Capsella Bursapastoris*: an old use.

**tooth-wound** (tôth'wönd), *n.* A wound inflicted by the tooth of an animal. It generally belongs to the class of punctured wounds, and is prone to become seriously inflamed, even when the animal inflicting it is not venomous.

**toothy** (tô'thi), *a.* [*< tooth + -y*]. 1. Having teeth; full of teeth. [Rare.]

Let the green hops lie lightly; next expand  
The smoothest surface with the *toothy* rake.  
*Smart*, Hop-Garden, ii.

2. Toothsome. [Colloq.]

A certain relaxation subsequently occurs, during which meat or game which is at first tough becomes more tender and *toothy*. *Allen and Neurol.*, X. 459.

3. Biting; carping; crabbed; peevish. [Prov. Eng. and Scotch.]

*Toothy* critics by the score,  
In bloody raw [row]. *Burns*, To W. Creech.

**tooting-hill** (tô'ting-hil), *n.* [*< ME. totyng-hylle, tytyng-hylle*; *< tooting*, verbal *n.* of *toot*<sup>1</sup>, *v.*, + *hill*<sup>1</sup>]. Same as *toothill*. *Prompt. Parv.*, p. 497.

**tooting-hole** (tô'ting-höl), *n.* [*< ME. totyng-hole*; *< tooting*, verbal *n.* of *toot*<sup>1</sup>, *v.*, + *hole*<sup>1</sup>]. A spy-hole.

They within the citee perceived well this *tooting-hole*, and laied a pece of ordynance directly against the wyndowe. *Hall*, Hen. VI., an. 6.

**tooting-place** (tô'ting-pläs), *n.* [*ME. totyng-place*; *< tooting*, verbal *n.* of *toot*<sup>1</sup>, *v.*, + *place*]. A watch-tower.

*Toting place*. *Wyckliff*, Isa. xxi. 5.

**tootle** (tô'til), *v. i.*; pret. and pp. *tootled*, ppr. *tootling*. [Freq. or dim. of *toot*<sup>2</sup>.] To toot gently or repeatedly; especially, to produce a succession of weak modulated sounds upon a flute.

Two Fiddlers scraping Lilla burlero, my Lord Mayor's Delight upon a Couple of Crack'd Crows, and an old Oliverian trooper *tootling* upon a Trumpet.  
Quoted in *Ashton's Social Life in Reign of Queen Anne*, (I. 85).

We are all for *tootling* on the sentimental flute in literature. *R. L. Stevenson*, Inland Voyage, p. 14.

**too-too** (tô'tô), *adv.* and *a.* See phrase under *too*<sup>1</sup>.

**toot-plant** (tô't-plant), *n.* [*< toot* (*< Maori tutu*) + *plant*<sup>1</sup>]. A large shrub of New Zealand, *Coriaria sarmentosa* (if not the same as *C. rus-cifolia*), having long four-angled branches, large leaves, and gracefully drooping panicles. The plant is poisonous and destructive to cattle—not, however, it is said, to goats. The property appears to be that of an irritant narcotic. The berry-like fruit without the seeds is edible. Also *wineberry*.

**toot-poison** (tô't-poi'zn), *n.* The poison of the toot-plant.

**too-who**, *n.* and *v.* See *tu-who*.

**toozle** (tô'zli), *v. t.* A dialectal variant of *tousle*.

**toozoo** (tô-zô'), *n.* [Imitative.] The cushat or ring-dove, *Columba palumbus*. [Prov. Eng.]

Skt. *tapas*, heat. According to Pliny (bk. xxxvii. c. 8), the name is derived from that of *Topazas*, an island in the Red Sea, the position of which is 'conjectural,' < *Gr. τῶπαζιον*, conjecture. Others place this conjectural island in the Arabian Sea.] 1. A mineral of a vitreous luster, transparent or translucent, sometimes colorless, often of a yellow, white, green, or pale-blue color. It is a silicate of aluminum in which the oxygen is partly replaced by fluorine. The fracture is subconchoidal and uneven; the hardness is somewhat greater than that of quartz. It usually occurs in prismatic crystals with perfect basal cleavage, also massive, sometimes columnar (the variety pycnite). Topaz occurs generally in granitic rocks, less often in cavities in volcanic rocks as rhyolite. It is found in many parts of the world, as Cornwall, Scotland, Saxony, Siberia, Brazil, Mexico, and the United States. The finest varieties are obtained from the mountains of Brazil and the Ural Mountains. Those from Brazil have deep-yellow tints; those from Siberia have a bluish tinge; the Saxon topaz has a pale wine-yellow. The purest topazes from Brazil, when cut in facets, closely resemble the diamond in luster and brilliance.

2. In *her.*, the tincture or in blazoning by the precious stones. See *blazon*, *n.*, 2.—3. A humming-bird, *Topaza pella* or *T. pyra*. False topaz, a transparent pale-yellow variety of quartz. —*Oriental topaz*, a name for yellow sapphire, or corundum. See *oriental*, 2.—*Pink topaz*, pink or rose-colored topaz, produced from the yellow Brazilian topaz by strong heating. If the heat is continued too long, the color is entirely expelled, and the topaz becomes colorless. Also *rose topaz*. —*Scottish topaz*. Same as *smoky topaz*. —*Siberian topaz*, the white or bluish-white topaz found in Siberia. —*Smoky topaz*. See *smoky*. —*Spanish topaz*, a variety of smoky quartz the color of which has been changed by heat from smoky to dark-brown, golden-brown, or golden-yellow. —*Star-topaz*, a yellow star-sapphire. See *asteriated sapphire*, under *sapphire*.

**Topaza** (tō-pā'zā), *n.* [NL. (G. R. Gray, 1840), < *Gr. τῶπαζος*, topaz; see *topaz*.] A genus of humming-birds, the topaz hummers. The curved bill is longer than the head, and the tail is forcipate with a long slender pair of feathers next to the middle pair.

Topaz Hummingbird, *Topaza pella*.

Two species are known, *T. pella* and *T. pyra*, both of Cayenne, Trinidad, and the Amazon region. The long tail and beak give these hummers a length of 5½ inches, though the body is small. The coloration is gorgeous; in *T. pella* the back is shining dark-red, changing to orange-red on the rump, the head is black, the throat metallic greenish-yellow with a central topaz sheen and black border; the other under parts are glittering crimson, with golden-green vent.

**topazine** (tō'paz-in), *a.* [*< topaz + -ine1*.] In *entom.*, yellow and semi-transparent with a glassy luster, as the ocelli of certain insects and the eyes of some spiders.

**topazolite** (tō-paz'ō-lit), *n.* [*< Gr. τῶπαζος*, topaz, + *λίθος*, stone.] A variety of garnet, of a topaz-yellow color, or an olive-green, found in Piedmont. See *garnet1*.

**topaz-rock** (tō'paz-rok), *n.* [*Tr. G. topasfēlōs* or *topasbrockenfels*.] A rock which is a peculiar result of contact metamorphism. It is made up of fragments of an aggregate of quartz and tourmaline, which fragments (brocken) are cemented by a mixture of quartz and topaz. The locality of this peculiar rock is the vicinity of the Schreckenstein in the Erzgebirge.

**top-beam** (tōp'bēm), *n.* Same as *collar-beam*.

**top-block** (tōp'blok), *n.* 1. *Naut.*, a large iron-bound block hung to an eye-bolt in the cap, used in swaying and lowering the topmast.—2. In a vehicle, a projection upon which the bows of the top rest when it is down. *E. H. Knight*.

**top-boot** (tōp'böt), *n.* A boot having a high top; specifically, one having the upper part of the leg of a different material from the rest and separate from it, as if turned over, or designed to be turned over. The jack-boots of the seventeenth century and later had the top somewhat projecting from the leg, as if to allow more freedom to the knee, and this upper part was of thinner leather than the leg, and sometimes, though rarely, of a colored leather, not requiring blacking. **topographist** (tō-pog'ra-fist), *n.* [*< topograph-y + -ist.*] A topographer.

**topography** (tō-pog'ra-fi), *n.* [*< F. topographie* = *Sp. topografía* = *Pg. topographia* = *It. topografia*, *< LL. topographia*, *< Gr. τοπογραφία*, a description of a place, *< τοπος*, place, describing a place, as a noun a topographer, *< τόπος*, place, + *γράφειν*, write.] 1. The detailed description of a particular locality, as a city, town, estate, parish, or tract of land; the detailed description of any region, including its cities, towns, villages, castles, etc.

In our topographie we haue at large set forth and described the site of the land of Ireland.

Geraldus Cambrensis, Conquest of Ireland, First Pref. (Holinshed's Chron., I.).

2. The features of a region or locality collectively: as, the *topography* of a place.—3. In *surv.*, the delineation of the features, natural and artificial, of a country or a locality.—4. In *anat.*, regional anatomy; the mapping of the surface of the body with reference to the parts and organs lying beneath such divisions of the surface, or the bounding of any part of the body by anatomical landmarks. The best examples of the former case of topography are the divisions of the abdominal and thoracic surfaces by arbitrary lines (see *cuts under abdominal and thoracic*); of the latter case, the natural bounds of the axilla, the inguen, the poples, Scarpa's triangle, the several surgical triangles of the neck, etc. See *triangle*.

5. In *zool.*, the determination of those different parts of the surface of an animal which may be conveniently recognized by name, for the purpose of ordinary description of specimens: as, the *topography* of a bird, a crab, an insect. Good examples are those figured under *bird* and *Brachyura*. Ordinary descriptive zoology proceeds very largely upon such topography.—**Military topography**, the minute description and delineation of a country or a locality, with special reference to its adaptability to military purposes.

**topolatry** (tō-pol'a-tri), *n.* [*< Gr. τόπος*, place, + *λατρία*, worship.] Worship of or excessive reverence for a place or places; adoration of a place or places. [Recent.]

This little land (Palestine) became the object of a special adoration, a kind of *topolatry*, when the Church mounted with Constantine the throne of the Cæsars.

Macmillan's Mag.

**topology** (tō-pol'ō-jī), *n.* [*< Gr. τόπος*, place, + *-λογία*, *< λέγειν*, speak: see *-ology.*] 1. The art or method of assisting the memory by associating the objects to be remembered with some place which is well known.—2. A branch of geometry having reference to the modes of connection of lines and surfaces, but not to their shapes.

**Toponeura** (top-ō-nū'rā), *n. pl.* [*NL.*, *< Gr. τόπος*, place, + *νεύρον*, nerve.] A division of *Hydrozoa*, containing those which are *toponeural*: distinguished from *Cycloneura*. The division corresponds to *Scyphomedusæ*. *Eimer*.

**toponeural** (top-ō-nū'ral), *a.* [*Toponeura* + *-al.*] Having several separate marginal bodies or sense-organs, as a *scyphomedusan*; of or pertaining to the *Toponeura*; not *cycloneural*.

**top-onion** (top'un'yōn), *n.* See *onion*.

**toponymy** (tō-pon'ō-mi), *n.* [*< Gr. τόπος*, place, + *ὄνομα*, name.] The place-names of a country or district, or a register of such names.

The substitution of vague descriptions of dress and arms, and a vague *toponymy*, for the full and definite descriptions and precise *toponymy* of the primitive poems.

Encyc. Brit., V, 306.

**toponym** (top'ō-nim), *n.* [*< Gr. τόπος*, place, + *ὄνομα*, *ὄνυμα*, name.] In *anat.*, a topical or topographical name; the technical designation of any region of an animal, as distinguished from any organ: correlated with *organonymy* and some similar terms. See *toponymy*. *Wilder and Gage; Leidy*.

**toponymal** (tō-pon'i-mal), *a.* [*< toponym-y + -al.*] Of or pertaining to toponymy. *Cuties*.

**toponymic** (top-ō-nim'ik), *a.* [*< toponym-y + -ic.*] Pertaining to toponymy: as, *toponymic* terminology.

**toponymical** (top-ō-nim'i-kal), *a.* [*< toponymic + -al.*] Same as *toponymic*. *Wilder and Gage*.

**toponymy** (tō-pon'i-mi), *n.* [*< Gr. τόπος*, a place, + *ὄνομα*, *ὄνυμα*, name.] In *anat.*, the designation of the position and direction of parts and organs, as distinguished from the names of the parts and organs themselves, which is the province of *organonymy*; regional or topographical nomenclature; topical terminology.—**Extrinsic toponymy**, the use of descriptive terms based upon the attitude of an animal in relation to the earth, as anterior, posterior, vertical, horizontal, etc. See the quotation under *superior*, *a.* 2.—**Intrinsic toponymy**, the use of terms referring to regions of the animal itself, regardless of its habitual posture, as dorsal, ventral, ental, ectal, etc.

**topophone** (top'ō-fōn), *n.* [*< Gr. τόπος*, a place, + *φωνή*, a sound, tone.] An instrument, invented by A. M. Mayer, for ascertaining the direction from which any sound proceeds, as the sound of a bell, whistle, or fog-horn at sea in thick weather. It consists essentially of a horizontal bar pivoted at the center so as to turn freely in any direction. At each end of the bar is a resonator opening in the same direction, each connected with a sound-tube for the corresponding ear of the observer. On moving the bar about, a position will be found in which both resonators face the source of the sound, when the sounds heard through the two tubes will be increased or reinforced. In any other position the sounds will be weakened. The direction of the sound when loudest will be at a right angle with the bar.

**top-pendant** (top'pen'dant), *n.* *Naut.*, a large rope used in sending topmasts up or down.

**topper** (top'er), *n.* [*< top<sup>1</sup> + -er<sup>1</sup>.*] 1. One who or that which tops. (*a*) The upper part, layer, or covering of anything. [Colloq.]

**torn**<sup>2</sup> (tôr), *n.* 1. A Middle English form of *turn*.—2. In *her.*, a bearing representing an ancient spinning-wheel.

**tornado** (tôr-nâd'), *n.* [See *tornado*.] A tornado. *Bailey*, 1727.

Inured to danger's direst form,

Tornado and earthquake, flood and storm.

*Scott, Rokeby*, i. 8.

**tornadic** (tôr-nad'ik), *a.* [< *tornado* + *-ic*.] Pertaining to, characteristic of, or of the nature of a tornado.

Four series of storms of *tornadic* character have passed over the States east of the Mississippi River since the beginning of the year.

*Amer. Meteor. Jour.*, I. 7.

**tornado** (tôr-nâ'dô), *n.*; pl. *tornados* (-dôz). [With the common change of terminal *-a* to *-o*, to give the word a more Spanish look (also sometimes *tornado*). < Sp. (and Pg.) *tornado*, a return, or turning about (applied appar. at one time by Spanish and Portuguese sailors to a whirling wind at sea). < *tornar*, turn, < L. *tornare*, turn: see *turn*. The Pg. name is *travado*; the Sp. name is *turbonada*.] A violent squall or whirlwind of small extent.

They were all together in a plume on Christmase-eve was two yere, when the great flood was, and there stird up such *tornados* and furicanos of tempests.

*Nashe, Lenten Staffe* (Harl. Misc., VI. 164).

We had fine weather while we lay here, only some *tornados*, or thunder-showers. *Dampier, Voyages*, an. 1681.

Specifically—(a) On the west coast of Africa, from Cape Verd to the equator, a squall of great intensity and of short duration, occurring during the summer months, but most frequently and with greatest violence at the beginning and end of the rainy season. On the western part of the coast, near Sierra Leone, these squalls come from easterly points, and blow off shore; while on the eastern part of the coast, near the mouth of the Niger, they occasionally blow on shore, partly because of a variation in the direction of the squall, and partly because of a different trend of the coast. The squall is marked by peculiar, dense, arched masses of dark cloud, furious gusts of wind, vivid lightning, deafening thunder, and torrents of rain; it produces a slight rise in the barometer and a fall of temperature amounting on the average to 9° Fahr. Similar squalls in other tropical regions are usually known by the name of *arched squalls*, but are sometimes also called *tornados*. The principal period when these squalls occur (namely, at the change of the seasons or of the monsoons) is that in which great quantities of vapor-laden air are stopped by a land wind, and accumulate near the coast, producing a hot, sultry, unstable state of the atmosphere. The tornado is the overturning process by which the atmosphere regains its stability. The wind ordinarily turns through two or three points during its progress, but in general a complete cyclonic motion is not established. (b) In the United States, east of the 100th meridian, a whirlwind of small radius and of highly destructive violence, usually seen as a whirling funnel pendent from a mass of black cloud, occurring most frequently in the southeast quadrant of an area of low pressure several hundred miles from its center, and having a rapid progressive movement, generally toward the northeast. The principal condition precedent to the formation of a tornado, just as for a thunder-storm, is an unstable state of the atmosphere. In the tornado a whirling motion from right to left, of tremendous energy, is generated in a mass of clouds, and is often maintained for several hours, while in the ordinary thunder-storm a complete cyclonic motion probably seldom becomes established. Tornados generally arise just after the hottest part of the day, when the atmosphere has its maximum instability; the months of greatest frequency are April, May, June, and July. The destruction in a tornado may be caused either by the surface wind which is forced in on all sides to feed the ascending current of the tornado-funnel, or by the grating winds of the funnel itself when sufficiently low to come within the reach of buildings; in the latter case no structure, however strongly built, is apparently able to withstand the wind's enormous force.

**tornaria** (tôr-nâ-ri-â), *n.* [NL., < *tornus*, a lathe (see *turn*), + *-aria*.] The echinopædic-like larva of *Balanoglossus*, bearing a great resemblance to the larvæ of some of the echinoderms, as starfishes; originally the name of a pseudogenus, retained to designate the objects defined. See *Balanoglossus* (with cut).

**tornarian** (tôr-nâ-ri-an), *a.* [< *tornaria* + *-an*.] Of or pertaining to a tornaria; resembling the larva of *Balanoglossus*.

**Tornatella** (tôr-na-tel'ä), *n.* [NL. (Lamarek, 1812), < L. *tornatus*, turned in a lathe, < *tornare*, turn (see *turn*), + dim. term. *-ella*.] The typical genus of the family *Tornatellidæ*: same as *Actæon*.

**Tornatellidæ** (tôr-na-tel'i-dê), *n.* pl. [NL., < *Tornatella* + *-idæ*.] That family of opisthobranchiate gastropods whose type genus is *Tornatella*, having a developed spiral shell: same as *Actæonidæ*.

**torn-crenate** (tôr-n'kre-nât), *a.* In *bot.*, crenate in having the margin torn, as certain lichens.

**torn-down** (tôr-n'doun), *a.* and *n.* 1. *a.* Rough; riotous; turbulent; rebellious; ungovernable; hence, overpowering of its kind. [Prov. Eng. and U. S.]

You know I was a girl onst; led the General a dance of it, I tell you. Yes, a real *torn-down* piece I was!

*W. M. Baker, New Timothy*, xxiii.

**II. n.** An unruly or unmanageable person. [Prov. Eng. and U. S.]

**torneament**, *n.* An obsolete form of *tournament*.

**tornilla, tornillo** (tôr-nîl'ä, -ô), *n.* [Mexican name, < Sp. *tornillo*, a screw, dim. of *torno*, turn, turning-wheel: see *turn*.] The screw-pod mesquit. See *mesquit*<sup>2</sup>.

**torriquet**, *n.* See *tourriquet*.

**torography** (tôr-nog'ra-fi), *n.* [Irreg. < *tor-nado* + Gr. *-γραφία*, < *graphein*, write.] The description and theory of tornados. [Rare.]

**torob**, *v. t.* [ME. *torobben*; < *to-2* + *rob*.] To steal wholly; take entirely away.

My joye, myn herte ye alle *to-robbidd*,

*MS. Cantab. B. ii. 38, f. 47.* (Halliwell.)

**toroidal** (tôr-ô'dal), *a.* [< *toreô*, *torus*, + *-oid* + *-al*.] Having a shape like an anchor-ring, or a surface generated by the revolution of a circle about a line in its plane; pertaining to such a surface, or to a family of such surfaces.—**Toroidal function**. See *function*.

**torose** (tôr'ôs), *a.* Same as *torous*.

**torosity** (tôr-ôs'i-ti), *n.* [< *torose* + *-ity*.] The state of being torous; muscular strength; muscularity. *Bailey*, 1727.

**torotoro** (tôr-rô-tô-rô), *n.* [Native name.] A Papuan kingfisher, *Syma torotoro*.

**torous** (tôr'us), *a.* [< L. *torosus*, full of muscle or flesh, < *torus*, a bulging, a protuberance, muscle: see *torus*.] Bulging; swelling; muscular. Specifically—(a) In *bot.*, cylindrical, with bulges or constrictions at intervals; swelling in knobs at intervals. (b) In *zool.*, protuberant; knobbed; tuberculated. Also *torose*.

**tor-ousel** (tôr'ô'z), *n.* The ring-ousel. [Devonshire, Eng.]

**Torpedinidæ** (tôr-pê-din'i-dê), *n. pl.* [NL., < *Torpedo* (-din-) + *-idæ*.] A family of batoid fishes, typified by the genus *Torpedo*; the electric rays, noted for their power of giving shocks by means of a sort of galvanic battery with which they are provided. In this respect the electric rays are peculiar among elasmobranchs, though some fishes of a different class are provided with similar organs (the electric eels and electric catfishes). The torpedoes are large rays, of 6 genera and about 15 species, found in most seas. The trunk is broad and smooth; the tail comparatively short, with a rayed caudal fin and commonly two rayed dorsals, the first of which is over or behind the ventrals. The electric organs are a pair, one on each side of the trunk anteriorly, between the pectoral fins and the head. See cuts under *torpedo*.

**torpedinoid** (tôr-ped'i-noid), *a.* [< NL. *Torpedinoidea*, *q. v.*] Of the nature of the electric ray; related or belonging to the *Torpedinoidea*.

**Torpedinoidea** (tôr-ped-i-noi'dê-ä), *n. pl.* [NL., < *Torpedo* (-din-) + Gr. *εἶδος*, form, resemblance.] The electric rays, rated as a superfamily contrasted with *Raioidæ* and *Pristoidæ*.

**torpedinous** (tôr-ped'i-nus), *a.* [< L. *torpedo* (-din-), *torpedo*, + *-ous*.] Shocking or benumbing like a torpedo. [Rare.]

Fishy were his

The torpedo is a self-propelled underwater weapon. It is usually cylindrical in shape and is propelled by a motor. The torpedo is used to attack ships and other vessels. It is a very dangerous weapon and has been used in many wars.

3. An explosive device belonging to either of two distinct classes of submarine destructive agents used in war—namely, *torpedoes proper*, which are propelled against an enemy's ship, and more or less stationary *submarine mines*, placed where a hostile vessel would be likely to come within range of their destructive effect. Of the first class, called also *concrete torpedoes*, there are three principal types: (a) the *anchored or out-anchored torpedo*, which includes the Whitehead and many other patterns; (b) the *mine*, which is stationary; and (c) the *self-propelled torpedo*. The Whitehead torpedo is a fish-shaped vessel from 14 to 24 feet in length, and from 14 to 16 inches in diameter. It is made of steel and divided into three compartments, the forward one carrying the explosive charge with the fuse to be fired on impact, the middle one containing the mechanism by which its course is adjusted, and the rear compartment containing the reserve of compressed air and the engine for driving the three-bladed screw by which it is propelled at a speed of from 20 to 30 miles an hour for about 500 yards. It is expected to be a formidable weapon, but thus far the results from its use have not justified the expectations.

WHITEHEAD TORPEDO.

The torpedo is a self-propelled underwater weapon. It is usually cylindrical in shape and is propelled by a motor. The torpedo is used to attack ships and other vessels. It is a very dangerous weapon and has been used in many wars.

In other patterns the motive power is supplied by compressed gas. In several inventions a reel of insulated wire in the stern is paid out as the vessel proceeds, keeping up communication with the shore, and a small flag or staff above water indicates its whereabouts—an electrical apparatus in connection with the reel of wire affording the

means of starting, stopping, directing, or firing it. Various forms of towing torpedoes have been devised, of which the best-known is that of Commander Harvey, R. N. This torpedo is towed on the quarter of the attacking vessel and is sent ahead to the towline as to pull the line out at an angle with the course of the attacking vessel, which endeavorers to maneuver so as to draw the torpedo under the hull of an enemy and explode its charge on contact by a trigger-bolt; but in practice it has not been successful, and in the navies of Great Britain and the United States has been withdrawn from use. The spar- or outrigger-torpedo consists of a metal case containing the explosive composition, gunpowder, dynamite, etc., and fitted with a fuse so arranged as to explode by means of a small electric current or by contact with the hull of an enemy's ship. It is fastened on the end of a spar or outrigger, which may be attached to the bows of a small steamer built on purpose, may be protruded under water from a properly fitted vessel, or may be carried on a spar projecting from the stem or the side of an ordinary man-of-war. The general bearing seems now to be in favor of specially constructed vessels of great speed. Stationary torpedoes, or submarine mines, placed in channels or harbors to prevent the approach of an enemy's vessels, usually consist of a strong water-tight metal case containing an efficient explosive, and having fuses to explode the charge on contact, or being connected by electric wires

with the shore and fired at the pleasure of the operator. A vast field of study and experiment has been devoted to the perfecting of torpedoes, and almost all governments now have schools for the instruction of naval and army officers in the use of torpedoes.

4. Hence, some other expressive agent. Specifically—(a) A shell hurled in the path of a steamship, having a percussion or friction device, or an electrical arrangement which explodes the charge when the ground over the torpedo is trod on. (b) A danger signal consisting of a detonating cartridge laid on a rail of a railway and exploded by the wheels of a passing locomotive. (c) A small quantity of an explosive wrapped up with a number of small pebbles in a piece of tissue paper, and exploded by being thrown on the ground or against some hard surface, for the amusement of children. (d) A cartridge of gunpowder, dynamite, nitroglycerin, etc., exploded in an oil-well to start the flow of oil, or in the vicinity of a school of fish to destroy great numbers of them, and for other purposes.

5. In med., narcosis; stupor. [Rare.]  
**torpedo** (tôr-pê'dô), *n.* [*< torpedo, n.*] **I. trans.** To attack with torpedoes; explode a torpedo under or in.

If ramming is tried before the enemy is disabled, the vessel trying it may be *torpedoed* in passing, and has added liabilities to other injuries. *Sci. Amer.*, N. S., LXIII, 304.

small swift steamer carrying one or more offensive torpedoes for use against an enemy's ships.

**torpedo-boom** (tôr-pê'dô-bôm), *n.* A spar for carrying a torpedo, either projected from a boat or vessel, or anchored to the bed of a channel.

**torpedo-catcher** (tôr-pê'dô-kach'êr), *n.* A swift steam man-of-war, especially designed to overtake and capture torpedo-boats.

**torpedoist** (tôr-pê'dô-ist), *n.* [*< torpedo + -ist.*] One who uses or who advocates the use of torpedoes. [Recent.]

The *torpedoist* tells us that his weapon (meaning the locomotive torpedo) will certainly decide an action, and forbid ships to approach near enough for ramming.

*Encyc. Brit.*, XXIV, 365.

**torpedo-net** (tôr-pê'dô-net), *n.* A network of steel or iron wire hung around a ship and boomed off by spars to intercept torpedoes or torpedo-boats. When not in use it is stopped up alongside the ship.

**torpedo-netting** (tôr-pê'dô-net'ing), *n.* Same as *torpedo-net*.

**torpedo-officer** (tôr-pê'dô-of'i-sêr), *n.* One of the line officers of a man-of-war whose special duty it is to supervise and care for the torpedoes and their fittings.

**torpedo-school** (tôr-pê'dô-skôl), *n.* A government school for teaching officers and enlisted men of the army and navy the construction and use of torpedoes. In the United States a torpedo-school for the navy has been established at Newport, Rhode Island, and for the army at Willett's Point, New York.

**torpedo-spar** (tôr-pê'dô-spâr), *n.* A wooden or iron spar projecting from the bows or side of a steamer, and on the end of which a torpedo is carried.

**torpedo-tube** (tôr-pê'dô-tûb), *n.* Same as *launching-tube*.

**torpelnest**, *n.* [ME.; as *torple* + *-ness.*] Instability.

*Dickens's Dict. Oxford*, p. 18.

**torpidity** (tôr-pid'i-ti), *n.* [*< torpid + -ity.*]

1. Insensibility; numbness; torpor; apathy.

Our Aryan brother creeps about his daily avocations with the desiccated appearance of a frozen frog, or sits in dormouse *torpidity* with his knees about his ears.

*P. Robinson*, *Under the Sun*, p. 94.

2. In *zool.*, a dormant state in which no food is taken; the condition of an animal in hibernation or estivation, when it passes its time in the winter or summer sleep; dormancy.—3. Dullness; sluggishness; stupidity.

Genius, likely to be lost in obscurity, or chilled to *torpidity* in the cold atmosphere of extreme indigence.

*V. Knox*, *Grammar Schools*.

**torpidly** (tôr'pid-li), *adv.* In a torpid manner; in consequence of numbness, insensibility, or apathy; sluggishly; slowly; stupidly.

**torpidness** (tôr'pid-nes), *n.* Torpidity; torpor.

The exercise of this faculty . . . keeps it from rust and torpidness.

*Sir M. Hale*, *Orig. of Mankind*, p. 3.

**torporific** (tôr-pô-rif'ik), *a.* [*< L. torpor*, numbness, + *facere*, make (see -*fic*).] Producing torpor; torpifying; stupefying.

**torquate** (tôr'kwat), *a.* [*< L. torquatus*, wearing a neck-chain, *< torques*, a neck-chain: see *torque*.] In *zool.*, ringed about the neck; collared, as with a collar, or by the peculiar texture, etc., of hair or feathers about the neck.

**torquated** (tôr'kwâ-ted), *a.* [*< torquate* + -*ed*.] 1. Having or wearing a torque.—2. In *zool.*, same as *torquate*.

**Torquatella** (tôr-kwa-tel'ä), *n.* [NL., dim. of *torquatus*, adorned with a neck-chain: see *torquate*.] The typical genus of *Torquatellidae*, having a plicate and extensible membranous collar, and the mouth with a tongue-like valve or velum. *T. typica* inhabits salt water.

**Torquatellidæ** (tôr-kwa-tel'i-dë), *n. pl.* [NL., *< Torquatella* + -*idæ*.] A family of peritrichous ciliate infusorians, typified by the genus *Torquatella*. These animalcules are free-swimming, illoricate, and more or less ovate; the anterior ciliary wreath is replaced by a membranous extensible and contractile collar, which is perforated centrally by the oral aperture.

**torque** (tôrk), *n.* [Also *torc*; = *It. torque* = *torc*, *< L. torques*, *torquis*, a twisted metal neck-ring, a necklace, a collar, *< torquere*, twist: see *tort*.] 1. A twisted ornament forming a necklace or

Torque, with manner of wearing it, from sculptures on the sarcophagus of Vigna Aménola, Capitoline Museum.

collar for the neck, particularly one worn by uncivilized people, and of such a make as to retain its rigidity and circular form. Such a collar was considered a characteristic attribute of the ancient Gauls. Also *torques*.

They [the Gauls] wore collars and *torques* of gold, necklaces, and bracelets, and strings of brightly-coloured beads, made of glass or of a material like the Egyptian porcelain. C. Elton, Origins of Eng. Hist., p. 115.

The Anglo-Saxons habitually wore upon their arms twisted bracelets or *torques*, or, in their stead, a number of simple bracelets. Encyc. Brit., VI. 465.

2. In *mech.*, the moment of a system-force applied so as to twist anything, as a shaft in machinery.

The *torque*, or turning moment, is, in a series dynamo, both when used as a generator and when used as a motor, very nearly proportional to the current.

S. P. Thompson, Dynamo-Electric Machinery, p. 45.

**torqued** (tôrkt), *a.* [*< OF. torquer*, twist, *< L. torquere*, twist (see *torque*), + -*ed*.] 1. Twisted; convoluted.

On this West shore we found a dead fish floating, which had in his nose a horse straight and *torquet*, of length two yards lacking two inches. Hakluyt's Voyages, III. 35.

2. Twisted like a rope: said of metal-work.

A pair of ear-rings of base silver, the large *torqued* circles of which were closed by a sort of hook and eye. Archaeologia, XXXVII. 102.

3. In *her.*, same as *targant*. **torquened** (tôr'kend), *a.* [*Cf. torqued*, *turken*.] In *her.*, same as *targant*.

**torques** (tôr'kwëz), *n.* [L.: see *torque*.] 1. Same as *torque*, 1.—2. In *zool.*, any collar or ring around the neck, produced by the color, texture, etc., of the pelage, plumage, or integument.

**torquet**, *a.* An obsolete form of *torqued*. **torquist**, *n.* [L.: see *torque*.] A torque.

You have no less surpris'd then oblig'd me by your account of the *Torquis*, . . . the most ancient and most akin to it of all that I have seen being a chaine of the same metall of about six hundred years old, taken out of Edward the Confessors Monument at Westminster. Samuel Pepys (Ellis's Lit. Letters, p. 211).

**torreador**, *n.* See *toreador*. **torrefaction** (tôr-ë-fak'shon), *n.* [*< F. torréfaction*, *< L. torrefacere*, dry by heat: see *torrefy*.] The act or operation of torrefying; the state of being torrefied.

Here was not scorching and blistering, but a vehement and full *torrefaction*. Bp. Hall, Sermons, xxviii.

**torrefy** (tôr-ë-fi), *v. t.*; pret. and pp. *torrefied*, ppr. *torrefying*. [Also *torrify*; = *F. torréfier* = *It. torrefare*, *< L. torrefacere*, dry by heat, *< torrere*, parch, roast, + *facere*, make.] To dry or parch with heat; roast.

Things become, by a sooty or fuliginous matter proceeding from the sulphur of bodies, *torrefied*.

Sir T. Browne, Vulg. Err., vi. 12.

Bread . . . toasted hard or *torrefied*.

**torrent** (tôr'ent), *a.* and *n.* [*< F. torrent* = *Pr. torrent* = *Sp. Pg. It. torrente*, a torrent; *< L. torrent* (t-s), burning, scorching, of a stream, boiling, roaring, rushing, and hence, as a noun, a rushing stream (not, as some explain it, lit. a stream of water that 'dries up' in the heat of summer), ppr. of *torrere*, dry by heat, parch, roast (cf. *terra* for *\*tersa*, 'dry land'), = *Gr. rēpsēbai*, become dry, = *Goth. thairsan*, be dry; cf. *thaurus*, dry, *thaurstei*, etc., thirst, = *Skt. √ tarsh*, thirst: see *thirst*.] 1. *a.* Rushing in a stream. [Rare.]

Fierce Phlegethon,

Whose waves of *torrent* fire inflame with rage. Milton, P. L., ii. 581.

II. *n.* 1. A rushing stream, as of water or lava; a stream flowing rapidly and with violence, as down the side of a hill or over a precipice.

And so firste we come to *Torrens* Cedron, which in somer tyme is drye. Sir R. Guylforde, Pylgrymage, p. 31.

The *torrent* road'd, and we did buffet it With lusty sinews. Shak., J. C., i. 2. 107.

The ghastly *torrent* mingles its far roar With the breeze. Shelley, Alastor.

2. Figuratively, a violent or overwhelming flow; a flood: as, a *torrent* of abusive words.

I know at this time a celebrated toast, whom I allow to be one of the most agreeable of her sex, that in the presence of her admirers will give a *torrent* of kisses to her cat. Addison, Tatler, No. 121.

**torrent-bow** (tôr'ent-bô), *n.* A bow or arch of rainbow-like or prismatic colors formed by the refraction and reflection of rays of light from the spray of a torrent; an iris.

From those four jets four currents in one swell Across the mountain stream'd below In misty folds that, floating as they fell, Lit up a *torrent-bow*. Tennyson, Palace of Art.

**torrent-duck** (tôr'ent-duk), *n.* A duck-like merganser of the genus *Merganetta*: so called

Torrent-duck (*Merganetta armata*), adult male.

from the torrents of the streams which they inhabit in the Andes from Colombia to Chili.

**torrential** (tôr-en'shal), *a.* [= *F. torrentiel* = *Sp. torrencial*; as *torrent* + -*ial*.] 1. Pertaining to or resembling a torrent; of the nature of a torrent: as, *torrential* rains.

The greater magnitude and *torrential* character of the rivers of that [glacial] period were no doubt due to the melting during summer of great masses of snow and ice. J. Croll, Climate and Cosmology, p. 116.

2. Produced by the agency of rapid streams, mountain torrents, and the like.

The äsar of Sweden are merely the denuded and partially re-arranged portions of old *torrential* gravel and sand, and morainic debris. J. Geikie, Great Ice Age, xvii.

3. Figuratively, fluent and copious; voluble; overwhelming.

The poetasters [of the Russian literary world] poured forth their feelings with *torrential* recklessness. D. M. Wallace, Russia, p. 396.

He could woo, he was a *torrential* wooer. G. Meredith, The Egoist, xlvii.

His *torrential* wealth of words. The American, VIII. 235.

**torrentiality** (tôr-en-shi-al'i-ti), *n.* [*< torrential* + -*ity*.] The character of being torrential. [Rare.]

**torrentially** (tôr-en'shal-i), *adv.* In a torrential manner; copiously; volubly.

**torrentine** (tôr'en-tin), *a.* [= *OF. torrenten*; as *torrent* + -*ine*.] Same as *torrential*. Imp. Dict.

**torrett**, *n.* A variant of *toret*.

**Torreya** (tôr'i-ä), *n.* [NL. (Arnott, 1838), named after Dr. John Torrey, 1796–1873, professor of botany at Columbia College, New York.] A genus of conifers, of the tribe *Taxee*, distinguished from the related genus *Taxus* by the complete or partial attachment of the seed to its surrounding capsule or berry, and by another cells being connate in a semicircle. It in-

Torreya taxifolia.

1, branch with male flowers; 2, branch with fruit; a, a male ament.

cludes 4 species, 2 natives of China (see *kaya*) and Japan, the others American—*T. taxifolia* of Florida and *T. californica* of California. They are evergreen trees, with flat, linear, two-ranked leaves resembling those of the yew, but longer, and with a larger ovoid drupaceous fruit, sometimes 1½ inches long. The Florida species, often called *Torrey-tree* or *savin*, is locally known as *stinking cedar* (which see, under *stink*). The western species is the California nutmeg.

**Torricellian** (tôr-i-sel'i-an or tôr-i-chel'i-an), *a.* [*< Torricelli* (see def.) + -*an*.] Pertaining to Evangelista Torricelli,

an Italian physicist and mathematician (1608–47), who, in 1643, discovered the principle on which the barometer is constructed, by means of an experiment called from him the *Torricellian experiment*. This experiment consisted in filling with mercury a glass tube closed at one end and then inverting it; the open end was then brought under the surface of mercury in a vessel, when the column of mercury in the tube was observed to descend till it stood at a height equal to about 30 inches above the level of the mercury in the vessel, leaving a vacuum at the top, between the upper extremity of the column and that of the tube. This experiment led to the discovery that the column of mercury in the tube is supported by the pressure of the atmosphere acting on the surface of the mercury in the vessel, and that this column is an exact counterbalance to the atmospheric pressure. See *barometer*.—**Torricellian tube**, a glass tube 30 or more inches in length, open at one end and hermetically sealed at the other, such as is used in the barometer.—**Torricellian vacuum**, a vacuum such as that produced by filling a barometer-tube with mercury, as in the Torricellian experiment; the vacuum above the mercurial column in the barometer.

**torrid** (tôr'id), *a.* [*< F. torride* = *Pr. torrid* = *Sp. torrido* = *Pg. It. torrido*, *< L. torridus*, dry with heat, parched, torrid, *< torrere*, dry by heat, parch: see *torrent*.] 1. Parched and dry with heat, especially of the sun; arid; sultry; hot; specifically, noting a zone of the earth's surface.

My marrow melts, my fainting spirits fry, In th' *torrid* zone of thy meridian eye. Quarles, Emblems, v. 15.

Through *torrid* tracts with fainting steps they go. Goldsmith, Des. Vil., l. 343.

2. Burning; scorching; parching. The brandish'd sword of God before them blazed, Fierce as a comet; which with *torrid* heat, And vapour as the Libyan air adust, Began to parch that temperate clime. Milton, P. L., xii. 634.

2. Specifically, in *bot.*, coiled like a rope: as, a *tortile* awn.

**tortility** (tôr'til'i-ti), *n.* [*tortile* + *-ity*.] The state of being tortile or twisted.

**tortilla** (tôr-tê'lyă), *n.* [Sp., dim. of *torta*, a tart: see *tort*, *turt*.] A round cake; specifically, in Mexico, a large, round, thin cake prepared from maize. For this purpose it is first pounded to cleanse and soften the grain, then crushed into a paste on a flat stone with a stone implement not unlike a rolling-pin, then worked with the hands into a kind of thin pancake, then baked, first on one side and then on the other, on a flat smooth plate of iron or earthenware, this baking being a sort of toasting carried just so far as not to brown the tortilla, which is then served up hot.

**tortillê** (tôr-tê'lyă'), *n.* [OF., pp. of *tortiller*, twist, < *L. torquere*, pp. *tortus*, twist: see *tort*, and cf. *tortil*.] In *her.*: (a) Same as *novel*. (b) Same as *wreathed*.

**tortillon** (F. pron. tôr-tê-lyôn'), *n.* In *charcoal-drawing*, a kind of paper stump, made of strips of paper rolled so as to form a point. *F. Fowler*, *Charcoal Drawing*, p. 12.

**tortion** (tôr'shon), *n.* An obsolete spelling of *torsion*.

**tortious** (tôr'shus), *a.* [Formerly also *tortuous*; a var. of *tortuous*.] 1. Wicked; wrong; base.

Than the devil . . . came vnto man in Paradise, & inticed him (oh, *tortious* serpent!) to eat of the forbidden fruit. *Stubbes*, *Anat. of Abuses* (ed. Furnivall), I. 36.

2. In *law*, having the character of a tort.

It is as if a civil officer on land have process against one individual and through mistake arrest another; this arrest is wholly *tortious*.

*Woolsey*, *Introd. to Inter. Law*, § 200.

**tortiously** (tôr'shus-li), *adv.* In *law*, by tort or injury; injuriously.

**tortive** (tôr'tiv), *a.* [*L. tortivus*, pressed or squeezed out, < *torquere*, pp. *tortus*, twist: see *tort*.] Twisted; wreathed.

As knots, by the conflux of meeting sap,  
Infect the sound pine, and divert his grain  
*Tortive* and errant from his course of growth.

*Shak.*, *T. and C.*, I. 3. 9.

**tortlet**, *n.* An obsolete form of *turtle*.<sup>2</sup>

**tortness** (tôr'tnes), *n.* The state of being tort or taut. See *tort*.<sup>4</sup> *Bailey*, 1727.

**tortoise** (tôr'tis or tôr'tus), *n.* [Early mod. E. also *tortoyse*, *tortesse*; < ME. *tortuous*, *tortue* (< AF. \**tortue*); ME. also *tortu*, < OF. *tortue*, *tortugue*, *F. tortue* = Pr. *tortuga*, *tartuga* = (Sp. *tortuga*, *tartuga*, Sp. *tortuga* = Pg. *tartaruga* = Olt. *tartuga*, also *tartaruga*, *tartaruga*, *tartaruga*, It. *tartaruga* (ML. *tortuca*, *tartuga*), a tortoise, so named on account of its crooked feet, < *L. tortus*, twisted: see *tort*, and cf. *tortue*, *tortuous*. The termination seems to be conformed in E. to that of *porpoise*, and in Rom., vaguely, to that of *L. testudo*, tortoise (see *testudo*). The word has undergone extraordinary variations of form, the latest being that which appears in *tortle*, now *turtle*: see *turtle*.<sup>2</sup>] 1. A turtle; any chelonian or testudinian; a member of the order *Chelonii* or *Testudinata* (see the technical terms). It is not known what species the name originally designated; probably a land-tortoise of southern Europe, as *Testudo græca*. There is a tendency to distinguish terrestrial chelonians from aquatic ones, the former as *tortoises*, the latter as *turtles*; yet *tortoise*.

A Fresh-water Tortoise, *Emys latitarsis*.

*shell* is fixed as the name of the commercial product of certain sea-turtles. (See *box-tortoise*, *land-tortoise*, *terrapin*, *turtle*,<sup>2</sup> *mud-turtle*, *sea-turtle*.) Tortoises of some kind are found in most parts, and especially the warmer parts, of the world; the species are numerous—those of the land and of fresh waters much more so than the marine forms. See also cuts under *carapace*, *Chelonia*, *Chelonidæ*, *Chelydridæ*, *Cinixyridæ*, *Cinosternum*, *Cistudo*, *plastron*, *Pyxis*, *Testudo*, *Testudinata*, and *terrapin*.

**Alligator-tortoise**. Same as *alligator terrapin*. Elephant tortoise, the great *Testudo elephantopus* of the Galapagos, the largest living representative of the *Testudinidæ*; sometimes also called *Indian tortoise* and *elephant terrapin*. See cut under *Testudinata*.—**Sculptured tortoise**. See *sculptured*.—**Soft-shelled or soft tortoises**. See *soft-shelled*.—**Spotted tortoise**, a common tortoise of the United States, *Chelopus guttatus*.—**Wood-tortoise**, *Chelopus insculptus* of the United States.

**tortoise-beetle** (tôr'tis-bê'tl), *n.* A leaf-beetle of the family *Cassididæ*; so called from the projecting elytra and prothorax, which suggest the carapace of a tortoise. This resemblance is heightened in some cases by the coloration. Several species in the United States feed upon the sweet potato, as *Deloyala clavata*. See also cuts under *Cassida*, *Coptoclytus*, *Deloyala*, and *Psephenella*.—**Spiny tortoise-beetles**, the *Hispidæ* or *Hispini*. See cut under *Hespa*.

**tortoise-flower** (tôr'tis-flou'ér), *n.* A plant of the genus *Chelone*.

**tortoise-headed** (tôr'tis-hed'ed), *a.* Having a head like or suggesting a tortoise's: specifically noting the ringed sea-serpent, *Emydocephalus annulatus*.

**tortoise-plant** (tôr'tis-plant), *n.* A South African plant, *Testudinaria elephantipes*, having a bulky, woody rootstock above the ground, the exterior of which by cracking gains the appearance of a tortoise-shell. This body, from having been used as food, is also called *Hottentot's-bread*, and its appearance before it is full-grown suggests the name *elephant's-foot*. See *Testudinaria*.

**tortoise-roofer** (tôr'tis-rô'ti-fêr), *n.* A wheel-animalcule of the family *Brachionidæ*.

**tortoise-shell** (tôr'tis-shel), *n.* and *a.* I. *n.* 1. The outer shell, or one of the scutes or scales, of certain sea-turtles or marine chelonians, especially of *Eretmochelys imbricata*, the hawk's-bill turtle, or caret, a species which inhabits tropical seas. These horny scales or plates, which cover the carapace in regular and symmetrical pieces, are a specially thickened epidermis, of beautifully mottled and clouded coloration, and of quite different character from the underlying bones of the shell. Similar epidermal scutes cover most tortoises or turtles, but *tortoise-shell* is mainly restricted to such as have commercial value. These scales are extensively used in the manufacture of combs, snuff-boxes, etc., and in inlaying and other ornamental work. They become very plastic when heated, and when cold retain with sharpness any form they may be molded to in the heated state. Pieces can also be welded together under the pressure of hot irons. The quality of *tortoise-shell* depends mainly on the thickness and size of the scales, and in a smaller degree upon the clearness and brilliancy of the colors. The best *tortoise-shell* is that obtained in the Indian archipelago. It is now largely imitated in horn and in artificial compounds of much less cost. See cuts under *carapace*, *Chelonia*, *Eretmochelys*, and *plastron*.

2. A *tortoise-shell* cat. See II., 2.—3. With a qualifying word, one of certain nymphalid butterflies: so called from the *tortoise-shell*-like maculation. *Aglaia milberti* is the nettle *tortoise-shell*, and *Vanessa urticae* is the small *tortoise-shell*.

II. *a.* 1. Made of *tortoise-shell*.

They only fished up the clerk's *tortoise-shell* spectacles.  
*Barham*, *Ingoldsbys Legends*, II. 44.

Pretty dears! they used to carry ivory or *tortoiseshell* combs, curiously ornamented, with them, and comb their precious wigs in public.

*J. Ashton*, *Social Life in Reign of Queen Anne*, I. 144.

2. Mottled with black and yellow: as, a *tortoise-shell* cat or butterfly. The cat of this name is a mere color-variety of the domestic animal; the insect is a vane-soid, as *Vanessa urticae* or *V. polychlora*.—**Tortoise-shell** goose. See *goose*.—**Tortoise-shell** tiger. See *tiger*.—**Tortoise-shell** ware, a fine pottery colored with oxide of copper and manganese so that the color penetrates the paste itself, producing a certain resemblance to the marking of *tortoise-shell*.

**tortoise-shelled** (tôr'tis-sheld), *a.* Same as *tortoise-shell*.

A *tortoise-shelled* butterfly. *S. Judd*, *Margaret*, II. 1.

**tortoise-wood** (tôr'tis-wûd), *n.* A variety of zebra-wood.

**tortuous**, *n.* A Middle English form of *tortoise*.

**tortozon** (tôr'tô-zon), *n.* [Sp.] A large Spanish grape.

**Tortrices** (tôr-trî'sêz), *n. pl.* [NL. (Linnaeus, 1758), pl. of *Tortrix*, *q. v.*] The *Tortricidæ* as a superfamily of heterocerous lepidopterous insects, including those *Microlepidoptera* whose larvae are known as *leaf-rollers*. The group has not been generally adopted, most lepidopterists preferring to consider these moths as forming simply a family.

**torticid** (tôr'tri-sid), *a.* and *n.* I. *a.* 1. In *entom.*, of or belonging to the lepidopterous family *Tortricidæ*, or having their characters.—2. In

*herpet.*, belonging to the ophidian family *Tortricidæ*, or having their characters.

II. *n.* 1. In *entom.*, a moth of the family *Tortricidæ*.—2. In *herpet.*, a serpent of the family *Tortricidæ*; a cylinder-snake.

**Tortricidæ** (tôr-tris'i-dê), *n. pl.* [NL. (Stephens, 1829), < *Tortrix* (*Tortric-*) + *-idæ*.] 1. In *entom.*, a large and wide-spread family of *Microlepidoptera*; the leaf-roller moths. They are stout-bodied, with wide oblong wings, the costal edge of the fore wings being often sinuate; the antennæ are simple, or finely ciliate and very rarely pectinate; the palpi are erect or pectinate and sometimes two or three times as long as the head, which is rough with erect scales; there is a tuft of scales at the end of the abdomen; and the legs are of medium length. Most of the larvae are leaf-rollers, folding or rolling over a part of a leaf and lining the interior with silk; others feed on buds, or live in seeds and fruits, or bore in the stems of plants. A common leaf-worm is *Cacaecia rosaceana* of the United States. *Cacaecia rileyana* is another leaf-roller on hickory and walnut. A seed-feeder is *Clydonopteron tomentosum*, which burrows in the seed-pods of the trumpet-creeper; the cosmopolitan codling-moth, *Carpocapsa pomonella*, is an example of the fruit-borers; the spruce bud-worm, *Tortrix fumiferana*, represents the bud-feeders; and the pine-twig borers of the genus *Retinia* represent another habit. *Pediasca scudderiana* has been reared from galls in the stems of goldenrod. The principal subfamilies are *Tortricinæ*, *Conchylinæ*, and *Grapholithinæ*. Nearly 500 species are known in the United States, and 650 in Europe. See cuts under *Tortrix* and *leaf-roller*.

2. In *herpet.*, a family of cylinder-snakes, or tortricoid ophidians, typified by the genus *Tortrix*, having rudimentary hind limbs and a very short conic tail. The genera are *Tortrix* (or *Ilysia*) and *Cylindrophis*.

**tortricine** (tôr'tri-sin), *a.* and *n.* Same as *tortricid*.

**tortricoid** (tôr'tri-koid), *a.* In *herpet.*, having the characters of the *Tortricidæ*.

**Tortricodea** (tôr-tri-koi'dê-ä), *n. pl.* [NL., < *Tortrix* (*Tortric-*) + *-odea*.] The cylinder-snakes, or tortricoid ophidians, a suborder of *Ophidia* containing small angiotomatous snakes, with or without anal spurs, with an ectopterygoid bone, a coronoid, and a free horizontal maxillary. There are two families, *Tortricidæ* and *Uropeltidæ* (or *Rhinophidæ*).

**Tortrix** (tôr'triks), *n.* [NL. (Brongniart, 1800), fem. of *L. tortor*, a tormentor, a torturer, lit. 'twister', < *torquere*, pp. *tortus*, twist: see *tort*.] 1. In *herpet.*: (a) The typical genus of *Tortricidæ*: same as *Ilysia*. *T. scytale* is the coral-snake of Demerara. (b) [*l. c.*] A snake of this genus.—2. In *entom.*: (a) A genus of moths,

typical of the family *Tortricidæ*. *Treitschke*, 1829. (b) [*l. c.*] Any moth of the family *Tortricidæ*: as, the cherry-tree *tortrix*, *Cacaecia cerasivorana*.

**tortur**, **tortucet**, *n.* Middle English forms of *tortoise*.

**tortuet**, *a.* [ME., < OF. *tortu*, twisted, crooked, < *tordre*, twist, bend: see *tort*, and cf. *tortuous*.] Twisted; tortuous.

He bar a dragon that was not right grete, and the taile was a fadome and an half of lengthe *tortue*.

*Mélin* (E. E. T. S.), ii. 206.

**tortulous** (tôr'tū-lus), *a.* [*L. tortula*, dim. of *torta*, a twist, something twisted.] Twisted: in *zool.*, moniliform; resembling a string of beads.

**tortuose** (tôr'tū-ôs), *a.* [*L. tortuosus*, winding: see *tortuous*.] In *bot.*, irregularly bending or turning in different directions. — **Tortuose** stem, a stem that is bent in the manner of a flexuose stem, but less angularly, as in *Cuscuta maritima*.

**tortuosity** (tôr'tū-os'i-ti), *n.*; pl. *tortuosities* (-tiz). [*F. tortuosité* = Pr. *tortuositat* = Sp. *tortuosidad* = Pg. *tortuosidade* = It. *tortuosità*, < *L. tortuositas* (-is), crookedness, < *tortuosus*, crooked: see *tortuous*.] 1. The state or attribute of being tortuous; tortuousness; crookedness.

The *Tory* was originally an Irish robber, and the term was applied by dates to the disbelievers in the Popish plot, was afterwards extended to the Irish Catholic friends of the Duke of York at the time of the Exclusion Bill, and soon became the designation of the whole body of his supporters. *Lecky*, Eng. in 18th Cent., i.

4. [*cap.*] In *American hist.*, a member of the British party during the Revolutionary period; a loyalist. The Tories were very numerous, especially in the Middle and Southern colonies, and many of them took arms for the king. They were frequently severely persecuted, and after the war many of them emigrated to Canada and elsewhere.

Washington will not trust us with the keeping of a suspected *Tory*, if we let the rascal trifle in this manner with the corps. *J. F. Cooper*, *The Spy*, xxix.

5. [*cap.*] In general, a conservative; one who favors established authority and institutions, especially in a monarchy or an aristocracy; a person of aristocratic principles, as opposed to a democrat or a radical.

Puruss Ram and Khoom Dass are in attendance, and fear greatly that the party of the Viziers, to whom they are opposed, will hurl them from power, and that the *Tories* of Bussahir will triumph. *W. H. Russell*, *Diary in India*, II, 191.

**High Tory**, an upholder or advocate of an extreme type of Toryism.

II. *a.* Pertaining to or characteristic of Tories, in any sense; specifically [*cap.*], belonging or relating to the Tories: as, a *Tory* government; *Tory* principles or measures. See I.

"Surrender! you servants of King George," shouted the leader, "... or I will let a little of your *Tory* blood from your veins." *J. F. Cooper*, *The Spy*, xxii.

The party led by Sir Robert Peel no longer called itself "*Tory*," but "*Conservative*." *Contemporary Rev.*, LI, 4.

**Tory Democracy**, the principles or views of the Tory Democrats; also, the Tory Democrats collectively.—**Tory Democrats**, in *recent British politics*, those members of the Conservative party who are supposed to incline more or less to democratic ideas and methods.

**toryism** (tō'ri-izm), *n.* [*< tory + -ism.*] The principles, methods, and practices of Tories, in any sense; specifically [*cap.*], those of the British Tories.

Nothing would illustrate the subject better ... than an inquiry into the rise and progress of our late parties, or a short history of *toryism* and whiggism from their cradle to their grave, with an introductory account of their genealogy and descent. *Bolingbroke*, *Parties*, ii.

The times have been dreadful, and old families like to keep their old tenants. But I dare say that is *Toryism*. *George Eliot*, *Felix Holt*, viii.

**Toryminæ** (tor-i-mī'nē), *n. pl.* [*NL. < Torminus + -inæ.*] A notable subfamily of parasitic hymenopterous insects, of the family Chalcididae, conspicuous for their brilliant metallic colors and their long ovipositor: originally named as a family *Torymidæ* by Watson in 1833. They are the commonest parasites of the cynipid and cecidomyidan gall-makers, although some have been reared from the cells of burrowing bees and a few from lepidopterous larvae. About 200 species are known.

**Torymus** (tor'i-mus), *n.* [*NL. (Dalman, 1820.)*] A genus of hymenopterous parasites of gall-making insects, typical of the subfamily *Toryminæ*.

**tory-rory** (tō'ri-rō'ri), *a.* [*Appar. a varied redupl. of tory.*] Wild; boisterous; harum-scarum.

Lift up your voices, and sing like nightingales, you *tory rory* jades. Courage, I say; as long as the merry pence hold out, you shall none of you die in Shoreditch. *Dryden*, *Kind Keeper*, iv, 1.

**tosca** (tos'kā), *n.* [*< Sp. Pg. tosco (fem. tosca), rough, coarse.*] A name given in parts of South America, especially near the mouth of the La Plata river, and in the region of the pampas generally, to a soft concretionary limestone, having about the consistence of slightly baked clay, and of a dark-brown color. It underlies the so-called Pampean formation. The name *tosca* is said also to be applied in parts of southern Italy, and especially in Sicily, to varieties of pumiceous tuffs. In the gold-mining regions of the United States of Colombia the word *tosca* is also in frequent use as designating a very peculiar rock lying near the surface, and said by some to be of volcanic origin, but not yet scientifically described. It differs very much from the *tosca* of the Pampean region.

**toscatter**, *v. t.* [*ME. toscateren; < to-2 + scatter.*] To scatter in pieces.

Lo, ech thyng that is oned in it selve

*William Morris*, *Earthly Paradise*, I, 300.

3. In *mining*, to separate (ore) from the gangue by stirring (tossing) the slimes with water in a keeve, and then allowing the heavier,

valuable parts to settle, this operation being hastened by packing, or striking the sides of the keeve with an iron bar held vertically with one end resting on the ground, an operation which may be continued from a quarter of an hour to an hour. The packing facilitates the separation of the ore by the vibrating motion imparted to the particles. This process is generally done by hand, but sometimes by a mechanical arrangement. It was formerly somewhat extensively employed in the tin-mining districts of Cornwall, England, and has not entirely gone out of use.

4. To cast; pitch; fling; hurl; specifically, to throw with the palm of the hand upward; throw lightly or carelessly.

I *tosse* a balle. . . I had as leve *tosse* a ball here alone as to play at the tenys over the corde with the. *Palsgrave*, p. 760.

**totalness** (tō'tal-nes), *n.* Entireness. *Bailey*, 1727.

**Totaniinæ** (tot-a-nī'nē), *n. pl.* [*NL.*, *< Totanus + -inæ*.] A subfamily of *Scolopacideæ*, corresponding to the genus *Totanus* in a broad sense, but containing a number of other modern genera; the tattlers. They are found all over the world, in great abundance of individuals and numerous species. The chief distinction from the true snipes or *Scolopacinae* lies in the bill, which is relatively shorter, harder, and less sensitive, and usually slenderer, with a more ample rictus. The legs are longer, and usually denuded above the suffrago, so that the lower end of the tibia is bare of feathers. The feet are more or less semipalmate. They are noisy, restless birds, inhabiting marshes, swamps, and wet woodland and meadows. The yellowshanks, willet, and solitary and spotted sandpipers of the United States are good examples. One of the most wide-spread and notable is the wandering tattler, *Heteroscelus incanans* or *brevipies*. Also called *Totaniæ*, as a group ranking lower than a subfamily, and formally contrasted with *Tringa*. See *Totanus* and cuts under *Bartramia greenishank*, *redshank*, *Rhyacophilus rufi*, *semipalmate*, *tattler*, *Terekia*, *Tringoides*, *Tryngites*, *willet*, and *yellowshank*.

**totanine** (tot'a-nin), *a.* Of or pertaining to the *Totaniinæ*: as, the *totanine* and *scolopacine* divisions of the snipe family; a *totanine* bird.

**Totanus** (tot'a-nus), *n.* [*NL.*, *< ML. totanus* (Olt. *totano*), a kind of moor-hen.] A genus of birds of the family *Scolopacideæ*, including some of the best-known sandpipers, tattlers, telltales, gambets, or horsemen, as the redshank, green-shank, yellowshank, and wood-sandpiper. Several are common British species: the green-shank, or green sandpiper, *T. ochropus*; the wood-sandpiper, *T. glareola*; the redshank, *T. calidris*; the spotted redshank, *T. fuscus*. In North America the best-known are the greater and lesser yellowshanks, *T. melanoleucus* and *T. flavipes*. The genus formerly contained all the *Totaniinæ* (which see). See cuts under *greenshank*, *redshank*, and *yellowshank*.

**totara** (tō-tā'rā), *n.* [*Maori.*] A coniferous tree, *Podocarpus totara*, the most valuable timber-tree of New Zealand. It grows 60 or 70 feet high, with a diameter of from 4 to 6 feet. The wood is of a reddish color, close, straight, fine, and even in grain, moderately hard and strong. It is used both for veneers, furniture, and cabinet-work, and for building, and is invaluable for piles of marine wharves, bridges, etc., being durable in the ground or under water, and resisting a long time the attacks of the teredo. It was used by the natives to make their smaller canoes, and the bark served for roofing. Also *mahogany-pine*.

**tot-book** (tot'būk), *n.* A book containing tots or sums for practice. *Encyc. Dict.* [*Eng.*]

**tote<sup>1</sup>** (tōt), *v.* An obsolete or dialectal form of *tote<sup>1</sup>*.

"Massachusetts Indian *wah-toh-timoin*, that to which a person or place belongs" (*Webster's Dict.*); Algonkin *dodaim* (Tylor); Algonkin *otem*, with a prefixed poss. pron. *no'tem*, my family token.] Among the Indians of North America, a natural object, usually an animal,

Totem Poles, Canadian Pacific Coast.

assumed as the token or emblem of a clan or family, and a representation of which served as a cognizance for each member of it; hence, a more or less similar observance and usage among other uncivilized peoples. See *totemism*. The representation of the totem borne by an individual was often painted or figured in some way upon the skin itself, and upon his different garments, utensils, etc. The totem was also, in a sense, an idol or the embodied form of a deity or demon, or at least had a religious significance. [The word is often used attributively, as in *totem clan*, *totem kin*, *totem post*, etc.]

And they painted on the grave-posts . . .

Each his own ancestral *Totem*;

Each the symbol of his household;

Figures of the Bear and Reindeer,

Of the Turtle, Crane, and Beaver,

Each inverted as a token

That the owner was departed.

*Longfellow*, *Hiawatha*, xiv.

It is not only the clans and the sexes that have *totems*; individuals also have their own special *totems*, i. e., classes of objects (generally species of animals) which they regard as related to themselves by those ties of mutual respect and protection which are characteristic of *totemism*. This relationship, however, in the case of the individual

*totem*, begins and ends with the individual man, and is not, like the clan *totem*, transmitted by inheritance. . . . In Australia we hear of a medicine-man whose clan *totem* through his mother was kangaroo, but whose "secret" (i. e., individual) *totem* was the tiger-snake. Snakes of that species, therefore, would not hurt him.

*J. G. Frazer*, *Encyc. Brit.*, XXIII, 471.

**totemic** (tō'tēm'ik), *a.* [*< totem + -ic.*] Of or pertaining to a totem; characterized by a totem: as, a *totemic* relative or relationship.

**totemism** (tō'tēm-izm), *n.* [*< totem + -ism.*] The system of tribal subdivision denoted by totems; the use of totems, with all the social and religious observances connected with them; the constitution of society as marked by these observances.

The theory of the wide distribution of *Totemism* among the nations of the ancient world (especially among the Greeks) is due to Mr. J. F. McLennan, who first explained it in the "Fortnightly Review," 1889, 1870.

*C. Elton*, *Origins of Eng. Hist.*, p. 300.

In the interesting pages on Egyptian religion, Mr. Lang defends his view that the worship of animals was at any rate in part a survival of *totemism*, and that the custom of representing the elemental gods as animals was of the same cause.

*Classical Rev.*, II, 250.

**tourmalin**, **tourmaline** (tör'mā-lin), *n.* [Also *turmalin*, *turmaline*; < *F. tourmaline* = Sp. *turmalina* = It. *turmalina*, *tormalina* (NL. *turmalina*, *turmalinus*); said to be < *tournamal*, a name given to this stone in Ceylon.] A mineral, crystallizing in the rhombohedral system, often in the form of a three-, six-, or nine-sided prism terminated by three faces of an obtuse rhombohedron. It often exhibits hemimorphism, the opposite extremities of a prismatic crystal showing an unlike development of planes. Its fracture is uneven or conchoidal; its hardness is a little greater than that of quartz. In composition tourmalin consists principally of a borosilicate of aluminium and magnesium, but contains frequently iron, lithium, and other elements. Some varieties are transparent, some translucent, some opaque. Some are colorless, and others green, brown, red, blue, and black, the last being the most common. Not infrequently the color varies in different parts of the crystal: thus, there may be a green exterior part about a red nucleus, or a crystal may be red at one end and green at the other, etc. Achroite is a colorless variety from Elba; rubellite is a pink or red variety containing lithium; indicolite is a blue or bluish-black variety; aphrizite is a black variety from Norway. Common black tourmalin is often called *schorl*. The transparent red, green, blue, and yellow varieties are used in jewelry: here belong the Brazilian sapphires, the Brazilian emerald, etc. Tourmalin occurs most commonly in granite, gneiss, and mica-schist. It is found in England, Scotland, Sweden, America, Spain, Siberia, and elsewhere. Sections cut from prisms of tourmalin are much used in polarizing apparatus. (See *polariscope*.) It exhibits marked pyro-electric phenomena, which are connected with its hemimorphic crystalline structure. See *pyroelectricity*. **Tourmalin plates**. Same as *tourmalin tongs*. power. Second, Glover's tower. Sam, as *headmaster*—**Catello tower**, a small circular fort with very thick walls, built chiefly on sea-coasts to prevent the landing of enemies. The name is variously said to be derived from the hammer (It. *martello*) used to strike the alarm-bell with which such towers built on the Italian coasts as a defense against pirates by Charles V. were furnished; from the name of a Corsican who invented the gun turret, and from Mortella in Corsica, where a tower of this kind strongly resisted an English naval force in 1794. The efficiency of this work induced the British authorities to build a large number of martello towers on their coasts, especially opposite France, in anticipation of Napoleon's threatened invasion. They are in two stages, the basement story containing store-rooms and magazine, the upper serving as a casemate for the defenders; the roof is shell-proof. The armament is a single heavy traversing gun. Similar towers afterward erected by Austria on the coast of the

**5.** The body of persons resident in a town or city; the townspeople: with *the*.

*Mrs. Candour.* The town talks of nothing else.  
*Maria.* I am very sorry, ma'am, the town has so little to do. *Sheridan*, *School for Scandal*, i. 1.

**6.** In legal usage in the United States: (*a*) In many of the States, one of the several subdivisions into which each county is divided, more accurately called, in the New England States and some others, *township*. (*b*) In most of the States, the corporation, or quasi corporation, composed of the inhabitants of one of such subdivisions, in some States designated by law as a *township* or *incorporated township* or *township organization*. (*c*) In a few of the States, a municipal corporation (not formed of one of the subdivisions of a county, but having its own boundaries like a city) with less elaborate organization and powers than a city. The word *town* is popularly used both in those senses, and also in the sense of 'a collection of dwellings,' which is characteristic of most towns. Thus, the name of a town, such as Farmington, serves to indicate, according to the context, either the geographical area, as in the phrase "the boundaries of the town" (indicated on maps by a light or dotted line), or the body politic, as in speaking of the town and county highways respectively, or the central settlement from which distances are usually measured, as on the sign-boards. When used in the general sense of a densely populated community, the boundaries are usually not identical with those of any

primary division of the county, but include only the space occupied by agglomerated houses.

**7.** A farm or farmstead; a farm-house with its connected buildings. [*Scotland, Ireland, and the North of England.*] **Cautionary town.** See *cautionary*. **County town.** See *county*.—**Free town.** See *free city*, under *city*. **Laws of the Hanse towns.** See *Hanse*. **Man about town.** See *man*. **Prairie-dog towns.** See *prairie dog*. **To come upon the town.** See *come*.—**To paint the town red.** See *paint*.—**Town and gown.** See *gown*. **Town-bonding acts or laws.** See *bond*. **Town's husband.** (*a*) One who holds the office of a steward in looking after the affairs of a town. Compare *ship's husband*, under *husband*.

The following advertisement appears in the Hull Advertiser, Aug. 8, 1795. "Guild-hall, Kingston upon Hull, August 7, 1795. Wanted by the Corporation of this Town, a proper person for the office of *Town's Husband*, or Common officer. He must be well acquainted with Accounts, capable of drawing Plans and Estimates for Buildings, and accustomed to inspect the workmanship of Mechanics."

*N. and Q.*, 7th ser., VIII. 496.

(*b*) An officer of a parish who collects moneys from the parents of illegitimate children for the maintenance of the latter. *Haltwell*. [*Prov. Eng.*] = *Syn.* 2 and 3. *Hamlet*, *Villain*, *Town*, *City*. A *hamlet* is a group of houses smaller than a village. The use of the other words in the United Kingdom is generally more precise than it is in the United States, but all are used more or less loosely. A village may have a church, but has generally no market; a town has both, and is frequently incorporated; a city is a corporate town, and is or has formerly been the see of a bishop with a cathedral. In the United States a village is smaller than a town, and a town usually smaller than a city; there are incorporated villages as well as cities. Some places incorporated as cities are smaller than many that have only a town organization.

Any toys for your head?  
*Shak.*, W. T., iv. 4. 326.

One cannot but be amazed to see such a profusion of wealth laid out in coaches, trappings, tables, cabinets, and the like precious toys, in which there are few prizes in Europe who equal them.

*Addison*, Remarks on Italy (Works, ed. Bohn, I. 504).

2. Something intended rather for amusement than for serious use; a means of diversion; hence, especially, an object contrived or used occasionally for the amusement of children or others; a plaything; also, something diminutive, like a plaything.

'Tis a pretty toy to be a poet.  
*Marlowe*, Tamburlaine, I., ii. 2.

O virtue, virtue! what art thou become,  
That man should leave thee for that toy, a woman!  
*Dryden*, Spanish Friar, iv. 2.

All the world I saw or knew  
Seemed a complex Chinese toy,  
Fashioned for a barefoot boy!  
*Whittier*, Barefoot Boy.

Perched on the top of a hill was a conspicuous toy of a church.  
*W. Black*, House-boat, ii.

3. A trifle; a thing or matter of no importance or value.

A man whose wisdom is in weighty affairs admired would take it in some disdain to have his counsel solemnly asked about a toy.  
*Hooker*, Eccles. Polity, i. 15.

A toy, a thing of no regard. *Shak.*, 1 Hen. VI., iv. 1. 145.

4. Play; amorous sport; caress.

So said he, and forbore no glance or toy  
Of amorous intent.  
*Milton*, P. L., ix. 1034.

5. A curious conceit or fable; a story; a tale.

Here by the way I will tell you a merry toy.  
*Latimer*, Sermon bef. Edw. VI., 1550.

I never may believe  
These antique fables, nor these fairy toys.  
*Shak.*, M. N. D., v. 1. 3.

6. A fantastic notion; a whim; a caprice.

Toxoglossa.  
Radial Teeth of  
Pleurodonta, enlarged.

Cast not thine eyes to ne yet fro,  
As thou wert full of toys,  
*Babes Book* (E. E. T. S.), p. 80.

Ta. Has he never been courtier, my lord?  
Mo. Never, my lady.  
Be. And why did the toy take him in the head now?  
*Chapman, Bussy D'Ambois*, i. 1.

7. Same as *toy-mutch*. [Now Scotch.]

On my head no toy

But was her pattern.

*Fletcher (and another), Two Noble Kinsmen*, i. 3.

8. In music, in old English writers, a dance-tune or other light, trifling piece.—9. A toy dog.

In the *Toys* equal first went to the well-known Wee Flower and a very good Black-and-tan called Little Jem.  
*The Field* (London), Jan. 28, 1882. (*Ensign, Dict.*)

**Philosophical toy**, any device or contrivance, of no practical use, which serves to illustrate some fact or principle in natural science in an attractive or entertaining as well as instructive manner, as a contrivance for producing the effects of so-called natural magic. The bottle-imp is a good example. See cuts under *Cartesian* and *phenakistoscope*.—**Steel toys**. See *steel*.—**To take toy**, to become restive; start.

The hot horse, hot as fire,

Took toy at this, and fell to what disorder

His power could give his will, bounds, comes on end.

*Fletcher (and another), Two Noble Kinsmen*, v. 4.

**Toy dog**, any dog bred to an unusually small or pygmy size and kept as a pet or plaything; a toy. Spaniels and terriers are so bred in some strains, and there are various mongrel toys.—**Toy spaniel**. See *spaniel*, 1.—**Toy terrier**, a terrier bred to small or pygmy size and kept as a plaything. Such terriers are usually of the black-and-tan variety, and some of them are among the smallest dogs known.

In-breeding is certain, if carried too far, to stunt the growth of any animal, and this is, without any doubt, the means by which the modern *toy-terrier* was first originated.  
V. Shaw, Book of the Dog, xxii.

**toy** (toi), *v.* [*< toy, n.*] **I. intrans.** 1. To trifle; amuse one's self; play.

Some plaid with straws; some ydly satt at ease;  
But other some could not abide to toy.

*Spenser, F. Q.*, II. ix. 35.

Pale dreamers, whose fantastic lay

Toys with smooth trifles like a child at play.

O. W. Holmes, Poetry.

2. To dally amorously.

Aft on the banks we'd sit us thair,  
And sweetly kiss and toy.

*Gilderoy (Child's Ballads)*, VI. 199.

A roi fainéant who chewed bag, and toyed with dancing girls.

*Macaulay, Warren Hastings*.

**To tick and toyt**. See *tick*.

**II. trans.** To treat in playful fashion; play with.

They must have oyle, candles, wine and water, flower, and such other things trifled and toyed withal.

*Dering, Expos.* on Heb. iii.

**toy-block** (toi'blok), *n.* One of a set of small blocks, usually of wood or papier-mâché, variously shaped, and plain, lettered, or pictured, forming a plaything for children.

**toy-box** (toi'boks), *n.* A box for holding toys; a box of toys. *Carlyle, Sartor Resartus*, ii. 6.

**to-year** (tō-yēr'), *adv.* [*< ME. toyere*; orig. two words: see *to* and *year*. Cf. *to-day*.] In this year; during the year: often pronounced *t'year*. *Grose*. [Prov. Eng.]

Yive hem joye that hit here  
Of alle that they dreme to-yere.

*Chaucer, House of Fame*, l. 84.

**toyer** (toi'ēr), *n.* [*< toy + -er*.] One who toys; one who is full of idle tricks.

Wanton Cupid, idle toyer,

Pleasing tyrant, soft destroyer.

*W. Harrison, Passion of Sappho* (Nichols's Collection), (IV. 183).

**toyful** (toi'fūl), *a.* [*< toy + -ful*.] Full of idle sport; playful.

It quickened next a *toyful* ape, and so  
Gamesome it was, that it might freely go  
From tent to tent, and with the children play.

*Donne, Progress of the Soul*, st. 48.

**toyingly** (toi'ing-li), *adv.* Triflingly; wantonly. *Bailey*, 1731.

**toyish** (toi'ish), *a.* [*< toy + -ish*.] 1. Fit only for a plaything; trifling; fantastic; whimsical.

*Capricciare*, to growe or be humorous, *toish*, or fantastical. *Florio*, 1598.

Adieu, ye *toyish* reeds, that once could please  
My softer lips, and lull my cares to ease.

*Pomfret, Dies Novissima*.

The contention is trifling and *toyish*.

*Jer. Taylor, Works* (ed. 1835), II. 320.

2. Toy-like; small: as, a *toyish* church.

**toyishly** (toi'ish-li), *adv.* In a toyish or trifling manner.

**toyishness** (toi'ish-nes), *n.* Inclination to toy or trifle.  
Your society will discredit that *toyishness* of wanton fancy that plays tricks with words, and frolics with the caprices of frothy imagination. *Glanville, Seep. Sci.*

**toyl**, **toylet**, *v.* and *n.* (Old spellings of *toil*.  
**toyman** (toi'man), *n.*; pl. *toyman* (-men). One who makes or sells toys.

But what in oddness can be more sublime  
Than Sloane, the foremost *toyman* of his time?

*Young, Love of Fame*, iv. 113.

**toy-mutch** (toi'much), *n.* A close linen or woolen cap, without lace, fringe, or border, and with flaps covering the neck and part of the shoulders, worn chiefly by old women. Also *toy*. [Scotch.]

**Toynee's experiment**. The exhaustion of air from the middle ear by swallowing when both the mouth and nostrils are closed.

**toyo** (toi'ō), *n.* [S. Amer.] A fragrant plant of British Guiana, an infusion and syrup of the leaves and stems of which are employed as a remedy in chronic coughs. *Treas. of Bot.*

**toyon** (toi'on), *n.* The Californian holly, *Heteromeles arbutifolia*. Also *tollon*.

**toyoust** (toi'us), *a.* [*< toy + -ous*.] Trifling.

Against the hare in all

Prove *toyous*.

*Warner, Albion's England*, v. 27.

**toy-shop** (toi'shop), *n.* 1. A shop where trinkets and fancy articles were sold.

All the place about me was covered with packs of ribbon, brocades, embroidery, and ten thousand other materials, sufficient to have furnished a whole street of *toy-shops*.

*Addison, Spectator*, No. 499.

We stopped again at Wirman's, the well-known *toyshop* in St. James's Place. . . . He sent for me to come out of the coach, and help him to choose a pair of silver buckles.

*Boswell, Johnson*, an. 1778.

2. A shop where toys or playthings are sold.

**toysome** (toi'sum), *a.* [*< toy + -some*.] Playful; playfully affectionate; amorous.

Two or three *toysome* things were said by my lord (no ape was ever so fond), and I could hardly forbear him.

*Richardson, Sir Charles Grandison*, III. lxxi.

**T-panel** (tē'pan'el), *n.* See *panel*.

**T-plate** (tē'plāt), *n.* 1. An iron plate in cross-section like the letter T. Also called *T-iron*.—2. In vehicles and other structures, a wrought-iron stay or strengthening piece for reinforcing woodwork where one piece is joined to another by a mortise and tenon. It is shaped like the letter T, and has one or more screw- or bolt-holes on each arm.

T-plate, 2.

**tr.** An abbreviation: (a) of *transitive*; (b) of *translation*, *translated*, *translator*; (c) of *transpose*; (d) of *transfer*; (e) of *trill*.

**Tr.** In chem., the symbol for terbium.

**tra-** See *trans-*.

**traast**, *n.* A Middle English form of *trace*<sup>1</sup>.

**trabal** (trab'al), *a.* [*< L. trabalis*, belonging to beams, *< trabs*, a beam: see *trave*.] Of or pertaining to a trabs; specifically, of or pertaining to the trabs cerebri, or corpus callosum; callosal. *Buck's Handbook of Med. Sciences*, VIII. 517.

**trabea** (trā'bē-ā), *n.*; pl. *trabæ* (-ē). [L.] A robe of state worn by kings, consuls, augurs, etc., in ancient Rome. It was a toga ornamented with horizontal purple stripes. See *toga*.

Plucking purples in Goito's moss,  
Like edges of a *trabea* (not to cross  
Your consul-humor), or dry aloë-shafts,  
For fasces, at Ferrara. *Browning, Sordello*, v.

**trabeate** (trā'bē-āt), *a.* [Irreg. *< L. trabs*, a beam, a timber, + *-ate*<sup>1</sup>.] Same as *trabeated*. *C. H. Moore, Gothic Architecture*, p. 6.

**trabeated** (trā'bē-ā-ted), *a.* [*< trabeate + -ed*<sup>2</sup>.] In arch., furnished with an entablature; or of pertaining to a construction of beams, or lintel-construction.

**trabeation** (trā'bē-ā'shon), *n.* [*< trabeate + -ion*.] In arch., an entablature; a combination of beams in a structure; lintel-construction in principle or execution.

**trabecula** (trā-bek'ū-lā), *n.*; pl. *trabeculæ* (-lē). [NL., *< L. trabecula*, dim. of *trabs*, a beam: see *trave*.] 1. In bot., one of the projections from the cell-wall which extend like a cross-beam or cross-bar nearly or quite across the cell-cavity of the ducts of certain plants, or the plate of cells across the cavity of the sporangium of a moss.—2. pl. In anat., the fibrous cords, layers, or processes of connective tissue which ramify in the substance of various soft organs, as the spleen, kidney, or testicle, conferring upon them greater strength, stability, or consistency.—3. In embryol., one of

a pair of longitudinal cartilaginous bars, at the base of the skull, in advance of the end of the notochord and of the parachordal cartilage, inclosing the pituitary space which afterward becomes the sella turcica; in the human embryo, one of the lateral trabecules of Rathke. They are constant in embryos of a large series of vertebrates, and persistent in adults of some. More fully called *trabecula cranii*. See cuts under *chondrocranium* and *cranium*.

4. One of the calcareous plates or pieces which connect the dorsal and ventral walls of the corona in echinoderms.—5. One of the fleshy columns, or columnæ carnee, in the ventricle of the heart, to which the chordæ tendineæ are attached: more fully called *trabecula carnea*.—6. In entom., one of the pair of movable appendages on the head, just in front of the antennæ, of some mallophagous insects, or bird-lice, as those of the genus *Docophorus*. They have been supposed to represent the rudiments of a second pair of antennæ. Also *trabeculus*.—Rathke's *trabecula*. See def. 3.—*Trabecula carnea*. See def. 5.—*Trabecula cerebri*, the corpus callosum, or trabs cerebri.—*Trabecula cinerea*, the middle, soft, or gray commissure of the cerebrum.—*Trabecula cranii*. See def. 3.—*Trabecula of the spleen*, connective-tissue laminae passing inward from the tunica propria, traversing in all directions the splenic pulp, and supporting it.—*Trabecula tenuis*, a name provisionally applied to a slender and apparently fibrous filament which, in the heart of the cat, spans the right ventricle near its apex, with its septal end springing from an independent little elevation, and its lateral end attached to the base of a columna carnea. *Wilder and Gage, Anat. Tech.*, p. 330.

**trabecular** (trā-bek'ū-lār), *a.* [*< trabecule + -ar*<sup>3</sup>.] Of or pertaining to a trabecula; forming or formed by trabeculae; trabeculate.

**trabecularism** (trā-bek'ū-lār-izm), *n.* [*< trabecular + -ism*.] In anat., a coarse reticulation, or cross-barred condition, of any tissue.

**trabeculate** (trā-bek'ū-lāt), *a.* [*< trabecula + -ate*<sup>1</sup>.] 1. Having a trabecula or trabeculae.—2. In civil engin., having a structure of cross-bars or struts strengthening a shell or tube by connecting opposite sides of its interior; also, noting such a structure.

**trabeculated** (trā-bek'ū-lā-ted), *a.* [*< trabeculate + -ed*<sup>2</sup>.] Same as *trabeculate*.

**trabecule** (trab'e-kūl), *n.* [*< L. trabecula*, dim. of *trabs*, a beam: see *trabecula*.] Same as *trabecula*.

**trabeculus** (trā-bek'ū-lus), *n.*; pl. *trabeculi* (-li). [NL., dim. of *L. trabs*, a beam: see *trave*.] In entom., same as *trabecula*.

**trabs cerebri** (trabz ser'ē-brī). [NL.: *L. trabs*, a beam; *cerebri*, gen. of *cerebrum*, the brain.] The corpus callosum. Also *trabecula cerebri*.

**trace**<sup>1</sup> (trās), *v.*; pret. and pp. *traced*, ppr. *tracing*. [*< ME. tracen*, *< OF. tracer*, *trasser*, delineate, score, trace, also follow, pursue, *F. tracer*, trace, = Sp. *trazar* = Pg. *traçar*, plan, sketch, = It. *tracciare*, trace, devise, *< ML. \*traciare*, delineate, score, trace, freq. of *L. trahere*, pp. *tractus*, draw: see *tract*<sup>1</sup>.] **I. trans.** 1. To draw; delineate; mark out, as on a map, chart, or plan; map out; design; sketch.

The Sea-works and Booms were traced out by Marquis Spinola. *Howell, Letters*, I. v. 6.

We firmly believe that no British government has ever deviated from that line of internal policy which he [Lord Holland] has traced, without detriment to the public. *Macaulay, Lord Holland*.

2. To write, especially by a careful or laborious formation of the letters; form in writing.

Every letter I trace tells me with what rapidity life follows my pen. *Sterne, Tristram Shandy*, ix. 8.

The signature of another plainly appeared to have been traced by a hand shaking with emotion. *Macaulay, Hist. Eng.*, xiv.

Specifically—3. To copy, as a drawing or engraving, by following the lines and marking them on a superimposed sheet, through which they appear.

There is an inscription round the inside of the [bronze] vase, which was traced of, as it is engraved on it, and shews exactly the circumference of the vase. *Pococke, Description of the East*, II. ii. 207.

4. To cover with traced lines, as with writing or tracery. [Rare.]

The deep-set windows, stain'd and traced,  
Would seem slow-flaming crimson fires  
From shadow'd grots of arches interlaced. *Tennyson, Palace of Art*.

And he holds a palm-leaf scroll in his hands,  
Traced with the Prophet's wise commands. *Whittier, The Palm-Tree*.

5. To follow the track, trail, or path of; pursue: a general term, the verbs *track* and *trail* being more specific, as in hunting.

tube, stiffened and held open by a series of many cartilaginous or osseous rings, the first of which is usually specialized (see *tracheid*), and the last one or more of which are variously modified to provide for the forking of the single tracheal tube into a pair of right and left bronchial tubes (see *tracheolus*). Through the lumen the trachea communicates with the mouth and nose and so with the exterior, and through the bronchial tubes with the lungs; and air passes through it at each inspiration and expiration. The trachea exists in all vertebrates which breathe air with lungs, and is subject to comparatively little variation in character. In man the trachea is a cylindrical membranocartilaginous tube about as thick as one's finger, and 4½ inches long, extending from the sixth cervical to the fourth dorsal vertebra where it branches into the bronchi, lying along the front of the spinal column, the esophagus interposing between it and the vertebrae. The thyroid body is saddled upon it. Its structure includes many cartilaginous rings, some white fibrous tissue, yellow elastic tissue, muscular fibers, mucous membrane, and glands, besides nerves and blood-vessels. The tracheal rings (see *ring*) are from sixteen to twenty in number, incomplete in a part of their circumference, being about one third filled in by fibrous tissue. The highly modified first ring, or cricoid, is usually excluded from this association and described as a part of the larynx. Tracheal mucous glands are found in abundance as small flattened oval bodies, with excretory ducts which pierce the fibrous, muscular, and mucous coats to open on the surface of the mucous membrane. The arteries of the trachea are derived from the inferior thyroid; the tracheal veins empty in the thyroid vein; the nerves are from the pneumogastric and recurrent and the sympathetic. The trachea in other mammals resembles that of man. In birds the trachea presents several peculiarities; especially in long-necked birds this organ does not always follow the S-shaped curve of the cervical vertebrae, and requires special contrivance for shortening and lengthening when the neck is bent and straightened. The whole structure is highly elastic, and the rings are peculiarly beveled on opposite sides alternately, so that each one may slip half over another to right and left. In some long-necked birds, as cranes and swans, the windpipe makes large folds or coils in the interior of the breast-bone or under the skin of the breast. The rings are prone to ossify in birds, and some of them are often greatly enlarged in caliber and soldered together into a large gristly or bony capsule, the *tracheal tympanum*, also called *labyrinth*. Besides its intrinsic muscles, the trachea is provided with others which pass to the furculum or sternum, or both. The lower end of the trachea is peculiarly modified in nearly all birds to form the lower larynx, or syrinx. See *syrinx*, 4 (with cut), also cuts under *larynx*, *lung*, and *pesantus*. (b) In *Arthropoda*, as insects, one of the tubes which traverse the body and generally open by stigmata upon the exterior, thus bringing air to the blood and tissues generally, and constituting special respiratory organs. Other forms of respiratory organs in arthropods are branchiae, tracheobranchie, and pulmonary sacs. See *branchia*, 2, *tracheobranchia*, and *pulmonary*, 6. (c) In *conch*, the siphon, or respiratory tube. See *siphon*, n., 2 (a), and cut under *Siphonostomata*.—2. In *bot.*, a duct or vessel; a row or chain of cells that have lost their intervening partitions and have become a single long canal or vessel. They may be covered with various kinds of markings or thickenings, of which the spiral may be taken as the type. See *vessel*.

**Trachea**<sup>2</sup> (trā-kē'ā), n. [NL., < Gr. *τραχία*, fem. of *τραχίς*, rough: see *trachea*<sup>1</sup>.] A notable genus of noctuid moths, containing one species, *T. piniperda*, known to English collectors as the *pine-beauty*. It is a common pest to pine and fir forests in Scotland and through northern and central Europe. The larva is slender, naked, and green, with three white lines on the back and a yellow or red line on the sides, and feeds on the older pine-needles. It passes the winter as pupa on or under the ground. This genus was named by Hubner in 1816.

Pine-beauty (*Trachea piniperda*).

**tracheal** (trā-kē'al), a. [NL. *trachealis*, < *trachea*, windpipe: see *trachea*<sup>1</sup>.] 1. Of or pertaining to the trachea or windpipe: as, *tracheal rings* or *cartilages*; *tracheal vessels*; *tracheal respiration*.—2. In *bot.*, of or pertaining to tracheae.—**Tracheal arteries**, branches of the inferior thyroid ramifying upon the trachea.—**Tracheal gill**. See *gill*, 1.—**Tracheal glands**. See *gland*.—**Tracheal opercula**. See *operculum* (b) (9).—**Tracheal rales**, bubbling sounds caused by the presence of liquid in the trachea, such as may be heard just before death, from the inability of the patient to expectorate, and the death-rattle.—**Tracheal rings**. See *trachea*<sup>1</sup>, 1 (a), and *ring*.—**Tracheal tube**. See *trachea*<sup>1</sup>, 1 (a).—**Tracheal tympanum**. See *trachea*<sup>1</sup>, 1 (a), and *tympanum*.

**trachealis** (trā-kē-ā'lis), n.; pl. *tracheales* (-lēz). [NL. (sc. *muculus*): see *trachea*<sup>1</sup>.] An intrinsic muscle of the windpipe. In man the name is applied to the set of circular or transverse muscular fibers.

**trachean** (trā-kē-an), a. [< *trachea*<sup>1</sup> + -an.] Having tracheae or trachea-like organs: as, a *trachean arachnid*: characterized by breathing through tracheae; as, *trachean respiration*: having the form or functions of tracheae: as, *trachean branchiae*. Also *tracheate* and *tracheary*.

**Trachearia** (trā-kē-ā'ri-ā), n. pl. [NL., neut. pl. of \**trachearius*: see *tracheary*.] The tracheate arachnids, an order of *Arachnida* comprising those which breathe by tracheae alone. It comprises the mites or acarids, the harvestmen or opilionines, the solpugids, and the false scorpions. See *Pulmotrachearia*. Also *Trachearia* and *Tracheata*.

**trachearian** (trā-kē-ā'ri-an), a. and n. [< *Trachearia* + -an.] 1. a. Of or pertaining to the *Trachearia*; tracheate; trachean; tracheary.

II. n. A tracheate arachnid; a tracheary.

**tracheary** (trā-kē-ā-ri), a. and n. [NL. \**trachearius*, < *trachea*, windpipe: see *trachea*<sup>1</sup>.] 1. a. Of or pertaining to the trachea or tracheae; breathing by means of tracheae, not by pulmonary sacs, as an arachnid. Tracheary tissue, in bot., tissue composed of both tracheae and tracheids. Also called *tracheo-kamit*.

II. n. A member of the *Trachearia*.

**Tracheata** (trā-kē-ā'tā), n. pl. [NL., neut. pl. of \**tracheatus*, tracheate: see *tracheate*.] Same as *Trachearia*.

**tracheate** (trā-kē-āt), a. and n. [NL. \**tracheatus*, < *trachea*, windpipe: see *trachea*<sup>1</sup>.] 1. a. Having a trachea or tracheae; pertaining to the *Tracheata* or *Trachearia*; tracheary.

II. n. Any tracheate arthropod; a tracheary.

**tracheated** (trā-kē-ā-ted), a. [< *tracheate* + -ed.] Same as *tracheate*. [Rare.]

The terrestrial tracheated air-breathing Scorpionidae. *Encyc. Brit.*, VI. 651.

**tracheid** (trā-kē'id), n. [< *trachea* + -id<sup>2</sup>.] In bot., a single elongated taper-pointed and more or less lignified cell, usually having upon its surface peculiar markings known as discoid markings or bordered pits, and especially characteristic of the wood of gymnosperms. In a longitudinal radial section of pine wood, for example, the surface of the cells or tracheids presents a dotted appearance, due to the presence of one or more longitudinal series of bordered pits. These bordered pits have the appearance of concentric circles, and are really thin places in the wall of the cell; and in transverse section it may be seen that they are pits with an arched dome, and that the thin spot is common to two contiguous cells.

**tracheidal** (trā-kē'id-al), a. [< *tracheid* + -al.] In bot., pertaining to tracheids, or having their nature.

**tracheitis** (trā-kē-ī'tis), n. [NL.] Same as *tracheitis*.

**trachelalis** (trak-ē-lā'lis), n.; pl. *trachelates* (-lēz). [NL., < Gr. *τραχήλος*, neck, + L. term. -alis (see -al).] A muscle of the back of the neck, commonly called *trachelomastoides*. *Coues*, 1887.

**trachelate** (trak-ē-lāt), a. [NL. \**trachelatus*, < Gr. *τραχήλος*, neck, throat.] In entom., having the form of a neck: said of the prothorax when it is produced anteriorly in a slender neck, as in certain *Hymenoptera*.

**Trachelia**<sup>1</sup> (trā-kē-li-ā), n. pl. [NL., < Gr. *τραχήλος*, neck, throat.] In Latreille's classification of insects, a division of heteromorous *Coleoptera*, including such genera as *Meloë*, *Lytta*, and *Rhipiphorus*: distinguished from *Atrechia*. Also *Trachelida*, *Trachelides*.

**trachelia**<sup>2</sup> (trā-kē-li-ā), n. Plural of *trachelium*.

**tracheliate** (trā-kē-li-āt), a. [< *Trachelia* + -ate.] Of or pertaining to the *Trachelia*: as, a *tracheliate beetle*.

**Trachelida** (trā-kel'i-dā), n. pl. [NL., as *Trachelia* + -ida.] Same as *Trachelia*.

**trachelidan** (trā-kel'i-dan), a. and n. [< *Trachelida* + -an.] 1. a. In entom., having the head narrowed behind into a neck; of or pertaining to the *Trachelia*.

II. n. A trachelidan beetle.

**Tracheliidae** (trak-ē-li'i-dē), n. pl. [NL., < *Trachelia* + -idae.] A family of holotrichous infusorians, whose type-genus is *Trachelius*. These animalcules are free-swimming, ovate or elongate, highly elastic, and ciliate throughout. The oral cilia are slightly larger than those of the general cuticular surface, and the oral aperture is situated at the base of a more attenuate and often trunk-like anterior prolongation (whence the name). Genera besides *Trachelius* are *Amphileptus* and *Loropholium*.

**trachelipod** (trā-kel'i-pod), a. and n. [< *Trachelipoda*.] 1. a. Pertaining to the *Trachelipoda*, or having their characters.

II. n. A member of the *Trachelipoda*.

**Trachelipoda** (trak-ē-lip'ō-dā), n. pl. [NL., irreg. < Gr. *τραχήλος*, neck, + *πῶς* (pod-) = E. foot.] In Lamarck's classification, the third order of mollusks, containing those univalves whose foot is attached to the neck (whence the name), and whose shell is spiral. They were contrasted with his gastropods (see *Gastropoda* (b)). The trachelipods were primarily divided into two series or sections, phytophagous and zoophagous, with many families in each. [Not in use.]

**trachelipodan** (trak-ē-lip'ō-dan), a. [< *trachelipod* + -an.] Same as *trachelipod*.

**trachelipodous** (trak-ē-lip'ō-dus), a. [< *trachelipod* + -ous.] Same as *trachelipod*.

**trachelium** (trā-kē'li-um), n.; pl. *trachelia* (-ā). [NL., < Gr. *τραχήλος*, the neck, throat, the middle part of a column.] 1. In arch., the neck of a column (which see, under *neck*). See cut under *hypotrachelium*.—2. [cap.] [Tournefort, 1700; earlier used by Lobel, 1576.] A genus of gamopetalous plants, of the order *Campanulaceae*. It is distinguished from the type genus *Campanula* by densely corymbose flowers with narrowly tubular corollas slightly three-cleft at the apex. The 4 or 5 species are all natives of the Mediterranean region. They are perennial herbs or undershrubs, with tall stems bearing pinnated corymbs of very numerous blue flowers, or in one species producing numerous short stems with the flower-clusters somewhat umbellate. *T. cæruleum* is cultivated for its flowers, under the name of *throatwort*.

**Trachelius** (trā-kē'li-us), n. [NL. (Sehrank, 1803; Ehrenberg), < Gr. *τραχήλος*, neck.] The typical genus of *Tracheliidae*, having highly vacuolar or reticulate parenchyma. *T. ocum*, which inhabits bogs, is the only well-established species.

**trachelo-acromial** (trā-kē'lō-a-kro'mi-āl), a. and n. [< Gr. *τραχήλος*, neck, + *ἀκρόμιον*, *ἀκρομία*, the point of the shoulder-blade: see *acromial*.] 1. a. Connecting the shoulder-blade with cervical vertebrae, as a muscle; common to the neck and to the acromion.

II. n. The trachelo-acromial muscle.

**trachelo-acromialis** (trā-kē'lō-a-kro'mi-ā'lis), n.; pl. *trachelo-acromiales* (-lēz). [NL.: see *trachelo-acromial*.] The trachelo-acromial muscle. Also called *levator claviculæ* (which see, under *levator*).

**Trachelobranchia** (trā-kē-lō-brang'ki-ā), n. pl. [< Gr. *τραχήλος*, neck, + *βράχια*, gills.] A section of docoglossate gastropods having a cervical gill, consisting only of the *Tecturidae*.

**trachelobranchiate** (trā-kē-lō-brang'ki-āt), a. Having gills on the neck, as certain mollusks; cervicobranchiate; specifically, of or pertaining to the *Trachelobranchia*.

**Trachelocerca** (trā-kē-lō-sér'kā), n. [NL. (Ehrenberg), < Gr. *τραχήλος*, neck, + *κέρκος*, tail.] The typical genus of *Trachelocercidae*, with a conspicuous apical annular groove, terminal mouth, and elastic extensible neck. *T. odor* is the swan-animalcule, so called from the long swan-like neck, and is found in ponds. It was formerly considered a vibrio and called *Vibrio proteus*, *V. odor*, or *V. cynus*. It is one of the infusorians longest known, having been described as a "proteus" by Baker in 1752. The aspect of the animalcule as it swims, alternately contracting and extending the long neck, and swaying it from side to side in search of food, is not unlike that of the bird named, and has also been likened to the supposed action of a plesiosaur.

**Trachelocercidae** (trā-kē-lō-sér'si-dē), n. pl. [NL., < *Trachelocerca* + -idae.] A family of holotrichous ciliate infusorians, typified by the genus *Trachelocerca*. They are free-swimming animalcules, flask-shaped or elongate, with neck-like prolongation and annular apical groove, a soft flexible cuticular surface, specialized oral cilia, and mouth terminal or nearly so.

**tracheloclavicular** (trā-kē'lō-kla-vik'ū-lār), a. [< Gr. *τραχήλος*, neck, + NL. *clavicula*, clavicle: see *clavicular*.] Pertaining or common to the neck and to the collar-bone, as a muscle between them.

**tracheloclavicularis** (trā-kē'lō-kla-vik'ū-lā-ris), n.; pl. *tracheloclavicularis* (-rēz). [NL.: see *tracheloclavicular*.] A small anomalous muscle of man, which sometimes extends from a low cervical vertebra, as the sixth, to some part of the clavicle.

**trachelomastoid** (trā-kē-lō-mas'toid), a. and n. [< Gr. *τραχήλος*, neck, + E. *mastoid*.] 1. a. Connecting the neck with the mastoid process of the temporal bone, as a muscle of the back of the neck.

II. n. The trachelomastoides or trachelalis.

**trachelomastoides** (trā-kē'lō-mas-toi'dēs-us), n.; pl. *trachelomastoides* (-ī). [NL.: see *trachelomastoid*.] The trachelomastoid muscle of the nape of the neck. It lies on the inner side of the transverse colli, between this and the complexus, arises by several tendons from the transverse processes of cervical and some upper dorsal vertebrae, and is inserted into the mastoid beneath the insertions of the splenius and the sternomastoid.

**trachelo-occipital** (trā-kē'lō-ok-sip'i-tal), a. [< Gr. *τραχήλος*, neck, + L. *occiput* (occipit-), occiput: see *occipital*.] Pertaining or common to the nape of the neck and to the hindhead: specifying a muscle of this region, now commonly called *complexus*.

**trachelo-occipitalis** (tră-kê-ô-sip'i-tă-lis), *n.* [NL., < Gr. *trachelo-*, windpipe, + *occipitalis*, occipital, pertaining to the occiput.] In bot., having a tracheo-occipital muscle. See *tracheo-*.

**trachelorraphy** (tră-kê-ô-răp'i), *n.* [Gr. *trachelo-*, windpipe, + *raphē*, sewing.] The operation for restoring a trachea.

**tracheloscapular** (tră-kê-lô-skăp'û-lăr), *a.* [Gr. *trachelo-*, windpipe, + *scapula*, shoulder.] Pertaining to the scapula. In anat., extending from the common to the side of the neck and the scapular region, or the scapular region, and specifying certain veins which connect the two.

**Trachelosperrum** (tră-kê-lô-spér'mum), *n.* [NL., Hayne, 1829, so named when supposed to produce seeds with a distinct neck or break; < Gr. *trachelo-*, a neck, + *spērma*, seed.] A genus of plants, of the order *Apocynaceae*, tribe *Trachelidæ*, and subtribe *Trachelidæ*. It is characterized by seeds without a beak and by loosely cylindrical corolla of regular flowers having a glandular or sticky calyx and a slender-shaped corolla with oblong lobes and a restricted throat. There are 6 Asiatic species, and a seventh in the southern United States. They are shrubby plants with opposite leaves and white flowers. *T. draco* is a native of riverbanks from Virginia to Florida and Texas; it is a climber reaching about 10 feet high, and bearing numerous creamy flowers in spring and summer. *T. chinensis* is the Shanghai jasmine of greenhouses, formerly cultivated under the names *Parachitis* and *Rhynchocarpus*.

**trachenchyma** (tră-keng'ki-mă), *n.* [NL., < Gr. *trachelo-*, windpipe, + *enchyma*, that which is poured in (cf. *enchyma*); see *enchymatous*.] In bot., same as *tracheary tissue*. See *tracheary*.

**tracheobranchia** (tră-kê-ô-brang'ki-ă), *n.*; pl. *tracheobranchiæ* (-i-ă). [NL., < Gr. *trachea*, windpipe, + *branchia*, gills.] A breathing-organ of certain aquatic insect-larvæ, combining the character of a gill with that of an ordinary trachea.

The so-called *Tracheobranchiæ* . . . are in no sense branchiæ but simply take the place of stigmata. *Harley, Anat. Invert.*, p. 221.

**tracheobronchial** (tră-kê-ô-fô-brang'ki-ă), *a.* [Gr. *trachea*, windpipe, + *bronchial*, the bronchial tubes; see *bronchial*.] Pertaining to the trachea and the bronchi: same as *bronchotracheal*.

**tracheoceles** (tră-kê-ô-sel), *n.* [Gr. *trachea*, windpipe, + *kēlē*, tumor.] An enlargement of the thyroid gland; bronchocele or goiter.

**tracheophone** (tră-kê-ô-fô-n), *a.* and *n.* [As *Tracheophones*.] I. *a.* Of or pertaining to the *Tracheophones*.

II. *n.* A bird of the group *Tracheophones*. **Tracheophones** (tră-kê-ô-fô-nēz), *n. pl.* [NL., < Gr. *trachea*, windpipe, + *phōnē*, voice.] In ornith., in Johannes Müller's classification (1847), one of three tribes of an order *Insectores*, containing certain South American families, distinguished by the construction of the syrinx both from the *Polymyidae* and from the *Picari* of the same author. These birds are a part of the formicoid *Passeres* of Wallace, and the name (also and probably in the form *Tracheophones*) has of late more definitely attached to certain South American mesomylid *Passeres*, represented by the very large families *Formicariidae* and *Dendrocephalidae* and their immediate allies.

**tracheophonine** (tră-kê-ô-fô-nin), *a.* [Gr. *trachea*, windpipe, + *phōnē*, voice.] Same as *tracheophone*. *Enop. Brit.*, XXIV, 689, note.

**tracheophonous** (tră-kê-ô-fô-nus), *a.* [Gr. *trachea*, windpipe, + *phōnē*, voice.] Same as *tracheophone*.

**tracheoscopic** (tră-kê-ô-skop'ik), *a.* [Gr. *trachea*, windpipe, + *skopē*, to look at.] Pertaining to or of the nature of tracheoscopy.

**tracheoscopist** (tră-kê-ô-skô-pist), *n.* [Gr. *trachea*, windpipe, + *skopē*, to look at.] One who practises tracheoscopy.

**tracheoscopy** (tră-kê-ô-skô-pi), *n.* [Gr. *trachea*, windpipe, + *skopē*, to look at.] The inspection of the trachea, as with a laryngoscope.

**tracheostenosis** (tră-kê-ô-ste-nô'sis), *n.* [NL., < Gr. *trachea*, windpipe, + *stenosis*, narrowing; see *stenosis*.] Stenosis of the trachea.

**tracheotome** (tră-kê-ô-tô-m), *n.* [Gr. *trachea*, windpipe, + *tomē*, to cut.] A surgical knife used in tracheotomy.

**tracheotomist** (tră-kê-ô-tô-mist), *n.* [Gr. *trachea*, windpipe, + *tomē*, to cut.] One who performs tracheotomy.

**tracheotomize** (tră-kê-ô-tô-miz), *v. t.*; pret. and pp. *tracheotomized*, pp. *tracheotomizing*. [Gr. *trachea*, windpipe, + *tomē*, to cut.] To perform tracheotomy upon. Also spelled *tracheotomise*. *Science*, V, 173.

**tracheotomy** (tră-kê-ô-tô-mi), *n.* [Gr. *trachea*, windpipe, + *tomē*, to cut.] The operation for making an opening into the trachea or windpipe. — **Tracheotomy-tube**, the tube used after tracheotomy for insertion into the opening made in the trachea, to facilitate breathing. Compare *tracheostomy*.

**Trachinidæ** (tră-kin'i-dē), *n. pl.* [NL., < *Trachinus* + *-idæ*.] A family of acanthopterygian fishes, of which the genus *Trachinus* is the type; the weever. They are related to the cottoids or mail-cheeks, and also to the star-gazers, and are noted for the pungency of their opercular and dorsal spines, which, though not connected with special poison-glands, may inflict serious wounds. There are two dorsal fins, the first of which is short and is composed of about six strong pungent spines, the second dorsal and the anal are both long; and the ventrals are in advance of the pectorals, and have a spine and five rays; the body is highest at the nape; the head is compressed, cuboid, with lateral and protrusive eyes, and very oblique cleft of the mouth; and the preorbitals as well as the preoperculars are armed with spines. The family was formerly taken in a more comprehensive sense, then including the members of several other families, as *Uranoscopidae*, *Sillaginidae*, *Notemidae*, etc. As now limited it has but few species, mostly confined to the Mediterranean and Atlantic waters, though one occurs along the coast of Chili. The two British species are justly dreaded, and have many local names alluding to their means of defense, as *adder-fish*, *sea-adder*, *sting-fish*, *stinger-bull*, *stinger*, etc. None are found on North American shores. See cut under *Trachinus*.

**trachinoid** (tră-ki-nôid), *a.* and *n.* [Gr. *trachinus* + *-oid*.] I. *a.* Resembling or related to the weever; having the characters of the *Trachinidæ*; of or pertaining to the *Trachinidæ*.

II. *n.* A trachinoid fish.

**Trachinus** (tră-ki'nus), *n.* [NL. (Linnaeus, 1758), < Gr. *trachis*, rough, rugged.] The typical genus of *Trachinidæ*. *T. draco* is the dragon-

weever; the lesser weever is *T. vipera*. The former is about 12 inches long, the latter 6. **trachitis** (tră-ki'tis), *n.* [NL., more prop. *trachitis*, < *trachea*, the windpipe, + *-itis*.] Inflammation of the trachea or windpipe. — **Pseudomembranous trachitis**. See *pseudomembranous*.

**trachle**, **trachle** (trăch'l, trăch'l), *v. t.* [By some regarded as a perverted form of *draggle*; cf. Gael. *trachladh*, fatigue.] 1. To draggle or bedraggle. — 2. To overburden or fatigue; exhaust or wear out with prolonged exertion. [Scotch in both uses.]

**trachle**, **trachle** (trăch'l, trăch'l), *n.* [See *trachle*, *v.*] A prolonged wearing or exhausting effort, as in walking a long distance or over heavy roads; a heavy pull. [Scotch.]

**trachly** (trăch'li), *a.* [Gr. *trachle* + *-ly*.] Bedraggled; slovenly; dirty. [Scotch.]

**trachoma** (tră-kô'mă), *n.* [NL., < Gr. *trachōma*, roughness, < *trachis*, rough, + *-oma*.] In surg., a granular condition of the conjunctiva of the eyelids, frequently accompanied with haziness and vascularity of the cornea; granular lids: a serious disease, often occurring after purulent ophthalmia. — **Trachoma glands**. See *gland*.

**trachomatous** (tră-kom'a-tus), *a.* [Gr. *trachoma* + *-ous*.] Pertaining to, of the nature of, or affected with trachoma.

**Trachomedusæ** (tră-kô-mê-dû'sê), *n. pl.* An incorrect form of *Trachymedusæ*. Haeckel; E. R. Lankester.

**Trachurops** (tră-kû'rops), *n.* [NL. (Gill, 1862), < *Trachurus* + Gr. *ōps*, face, aspect, appearance, eye.] A genus of carangoid fishes, of fusiform shape, with the hinder part of the lateral line plated, the shoulder-girdle with a deep cross furrow at its junction with the isthmus, and the eye very large. *T. crumenophthalmus* is the big-eyed scad, also called *gogglar* and *goggle-jawed jack* (which see, under *goggle-eyed*).

**Trachurus** (tră-kû'rus), *n.* [NL. (Rafinesque, 1810), < L. *trachurus*, < Gr. *trachyrops*, *trachyrops*, the horse-mackerel, < *trachis*, rough, + *ōps*, tail.] A genus of carangoid fishes, the saurels, having the lateral line armed with bony carinate plates for its whole length. *T. saurus*, also called *scad*, *horse-mackerel*, and *skipjack*, is greenish with silvery sides and a dusky opercular spot, and is a foot long. It inhabits Atlantic waters both of Europe and of the United States. See cut under *scad*.

**trachybasalt** (tră-ki-bă-sălt'), *n.* [Gr. *trachis*, rough, + E. *basalt*.] The name given by Bořický to a variety of basalt. It is dark-gray, very fine-grained, with more or less calcitic and zeolitic matter dispersed through it, and is the latest member of the basaltic formation of Bohemia.

**trachycarpus** (tră-ki-kăr'pus), *a.* [Gr. *trachis*, rough, + *karpos*, fruit.] In bot., having rough fruit.

**Trachycarpus** (tră-ki-kăr'pus), *n.* [NL. (Wendland, 1861), so called with ref. to the woolly fruit of one species; < Gr. *trachis*, rough, + *karpos*, fruit.] A genus of palms, of the tribe *Coryphææ*. It is characterized by polygamously monocious flowers with valvate segments, and an ovary of three distinct acute carpels connate at the base, each with a sessile stigma terminal in fruit. There are 4 species, 2 natives of the mountains of northern India and Burma, one in China, and another in Japan. They are thornless palms, densely clothed above with a fibrous netting remaining from the leaf-sheaths. They bear terminal roundish leaves deeply cut into narrow two-cleft segments, with a biconvex petiole, and entire densely fibrous sheath. The short or elongated numerous robust spadices are densely or loosely flowered, and covered at first by numerous large, compressed, obliquely cut woolly spathes. The flowers are small and yellowish, followed by a roundish fruit with thin fleshy pericarp, and a single erect free seed with equable cornucous albumen. They vary very much in habit. *T. Martiana*, of the Himalayas, produces tall solitary trunks; in others the stems are low and tufted. The fruit is either blue or saffron-colored. The species have been often described under the genus *Chamarops*. *T. exzelus* is known as *hemp-palm*. *T. Fortunei*, the Chinese fan-palm, considered the only palm which is at all hardy in England, is the source in China of a fibrous matting used for cordage, and made into clothing, which is said to be water-proof.

**Trachycephalus** (tră-ki-sêf'ă-lus), *n.* [NL., < Gr. *trachis*, rough, + *kephalē*, head.] A genus of *Hyliidæ*, characterized by the extensive cranial ossifications, which cause the head to seem bare and rough on the upper side. *T. lichenatus* is a species known as the *lichen tree-toad*.

**Trachycomus** (tră-ki-k'ô-mus), *n.* [NL. (Cabanis, 1850), < Gr. *trachis*, rough, + *kōmē*, hair; see *coma*.] A genus of timeline birds of the Oriental region. *T. ochrocephalus* is the yellow-crowned thrush or bulbul, formerly also called *Ceylonese star*, ranging through the Malay peninsula to Java, Sumatra, and Borneo.

**Trachyglossa** (tră-ki-glos'ă), *n. pl.* [NL., < Gr. *trachis*, rough, + *glossa*, tongue.] A primary group of octopods, including all those which have radular teeth: contrasted with *Lioglossa*. It embraces all octopods except the *Cirrotenuthidæ*.

**trachyglossate** (tră-ki-glos'ăt), *a.* and *n.* I. *a.* Having the tongue rough with radular teeth, as an octopod; of or relating to the *Trachyglossa*.

II. *n.* Any member of the *Trachyglossa*.

**Trachylobium** (tră-ki-lô'bi-um), *n.* [NL. (Hayne, 1827), so called with ref. to the rough pods; < Gr. *trachis*, rough, + *lobos*, pod; see *lobe*.] A genus of leguminous plants, of the suborder *Cæsalpinieæ* and tribe *Amherstieæ*. It is characterized by leaves composed of two coriaceous leaflets, and by flowers with caducous bractlets, each with five petals, all stalked, and somewhat equal, or with the two lower ones minute. There are 2 or 3 species, natives of the tropics in eastern Africa and the Mascarene Islands, with one in Asia, there commonly cultivated. They are trees with white flowers panicle at the ends of the branches. See *copal* and *anime*.

**Trachymedusæ** (tră-ki-mê-dû'sê), *n. pl.* [NL., < Gr. *trachis*, rough, + NL. *Medusæ*.] In Haeckel's system of classification, an order of acalephs whose marginal bodies or sense-organs are tentaculicysts, and whose genitals are situated in the course of the radial canals. No hydriform trophosome is known to occur. It is composed of such forms as *Pelagia*, *Trachymedusa*, *Aglaura*, *Liriope*, and *Geryonia* (or *Carnarina*), and corresponds to a part of the *Haplomorphæ* of Carus or of the *Mousses* of Allman.

**trachymedusan** (tră-ki-mê-dû'san), *a.* and *n.* [Gr. *trachis*, rough, + *medusē*, a medusa.] I. *a.* Pertaining to the *Trachymedusæ*, or having their characters.

II. *n.* A member of the *Trachymedusæ*.

**Trachymene** (tră-ki-mê'nē), *n.* [NL. (Rudge, 1811), so called with ref. to the woolly and somewhat moon-shaped fruit; < Gr. *trachis*, rough, + *μήνη*, moon.] A genus of umbelliferous plants, of the tribe *Hydrocotyleæ*. It is distinguished from the related genus *Hydrocotyle* by the absence of stipules. It includes about 14 species, one a native of New Caledonia, and one of Borneo, the others all Australian. They are usually hirsute herbs, with ternately dissected and toothed leaves, and white or blue flowers in simple umbels with linear involucre bracts. The fruit is usually roughened with bristles or tubercles, one of the carpels often smoother or abortive. *T. australis* is known as *Victorian parsnip*.

**Trachynematidæ** (tră-ki-nē-mat'i-dē), *n. pl.* [NL., < *Trachynema* + *-idæ*.] The typical genus (< Gr. *trachis*, rough, + *nēma*, a thread, + *-idæ*). A family of hydromedusans, of the order *Trachymedusæ*, typified by the genus *Trachynema* (or *Circe*), having rigid marginal tentacles, and the genitals developed in vesicles in the eight radial canals. Also *Trachynematidæ*.

**Trachynotus** (tră-ki-nô'tus), *n.* [NL. (Lacépède, 1800), < Gr. *trachis*, rough, + *notos*, back.] A notable genus of carangoid fishes, with short

Lesser Weever (*Trachinus vipera*)

free spines on the back (whence the name); the pompanos. There are several species, highly valued as food-fishes. See *pompano*, 1.

**trachyphonia** (trak-i-fō'ni-ā), *n.* [NL., < Gr. *τραχύφωνος*, roughness of voice, < *τραχύς*, rough-voiced, < *τραχίς*, rough, + *φωνή*, voice.] Roughness of the voice.

**Trachypteridæ** (trak-i-pet'ri-dō), *n. pl.* [NL., < *Trachypterus* + *-ida*.] A family of deep-sea acanthopterygian fishes, typified by the genus *Trachypterus*, of few species, some of which are noted for their fragility. *T. arcticus* is the deep-fish (see cut under *deep-fish*), occasionally stranded on the British coasts. The family has been used with varying limits. In Günther's classification it included the *Regalecidae*, or oar-fishes (see cut under *Regalecidae*), and the *Stoleporidae*. In Gill's it is restricted to teleostomous with the body moderately long and much compressed, the head and opercular apparatus short (the operculum extended downward, the suboperculum below it, the interoperculum contracted backward and bounded behind by the operculum and suboperculum); the ventral fins with few rays in the young and atrophied or lost in the adult; the cranium with a myodome and basisphenoid; the supraoccipital prominent behind; the epioptic confined to the sides and back of the cranium; and no ribs.

**trachypteroid** (trā-kip'te-roid), *a. and n.* [< *Trachypterus* + *-oid*.] *I.* A. Belonging to the *Trachypteridæ*, or having their characters; resembling or related to the king of the salmon.

*II.* *n.* A fish of the family *Trachypteridæ*.

**Trachypterus** (trā-kip'te-rus), *n.* [NL. (Gouan, 1770), < (Gr. *τραχύς*, rough, + *πτερον*, wing (fin).] The leading genus of trachypteroid fishes, characterized by the well-developed ventral fins of from four to six branched rays, and the long fan-shaped caudal fin. (See cut under *deep-fish*.) *T. atrovirens* is known as *king of the salmon* (which see, under *king* 1).

**trachyspermous** (trak-i-spér'mus), *a.* [< Gr. *τραχύς*, rough, + *σπέρμα*, seed.] In bot., having rough seeds; rough-seeded.

**Trachystomata** (trak-i-stō'ma-tā), *n. pl.* [NL., < (Gr. *τραχύς*, rough, + *στόμα*, mouth.) A group of urodele amphibians, of eel-like form and without hind legs, as the *Sirenidae*. The basioccipital, supraoccipital, and supratemporal bones are suppressed; there is no vomer, intercalare, or maxillary arch; and the propodials are distinct. See *Sirenidae*, 1.

**trachyte** (trak'it), *n.* [= F. *trachyte* = G. *trachyt*, < (Gr. *τραχύς*, roughness, < *τραχίς*, rough, rugged.) A volcanic rock exhibiting a characteristic roughness when handled. At present it is sought to limit the term to rocks composed essentially of sanidine, with more or less trichinic feldspar; hornblende, biotite, and magnetite are also frequently present in greater or less quantity. Much of the rock of the Cordilleras, formerly called trachyte, is now considered by lithologists to belong more properly among the andesites. — *Greenstone-trachyte*. Same as *propolite*. **Quartz-trachyte**, a rock distinguished from trachyte by the presence of quartz. As used by most lithologists, the same as *liparite* or *quartz-rhyolite*.

**trachyte-tuff** (trak'it-tuf), *n.* A fragmentary eruptive rock made up of trachytic material. See *tuff* 3 and *trachyte*.

Like the other fragmentary volcanic rocks, the tuffs may be subdivided according to the lava from the disintegration of which they have been formed. Thus we have felsite-tuffs, *trachyte-tuffs*, basalt-tuffs, pumice-tuffs, porphyrite-tuffs, etc. Geikie, Text Book of Geol., 2d ed., p. 166.

**trachytic** (trā-kit'ik), *a.* [< *trachyte* + *-ic*.] Pertaining to or consisting of trachyte.

**trachytoid** (trak'i-toid), *a.* [< *trachyte* + *-oid*.] Belonging to or having the characters of trachyte. **Trachytoid structure** (as used by Fouqué and Michel-Lévy, in describing the eruptive rocks), a type of structure in which an amorphous magma is present, with the usual evidences of fluxion, while at the same time there is a more distinct indication of two epochs or stages of crystallization than there is in the granitoid structure as this latter term is limited by these authors.

**tracing** (trā'sing), *n.* [Verbal *n.* of *trace* 1, *v.*] 1. The act of one who traces.—2. A track or path; a course.

Not all those precious gems in Heav'n above  
Shall yield a sight more pleasing to behold,  
With all their turns and tracings manifold.  
Sir J. Davies, Dancing, st. 13.

3. A mechanical copy of a design or drawing, made by reproducing its lines as seen through a transparent medium, as tracing-paper.

**tracing-cloth** (trā'sing-klōth), *n.* A smooth thin linen fabric, coated with size, used for making tracings of drawings, plans, etc., as less destructible than tracing-paper. Also called *tracing-linen*.

**tracing-instrument** (trā'sing-in'strō-ment), *n.* An instrument of any kind used to facilitate tracing, or to make by tracing an enlarged or a reduced copy. See *tracer* (g), and cut under *photograph*.

**tracing-linen** (trā'sing-lin'en), *n.* Same as *tracing-cloth*.

**tracing-lines** (trā'sing-līnz), *n. pl.* Naut., lines in a ship passing through a block or thimble, and used to hoist a thing higher.

**tracing-machine** (trā'sing-mā-shēn), *n.* Same as *tracer* (g).

**tracing-paper** (trā'sing-pā-pēr), *n.* 1. See *paper*, —2. Same as *transfer paper*, 1.

**tracing-thread** (trā'sing-thred), *n.* In lace-making: (a) A bordering thread thicker than most of the threads of the fabric, usually indicating the pattern. (b) A group or cluster of threads used for such bordering. Compare *trolley-thread* (under *trolley*), and *Mechten lace* (under *lace*).

**tracing-wheel** (trā'sing-hwēl), *n.* A wheel used as a tracer; especially, a small toothed wheel attached to a handle by which it is run over a surface to mark a pattern in dotted lines.

**track** 1 (trak), *v. t.* [A var., prob. due to association with the noun *track*, of *track* (as in *track-pot*), or *trick* (see *trick* 3, draw), < MD. *trecken*, D. *trekken*, draw, pull, tow, delineate, sketch, also intr., travel, march, = OFries. *treka*, *tregga* = MLG. *trecken*, LG. *trekken* = MHG. G. *trecken*, draw, a secondary form of a strong verb seen in OHG. *trehhan*, MHG. *trechen*, draw, shove, scrape, rake. The L. *trahere*, draw (whence ult. E. *tract* 1, *tract* 1), is a different word. Cf. *track* 2, *n.* and *v.*] 1. To draw; specifically, to draw or tow (a boat) by a line reaching from the vessel to the bank or shore.—2. To draw out; protract; delay.

Yet by delays the matter was always tracked, and put over without any fruitful determination.  
Styrie, Eccles. Mem., Hen. VIII., Originals No. 13.

**track** 1 (trak), *n.* [< MD. *treck*, *treke*, D. *trek*, a drawing, train, delineation, feature; from the verb: see *track* 1, *v.* Cf. *track* 2, *n.*, and *tract* 1, *n.*, 6, with which *track* 1 is confused, and to which it may be in part or wholly due (so *track* 3 for *tract* 1). Cf. *trick* 2, *n.*] A feature; lineament. [Scotch.]

**track** 2 (trak), *n.* [Formerly also *tract* (by confusion with *tract* 1); < OF. *trac*, a track, trace, a beaten way or path, a course, F. *trac*, track, < MD. *treck*, *treke*, a drawing, draft, delineation, feature, train, procession, a line or flourish with a pen, a sketch, D. *trek*, a draft, feature, expedition, = MLG. *trek*, draft, expedition: see *track* 1, *n.* (the same word derived directly from the D.), and *track* 1, *v.* See also *trek*. For the relation of *track* 2 to *track* 1, draw, cf. that of *tract* 1, 'track,' to *tract* 1, 'draw.' 1. A mark left by something that has passed along: as, the *track* of a ship (a wake); the *track* of a wagon (a rut).

The weary sun, . . .  
 . . . by the bright track of his fiery car,  
Gives signal of a goodly day to-morrow.  
Shak., Rich. III., v. 3. 20.

Thou dost cleave, with thy keen Fauchins force,  
The Bards and Breast-plate of a furious Horse,  
No sooner hurt, but he recoyleth back,  
Writing his Fortune in a bloody track.  
Sylvester, tr. of Du Bartas's Weeks, ii., The Vocation.

2. A mark or an impression left by the foot, whether of man or beast; a footprint; specifically, in *paleontol.*, an ichnite or ichnolite; a fossil footprint, or cast of an extinct animal's foot. Compare *tract* 1, 1, and *trail* 1, 2.

Consider the atmosphere, and the exterior frame and face of the globe, if we may find any tracks and footsteps of wisdom in the constitution of them.  
Bentley, Works, I. viii. § 8.

3. A road; a path; a trail.

Behold Torquatus the same track pursue.  
Dryden, Æneid, vi. 1130.

Up through that wood behind the church  
There leads from Edward's door  
A mossy track, all over-boughed  
For half a mile or more. Coleridge, Three Graves.

We all shrink, like cowards, from new duties, new responsibilities. We do not venture to go out of the beaten track of our daily life. J. F. Clarke, Self-Culture, p. 340.

4. A course followed; a way of going or proceeding: as, the *track* of a comet.

Thy Fancy like a Flame its way does make,  
And leaves bright Tracks for following Pens to take.  
Cowley, To Sir W. Davenant.

If straight thy track, or if oblique,  
Thou know'st not. Tennyson, Two Voices.

5. The course or path laid out for horse-, foot-, bicycle-, or other races: as, a cinder *track*; a *track* of six laps to the mile.—6. The two continuous lines of rails on which railway-cars run, forming, together with the ties, ballast, switches, etc., an essential part of the permanent way: as, a single *track*; a double *track*; to cross the *track*. See cut under *switch*.—7. In

*anat.*, the course of a vessel, nerve, duct, etc.—

Silly Wormes in *tract of time* overthrew. . . . statelye Townes.

A lifelong *tract of time* revealed.

2. Course or route; track; way.

Understanding, by reason of the sphere, that if I shulde sayle by the way of the northwest wynde I shulde by a shorter *tracte* come to India, I thereupon caused the kyng to bee advertised of my devise.

3. Course or movement; action.

The whole *tract* of a Comedy shoulde be full of delight, as the Tragedy shoulde be still maintained in a well raised admiration.

4. Attractive influence; attraction; charm.

But I am taken! the fine *tract* of it  
Pulls me along! to hear men such professors  
Grown in our subtil sciences!

5. Extent; expanse; hence, a region of indefinite extent; a more or less extended area or stretch of land or water: as, a *tract* of woodland.

All this *tract* of the Alpes . . . was heretofore called Alpes Coctias.

6. Trait; lineament; feature.

The discovery of a man's self by the *tracts* of his countenance is a great weakness and betraying.

7. In *anat.*, an area or expanse; the extension of an organ or a system: as, the digestive or alimentary *tract*; the optic *tract*. Also called *tractus* (which see).—8. In *ornith.*, a pteryla, or feathered place: distinguished from *space*.

The former places are called *tracts* or pteryla.

9. In *her.*, same as *trassure*.—Anterolateral ascending tract, a somewhat comma-shaped tract occupying the periphery of the anterolateral column of the spinal cord, extending from the anterior extremity of the cerebellar tract nearly or quite to the anterior roots. The fibers are of medium size, and degenerate upward. Also called *tract of Gowers*.—Anterolateral descending tract, a tract of white fibers in the anterolateral column of the spinal cord, bordering the anterolateral ascending tract on its inner side, and extending from the crossed pyramidal tract nearly or quite to the anterior fissure. It is marked by many fibers which degenerate downward, but these are so mingled with other fibers that it is far from being a pure tract. See cut under *spinal*.—Cerebellar tract, a tract in the lateral column of the spinal cord and medulla, extending from the lumbar enlargement of the cord to the superior vermiciform process of the cerebellum.—Ciliated tracts. See *ciliate*.—Descending comma tract, a somewhat comma-shaped group of fibers in the central section of the external posterior column of the spinal cord, which degenerates downward for a short distance. It has been made out only in the cervical and upper thoracic regions.—Direct cerebellar tract. Same as *cerebellar tract*.—Intermediolateral tract, the so-called lateral gray cornu of the spinal cord, most conspicuous in the thoracic region. See cut under *spinal*.—Lissauer's tract, a small tract of fine nerve-fibers lying at the tip of the posterior gray cornu of the spinal cord, formed by the ascending fibers of the lateral sections of the lateral bundles of the posterior roots of the spinal nerves, which appear thus to pass upward for some distance before they terminate in the posterior gray cornu. Also called *posterior marginal tract* or *zone*, or *Lissauer's zone*. See cut under *spinal*.—Olfactory tract, the rhinencephalon, or olfactory process of the prosencephalon, especially when, as in man and the higher vertebrates, it is comparatively small and of simple hand-like character, whence it is also erroneously called *olfactory tract*.—Optic tract. See *optic tract*.—Peduncular tract. Same as *pyramidal tract*.—Posterior marginal tract. Same as *Lissauer's tract*.—Powder-down tracts. See *powder-down*.—Pyramidal tract. See *pyramidal*.—Respiratory tract. (a) The middle column of the spinal marrow, whence, according to Sir Charles Bell, the respiratory nerves originate. (b) The air-passages collectively.—Semilunar tract, a tract of white fibers, in the lateral part of the cerebellar hemisphere, of unde-

terminated connections.—Tract of Gowers, the anterolateral ascending tract (which see, above).

**tract** (trak't), *v. t.* [*L. tractare*, handle, treat, freq. of *trahere*, draw: see *treat*, and cf. *tract*.] 1. To handle; treat.

His religious opinions, . . . said the clergyman, were those of a sound Churchman; by which he meant, I rather suspect, that he was a pretty smart *tractarian*.

His religious opinions, . . . said the clergyman, were those of a sound Churchman; by which he meant, I rather suspect, that he was a pretty smart *tractarian*.

A reaction begins in England with Wesley. It is seen in the Evangelical movement, still more in the *Tractarians*, who strive after the re-creation of the church as a living organism and the absorption of the individual in it.

Westminster Rev., CXXV, 225.

**Tractarianism** (trak-tā'ri-an-izm), *n.* [*Tractaturum* + *-ism*.] A system of religious opinion and practice promulgated within the Church of England in a series of papers entitled "Tracts for the Times," published at Oxford between 1833 and 1841. The movement began as a counter-movement to the liberalizing tendency in ecclesiasticism and the rationalizing tendency in theology, and was in its inception an endeavor to bring the church back to the principles of primitive and patristic Christianity. Its fundamental principles were that the Christian religion involves certain well-defined theological dogmas, and a visible church with sacraments and rites and definite religious teaching on the foundation of dogma, and that this visible church is based upon and involves an unbroken line of episcopal succession from the apostles, and includes the Anglican church. The tracts consisted of extracts from the high-church divines of the seventeenth century and the church fathers, with contributions by Newman, Froude, Pusey, and Isaac Williams. In the last of the series, tract No. 90, Dr. (afterwards cardinal) Newman took the ground that the Thirty-nine Articles of the Church of England are in large part susceptible of an interpretation not inconsistent with the doctrines of the Council of Trent. This tract was condemned by a number of bishops and heads of colleges, and a part of the Tractarians (among them Newman in 1845) entered the Church of Rome, others remaining with Dr. Pusey and John Keble in the Church of England, and maintaining the principles of sacramental efficacy and apostolic authority within that communion.

**tractate** (trak'tāt), *n.* [Formerly also *tractat*; = *D. tractatus* = *G. tractatus* = *Sw. Dan. tractat*, < *L. tractatus*, a treatise, eccl. a homily, a handling, treatment, < *tractare*, handle, treat: see *tract<sup>2</sup>*, *treat*, and cf. *tract<sup>3</sup>*.] A treatise; a tract.

I presumed to allege this excellent writing of your majesty as a prime or excellent example of *tractates* concerning special and respective duties.

Bacon, Advancement of Learning, ii.

Needlesse tractats stuff't with specious names.

Milton, Prelatical Episcopacy.

**tractation** (trak-tā'shən), *n.* [*L. tractatio(n)-*, management, treatment, < *tractare*, manage, treat: see *tract<sup>2</sup>*, *treat*.] Treatment or handling of a subject; discussion.

The journey they make us take through fire and water requires a more punctual *tractation* than your patience will now admit.

Rev. T. Adams, Works, I, 88.

**tractator** (trak-tā'tor), *n.* [*L. tractor*, a handler, a treator, < *tractare*, handle, treat: see *tract<sup>2</sup>*, *treat*.] A writer of tracts; specifically [*cap.*], one of the writers of the "Tracts for the Times"; a Tractarian. [Rare.]

**tractellate** (trak'te-lāt), *n.* [*L. tractellum* + *-ate<sup>1</sup>*.] Having a tractellum, as an infusorian.

**tractellum** (trak-tel'um), *n.*; pl. *tractella* (-ā). [NL., dim. < *L. tractus*, a tract: see *tract<sup>1</sup>*.] The anterior vibratile flagellum of a biflagellate infusorian, used for locomotion: correlated with *gubernaculum*.

**tractile** (trak'til), *a.* [*L. \*tractilis*, < *trahere*, pp. *tractus*, draw, drag: see *tract<sup>1</sup>*.] Capable of being drawn out in length; ductile.

The consistencies of bodies are very divers; . . . *tractile* or to be drawn forth in length, *intractile*.

Bacon, Nat. Hist., § 339.

**tractility** (trak-til'i-ti), *n.* [*L. tractile* + *-ity*.] The property of being *tractile*.

Silver, whose ductility and *tractility* are much inferior to those of gold.

Derham.

**traction** (trak'shən), *n.* [= *F. traction* = *Sp. tracción* = *Pg. tracção* = *It. trazione*, < *ML. \*traction* (*n.*), a drawing, < *L. trahere*, pp. *tractus*, draw, drag: see *tract<sup>1</sup>*.] 1. The act of drawing, or the state of being drawn; specifically, in *physiol.*, contraction, as of a muscle.—2. The act of drawing a body along a surface, as over water or on a railway. The power exerted in order to produce the effect is called the *force of traction*. The line in which the force of traction acts is called the *line of traction*, and the angle which this line makes with the plane along which a body is drawn by the force of traction is called the *angle of traction*.

3. Attraction; attractive power or influence.

He (Macheth) feels the resistless *traction* of fate, sees himself on the verge of an abyss, and his brain is filled with phantoms.

Welsh, Eng. Lit., I, 384.

4. The adhesive friction of a body or object, as of a wheel on a rail or a rope on a pulley. *E. H. Knight*.—5. An action the negative of pressure.—*Line of traction*. (a) See def. 2. (b) In *physiol.*, the axis or direction of the tractive action of a muscle; the line in which a muscle contracts.

**tractional** (trak'shən-əl), *a.* [*L. traction* + *-al*.] Of or pertaining to traction.

**traction-aneurism** (trak'shən-an'ū-rizm), *n.* An aneurism produced by traction on the wall of the vessel, as by the ductus Botalli on the wall of the aorta.

**traction-engine** (trak'shən-en'jin), *n.* A movable steam-engine used for dragging heavy loads.

7. driving wheels with V-shaped flanges on their rims to prevent slipping. 8. gear wheel keyed to the shaft of the driving wheels, and receiving motion through intermediate gearing from the engine. 9. horizontal shaft of the boiler. 10. This driving gear may be made to reverse its motion by a link-motion controlled by the lever *e*. The steam-dome and smoke-stack are shown at *f* and *g*. When it is desired to use the steam-power for driving other machinery, the traction-wheels may be run out of gear, and the power taken off by a belt from the fly-wheel *h*. The engine stands on a step *j*, and through a hand-wheel keyed to the shaft *k* steers the machine when it is moved from place to place, the steering-mechanism consisting of the worm-gearing *m* which turns the winding-shaft *l*, and the chain *n* linked to the opposite ends of the axle of the wheels *p*, this axle being swiveled to a bracket on the under side of the boiler. The turning of the shaft *l* lengthens the chain-connection on one side while shortening it on the other, thus turning the axle of the wheels *p* on its center, after the manner in which the front wheels of vehicles are turned in changing their direction.

on common roads, as distinguished from *locomotive engine*, used on a railway.

**traction-gearing** (trak'shən-gēr'ing), *n.* A mechanical arrangement for utilizing the force of friction or adhesion by causing it to turn a wheel and its shaft.

**traction-wheel** (trak'shən-hwēl), *n.* A wheel which draws or impels a vehicle, as the driving-wheel of a locomotive. Power is applied to the wheel, and its frictional adhesion to the surface on which it bears is the direct agent of progression. *E. H. Knight*.

**Tractite** (trak'tit), *n.* [*L. tract<sup>3</sup>* + *-ite<sup>2</sup>*.] Same as *Tractarian*. *Imp. Dict.*

**tractitious** (trak-tish'us), *a.* [*L. trahere*, pp. *tractus*, draw (see *tract<sup>2</sup>*), + *-itious*.] Treating; handling. [Rare.] *Imp. Dict.*

**tractive** (trak'tiv), *a.* [= *F. tractif*, < *L. tractus*, pp. of *trahere*, draw: see *tract<sup>1</sup>*.] Tractive; drawing; needed or used in drawing.

In any plexus of forces whatever, the resultant of all the *tractive* forces involved will be the line of greatest traction.

J. Fiske, Cosmic Philos., I, 293.

**tractlet** (trak'tlet), *n.* [*L. tract<sup>3</sup>* + *-let*.] A small tract.

**tractor** (trak'tor), *n.* [*NL. tractor*, < *L. trahere*, pp. *tractus*, draw, drag: see *tract<sup>1</sup>*.] That which draws or is used for drawing; specifically, in the plural, metallic tractors. See the phrase.

What varied wonders tempt us as they pass!

The cowpox, tractors, galvanism, and gas.

Byron, Eng. Bards and Scotch Reviewers.

**Metallic tractors**, a pair of small pointed bars, one of brass and the other of steel, which, by being drawn over diseased parts of the body, were supposed to give relief through the agency of electricity or magnetism. They were devised by Dr. Perkins, and were much in vogue about the beginning of the nineteenth century, but have long been disused. Also called *Perkins's tractors*.

**tractionation** (trak-tō-rā'shən), *n.* [*L. tractor* + *-ation*.] The employment of metallic tractors for the cure of diseases. See *tractor*.

Homoeopathy has not died out so rapidly as *Tractoration*.

O. W. Holmes, Med. Essays, Pref.

**tractory** (trak'tō-ri), *n.*; pl. *tractories* (-riz). [NL. *\*tractorius*, < *L. trahere*, pp. *tractus*, draw: see *tract<sup>1</sup>*.] A tractor.

**tractrix** (trak'triks), *n.* [NL., fem. of *tractor*.] A transcendental curve invented by Christian Huygens (1629-95), the property of which is that the distances along the different tangents from the points of contact to the intersections of a certain line are all equal. It is the evolute of the catenary.

The definition above given is that now usual, and implies four branches, as shown in the figure. But the original definition is that it is the locus of the center of gyration of a rod of which the end is drawn along a straight line, without any effect of momentum. So defined, the curve is confined to one side of the asymptote, and so it is usually drawn. Also *tractatrix*. Compare cut under *symptractrix*.

**tractus** (trak'tus), *n.*; pl. *tractus*. [NL., < *L. tractus*, a tract: see *tract<sup>2</sup>*, *tract<sup>3</sup>*.] 1. Same as *tract<sup>1</sup>*, 7.—2. Same as *tract<sup>3</sup>*, 2. *Tractus intermediolateralis*, the lateral cornu of the spinal cord

with the cells contained in it. See cut under *spinal cord*.—**Tractus intestinalis**, the intestinal tract, or alimentary canal; the whole intestine from mouth to anus. See cuts under *alimentary* and *intestine*.—**Tractus opticus**, the optic tract, the band of white nerve-tissue which arises from the diencephalon, and forms a chiasm with its fellow in front of the tuber cinereum. See *optic*.—**Tractus spiralis foraminulentus**, a shallow spiral furrow in the center of the base of the bony cochlea, exhibiting groups of foramina through which the filaments of the cochlear nerves pass.

**tradit.** A Middle English preterit of *tread*.

**trade<sup>1</sup>** (trād), *n.* and *a.* [A later form, due partly to association with the related noun *tread* and the orig. verb *tread*, of early mod. *E. trode*, *trod*, < *ME. trod*, footstep, track, < *AS. trod*, footstep, < *tredan* (pret. *træd*, pp. *treden*), step, tread: see *tread*, *v.*, and cf. *tread*, *n.*, *trod*, *trode*. The appar. irregularity of the form (the reg. form is *trode* or *trod*, as still in dial. use) and the deflection of sense (from the obs. senses 'track, path', etc., to the present usual senses, 'business, commerce, exchange') have obscured the etymology, suggesting an origin from or a confusion with *F. traite*, trade, *Sp. trato*, treatment, intercourse, communication, traffic, trade, etc.: see *trait*, *tract<sup>2</sup>*.] **I. n. 1<sup>st</sup>**. A footstep; track; trail.

Streight gan he him revyle, and bitter rate,  
As Shepheardes curre, that in darke eveninges shade  
Hath treadt forth some salvage beastes trade.

Spenser, F. Q., II, vi. 39.

**2<sup>nd</sup>**. Path; way; course.

A postern with a blind wicket there was,  
A common *trade* to passe through Priam's house.

Surrey, Aeneid, ii, 587.

By reason of their knowledge of the law, and of the autoritee of being in the right *trade* of religion

J. Calhoun, On Luke xix.

You were advised . . . that his forward spirit  
Would lift him where most trade of danger ranged.

Shak., 2 Hen. IV., i, 1. 174.

**3<sup>rd</sup>**. The bearing part of the felly of a wheel; the tread of a wheel.

The utter part of the wheele, called the *trade*.  
Withals' Dict. (ed. 1608), p. 79. (Nares.)

**4<sup>th</sup>**. Course of action or effort.

Long did I love this lady;  
Long my travail, long my *trade* to win her.

Fletcher and Massinger, A Very Woman, iv, 3.

**5<sup>th</sup>**. Way of life; customary mode or course of action; habit or manner of life; habit; custom; practice.

In whose behaviors lyeth in effect the whole course and *trade* of mans life, and therefore tended altogether to the good amendment of man by discipline and example.

Puttenham, Arte of Eng. Poesie, p. 25.

The ancient *trade* of this realm in education of youth . . . was to yoke the same with the fear of God, in teaching the same to use prayer morning and evening, . . . to make besynesse to the magistrats.

Huggard, Displaying of the Protestants, p. 85. (Davies, under *besynesse*.)

Thy sin's not accidental, but a *trade*,  
Shak., M. for M., iii, 1. 149.

**6. Business pursued; occupation.**

The Spaniards dwell with their families, and exercise divers manuary *trades*.

Coryat, Crudities, I, 122.

Thy trade to me tell, and where thou dost dwell.  
Robin Hood and the Butcher (Child's Ballads, V, 33).

Begging is a *trade* unknown in this empire.

Swift, Gulliver's Travels, i, 6.

**7. Specifically, the craft or business which a person has learned and which he carries on as a means of livelihood or for profit; occupation; particularly, a handicraft, as distinguished from one of the liberal arts or of the learned professions, and from agriculture. Thus, we speak of the *trade* of a smith, of a carpenter, or of a mason; but not of the *trade* of a farmer or of a lawyer or physician.**

We abound in quacks of every *trade*.

Crabbe, (Imp. Dict.)

**8. The exchange of commodities for other commodities or for money; the business of buying and selling; dealing by way of sale or exchange; commerce; traffic. Trade** comprehends every species of exchange or dealing, either in the produce of land, in manufactures, or in bills or money. It is, however, chiefly used to denote the barter or purchase and sale of goods, wares, and merchandise, either by wholesale or by retail. Trade is either *foreign* or *domestic*. *Foreign trade* consists in the exportation and importation of goods, or the exchange of the commodities of different countries. *Domestic or home trade* is the exchange or buying and selling of goods within a country. Trade is also *wholesale* (that is, by the package or in large quantities) or it is by *retail*, or in small parcels. The *carrying-trade* is that of transporting commodities from one country to another by water.

Let this therefore assure you of our loves, and every year our friendly *trade* shall furnish you with Corne.

Quoted in Capt. John Smith's Works, I, 209.

But I have been informed that the *trade* to England is sunk, and that the greatest export now is to France.

Pococke, Description of the East, II, ii. 90.

9. The *trade* is connected to the same occupation as the *book trade*.

10. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

11. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

12. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

13. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

14. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

15. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

16. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

17. A *trade* is a business, a profession, a calling, a vocation, a *trade*.

18. A *trade* is a business, a profession, a calling, a vocation, a *trade*.
